Hi Al,

I use the same applet for a few days and I experiment the same problem
(with IE 5 or 5.5). I ask him for some suggestions but haven't answer
yet.

Howdy, folks.

This message is about my ham radio resource for those who have WIRELESS access to WML pages. In otherwords, if you have a cellphone or pda that can read WML (like an Ericsson or Nokia, and so forth), or, you use Opera (the Webbrowser), then you can access the special format of the radio pages at http://wap.hfradio.org/ - if you browse that page with a normal webbrowser (say, Netscape or MSIE), you will be redirected to the normal HTML pages at http://hfradio.org

With that said:

I've added a large number of additional DX Cluster pages - spots by band, by special interest (IOTA, Mobile, QRP, and so on), announcements and wwv reports. These WML pages are NOT on my normal site (since they are from the DX Summit site). These pages are an interface for WIRELESS browsers to the DX Summit pages. If you are a wireless device user (cellphone, pda) that can browse WML pages, check out

http://wap.hfradio.org/

There are more resources than just the DX Cluster, by the way. I also provide live propagation data, forecasts, and related information.

I'd love to hear how the WML works on your cellphone or other WML device. I have tried to create pages that render well on all versions, and so forth.

Enjoy.

Amateur Radio Newsline™ Report 1311 – September 27, 2002

Amateur Radio Newsline report number 1311 with a release date of Friday, September 27th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Unlicensed stations invade the low end of 20 meters and a tower finding in California highlight this weeks Amateur Radio Newsline report number 1311 coming your way right now.

(Billboard Cart Here)

**

INTRUDER WATCH: WORLDWIDE QRM FROM INDONESIA

Unlicensed stations allegedly operating from Indonesia are causing havoc to the D-X beacon monitoring system on 20 meters. Its interference being heard around the world as we hear from Q-News Graham Kemp, VK4BB:

--
The presence of Indonesian non amateur groups on the various amateur band frequencies in the 40 and 20 meter bands is causing severe concern for all the amateurs of Region 3 and the world over. While they use amateur radio frequencies for their regular communications, you will never miss the many calls for Prayers and the many jokes and Kookaburra pattern of laughing with old men and young ladies together.

The 40 meter band has several channels of 5 kHz intervals from the lower edge and these stations have their breeding grounds here. They graduate to other frequencies and move to 20 meter band, where they are on either side of the International Beacon frequency of 14100 kHz. Many of us in Region 3, cannot monitor any NCDXF/IARU beacons on this frequency.

Even though this QRM from Indonesians has been reported month after month to telecommunications authorities, so far nothing seems to be happening get them off the air.
--

If you hear this QRM, please report it to your nations Intruder Watch coordinator.
(Q-News)

**

RADIO LAW: COURT RULES CITY CANNOT RESTRICT BUSINESS ANTENNA USE

A California Court of Appeals has ruled that a city cannot regulate the type of transmissions that an FCC license holder can broadcast. It also says that a

city ordinance that prohibited a license holder from broadcasting commercially is preempted by federal law. Amateur Radio Newsline’s Bruce Tennant, K6PZW, says what the city of Rancho Palos Verdes was trying to write its own rules on this one:

--
Mark Abrams, WA6DPB, lives in Rancho Palos Verdes California. He is an amateur radio operator and with city approval, Abrams built a 40-foot antenna and 52-foot antenna in the backyard of his home. The city’s approval of the towers was contingent on their use being limited to non-commercial applications only. Abrams is also the owner of a business that sells and services two-way radio equipment and holds 76 licenses issued by the FCC which permitted the use of his antennas for commercial purposes.
--
Abrams: Audio Onlt at www.arnewsline.org.
--

Abrams says that he never used the two city-approved towers to receive or transmit on frequencies for commercial use. Instead, he used portable antennas mounted on tripods in his backyard and on a mobile tower trailer which he parked in his side yard.

But in 1998 and 1999, the City of Rancho Palos Verdes monitored radio transmissions from Abrams's property and detected the commercial use of frequencies. The City stated that these transmissions were in violation of an ordinance that required FCC licensees to obtain a conditional use permit from the city's planning commission to operate commercially.

--
Abrams: Audio only at www.arnewsline.org
--

The City of Rancho Palos Verdes and State of California filed an action seeking an injunction to bar Abrams from, among other things, operating his antennas for commercial purposes. Abrams answered the complaint and filed a cross-complaint of his own. It he claimed that federal law preempted the City's ordinance because it prohibited the use of frequencies allocated to him and his customers by the FCC.

--
Abrams: Audio only at www.arnewsline.org
--

The court says that he can use his antennas for commercial purposes without a city permit. It says that federal law preempts the City's ordinance banning such use because the Rancho Palos Verdes requirement that Abrams obtain a permit to transmit a commercial broadcast was preempted by federal regulation. It says that Abrams's FCC licenses enable him to operate commercially on certain frequencies and the City of Rancho Palos Verdes limitation on his rights are in conflict with federal law. And that’s good news for WA6DPB.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

The Court concluded the City does hold zoning authority, but such authority is limited to the placement, construction, and modification of facilities used for commercial mobile radio services only. (ARNewsline™)

**
RADIO RULES: UPDATE ON NTIA VS. PROPOSED 5 MHZ HAM BAND

Some good news concerning the National Telecommunications and Information Administration opposition to a new Amateur service allocation at 5 Mhz. This from ARRL President Jim Haynie, W5JBP, and General Counsel Chris Imlay, W3KD who say that they are now optimistic about reaching a resolution to issues that could otherwise block plans for the band.

The two met with representatives of the government agency to discuss the NTIA concerns. Haynie says that they came away with a feeling that the NTIA was willing to work with the ARRL to resolve concerns. Until surprise opposition surfaced the FCC appeared to have put ARRL's request for a new, domestic-only, secondary amateur allocation at 60 meters on the political fast track. (ARRL Bulletin)

**

**
RESCUE RADIO: HURRICANE ISADORE STRIKS

On Tuesday, September 24th, the FCC declared that a general communications emergency existed for Alabama, Florida, Louisiana, Mississippi, and Texas. This as hurricane Isadore approached the region.

The declaration requires amateurs not use 3.873 MHz during hours of darkness and 7.285 MHz during daylight. Both frequencies are to be protected plus or minus 3 kHz. Only amateurs taking part in the handling of emergency traffic are to use these 6 kilohertz slots.

The FCC said the communications emergency could last as long as 14 days but it actually remains in force until its rescinded. Keep an eye on the ARRL website newspages for ongoing updates on ham radio involvement in this emergency. Its in cyberspace at www.arl.org (From ARRL bulletin.)

**

HAM RADIO IN SPACE: V-U-SAT’S MESSAGES FROM ORBIT

A new ham radio satellite to be launched by India wants to carry your message. This, according to VU2NUD who is the coordinator for Amsat-India.

VU2NUD says that V-U-SAT will carry a beacon system with the ability to play back pre recorded messages on command. They will be transmitted in F-M voice

for all the world to hear and your words could be among those it broadcasts from space. Here's how:

Think of short, meaningful and apropos messages no longer than 15 seconds in duration. It could be related to ham radio space operations, amateur satellites, famous quotes, sayings or whatever. Then send it along to VU2SBJ by e- mail to sri@ebhats.com and a copy to ham@vsnl.com. Mark clearly in the subject: Message for Beacon. Then wait to see what V-U-SAT eventually has to say. (ANS)

**

ENFORCEMENT: FCC SETS ASIDE LICENSE RENEWAL

The FCC has notified Scott E. Kamm, of Sioux City Iowa that it has set aside the renewal of his Technician class license grant for N0UGN. The Commission said it took the action based on recent complaints about the operation of Kamm's station and questions regarding his qualifications to be a licensee.

The FCC notes a Warning Notice by the Enforcement Bureau sent to Kamm last February 5th. The agency says that the warning was related to Kamm's alleged use of transmitting equipment on 156.300 and 174.000 MHz without a license, and deliberate interference to an Amateur repeater operating on 146.910 MHz. The letter also pointed out that Kamm's address in the database was incorrect. And subsequent to that warning notice the FCC says that information came to its attention that Kamm had apparently provided radio equipment to an unlicensed minor residing in Waterbury, Nebraska, and had instructed him on how to operate on the Marine Band and other frequencies.

In his February 11th response to the FCC Warning Notice, Kamm denied setting up radio equipment for the minor, and also stated that he had sold all of his radio equipment. But the FCC says that it has all of these complaints under review and that Kamm will be hearing from the agency again in the not to distant future. (FCC)

**

SAFETY ALERT: FLUKE METER RECALL

Test equipment manufacturer Fluke Corporation has announced a voluntary recall of certain models of its digital multimeters. This because of a delay in readings on the A-C scale above 500 volts.

According to a company release, the meters can take more than 18 seconds to reach a final reading. This could lead users to think that the voltage is lower than it actually is.

The meters involved in the recall are models 175, 177 and 179 of which 17000 were sold in the United States. All of the recalled units have a serial number below 79000000 and were sold between January and October 2001. If you have one, please call Fluke toll-free at 800-260-4819 between 8 AM and 7 PM weekdays Eastern time. More information on the recall can be found in cyberspace at www.fluke.com/rma/default.asp. (Fluke press release forwarded by WA6ILQ)

**

SAFETY ALERT: KODAK DC5000 DIGI CAMERA RECALL

A recall on a popular digital camera. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the shocking details:

--
If you own a Kodak brand digital camera model D C 5000, listen up. Eastman Kodak Co. is recalling about 75,000 of these cameras because of a possible manufacturing defect that can cause electrical shock.

According to news reports, the recalled cameras bear the model number DC5000 on the lower front right-hand corner. The cameras also carry a plate on the bottom containing the Kodak product identifier code KJCAA, followed by an eight-digit serial number ranging from 01800001 to 11700825.

The cameras were sold at department, electronic, computer and camera stores as well as mail-order and Web sites from June 2000 through August 2002. Consumers can return the cameras for free inspection and repair by contacting the company at 1-888-793-2977 between 9 a.m. and 8 p.m. Monday through Friday Eastern Daylight Time.
--

Again, if you own one of these cameras, please contact Kodak at 1-888-793-2977 between 9 a.m. and 8 p.m. Monday through Friday Eastern Daylight Time. (Kodak press release)

**

HAM RADIO ON TV: ICOM JOINS “THE HUMAN RACE”

ICOM America has been named the high frequency communications provider for the television shoe The Human Race. ICOM America has already shipped an IC-706 Mark II G to Boston for use by the show. The IC-706 and additional equipment will be used during an upcoming trek along the actual travel route to be used. The donation is the result of an agreement recently reached between ICOM America's National Sales Manager Ray Novak, KC7JPA, and the shows producer Bill Desjardins, W1ZY. (THR)

**

CONFRENCES: WSWSS IN CERRITOS CA

The Western States VHF-UHF and Microwave Conference is slated for October 11, 12 and 13 at the Sheraton Cerritos Hotel Towne Center in Cerritos California. Hosted by the Western States Weak Signal Society, the conference provides VHF and UHF enthusiasts the knowledge and tools to work DX and contests on 6 meters and up. This years banquet speaker is ARRL 1st Vice-President and VHF/UHF contester Joel Harrison, W5ZN. More information is on the web at www.wswss.org. (WSWSS)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

RADIO HISTORY: PEARL HARBOR REPORTER S.K.

He wasn't a ham, but Hugh Lytle was a communicator in his own right. History remembers Lytle as the man whose teletype message provided The Associated Press and the world with the first account of Japan's sneak attack on Pearl Harbor back in 1941.

Lytle was the news services Honolulu correspondent and a reserve Army officer. He was awakened by the Army on December 7th as Japanese planes bombed the U.S. fleet. According to his son David, Lytle quickly left for his A-P office at the Honolulu Star-Bulletin, where he filed a brief account of the attack in progress. He then reported for military duty with the Army.

A few weeks ago on August 16th Hugh Lytle passed away. He was 100 years old. (Published reports)

**

HAM TRAVEL: FREE ACCOMMODATIONS FOR HAMS ON THE GO

From across the Atlantic comes word of an interesting program for hams who like to move around. The International Travel Host Exchange, or I-T-H-E is a program administered by the German national society, D.A.R.C. It provides radio amateurs with the possibility of free accommodation with other amateurs around the world in exchange for other hams offering accommodation to overseas amateurs.

Most International Travel Host Exchange members are in Europe, but there are also amateurs registered in Australia, Canada, India, Indonesia, Japan, Malaysia, New Zealand, Syria, Thailand and the USA. Once registered, postal or e-mail addresses are made available so that contact can be established well before any visit takes place. For more information please contact Thilo Kootz, DL9KCE by e-mail to dl9kce@darc.de.

**

SCIENCE AND TECHNOLOGY: NEW GRAYLINE STUDY REMAILER

A new Internet newsgroup has been set up to discuss and coordinate the current research into greyline propagation by the RSGB Propagation Studies Committee. It is with Yahoo and people can subscribe by sending an empty e-mail to greyline-subscribe@yahoogroups.co.uk

Yahoogroups is also the home of the Amateur Radio Newsline e-mail list you subscribe to it by sending a similar empty e-mail to arnewsline-subscribe@yahoogroups.com. ARNewsline is one word spelled a-r-n-e-w-s-l-i-n-e.

**

HAM RADIO IN SPACE: RS-12/13 - S.K.

The AMSAT News Service and the ARRL Letter both report that the Russian Radiosport RS-12/13 ham satellite appears to have died. Jerry Brown, K5OE, reports he's received word from Russian sources that RS-12/13 went dark as a result of severe solar flare activity in
July and August.

At airtime, efforts are under way to restore the satellite, but hopes for success are dim, according to Brown's Russian acquaintances. RS-12/13 were integrated into the COSMOS 2123 Russian navigation satellite, launched February 5, 1991. It’s beacons have not been heard since August 20. (ANS, ARRL Letter)

**

INTERNATIONAL - AUSTRALIA: CB RULES ARE CHANGING

The Australian UHF CB equipment standard is to change. The new standard will require that CTCSS equipment include facilities to reduce interference to non CTCSS users. Required features include a 'channel busy' warning light and a 'listen before transmit' function. The changes were required by the Australian Communications Authority following changes that legalized CTCSS signaling on UHF CB channels. The A-C-A has also informed the Australian Association of Citizens Band Radio Operators that once the standards are approved by Standards Australia, they will become compulsory for equipment manufacturers. (Q-News)

**

DX

In D-X, word that KF2XN is active as KH2 slash KF2XN from Guam for at least the next month. He operates mostly SSB in his spare time. QSL as directed on the air. (RSGB)

And BI7DX is an Isands on the Air expedition that will operate from Weizhou Island throuhgh the 4th of October. Weizhou Island is located in the Gulf of Tongking in South China with team members comming from four different Chinese provences. The operation will be on SSB and CW from 40 to 10 meters, including the WARC bands. (RSGB)

**

THAT FINAL ITEM: THE BIRDS ARE BACK

And finally this week, our favorite flying T-Hunt is about to start. This, as the famed radio tagged burrowing owls take flight once again. With the details, here’s Joe Moell, K0OV.

--
It's that time again -- migratory birds in the Northern Hemisphere are heading south for the winter. For the fifth year, ham radio operators and scanner fans are being asked to use their equipment to help wildlife biologists figure out the routes and final destinations of endangered Burrowing Owls. In previous

years, hams helped determine that owls hatching during summer months in the Canadian provinces of Saskatchewan and Alberta travel over central states from North Dakota to Oklahoma, ending up in southeast Texas and northern states of Mexico. They sometimes fly over 2000 miles to their winter homes.

There aren't any radio-tagged Canadian owls to listen for this fall, but the University of Arizona is asking for ham help with 53 transmittered owls from eastern Washington state. If you live in the western USA and can receive 150 MHz signals, you could help. Your scanner or extended-range hand-held ham radio transceiver, plus an outside antenna, are all you need to join in. If you have radio direction finding equipment for VHF, so much the better.

For all the frequencies and monitoring information, go to the usual place on the Web, www.homingin.com (HomingIn is one word.) If you aren't on the Web, send postal mail to my callbook address. Again, the Web site is homingin.com

Thanks in advance for your help. From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline

--

Once again, more information is in cyberspace at www.homingin.com. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that our survey how ham radio is being used by home schoolers is still taking place. If you are a home schooling parent or a student being home schooled, please send your thoughts on the subject by e-mail to newsline@arnewsline.org. We will keep the survey going for one more week.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Jim Damron N8TMW and I’m Jeff Clark K8JAC saying 73 and we thank you for listening.

There are some new modifications...Check how work http://www.qsl.net/on4ldu/
when clickinh on "My logbook" it opens
http://www.qsl.net/on4ldu/on4ldu/menu-logbook.htm, so twice /on4ldu.
And there is the problem is you do not mention twice the subdir name.
In my case I have write this
<param name="URL1name" value="http://www.qsl.net/on4ldu/on4ldu/log/">
even if physically there is only one http://www.qsl.net/on4ldu/log/

Why dto do so, I don't know. maybe is it related to how qsl.net work,
opening a new windows when you click on a submenu.

Hi Peter,

I just did a web search for Sunair and came up with this for Sunair Electronics.
Hope it might be what you want.

Hate to rain your parade Don, but the auction original policy page
included the proper sold as-is statement. Your pretty much out of luck...
caused by your own actions.

I've had nothing but great results with Quecan and the many items I've
bought through/from them. You simply didn't ask enough or the
right type of questions...

cheers
skipp

I worked 9H3O twice, and am trying to confirm the QSO. One direct envelope to DL7VRO was returned as "not at this address", a card sent to DL7VRO via the bureau was returned as "silent key".

Can someone help me out here? Who is the manager for 9H3O? Is there a valid address for the manager? Is it DL7VRO? Is DL7VRO a silent key?

Thanks in advance,

-larry

HOW can DXCC be "free" if you have to join into an exclusive club within a fraternal org that requests a donation of " ($5,000 - $9,999 donation annually)"

then again....they do say there's one born every minute......

Blasphemy and 10-4!

Jim, if it weren't for DXCC, folks would have to go for some other
magazines DX awards. Even little newspaper print "World Radio" has a
DX award.

Amateur Radio Newsline™ Report 1312 – October 4, 2002

Amateur Radio Newsline report number 1312 with a release date of Friday, October 4th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new world-wide threat to ham radio on 70 centimeters tops this weeks Amateur Radio Newsline report number 1312 coming your way right now.

(Billboard Cart Here)

**

RADIO REGULATIONS: A WORLDWIDE CHALLENGE TO 70 CM

If you operate on 70 centimeters anyplace in the world, listen up. Your future access to that band is in peril. Q-News Graham Kemp, VK4BB, has the details on how a proposed satellite system could run hams off of the band:

--
It has come to the attention of the South African Radio League, SARL that the threat to the 70-cm band -- world wide -- is once again very real. The SARL has just received a discussion paper which will be tabled at the World Radio Conference next year -- WRC-03 -- which directly targets the portion of 432 to 438 MHz for exclusive use by the planned Earth Exploration Satellite Service or EESS, due to be launched soon.

If this proposal is carried at the World Radio Conference next year it, will see this portion of spectrum allocated on a worldwide basis and this spells the death knell of all 70-cm ham radio operation.

The section of the proposal and the motivation is as follows: Agenda Item 1.38: '...to consider provision of up to 6 MHz of frequency spectrum to the Earth exploration-satellite service active in the frequency band 420-470 MHz, in accordance with Resolution 727 that was revised at WRC-2000.
--

But why target the Amateur Radio allocation at 70 centimeters? The researchers who want it say its the only frequency that will work. Again, Q-News Graham Kemp, VK4BB:

--
According to the United Nations Conference on Environment and Development -- UNCED -- held in Rio de Janeiro in 1992, there is an urgent need for assessment and systematic observations of forest cover and rate of forest degradation in tropical and temperate regions. Active space borne sensors Synthetic Aperture Radars (SARs) are needed to enable the monitoring of forest biomass.

Systems operating on frequencies around 450 MHz can penetrate the canopy of forests, and have the capability to determine the ground-trunk interaction and are in the context of forest cover information of particular importance.

Systems operating at 1.3 GHz, or higher frequencies cannot penetrate the canopy. The spectrum around 450 MHz is also optimal for monitoring of continental ice and for monitoring of vegetation and soil surfaces for desert and tropical areas.
--

More on this story in future Amateur Radio Newsline reports. (Q-News, SARL, ARNewsline™)

**

HAM POLITICS: HAM-CONGRESSMAN APPOINTED TO KEY HOUSE SUBCOMMITTEE

Back here in the U-S-A the ARRL Letter reports that Oregon Republican Congressman Greg Walden, WB7OCE, has been appointed to fill a vacancy on the House Subcommittee on Telecommunications and the Internet. Walden is one of only two amateurs in the U-S House of Representatives, and his appointment to the key House panel dealing with communications matters is considered good news for the ham radio community. Walden's selection was announced by Republican House Energy and Commerce Committee Chairman Billy Tauzin of Louisiana. (ARRL)

**

RADIO LAW: CONGRESS MANDATES DIGITAL ANTI-PIRACY

Meantime, congressional lawmakers have ordered the Federal Communications Commission to mandate technology preventing digital TV signals from being hooked up to the Internet and made vulnerable to piracy. The directive is viewed as a major victory for Hollywood film makers and other copyright owners at a time when the music business is being ravaged by Internet piracy. (Published news reports)

**

RADIO LAW: FEDERAL COURT RULES IN RF BRAIN CANCER CASE

A Federal District Court has dismissed an RF related mobile telephone brain cancer suit. According to the C-G-C Communicator, the court ruled that the plaintiffs had not provided any reliable and relevant scientific evidence to prove their case. The complete finding can be found in cyberspace at http://www.mdd.uscourts.gov/Opinions152/Opinions/newman0902.pdf (CGC Communicator)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the KA5GLX repeater serving Clear Lake Texas.

(5 sec pause here)

**

RESCUE RADIO: HAM RADIO READY FOR HURRICANE LILI

Following quickly in the wake of Hurricane Isidore, a Category 2 storm named Lili made its way across western Cuba and then took aim at the U-S Gulf Coast shoreline. Amateur Radio Newsline's Don Wilbanks, KC5MFA, has more from New Orleans:
--

According to an ARRL Bulletin, the Hurricane Watch Net and W4EHW at the National Hurricane Center in Miami are again gathering ground-level reports using ham radio for communications into and out of the affected areas.

The Hurricane Watch Net is currently activated on 14.325 MHz with traffic coming in from numerous stations. Meantime W4EHW continues to exchange meteorological data and Spanish advisories with Cuban amateurs. Many of the reports received via ham radio have proven to be valuable to forecasters at the National Hurricane Center.

Right now all eyes are on Lili as she makes her way toward the U-S mainland. On Wednesday October 2nd the FCC declared a communications emergency as Lili approached the Louisiana and Texas shoreline. As we go to air, all hams not directly involved in hurricane related emergency communications are required to avoid using 7.285 MHz daytime and 3.873 MHz from sundown to sun up. These frequencies are protected plus or minus 3 kHz. The FCC declaration will remain in effect until rescinded and could be in effect for as long as two weeks.

Monitoring the storm and ham radio traffic from one of Lili's probable targets near New Orleans, I'm Don Wilbanks, KC5MFA, reporting.
--

Official advisories on Lili and other tropical storms can be found at the National Hurricane Web site. Its in cyberspace at www.nhc.noaa.gov. Late breaking ham radio operational advisories are at www.arrl.org. (ARRL, others)

SPACE AND SCIENCE: HURRICANE LILI CAUSES SHUTTLE LAUNCH DELAY

And a potential threat from Hurricane Lili to the Mission Control Center at Johnson Space Center in Houston has forced a delay in the launch of the STS-112 shuttle mission. Atlantis and its six member crew are now slated to lift off no earlier than 1800 to 2200 GMT on Monday October 7th. Once on-orbit, Atlantis will deliver the S-1 Truss to the International Space Station. The crew will perform three spacewalks at the station and will transfer supplies and equipment between the two vehicles. (NASA)

RESCUE RADIO: VK HAMS THERE AS PHONES GO OUT

Amateur Radio has come to the rescue after the town of Bindoon in Western Australia was isolated by communications failure.

For reasons yet to be explained, the failure of the phone system on Sunday September 22nd was total. Both mobile and fixed services went dead. No calls were possible.

A ham radio knight in shining armor in the form of VK6HGM rode to the rescue. Actually he drove to a hilltop and used the Roleystone repeater on 146.700 MHz in the hills above the city of Perth to report the telephone outage. This of itself is quite a feat, as both Bindoon and Roleystone are in the Darling Mountain Range and are out of line-of-sight from one another.

Be that as it may, the call for assistance was answered by VK6AX. He had telephone service and used it to alert the authorities and brought about a happy end to the story. Within half an hour, all telephone services in Bindoon were back on line.

**

ENFORCEMENT: NET UNDER FCC SCRUTINY

Turning to news from the FCC, word that the agency is taking a close look at a 20 meter net and its control operator. The FCC's Daryl Duckworth, NN0W, explains:

--
"The Enforcement Bureau has opened an inquirey into the Mobile Emergency and County Hunters Net operating on 14.336 Mhz. We have requested that James Grandinetti, who uses the call signs KZ2P and K2JG to respond to seven complaints about the operation of the net. The Enforcement Bureau also requested documentation supporting the club call sign of K2JG which is assigned to the Atlantic Amateur Association."
--

The FCC's letter to Grandinetti alleges that he harassed certain operators and banned other hams from using 14.336 MHz while he was operating as a net control station. The letter told Grandinetti that the frequency 14.336 MHz is a shared amateur frequency. As such, the operation of a net on that frequency conveys no greater rights regarding its use by Grandinetti than any other licensed radio amateur. Grandinetti was given the customary 30 days to reply.

**

ENFORCEMENT: PRIVILEGES REINSTATED

And still in the enforcement arena, some good news for a Martinsville Virginia ham. Again, the FCC's Daryl Duckworth, N-N-Zero-W:
--
"We notified Theodore Crutchfield, K4TFC, that since he has taken and passed an Element 1 code test as requested, his license remains Extra class and that he is in good standing."
--

By way of background, back on December 20, 2001, the FCC had notified Crutchfield that it was requiring him to re-take Amateur Element 1 under the supervision of the W4VEC Volunteer Examination Coordinator. This, on or before February 15th of this year. Crutchfield appeared for the exam session but did

not pass. As a result, he was notified on July 16th that the Wireless Telecommunications Bureau would downgrade his license from Extra to Technician Class. A few days later on July 21st, Crutchfield successfully completed an Element I examination in Roanoke, Virginia. Now, as Daryl Duckworth put it, Crutchfield remains Extra Class and his license is in good standing with the FCC.

RADIO ACCIDENTS: HAM INJURED IN TOWER ACCIDENT

A Michigan ham has been seriously hurt in a tower fall. According to an Internet report from Allen Stap, N8OKU , the accident involved the removal of a 160 foot tower.

Stap says that the top 120 feet was removed without incident. Daylight ran out so removal of the remaining 40 feet was deferred to the following morning. On inspection, the last 40 feet appeared to be safe and the removal work began. But the base of the tower broke apart and the tower fell with the ham on board. It landed on a polebarn with the ham crushed between the tower and the roof.

The accident happened near the town of Lawton. The ham involved was not identified by full name or call sign but was described as a long time and experienced tower climber. His injuries included a broken jaw, two broken arms and a broken leg. The good news is that he is expected to make a full recovery after extensive rehabilitation.

**

RADIO ACCIDENTS: NEBRASKA TOWER COLLAPSE KILLS TWO

And a 1,965-foot television tower collapsed Tuesday September 24th in a western Nebraska field. Two workers were killed and three others were injured.

The tower was located near the town of Hemingford. A spokesman for its owner, Duhamel Broadcasting Enterprises of Rapid City, South Dakota, said two of the workers were repairing the roof of the near-by transmission building. The others were strengthening the tower so it could be equipped with high-definition television antennas.

The structure was built in the late 1960’s and was used to transmit the signal for Scottsbluff television station KDUH throughout most of the states panhandle area. It and was the tallest structure in Nebraska, and was some 500 feet taller than the Sears Tower in Chicago and 700 feet higher than the Empire State Building in New York. The cause of its collapse is not yet known. (K0NEB)

**

OPERATING EVENTS: ARRL DEVELOPING JOTA DATABASE

Jean Wolfgang, WB3IOS, of the ARRL Field and Educational Services Department writes to say that the League has set up a first ever scouting Jamboree On The Air event database. It comes as the result of requests to Jean from scouting

groups looking for hams who plan to offer their services to the event. You can register your JOTA event by taking your browser to the rather complex U-R-L you will find on the web at http://www.arrl.org/FandES/ead/jota.html. T his years Jamboree On The Air takes place October 19th and 20th, local time. (ARRL)

**

OPERATING EVENTS: SHIPS ON THE AIR

The USS Cassin Young, a museum ship in Boston on a turn around cruise will operate an Amateur Radio station from her radio room during the voyage on Saturday, October 12th. Operators will pass commemorative US Naval style messages between that ship and the USS Salem. The Salem is another museum ship berthed in Quincy Massachusetts. Operation will be on 20 and 40 meters. For a commemorative certificate send an SASE and a copy of the message you hear to Bob Callahan, W1QWT, 56 Acorn Street, Scituate, Massachusetts 02166. And less we forget, of the two ships involved the USS Cassin Young is a Destroyer and the USS Salem is a heavy cruiser. (W1QWT)

EMERGING TECHNOLOGY: THE SCIENCE REPORT

Two interesting items from this weeks science page. Here are Jim Damron, N8TMW and Jeff Clark, K8JAC.

--
EMERGING TECHNOLOGY: TECHNO-JUNK PILING UP

A new study called Waste in the Wireless World: The Challenge of Cell Phones says that 130 million wireless devices will be discarded annually in the United States. This equals 65,000 tons of two-way radio garbage.

The study makes several recommendations regarding both the design of cell phones and the disposal of them. It says that the use of toxic substances in them be reduced. It also suggests that device standardization be implemented so users are not forced to purchase new phones when they change service providers or for travel. Finally, the study says that cellular telephones should be

designed for disassembly, reuse and recycling.

It should be noted that the study was limited to cellular phones and other two way radio devices. It does not include the tons of VCR’s and TV sets that are disposed of each year. (Supplied by several ARNewsline(tm) listeners)

**

EMERGING TECHNOLOGY: BARCODES CAN SAVE LIVES

You know those bar codes that grocery workers scan to let you know how much your cereal costs? Well, hospitals are now using the same technology to help save lives, thanks to a computerized medication system. A nurse scans the bar code on a patient's I-D bracelet, along with a bar code found on the medication itself before administering the drug. This enables the computer to verifies and checks the bar codes to make sure the patient is getting the correct medication. A green signal tells the nurse it's okay to precede. An error warning, and red signal, alerts the nurse if something's not right.

To date, only about two percent of the nation's medical facilities use bar code technology to verify medication administration, but that number is expected to rise. Statistics show the system prevents anywhere from 84 to 264 potential errors a week at one hospital alone. (Science Today)
--

More emerging technology news, next week.

**

SPACE AND SCIENCE: JAPAN DELAY COMPLETION OF ISS MODULE

Completion of the international space station hit another snag. This as Japan's cash-strapped space program announces that it would delay launch of the bus-sized research module it is building for the project.

The research capsule called Kibo is the only part of the space station developed and run by an Asian country. It was scheduled for launch sometime in 2004. Liftoff of that module is now planned for April 2005 at the earliest. (Published reports)

**

INTERNATIONAL - GERMANY: DDH47 CELEBRATES 50 YEARS OF SERVICE
November 8th and 9th will see a special station on the air from Pinneberg Germany. This as Weather Service's station DDH47 will be operating crossband on 147 kHz and listening on 80, 40 and 20 meters CW to celebrate its 50th anniversary of the service. Slow speed Morse transmissions to North America are also planned. (G4NJH)

**

INTERNATIONAL: FIRST UK TO VE CONTACT

Sunday, September 22nd marked the 84th anniversary of the first radio message from the United Kingdom being received in Australia. On the 22nd of September

1918, a message of goodwill was sent in Morse code from the Marconi station located near Caernarfon. The callsign was M-U-U, and the 200-kilowatt transmitter was on 21 kHz, a wavelength of 14,300 meters. The signal was received at
Wahroonga near Sydney by Sir Ernest Fisk, an Englishman who had served under Marconi in England. The message of goodwill was published the following day on the front pages of the Australian morning newspapers. (GB2RS)

**

DX

In DX, word of the first 6 Meter contact from Afghanistan. Nick Peckett, G4KUX, writes that he made what he says is the first-ever contact on 6 metes from Kabul at 15:15 UTC on Tuesday
the 24th of September. Peckett, operating as YA4F, contacted YF1OO in Indonesia. G4KUX says that he hopes to be able to give many others their first opportunity to contact Afghanistan on 6 meters over the next few weeks. (GB2RS)

And lower in frequency, TM4ENN is a special event station in France to commemorate the 60th anniversary of the creation of the 'Normandy Niemen' air flotilla by General de Gaulle. It will be active on 40, 20, 15 and 10 meters internationally. QSL direct with an stamped and self addressed envelope to F6BZH, or via the bureau. (GB2RS)

**

THAT FINAL ITEM: BY-BY BETAMAX

And finally this week, a legend is being put to rest. After twenty-seven years in production Sony Corporation says that it will finally put its famed Betamax tape format to bed forever. Our producer Bill Pasternak, WA6ITF, takes a nostalgic look back:

--
Its said that Betamax opened the world of home video as the first practical consumer format. Sony, J-V-C and Panasonic first tried with the famed 3/4 inch U-Matic machines, but consumers were reluctant to buy a videotape machine that was bigger than most T-V sets of that era and looked more at home in a television station than their livingroom.

My own first home VCR was a Sony SL-7200 Betamax. It would record a whole hour of pretty high quality video and audio on a tape cassette that was only 3 1/2 by 6 inches in size. I paid almost $2000 for the machine and each cassette cost me close to $25. That was in the late 1970’s and despite loosing the 1980’s video format war to VHS, Betamax held on as a niche product all these years.

Now, according to Larry Bloomfield’s Tech Notes news service, Betamax for consumer use is being phased out. This is because of the new consumer digital tape formats like Mini D V that are literally delivering a death blow to Betamax’ future prospects.

Sony reportedly will manufacture only 2,000 more Betamax machines before discontinuing the product altogether. But Beta will live on in the world of television journalism. Thats where a spinoff tape format called Betacam with suffixes like S-X and S-P became the defacto news gathering videotape of choice and have remained so for the past decade and a half.

With an SL 7200 Betamax still sitting someplace out in the garage -- gathering dust -- I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.
--

And you thought that the Betamax died a quiet death many years ago!
(Tech-Notes, ARNewsline™)

3040. JARL awards : help to access JA callbook

Newsgroup: rec.radio.amateur.dx
Date: 2002-10-07 08:01:32 UTC
From: Thierry Lombry <lombryt@hotmail.com>
Message-ID: <3da13f3e$1_2@news.vo.lu>
Source record: 12016

Post I mainly address to JA hams,

Hi OM-San,

I encountered some difficulties as SWL to get confirmation of my QSO in respect to delay ruled by the JARL 75th anniversity (A-75 award, one of the 5 mandatories awards to get the commemorative plaque).

I am in contact with Aoki, the JARL award manager but up to know we haven't find any solution other than... checking callsigns and wait for QSL...

I'm agree but for SWL is is quasi impossible. If I do not understand the city/fun from which emitted the OM, I am physically unable to complete my logbook. Worst, as the JA callbook is written in katakana without an english verison, there is no way for a foreigner to check the calligns with cities.

I cannot no more wait for months or years that QSL be send back by JA stations (we regularly lost 2x 2 months in each QSL buro, so 4 months). The rules of 75th ann. award states that the requests for award will be closed as september 2003. So I will be surely out of delay I wait teh return of QSL via buro.

Question.
I would like to know if some JA hams could check my logbook. I searching one or more JA amateurs having access to their JA caallbook and that could help to fill out my Excel sheet (column "city/gun") for each callsign. There are about 130 callsigns to check, a 1 hour job.

If you can do that for me (not necessary in once, as you want), please contact me by direct email.

Many thanks.

Sayonara

WHAT??? You think as a USA ham for 52 years is going to donate five to ten grand to an organization that has done little for my hobby except dumb it down and trying now to eliminate CW so their off-shore advertisers can build cheaper radios that only operate FM or SSB? Not me Buddy, I wasn't born in England, you know!

So what's the problem with that? At least in the USA, the poorest of
the poor can rise to that position and it seems that half of the
world's poor are trying to sneak into the States to give it a shot.

Not too many of them have a shot at working their way into the British
monarchy. :)

If that is what you believe, Walt, you might be getting most of your information from American TV. I might add that the only place on the earth I've ever been served luncheon meat sliced thinly enough to read a newspaper through it was in England.

The only difference between the American and other cultures is that we not only openly admit that fact, we print it on t-shirts and sell them.

We have no need to demonstrate it to each other. Maybe you've just seen
the red carpet rolled out for those visitors who come from places where
the luncheon meat is thinner than the lettuce leaf. Our rationing ended
with VJ Day.

REALISTIC PRO-2040 SCANNER - Canadian Version
With Descriminator tap Mod, RCA type plug added to rear of unit to connect DATA SLICER which I'm also selling
Excellent scanner, I've decoded ACARS, FLEX, POCSAG paging, MDT, MOBITEX, etc with the data slicer and my PC
I will even include the software. This scanner can receive cell phone transmissions also. Original box, manual,
telescopic antenna and power adapter included. -$115.00

REALISTIC DX-390
With Mute and Beep Mod!, Manual and Power Adapter, excellent condition, NO BLOWN FETS! -$65.00

GRUNDIG YACHT BOY 400PE
With Mute and Fine Tune Mod!!!, Manual, Original box, carrying case, Wall Adapter, long-wire external antenna,
Hardly used! -$105.00

GE SUPERADIO III
High performance AM/FM reception, very clean and in excellent shape, I've dxed stations as far away as Texas!!
on this one. (I'm in Ontario, Canada) -$30.00

BELTEK 23 CHANNEL AM TRANSCEIVER
This one's an oldie, looks like a mid seventies transceiver, couldn't find anything on the web about it. It measures about
12x10x4 in an all metal cabinet, it has a 120v ac as well as connections for 12v mobile. This is a solid state transceiver
and it works. -$15.00

I'm located in SW Ontario, shipping to anywhere in North America is about 8-12 dollars for these items.

Regards.

"Terrible" is about right.

Also somewhat strange at times.

One afternoon the only stations I could hear (other than backscatter)
were ZK1 and ZK2 ... for about 3 hours ... on 10, 15, and 20.
Stations south of me (e.g. S. California, I'm in Oregon) were
hearing quite a lot of DX, going by listings on the cluster.
That was one of the good days :-)

Hi folks,

Many of the Qsl routes that are asked about on this user group
can be found on the GOLIST Online Database. It is open
to "Guests" and subscribers alike.

Subscribers login with your Call sign and Password.
Guests login with your Call sign and email address.

If you have New or different Qsl manager routes than what is
in the GOLIST database, there is a Qsl Manager Update page on
the Web site as well.

Use and enjoy.

Hi,

Nothing abnormal on bands, excepting locally QRN below 20m.

See the status of D-layer absorbtion and its influence on MUF on :
http://www.sec.noaa.gov/rt_plots/dregion.html

Then the solar flux on WWV, example :
Solar Flux, A-index, K-index:
> 180 , <8 , < 3 = E-W opening
> 180 , < 8 , > 3 = N-S opening

Relationship between A and K indices
A = 0 3 7 15 27 48 80 140 240 400
K = 0 1 2 3 4 5 6 7 9 9

Data about propagation are accessible on-line on various frequencies
depending your location (often on 2.5, 10, 15 and 20 Mhz). The easiest
access is however through the Internet, searching on DX clusters coded
messages broadcasted from WWV services.

In order to get usable data we need to feed our models with specific
values, like the solar flux index, SFI and the sunspots number that
are the main subjects influencing the geomagnetism, specially the
behaviour of the ionosphere. The solar flux measures the sun activity
at earth orbit level and is expressed by two values : A-index that
ranges between 0-400 with a minimum near 60 and K-index that ranges
between 0-9 with a mean value of 2. When we need a K-index of 4 to see
aurora in the States, Europe requests a K-index over 9 due to tilt of
the magnetic pole towards Canada. The index are updated several times
each days.

I agree with that totally. I've send him requests for YA5T, PW0T and BQ9P.
So far I did get only Pratas card. He is very reliable, but handling many DX
calls QSL's, so just wait...
Still waiting CY9DH card too!!

I'm looking for the Data cable(PSK31, RTTY, etc) and a programming cable
for my 706MKIIG.
HRO wants $125 for the programming cable, can't find the data cable
anywhere.
Any help would be appreciated.
thnx
Please email direct

hello
unless the MkIIG is differnt from the MrkII the only cable is the CIV17 which
allows you to control the radio not to program it i emailed RT Systems asking
if they made software for the 706s and they told me that the radio isnt
capable of programming like the other radios they make software for
if you want the CIV17 type of cable check out www.hosenose.com
they sell of for like $50 i bought that one for mine MkII and it controlled
the radio fine
as for the data cable i think you have to make that one up yourself
good luck

20's been strange. Last night (Thursday, Oct. 10th), 20 was almost
unihnabited after 0530Z, but the ones that were there were good
catched (a few VKs and ZLs and a V51 without a pileup). After 0630Z
the strongest sigs were S1-S2 in NYC, and that's when I gave up.

I have to wonder if people were so fed up with at least a week's worth
of horrid propagation that they just gave up on the bands that they
just left the radios off this week? I mean with openings to VK/ZL,
there's at least *some* life in the bands, yet few takers.

I really hope conditions improve in the coming days and weeks, though.
This year, and maybe next, are likely the last gasp for this cycle,
and this is supposedly one of the best times of the year for DX. I'm
really hoping things are good for the CQWW!

Dennis, why don't you just go back to sleep?

we'll wake you if we need any QRN from the HF Group :-)

Why don't you just stay out of the VHF-UHF Groups and keep your CB Style A.M QRN to yourself?

A icom OPC-478 cable will work for programming the radio. The cable for the yaesu vx-5r will work too. Both need a mono adapter.

Hi

Has anyone managed to get a QSL from FR/F6KDF/T?

I have sent direct QSL's twice to F6KDF, but no answer. Envelopes included
SAE + IRC and/or USD.
Maybe even few of those.

I would be glad to hear something about this, especially from french hams.

Or, what have I done wrong here?

Hi !

My QSL-Manager DL3AMA received recently a lot of QSL-cards for my ex-call HC2DX.

But he (DL3AMA) is NOT the manager of the actual call-sign-owner of HC2DX :-)

I used my call HC2DX/8 operating from Galapagos many years ago ....

It would be helpful if somebody could post here the actual QSL-adress of HC2DX.

Thanks and 73 from Venezuela !

Silent Key NF3Q/W3HBC

(09/29/2002) Hilory Bracken Cox, Age 52, of Austin, Texas, formerly of Murrysville, Pennsylvania, passed away on Thursday, September 26, 2002. He is survived by his father, H. Bracken Cox; and his brother, Edward Warren Cox of Austin, Texas. He was preceded in death by his mother, Margaret Geyer Cox; and his paternal grandfather, George W. Cox of Pennsylvania. Hilory was born in South Charleston, West Virginia, on May 10, 1950, and graduated from Franklin Regional High School in Murrysville, PA. After graduation, Hilory traveled the Northeastern and Central United States as a musician playing the piano, keyboard and singing with several different bands. He also ran the sound system each week at Newlonsburg Presbyterian Church for a number of years. What Hilory enjoyed most was his family and friends, making music, working with computers, and Amateur Radio. He also loved animals and animals loved him. He earned his first Radio license in 1963 before he graduated from high school. He was very active in Amateur Radio in the Pittsburgh area and earned an Extra Class FCC license, W3HBC, NF3Q. Hilory was a member of the Masonic Valley Lodge No. 613, F. and A.M. in Turtle Creek, PA; Newlonsburg Presbyterian Church in Murrysville, PA; the Amateur Radio Emergency Service (ARES) in Pittsburgh, PA, and in Austin, TX; North Hill Amateur Radio and Skyview Amateur Radio in Pittsburgh, PA; and was a life member of the American Radio Relay League (ARRL). In November, 2000, Hilory and his father, Bracken, moved to Austin, TX, from Murrysville, PA. They are currently living in Austin, TX.

*** If what you say is correct this must be a first. Im not knowledgeable about CB operation outside of the U.S. but if my understanding of U.S. CB regulations are correct, long haul contacts are not permitted.

Maybe that has changed and of course without callsigns it is totally unenforceable if true. And without a callsign and listing I suppose QSL cards are not an option to the CBer. Times are certainly changing. Interesting.

Amateur Radio Newsline™ Report 1313 – October 11, 2002

Amateur Radio Newsline report number 1313 with a release date of Friday, October 11th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A first ever Amateur Radio satellite for New Zealand and hams are honored in the U-S mid-West These stories are first on Amateur Radio Newsline report number 1313 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ZL ANNOUNCES PLANS FOR KIWISAT

Ham radio in space is coming to New Zealand. This, with announcement of a new ham radio satellite to be designed and built down-under. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has a close-up look at Kiwi Sat.

--
Yes, that's actually its name. Kiwi Sat. And in case you were not aware, the Kiwi is a bird with thick hair-like feathers, no tail, a beak one third the length of its body, and nostrils at the tip. It looks like a cross between a hedgehog and an anteater. And its found only one place in the world. Here in New Zealand. Its our mascot and we love it. And now the hams of Kiwi-land are naming our soon to be built ham satellite after it.

Like the bird that its named after, Kiwi Sat will be a bit unusual in its own right. It will be a rather small ham-sat. A 237 millimeter cube based on the early 1990's Microsat technology developed by AMSAT. But it will carry some 21st century electronics that will enable it to run both as linear translator for low duty cycle modes like sideband and C-W as well as an F-M transponder to serve the needs of the overall ham radio community. This, even though the solar cells can only produce a maximum of 15 watts of available power at any given moment and an average of only 6 watts. Uplinks will be on 70 and 23 centimeters with Kiwi Sat talking back to Earth on 2 meters.

But there's more. Plans also call for Kiwi Sat to carry some sort of scientific experiment and possibly even a digitalker module. This would permit the satellite to identify with its own voice as well as provide some good publicity for the Kiwi Sat project. All of this made possible by the many advances in microchip design that have taken place since the first Microsat was launched.

There is one big difference between a feathered Kiwi and the ham radio satellite the hams down here are building that I should mention. A live Kiwi

cant fly. Kiwi Sat will.

From Auckland, New Zealand -- down-under -- I’m Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.
--

A s we go to air, no completion or launch date has been announced for Kiwi Sat. An excellent article on the project appears in the summer edition of the AMSAT Journal. (AMSAT)

**

HAM RADIO IN SPACE: PC SAT IN ECLIPSE

Meantime users of the P C Sat ham satellite are being requested to please turn off all unattended night time transmissions. This, to conserve energy while the bird is not in direct sunlight and having its batteries charged.

According to Bob Bruninga, WB4APR, P C Sat left full sunlight on Sunday September 30th. The bird is still fully operational but is passing through 25 minute eclipses on every orbit. And because of these eclipses the overall power available on board P C Sat is down. Keeping unattended beacons off while you are not there cuts the load on the satellite power supply significantly.

Bruninga says that with everyone’s cooperation the satellite might be able to make it to full sun again in November. He adds that normal operations are O-K when the satellite is in sunshine and the batteries are on charge. (AMSAT)

**

RADIO LAW:: FOLLOW-UP – S.A. ACTS TO PROTECT THE 70 CM BAND

A follow-up to last weeks story on the probable threat to the 70 centimeter band posed by a planned Earth Exploration Satellite Service that’s soon to be launched. As reported last week a discussion paper will be brought before the World Radio Conference next year that directly targets 432 to 438 MHz for exclusive use by the Earth Exploration birds.

The threat is very real and now comes word that at least one national ham radio society is taking action to stop the incursion. The South African Radio Relay League which was the first to make information on the threat public is already engaged in urgent talks with the that nations telecommunications regulatory body. Their objective is to try and convince the radio law makers that such a reallocation of spectrum would be a severe blow to the future of amateur radio. Others national societies are expected to quickly do the same. (SARL, Q-News)

**

RESCUE RADIO: HAMS HONORED FOR TORNADO WORK

Ham radio Radio Skywarn spotters from 14 Central and Southern Indiana counties are being given credit for helping save lives. This, during an unusual outbreak of tornadoes the morning of Friday, September 20 th. Amateur News Weekly’s Jack Parker, W8ISH, tracked the storm and has this report.

--
When an F3 Tornado started it’s destructive journey across Indiana, Hoosier hams were hot on the trail. In fact, the storm moved so quick several amateur radio operators almost became casualties themselves.

The mid-morning outbreak started as a line of strong thunderstorms associated with a cold front. Tornado touchdowns were reported in several counties southwest of Indianapolis before noon. The storm gained strength as it ripped apart homes and businesses while tossing cars like they were matchbox toys. Many amateur radio operators saw first hand the destructive power of these late summer storms. Around 1:00 p.m., an F3 tornado touched down in Ellettsville, just west of Bloomington, Indiana. Two Ellettsville hams, Mike Poe, KB9SGN, and Russ Ryle, N9DHX, had close encounters with the super strong tornado. According to one Monroe County Spotter “The tornado went right past Mike’s house. Poe was in his driveway trying to get away in his truck and wound up dodging parts of his neighbors house while transmitting a warning to the Bloomington repeater. At the same time Russ Ryle was taking cover.

--
Ryle: “I was just passing information for my local area. First report I had was, we had a tornado on the ground. I could see some debris. At that point my wife and I took cover in the bathroom”.
--

As many as four tornadoes skipped across Indiana covering 112 miles. Over 20,000 homes were damaged. Thankfully, no one was seriously injured or killed. The National Weather Service office in Indianapolis credited the Skywarn spotters with saving hundreds of lives. As the NWS began to receive frequent damage reports, activation of spotter groups became critical. The NWS requested spotter information be relayed to their office as quickly as possible so counties in the path of the storm could be alerted.

According to National Weather Service Warning Officer, Dave Tucek, quick actions by spotters helped the NWS increase watch and warning lead times to 25 minutes or more, saving lives.

After the storm passed, many of the individual county spotters groups teamed up with their local Red Cross, Salvation Army and Emergency Management agencies to provide communications between shelters and county EOC’s. Some of the amateur radio operators found themselves working with damage assessment teams while providing communications for National Guard clean up crews. Reporting from Indianapolis, for Amateur News Weekly, this is Jack Parker, W8ISH
--

Following an aerial survey of the damaged areas, Indiana’s Governor Frank O’Bannon said this is the most wide spread tornado damage to hit the state in over a decade. Damage assessments are expected to be in the millions. (ANW)

RESCUE RADIO: FCC OK'S NEW PERSONAL LOCATOR BEACONS

If you are a ham involved in search and rescue work, listen up. The FCC has issued a report and order that provides for licensing individual 406.025 MHz personal locator beacons or P-L-B's. The agency says that it will require mandatory registration of these devices with the National Atmospheric and Oceanographic administration.

According to the CGC Communicator, a 406 MHz digital P-L-B signal contains information on the type of emergency, the country an identification code of the beacon in distress and other information to facilitate search and rescue operations. Even more important, a 406 MHz distress signal can be received and stored on-orbit by the COSPAS/SARSAT satellite and later retransmitted to the ground. That should eliminate the so-called blind spots found in older 121.50 MHz and 243.00 MHz devices. (CGC Communicator)

**

ENFORCEMENT: YOU GET YOUR OLD CALL BACK

The FCC has written to Jamie H. King, Jr. of New Bern, North Carolina to tell him that it has canceled the Vanity Call Sign W4JHK and has reinstated his previous KG4RLJ call. Amateur Radio Newslines Bruce Tennant, K6PZW has more:

--

Back on June 19th the agency requested that Jamie H. King, Jr., provide documentation of his claim that he was a former holder of the W4JHK call sign. He responded by letters dated July 20th and 27th. In his reply King stated that he believed that the problem seemed to lie in interpretation of blanks to be filled in on the Vanity Call Sign application. He says that when he completed the application last February, he interpreted the line 'Former Primary Station Holder' to mean any primary station license, regardless of call sign, issued at a date earlier than the application. Therefore he says that he was referring to his previous license KG4RLJ when he checked that line.

But the FCC says that explanation might be acceptable if King had only checked the "Former Primary Call Sign Holder" block. But the FCC says that King also wrote in the call sign W4JHK. Also, that the application block contains the statement -- quote -- "This call sign was previously shown on my primary station license."

The FCC says that in view of the fact that King has never been a former holder W4JHK, that his call sign reverts to KG4RLJ. It says a license bearing that call is on its way to him.

Reporting for the Amateur Radio Newsline, I'm Bruce Tennat, K6PZW
--

The FCC adds that it is not pursuing further enforcement action at this time but cautioned King to use care in the filing of any future applications with the FCC. (FCC)

**

ENFORCEMENT: BIG FINE FOR SELLING ILLEGAL CORDLESS PHONES

The FCC has issued a $7,000 against Lightning Electronics Incorporated of Miami Florida. This, for willful and repeated violations of the Commission's rules involving Lightning's marketing of unapproved long-range cordless telephones. Phones that the agency says are capable of interfering with aviation safety. Phones that hams say are ripping up the two meter band. We have this report:

--
Back in February of 2001, the Federal Aviation Administration told the FCC that some pilots were reporting receiving sporadic interference to an aviation frequency here in the Miami, Florida, area. In March of 2001, the FCC’s Miami Office identified the source of the interference as a long-range cordless telephone being operated from an electronics store in Miami. That one was quickly removed from the airwaves.

As a result of the FAA’s concerns, the FCC launched a nationwide investigation into the unlawful marketing and use of long-range cordless telephones. During the inquiry, the Bureau discovered that electronics dealers were selling long-range cordless telephones in several states. It also found that certain of the long-range cordless telephones caused interference by transmitting spurious emissions on aviation frequencies. Even more scary -- others were specifically designed to operate in the aviation band.

During the investigation, agents from the Miami Office visited Lightning Electronics retail store. This took place on July 27, 2001. While there, agents saw several of the illegal long-range cordless telephones on display. Models included a Super Phone CT-9000, a Prolink CT-6000CID, and an Optima OP8810.

According to the FCC, a salesperson at Lightning offered to sell one of the units to the agents. As a result, on August 24, 2001, the Miami Office issued a citation to Lightning for violation of rules which prohibit the marketing of unapproved radio frequency devices.

But the company apparently did not heed the warning. On September 26, 2001, agents from the Miami Office and from the Tampa Office again visited Lightning’s retail store. At that time they purchased a Prolink BAO-6110CID long-range cordless telephone and antenna for $669.80. The telephone the agents purchased was capable of causing serious interference to aviation communications and was not approved for sale by the Commission.

On October 29, 2001, the Tampa Office issued a Notice of Apparent Liability to Monetary Forfeiture against Lightning but the company did not file a response. On February 21, 2002, the Bureau issued a Forfeiture Order. On March 8, 2002, Lightning filed a petition for reconsideration of that order indicating certain information did not pertain to the company. The FCC responded with a new order last May 21st and has now ordered Lightning to pay up.

From Miami, I’m Bill Burnett, KT4SB, reporting for the Amateur Radio Newsline.
--

So far the FCC investigation into the sale of these illegal high power cordless telephones has resulted in the issuance of several citations and fines by the agency’s Enforcement Bureau. Its also gotten a few that bothered ham radio communications on two meters off the air. (FCC)

**

ENFORCEMENT: SBC TO PAY $3.6 MILLION IN CONSENT DECREE

SBC Communications will pay $3.6 million to federal regulators for filing inaccurate information in applications to provide long-distance service in four states. The consent decree resulted from Federal Communications Commission investigations of S-B-C applications to enter the long-distance markets in Missouri, Texas, Oklahoma and Kansas.

In agreeing to the consent decree the company admits no wrong doing. In fact, SBC says that the inaccuracies were the result of good-faith efforts in describing highly technical matters and not the product of any intent to mislead. (Published reports)

**

NAMES IN THE NEWS: MITNICK SELLING LAPTOPS TO PAY LEGAL FEE

Former computer hacker Kevin Mitnick, N6NHG, says that he is selling some of his personal items to pay a lawyer who is trying to save his ham radio license. Mitnicks’ request to renew his license earlier this year end up in it being designated for a hearing. The items that Mitnick is auctioning off include his old Toshiba laptop computer which was taken by the government back in February of 1995. As this is written, that computer is up on e Bay with a top bid approaching $10,000.

A second laptop is also up for auction. It features a layer of fingerprint dust and red "X" marks where fingerprints were lifted. It also includes a mouse still housed in an FBI evidence bag. Both computers are signed on the bottom by Mitnick and former Apple executive Steve Wozniak. (Published reports)

**

NAMES IN THE NEWS: RAFY BRIEM N6FFT - TALKRADIO LEGEND -- RETIRES

Talk radio legend Ray Briem, N6FFT, has retired. Briem’s last show was on Sunday evening September 28th over Los Angeles radio station KRLA. Before moving to the 870 spot on the AM dial Briem spent several decades honing the art of late night talk over at KABC radio on 790 Kilohertz. While there his show was eventually put on the ABC radio network, nationwide. (ASWLC)

**

NAMES IN THE NEWS: A.PROSE WALKER, W4BW - S.K.

A. Prose Walker, W4BW, the man considered as the father of the "WARC bands" has died. Walker headed up the FCC’s old Amateur and Citizens Division from 1971 to 1975. While there, he made the initial proposal for the creation of the 10, 18 and 24 MHz bands at a conference in Geneva 1972. Later, Walker organized and chaired the United States the Advisory Committee of Amateur Radio. This committee took the initial steps to turn the idea into reality at the 1979 World Administrative Radio Conference.

But there was another side of Walker that hams in the world above 50 MHz do not remember very fondly. It was a set of highly restrictive repeater regulations promoted by Walker back in the early 70’s. Among other things, these rules required the submission of what are today called engineering feasibility studies in order to get a required W-R prefix repeater license. The regulations were so strict that repeater growth almost ground to a halt for the better part of half a decade. Eventually, the ham community lead by 73 Magazine publisher Wayne Green, W2NSD, rebelled against the Walker inspired rules. They were repealed as a part of repeater deregulation a few years later.

Walker was living in Rochester, New York, at the time of his death. He was 92. (ARRL, Repeater Remailer, W9JUV, 73 archives, others)

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

ON THE WEB: INTERNET OUTAGE ON UUNET

If you think that the Internet went away for a few hours on October 3rd, you are close. What actually happened is that some users faced heavy delays reaching Web sites and accessing e-mail for a few hours because of widespread technical troubles on WorldCom's long-haul network.

A WorldCom' backbone called U-U-NET carries most of the Internet traffic in the United States. The problems began about 8 a.m. and about 20 percent of WorldCom's U.S. Internet. Very few if any lost service and Worldcom had service fully restored by early afternoon. WorldCom says that the problem appears to have been with the lists telling router computers how to pass data on to their destinations. (Published reports)

INTERNATIONAL - GERMANY: THE CODE SHOULD STAY

Germany’s Deutscher Amateur Radio Club is that country’s national Amateur Radio society. As previously reported, the D.A.R.C. supports the retention of Morse code testing as a license qualification. Now, D.A.R.C. has put this position on the discussion agenda of the International Amateur Radio Union’s Region 1 Conference. Its slated to be held in San Marino in November.

(Q-News)

**

INTERNATIONAL-UK: BBC AND B SKY B TO LAUNCH ALL DIGITAL TV NETWORK

The British Broadcasting Company and Rupert Murdoch’s B sky B network are teaming up to create a new all digital television service in the United Kingdom. According to news reports, the terrestrial service called Freeview will be launched on October 30th. It’s purpose is to fill the void left by the collapse of I-T-V Digital Television. If successful, it will give Great Britain a let up on the rest of the world by being the first nation with an all digital network.

http://www.reuters.com/news_article.jhtml?type=search&StoryID=1530266 (Media Network)

**

INTERNATIONAL - NEW ZEALAND: HAM RADIO WALKABOUT

Well known land hiker Tony Whitiker, G3RKL, will be walking in the north island of New Zealand during the month of October. Tony will be walking from east to west and will be on the air using the callsign ZL6WFE. He will be on the New Zealand national repeater network and hopes to send Slow-Scan Television pictures live via the Internet Radio Linking Project gateways. (Q-News)

**

ON THE AIR: NEW PROPAGATION BEACON FROM FN20

On the air, Steven Kerns, N3FTI, in Reading, Pennsylvania reports over the VHF Reflector that he has established a new 2 meter propagation beacon from grid square FN20. Its on 144.279 Mhz running 4 watts out into a Discone antenna but he plans to change that to a halo in the coming weeks. Steve is also planning a 6 meter beacon to operate from the same location. QSN reports go to Steve at his callbook address. (VHF Reflector)

**

DX

In D-X, VE7XF is going back to the Cook Islands next weak in a muilti-multi operation to take part in the C-Q World Wide DX SSB Contest. He and the gang will operate from Manihiki on North Cook Island as ZK1MA during the event. Before and after the contest they will spend as much time as possible on 6 meter C-W and S-S-B with the call ZK1AKX. Listen for the operation from Manihiki from October 18th to the 31st and then on to Rarotonga South Cook Island from November 1st to the 11th. QSL cards go to Ralph Parker, 5330 Wallace Ave., Delta, British Columbia Canada at postal code V4M 1A1 (GB2RS)

K5AND, W5OZI and W5LXG will be operating from Montserrat from October 31st through November 8th. The trio will be focusing most of their attention on the 6 meter band using a Yaesu FT-897, a 7 element yaggi and radiating about 800

watts out and a Morse beacon on 50.155 Mhz.. From 20 to 10 meters they will run about 100 watts out. They say that the location is ideal for making 6 meter contacts across Europe, Africa and maybe even into the United States. As we go to air the most likely call sign they will use is VP2MJD. If you work them, Q-S-L as directed on the air. (VHF Reflector)

And Nick Peckett, G4KUX, operating as YA4F, has made what he claims is another first-ever contact on 6 meters from Afghanistan. Nick is now claiming that at 11:08 UTC on the 27th of September he worked VK6JQ in Broom, Western Australia for a YA to VK first on the Magic band. (G4NJH)

And G4IUF is on vacation in the Galapagos Islands. He hopesto be active on C-W and SSB from San Cristobal Island through the 23rd of October. He has requested the callsign HC8UF. (RSGB)

**

THAT FINAL ITEM: FIRST 'eDX100' AWARD TO 4Z4DX

And finally this week, word that the first ever 'eDX100' award, issued on the basis of electronic - or 'e QSLs' - was awarded on the 25th of September to Dov Gavish, 4Z4DX of Ramat Hasharon Israel. The ‘eDX100’ award is billed by its sponsors as an electronic equivalent to the ARRL's DXCC but is issued for receiving electronic QSL’s from a minimum of 100 DXCC entities through the eQSL.cc system.

eQSL.cc or the Electronic QSL Card Centre which sponsors the award is operated by Dave Morris, N5UP, of Garland, Texas. It is supported by an advisory board of volunteers around the world.

And true to the nature of electronic QSL’ing, 4Z4DX will be able to print an ‘eDX100’ certificate on his own printer. He will also receive a full-color certificate and a walnut plaque in the mail. (eQSL.cc)

Just got my QSL to C91CU returned with the envelope open, but wonder of wonders, the contents, including IRCs, intact.

It only took 15 months since I sent it for it to come back!

Does anyone have late info on this station. The QRZ data is what I used so obviously, it is incorrect.

Amateur Radio Newsline™ Report 1314 – October 18, 2002

Amateur Radio Newsline report number 1314 with a release date of Friday, October 18th, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The FCC tells ham radio its not going to have to share 2300 Mhz. This story is first on Amateur Radio Newsline report number 1314 coming your way right now.

(Billboard Cart Here)

**

SPECTRUM ISSUES: FCC SAYS NO TO 2300 MHZ SHARING

First the bad news. The FCC has dismissed an ARRL petition that sought primary status for amateurs in the 2300 to 2305 MHz. Now the good news. The Commission has also turned down a paior of petitions from commercial interests that had hoped to share the spectrum with Amateur Radio. Amateur Radio Newsline's David Black, KB4KCH has more:

--
It's not just ARRL that the FCC turns down. The Commission also dismissed petitions from MicroTrax and AeroAstro--both groups had sought access to 2300 to 2305 MHz. The FCC says it's denying the two commercial applications in part because appropriate spectrum is already available elsewhere. And, according to the Commission, neither company had demonstrated a need for additional spectrum.

By way of background, an ARRL bulletin says that MicroTrax had wanted to establish a Personal Location and Monitoring Service between 2300 and 2305 MHz. The petition by AeroAstro asked to share the band on a co-primary basis with Amateur Radio. AeroAstro wanted to launch its Satellite Enabled Notification System messaging service.

But the Commission says AeroAstro's request did not go far enough in protecting other serevices. The agency was particularly concerned that NASA's Deep Space Network would not be protected by the modified out-of-band limits AeroAstro had proposed.

The FCC says that -- at least for now -- amateur weak-signal communications in the 2300 to 2305 MHz band will be protected if the amateur allocation remains as secondary. The Commission says band will remain in its spectrum reserve. The status quo will be maintained, then, until the FCC re-evaluates the status of the frequencies in relation to the Amateur Service at some point in the future.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.
--

The 2300 to 2305 MHz band is allocated to Fixed and Mobile services on a primary basis and to the Amateur Service on a secondary basis in all three International Telecommunication Union regions. The Radiolocation Service has a secondary allocation in the band in Region 1, and a primary allocation in Regions 2 and 3. (ARRL)

**

RESTRUCTURING: NETHERLANDS MAY SAY GOODBYE TO MORSE TESTS

Im Bill Pasternak, WA6ITF, with some late breaking news. It comes from the Netherlands where the Morse code could soon be going away. RSGB News reader Jeramy Boot, G4NJG, has the details:

--
The Netherlands is set to abandon the Morse code test next year. Rob van den Ent, PE9PE, reports that the Netherlands' national amateur radio convention took place the 12th and 13th of October. He says that the Dutch radio regulatory authority used the occasion to announce that if, as expected, Morse code is lifted as a mandatory requirement for an HF licence at nextyear's World Radio Conference, the authority would immediately eliminate the Morse code test in the Netherlands. At the same time, current VHF licensees would get direct access to the HF bands without further examinations.

--
More on this story in future Amateur Radio Newsline reports. (GB2RS)

**

RADIO REGULATIONS: BIG CHANGE AT THE ITU RADIOCOMUNICATION BUREAU

Ham radio has lost an significant post in the area of setting world radio policy. This, as a non radio amateur is selected to head up an important aspect of the International Telecommunications Union. From Brisbane Australia, Q-News Graham Kemp, VK4BB, has the details:

--
Valery Timofeev has been elected director of the International Telecommunication Union -- ITU -- Radiocommunication Bureau. Timofeev, who is Russia's deputy minister for communications and informatization, has extensive experience in radio frequency spectrum management at both the national and international levels.

Timofeev's election does mean for the first time in at least three decades, an non-Amateur Radio licensee will head the ITU Radiocommunication Bureau. The election took place during the 6th ITU Plenipotentiary Conference now under way in Marrakesh, Morocco. The meeting concludes October 18th.

From Q-News Australia, I’m Graham Kemp, VK4BB, reporting for the Amateur Radio Newsline.
--

The political signifigance of this change is obvious. Having a ham radio operator in this position gave the service considerable leverage in negociations involving spectrum issues. (Q-News)

**

RADIO REGULATIONS: HAM RADIO GAINS OBSERVER STATUS AT THE IARU

The International Amateur Radio Union now has observer status at ITU meetings. IARU President Larry Price, W4RA, was on hand to represent the organization at at a major ITU gathering which was held in Marrakesh Morroco in late September. And Region 2 Executive Committee member Tim Ellam, VE6SH, is now participating on behalf of the organization. (Q-News)

**

THE WAR ON TERROR: COMMUNICATIONS STANDARDS ADOPTED

Back here in the United States, the communication industry has adopted emergency procedures intended to help maintain the nation's telephone, cable and Internet networks in case of a natural disaster or terrorist attack. The procedures were developed by a council of more than 50 industry officials formed by the Federal Communications Commission in January.

The group adopting the standards is called the Network Reliability and Interoperability Council. Their job was to recommend ways to strengthen communications networks to resist attack. The plan all have now agreed to will help companies in a crisis contact and work with partner firms to keep services running. (NRIC)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the AA4ED repeater serving Broward Ounty Florida.

(5 sec pause here)

**

ON THE AIR: IRLP NODES TO GET AN EXTRA DIDGIT

Changes are in the air for those of you involved in internet radio linking. This, to permit an increase the number of possible I-R-L-P nodes to over 99 000.

Right now most I-R-L-P users will not notice any difference. Eventually IRLP node codes will increase from three numbers to four. The result is that node 640, for example, will become 6400. (G6PHF/Bass IRLP Group via APC News)

**

ENFORCEMENT: FOUR LICENSES CANCELLED IN EXAM INVESTIGATION

Turning to enforcement news, a group radio amateurs who did not show up for a retest are no longer membewrs of the ham fraternity. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “As a result of an audit by the Enforcement Bureau of the September 1st 2001 examination session given in Yucaipa California by the W5YI VEC, the Wireless Telecommunications Bureau has cancelled the licenses of four who did not appear for a retest. Those are Technician Camito E. Lopez KG6GJG and General class licensees Marcileno Llanes KG6HBR, Manual Vega KG6GSP and Marcial Rivas KG6HCP.
--

Duckworth says that the investigation into the exam session continues. (FCC, RAIN)

**

ENFORCEMENT: KENYAN PIRATES OFF THE AIR

Still in the enforcement arena, ham radio in Nairobi Kenya have gotten some relief from illegal operators. Kenyan Intruder Watch Coordinator Ted Alleyne reports that five High Frequency stations have been confiscated. Also, the operators of a Nairobi travel agency that was using 2 meter amateur frequencies were caught and equipment has been siezed. (Q-News)

**

ENFORCEMENT: IRANIAN JAMMER UPDATE

The 40 meter Iranian jammers we recently reported on are still being heard. Intruder Watch Regional Coordinator Martin Potter says that the jamming is being done to a low power station called Radio Mujahed. It’s being head in 10 Kilohertz steps from 7 point 010 to 7 point 090 Mhz. Potter says that S-W-L’s may find the same situation in the broadcasting frequencies as well. (Q-News)

**

NAMES IN THE NEWS: FCC CHAIRMAN POWELL COMMENTS ON MEDIA OWNERSHIP

Some names in the news. First is FCC chairman Michael Powell. He has warned that rules on media ownership will probably be struck down by the courts if they aren't modified to account for sweeping changes in the media landscape over the past 30 years. Powell's comments came shortly after the FCC released the results of studies suggesting that many ownership rules are outdated. The studies mark the foundation of the FCC's review of key rules on media ownership. (ComOnline)

**

NAMES IN THE NEWS: CULTURAL RESOURCE SPECIALIST NAMED

The C-G-C Communicator reports that Dr. Amos J. Loveday, Jr. has been appointed as the "Cultural Resource Specialist" in the F-C-C’s Wireless Telecommunications Bureau's Commercial Wireless Division. His job will be to

insure that tower and antenna siting projects comply with the requirements of the National Historic Preservation Act of 1966. He will also assist the FCC in establishing a closer working relationship with Native American Tribes and Native Hawaiian Organizations. (CGC Communicator)

**

NAMES IN THE NEWS: KB5HAV APPOINTED ASST MGR OF HURRICANE WATCH NET

Bobby Graves, KB5HAV, of Pearl, Mississippi, has been named as the Assistant Manager of the Hurricane Watch Net. According to the ARRL Letter, Graves appointment was announced by Mike Pilgrim, K5MP, who is Manager of the net. More information is on the web at www.hwn.org (ARRL)

RESCUE RADIO: AOL SIGNS ONTO AMBER ALERET SYSTEM

The worlds largest Internet service, America Online, says that it will soon begin transmitting Amber Alerts. The service says that the alerts about abducted children will show up on the screens of computers, pagers and cell phones of more than 26 million of its subscribers in dozens of states and cities beginning in early November. Warnings issued by most communities that use the system will go to AOL users in those areas who request to receive them. All but one of the existing Amber Alert systems are participating in the America Online project. (AoL)

**

EMERGING TECHNOLOGY: X-RAY EYES

If you thought only cartoon super-heros like Superman could see through walls to detect the villains, guess again. New technology called ultra-wideband will soon allow mere mortals to detect objects buried underground and to build cars enhanced with sensors that help avoid collisions.

According to press reports, ultra-wideband uses millions of narrow pulses each second to get an accurate reading of location and distance, opening the door for new applications in radar tracking, precise positioning and wireless communications. The possibilities vary from short-range computer networking for homes to devices that determine the location of golfers on a course.

What regulators like even better is that ultra-wideband devices can work within frequencies already allocated for other radio services -- helping to maximize this dwindling resource. The Federal Communications Commission believes the technology is so promising that the agency has proposed allowing it to be used on an unlicensed basis.

But it may be a while before the new technology is available. First, government agencies and private groups are testing to make sure ultra-wideband can safely coexist with other services, like the Global Positioning System. More information is on the Ultra-wideband working group website at www.uwb.org (Science Today)

HAM RADIO IN SPACE: PCSAT - HELP NEEDED TO BUILD A NEW BIRD

Bob Bruninga, WB4APR, of the P-C-sat Project Team has put out a call for an antenna designer for the next generation of this type of ham satellite. According to Bruninga, to get a free ride to orbit for P-C-Sat the satellite must fit inside of a perfectly spherical but totally passive mirror surfaced 18 inch diameter ball. Also, the antenna must be totally internal with no external protrusions.

To make it happen, the P-C-Sat team at the US Naval Academy Satellite Lab, needs a good RF designer and antenna modeler to help out. If you can help, please contat Bob Bruninga by e-mail to wb4apr@amsat.org. P-C-Sat is scheduled for launch in less than a year. (AMSAT BB)

**

RADIO IN SPACE: GOVERNMENT CONTRACTS FOR NREW WESATS

The government has selexcted TRW Space and Electronics to build the fleet of next generation weather satellites. The Redondo Beach California unit of Cleveland Ohio based company will build two satellites with options for up to four more.

Eventually six new polar-orbiting satellites will collect data on the Earth's weather and climate, as well as its land, oceans and atmosphere. The birds will go into orbit between 2009 and 2018. The contract to build the new weather satellites is worth up to $4.5 billion dollars. And that’s billion – with a B. (Published reports)

**

INTERNATIONAL – AUSTRALIA: THE CB MOUNTAIN CHALLENGE

Turning to the international pages, C-B operators in Australia are about to embark on what is best described as a cross between an emergency training operation and a contest. Its called the Mountain Challenge where the object is to accurately pass a message around the state of Victoria using C-B radio.

It will all take place on Saturday the 30th of November. Both 27 MHz and U-H-F C-B radio is used to get the message through. And this year the event will extend beyond Victoria, with C-B’ers in Mount Gambier and Tasmania having expressed interest in taking part.

Find this interesting? Want to learn more? Well you can – on the web at www.mrc.cat.net.au. (Q-News)

**

INTERNATIONAL - AFGHANASTAN: KANDAHAR GETS TV

A new television station in Kandahar Afghanastan is being called a resounding success. This even though the signal is so poor the Afghan musicians shown in the first broadcast looked like grainy, quivering ghosts. According to Abdul Ali who heads up broadcasting in Kandahar, all of the equipment is than 20 years old and had not been used at all during the years that the Taliban ruled the country. (Media Network)

**

INTERNATIONAL - CANADA: VE3CT WLECTED QCWA PRESIDENT

For the first time in the history of the Quarter Century Wireless Association a Canadian radio amateur has been elected as its president. Croft Taylor VE3CT , who previously served as vice president, assumed office on September 1st and will serve a two year term. The QCWA was founded in 1947. You can learn more at www.qcwa.org (RAC)

**

DX

In D-X, A group of five American operators will be active using ZK1 callsigns from Manihiki in the remote North Cook Island group through the 31st of October. They will be active on 6 to 160 metres on CW, SSB and RTTY. During the CQ World Wide SSB Contest on the 26th and 27th of October they will use the callsign of ZK1MA. (GB2RS)

9V1SM is Sasi, a new operator from Singapore. He is active on all bands from 40 to 6 metres, mainly on SSB. He also plans to start PSK-31 operation in a few week's time. (RSGB)

Lastly, the new address for the ARRL W 5 Incoming QSL
Bureau is O.K.D.X.A, PO Box 2591, Claremore, Oklahoma 74017-2591. If you have cards for W-5 land, send them there. (ARRL)

**

THAT FINAL ITEM:

WITH THE SCOUTS: JOTA THIS WEEKEND

This weekend, the 19th and 20th of October, is the scouts Jamboree on the Air, or JOTA. Bruce Tennant, K6PZW, tells us what its all about:

--
The Jamboree on the Air is an annual event. Every October a half a million Scouts and Scout Guides all over the world take to the airwaves to make contact with each other by means of Amateur Radio.

The World Scout Bureau owns and operates its own Amateur Radio station. The the call sign H-B-9-S and it operates from a permanent radio room located in its offices in Geneva Switzerland. The station normally operates during Scout Nets and other major scouting events like the Jamboree On The Air. This year, the station is active on 160 through 10 meters in a number of languages.

Here in the United States, the big JOTA gathering takes place at Camp Wisdom near Dallas, Texas. The call sign to listen for from there is K2BSA slash 5. Other stations expected to take part include GB2GP in London England and JA1YSS from Tokyo Japan.

If you are hearing this newscast before or during this years Jamboree on the Air, get on the air and show your support of the worlds youth and of scouting by making contact with a J-O-T-A station. Who knows, it could evenb be HB9S.

For the Amateur Radio Newsline, I’m Bruce Tennent, K6PZW, in Los Angeles.
--

Again, this weekend, the 19th and 20th of October, is the 2002 Scouting Jamboree on the Air. And if you are hearing this newscast later in the week we hope you had time to contact a Jamboree station. (ARNewsline™, Q-News, GB2RS)

The only current XY operation that I'm aware of is the one by XW2A (Hiroo) who is scheduled to be in Burma between today and November 5. I believe that this is a one-man operation. I've seen no spots for him, so he may not yet be on the air.

***To be candid with you Dan, there has been a rash of messages over this newsgroup that were totally unrelated to Amateur Radio DX and that prompted my first reply to you. If your a U.S. CBer, I think, but not certain, long haul DXing is illegal, although your rig is capable provided you have a decent antenna.

DX is simply an abbreviation for working out of area stations. In the case of Amateur Radio it means working stations outside of the 48 states. May I suggest that you investigate obtaining an Amateur Radio license instead. Try http://www.arrl.org for more information on the Amateur Radio Service.

Good luck
Murray, K3BEQ

Thanks. I'm in Canada (northern Ontario), and assuming it is legal to transmit outside area stations, is a Wilson 1000 and a Uniden Grant LT (with the choke tuned to 9 watts on AM) a good combination to DX? By the way, the guy at my local radio shop also did a modification that gives me about 80 surplus frequencies above and below 27MHz. What freqs do DXer's hang out on? And finally, how do you get a call sign.. I see your's is "K3BEQ". Does that come with the amateur Radio License?

***Final reply. Before you use your CB with it's modification, I would
check your Country's communication regulations to determine if what
you have and want to do is legal. There may be some very stiff fines
and possible imprisonment involved. You especially DO NOT want to
have your transmitter transmit out of the legally allocated CB bands
and NOT exceed the legal allocated power requirements. In the U.S.
there are no callsigns nor licenses associated with CB operation,
but there are power limitations.

Conversely, Amateur Radio in both of our Countries requires testing
and a government license with callsign issued. Good luck but
please be careful with what you do with your CB rig, especially
modifications and out of CB band operation.
Murray

3151. QSLing direct ?

Newsgroup: rec.radio.amateur.dx
Date: 2002-10-21 01:35:57 UTC
From: lombryt@hotmail.com
Message-ID: <db35a0c.0210201735.42ea2b19@posting.google.com>
Source record: 11777

Hi,

I am preparing several hundreds of QSL to send all over the world after have wait about 2 months long that Bevione print them...

Question. Do you have encounted some difficulties to receive QSLs from the new eastern european states (from white russia to republics behind Ural to Murmansk, including, EM, ET, EY, 4K, 4L, UA0, UA9, UA1, UA2, etc).

If my files are correct, all these DX have a QSL buro but do you have some DX for which you 'd suggest me to send QSL direct only (including IRC+SASE) to avoid e.g. lost of my QSL, or in the best case maybe some years of patience to receive the QSL back ?

If you have similar bad experience with other DX (far east, S.america, Africa, micronesia, etc) that suggested you to send QSL direct, please give me more information about these DX too (a "red list" of suspected DX)

FYI usually I send QSL direct for all the "most wanted DX" (the 50 first surely, maybe 100 depending if I already have its QSL or not).

My QSL budget is not unlimited but I can send some hundreds of them direct.

Thanks

73

3152. DX where IRC are no valid ?

Newsgroup: rec.radio.amateur.dx
Date: 2002-10-21 07:38:47 UTC
From: Thierry Lombry <lombryt@hotmail.com>
Message-ID: <3db3aed5_1@news.vo.lu>
Source record: 11778

Hi,

ON5NH just told me that IRCs are not valid in Lebanon and that each mail (QSL sent back) costs around $1.5.
I also know that in VK, the postman request 2 IRC in place of 1 to get the change and send the QSL back.

Do you know other countries in which 1 IRC is not enough to send back a QSL ?

Subsidiary question :
Do you know countries in which IRC are not accept but were the GS (1 to 5 $) are ?

Thanks

Thierry

Easy?

The VK9ML DXpedition earlier this year had their logs on-line within 12-15
hours if I recall correctly. That team probably set world records.
Why can't others do that as well then?

Good grief. A few years ago there were no on-line logs. A few years
before that there weren't any on-line QSL info databases, packet
clusters, Internet spots, etc.....

I can see it now, the "Quickest On-line Log" contest. Entry classes
could be: 'QRP' (486 processor-dialup modem), 'Single Op-low power'
(P-III, 400 MHz or slower), 'Multi-Multi' (Two-way satellite link-Sun
server)....

That is correct. BTW, Puzant's call is OD5NH not ON5NH <grin>.

>I also know that in VK, the postman request 2 IRC in place of 1 to get the
>change and send the QSL back.

I've heard this as well, and is yet another reason why I never use
IRCs. The Australian dollar is worth about 50-55 cents US, and the
stamp price for a card to the US is $1.25 I believe (may be $1.50--I
don't have my list or old enveope in front of me). One GS will be
more than enough for your VK station' soperator to send your return
card back.

>Subsidiary question :
>Do you know countries in which IRC are not accept but were the GS (1 to 5 $)
>are ?

Thierry, in all seriousness, unless a DX station specifically asks for
IRCs, do yourself a favour and send one (or maybe two) GS.

How easy is it for you to get GS's at your location? Do you local
banks usually carry these?

Or try mint stamps if these are easily available to you.

Now I have a question to you about IRCs. When you go to buy IRCs, do
all your postal clerks know what they are, and how to stamp them
properly? Conversely, have you ever tried redeeming them? If you have,
did you ever run into problems?

Update the log after every contact. If you get good at it, maybe you
can hit a rate of 5 Q's/hour or better.

What do you mean there's no T-1 internet service on Heard Island?

I just checked the ZL7C logs and they are currently 24 hours old! Talk about
irresponsibility. All those lazy guys want to do is make contacts,
apparently.

I can recall waiting months (or years) for a QSL to know if I was in
the log or not. Oh, the stress....

Hi,
Strange this definition... Here in Europe we consider that DX is
outside... the continent, so to US, Africa, etc.
This difference explains probably why when we call CQ DX we sometimes
(often) hear local stn answering our calls, Hi...

My mistake.

NB. I do no more find the post but Puzant confirmed me yesterday that
he do answer to all QSL he receive (if sufficiently charged, as
everybody does I think) and all his 5 email work fine (hotmail, qrz,
etc).

Right. A VK OM confirmed me that to send his QSL back he must charge
$1.5 vk. but that "it only cost 1 IRC to send the QSL back to UK"

>
> >Subsidiary question :

> >are ?
>
> Thierry, in all seriousness, unless a DX station specifically asks for
> IRCs, do yourself a favour and send one (or maybe two) GS.

My question was serious as I usually send IRC in place of GS because I
have though that it was easier to go to the postoffice with an IRC
than with a GS... but I am always afraid that someone stoles the GS
included in the envelope. Anyway I will probably change for GS when
QSLing to all "secure" DX (see below) using opaque envelope.

>
> How easy is it for you to get GS's at your location? Do you local
> banks usually carry these?

No problem indeed (and surely not in LX known for in 300 banks, Hi),
excepting that that can be if I sent GS to Irak or USSR... There are
chance that my QSL never reach the recipient :-((

So my philosophy is as follows when I QSL direct:

- First I read the qsl.net or I send an email to the concerned OM in
case of the ham has recommendations
- For countries where IRC are not valid (see N6DHZ irc-chart on
qsl.net or similar pages) or in very poor countries lacking of
ressources I send 1 GS (up to 5 GS but this is exceptional if I feel
that this could help the OM).
- Excepting DX where IRCs are not valid, in all other "civilized"
countries I send only 1 IRC (up to now).

I use this procedure to send 20-25% of my QSL and it is 99.5% sure (I
receive all QSL back), the 0.5% remaining being related to pirates
stations or bad adresses.
See more comments on http://www.astrosurf.com/lombry/qsl-gs.htm (soon
updated)

>

> did you ever run into problems?

Here at least (in LX), postal clerks know the problem (or I remind
them).
But the NEW IRCs (published from 2001 i think) stated in the front
side that the stamping is optional, so there is no more problems to
convert them in local stamps.

But I will update my "gs" page with some of the comments published on
this post as for VK e.g I stated that OM need 2 IRC where i had the
confirmation by VK OMs than 1 IRC (or 1 GS) is enough (in fact in VK 1
IRC costs $2.5 vk and the stamp costs $1.65 vk or for card only
airmailed $1.10 vk).

Thanks for yr comments

It's optional for the earlier version as well ("facultative" in
French, it says so right on the front).

Don't you understand, Wes. These "instant gratification" types want
to get their license (no-code) on friday afternoon. Enter CQWW (SSB)
on friday night, and have DXCC Honor Roll verified and plaqued by ARRL
by the next monday morning. Then they can get on I'net and bitch
about ham radio.

cynically yours,
unkadean -

I got my first OD card from him with about a 1 month turnaround at most. I since got him on 20, and I still haven't gotten a card in 6 months, so who knows. I have since gotten a couple of other OD's, so I sent Puzant another via the bureau just as a courtesy.

>Right. A VK OM confirmed me that to send his QSL back he must charge

Yet I've been told by several hams that the Australian post office wants 2 IRCs for international postage. Feh.

Not all post offices understand what to do with IRCs is my point. I suspect that's the case because my rate of return with IRCs is substantially lower than it is with GS's. I've gotten some back with IRCs--mostly to places like Western European countries with good or excellent postal systems. If you're QSLing neighbouring countries, then I'd certainly consider IRCs. If you're looking at rare entities without European or American/Canadian managers, then I'd consider IRCs if the op agrees or asks.

I've sent both GSs and IRCs to the ex-USSR republics, and neither of them get good results. For rare places like Azerbaijan and Turkmenistan and Kyrgyzstan I've had success with 2 GSs, yet nothing has gotten me a card from Moldova yet and I've only received one from Kaliningrad. RM1V (I can't spell it or pronounce it, sorry) took one GS and I got it in 3 weeks from a Moscow manager.

>- First I read the qsl.net or I send an email to the concerned OM in

I can't think of one country I'd send $5 for just a QSL exchange. I will send more than that as a donation to the big DX Peditions (I'm not very well off, but without the serious equipment the Big Guys bring to places like Chatham Island or Trindade or Cocos Island, I'd never have a chance if all they were running were 100W/dipoles!!)

Well, maybe I'd send that if that card gets me onto the Honor Roll, gives me my 5B-DXCC or even my WAZ (DAMN, I wish I could hear JTs and DUs in NYC!!). Other than that, $1 or $2 should be sufficient.

>But the NEW IRCs (published from 2001 i think) stated in the front

With no intention of starting WW4, Craig, I'd like to ask you a question. Questions like yours always leave me wondering.....

If you worked (talked to) FR/PA3GIO and you wanted to know where he was, why didn't you ask HIM? Nobody knows better where HE is than HE does.....

Did you feel intimidated because he's a Rock Star and you didn't want to bother him with questions or what ?

73, Jim KH2D

3175. Update : how many GS for a QSL

Newsgroup: rec.radio.amateur.dx
Date: 2002-10-24 10:31:42 UTC
From: Thierry Lombry <lombryt@hotmail.com>
Message-ID: <3db7cbd7$1_1@news.vo.lu>
Source record: 11951

Hi,

I sent several hundreds QSL direct these last days taking care to stamp the enveloppe and including all GS or IRC as necessary.
As I contacted several OM from remote countries to get more information about the GS they requested, I would like to say there are some mistakes in the chart displayed on the website http://www.qsl.net/n6dhz/irc-chart.html

I can confirm the next values related to GS :

OM you worked/heard in Europe :
In Europe today 1 US dollar if about 0.98 euro, so say $1 = 1 E. To stamp an enveloppe including a QSL to send to the most far country (e.g. JA, VK, CE, Pacific islands) the post office requests 0.74 euro (about US$ 0.8).
By default all mails are nowadays send by air (including intra-europe).

So contrarily to what is listed on the above referced chart for any european country, including 1GS in your enveloppe is much enough for ON, DL, HB...
The OM requesting 2 GS are not only QSLing for the pleasure, but do money too...
An OM from PA and working in Thailand even try to request me 2 GS to send me back his QSL to LX, 300 km away, where 0.5 $ if far enough... His benefis should has been of 1.5 $ for each OM contacted !

Eastern European countries :
Most request only 1 GS or 1 IRC, excepting Armenia, Georgia, Ukraine, and oblasts behind Oural montains where I suggest you to send 2 IRC or 2 GS (those republics and other oblasts are quite poor) or to work via the Buro, no problem.

Japan :
Today 1US$ is around 120Yen in the market. The postage to Europe/US/VK/CE from Japan is 110Yen at least. So, usually one Green Stamp is enough for return the QSL in an enveloppe by airmail, not 2 GS..

Australia :
Confirmed teh return postage cost about 1GS.

A+
Thierry

Holy cow!

What an expensive hobby you have there, Thierry!

The bureau is much less expense, if slower. This hobby
is expensive enough with out adding the costs of a direct
QSL exchange.

Thanks for your research on the costs of direct mailing
of QSLs in various countries.

Hi Gary,

people just don't answer back anymore when you send cards by the
bureau.

I have to agree with Thierry.

It USED to work and It still works for about 20-30% of the cards, as
they'll come back by the bureau.

I waited 14 years to confirm about 60 DX QSL cards and 35 states via
the bureau.
I then sent GS and IRCs and SASEs last winter, direct.
I now have my all my 50 states on CW, 50 on RTTY, 50 on phone, and 110
DX confirmed. (I still need to send 50 DX QSL soon)

So, instead of losing 80% of my cards, I chose to send the ones I
needed direct.
I had 90%+ returms, still losing 10% of them (I still hope to get an
answer back).

Is it more expensive to print more cards, or to send one GS to the
right person. Anyway, it works.

I reply to all the ones I receive by the bureau and still send the
ones I don't really need, via the bureau! (same countries, on other
bands, modes, etc)

I deplore this fact, but since I was faced with poor returns by the
buro, I had to rely on plan #2, which is send them QSLs direct.

Thierry, the cost from Germany to the United States is 1.53 Euro
(roughly $1.49). The cost from Switzerland to the United states is 2
Swiss Franks (roughly 1.36 Euro or $1.32) for economy (7-20 days) or 3
Swiss Francs (about $2.00) for less-than-one-week delivery. I believe
the rest of Western Europe is under $1/1E. Currency conversions done
through xe.com's universal currency converters.

Rodger, rodger on all that Stephen said.
I'm fairly new to DX and haven't used the Buro
once. I'm not very active, but I've got about 55
DX from Vannuatu to Uzbekistan, from Moldova
to Algeria , from Svaalbard to Antarctica.
All direct, all worked (or applied for) in 2002,
all recieved within six months. Losses were
about 10% also. Most losses were from South
American countries which surprised me as I
thought our economically oppressed comrades
in the (former) Eastern Bloc would have the most
Postal corruption. Actually, they were very good
about replying and sent nice cards.

I was warned here earlier about the dangers and
expenses of going direct, but I can't imagine wanting
to wait years for my first DXCC when a couple hundred
spread over a year or less would do it so much quicker.
I'm not rich or arrogant but even at 2GS per envelope
plus postage and QSL printing, etc. you're still only talking
about a dollar a day over one year more or less.

Das Vedanya !

Andy,

That's all OK. It is a more expensive way to QSL,
but we all have to make decisions about where
to put our hobby dollars.

I used to be a lot more gung-ho about QSL cards too.
I guess that age and experience has changed my
attitude a bit, but it still nice to get a card for a new
one be it via the buro or otherwise. Got a JW card
last week through the buro for another new one.

My favorite DX activity is ragchewing. This has
become more difficult partially because of the
constant "5-9 QSL via buro" activity of the postcard
chasers. But, it's all good I suppose, it just depends
on what you want to do. I agree with Jim, KH2D, on
that subject. Check out his web page for an interesting
take from the other side of the fence!

73 All!

Hi Thierry,

What I would do is visit an online callsign server and check for any
special QSL routes for any of your contacts.

http://www.buck.com/cgi-bin/do_hamcall

Is a good one I use regularly. A lot of Eastern European hams
recognise difficulties in mailing and receiving and often use
British or American QSL managers.

Hope this helps !

HI,

I agree but there are few QSL comming with a jacket, etc. Some rare
DXpedition, maybe 10 QSL in 1000 or much less.
However I shoudl accept anothr argument oo, the fact that the OM
printing QSL does not want to loose his/her money. But personnaly I
don't take in account this factor. My 9000 QSL cost me about 350$
maybe (I don't remember the correct price) and I'm going not to divide
the price of my QSL by the number of QSO to ask the just price to each
OM... I'm an amateur enterprise not a financial one, Hi !

Anyway your argument is valid and I note it.

>

The conditions are similar for every OM/YL everywhere, isn't it ?
It is even worst for the most wanted DX that are subjects pile-up from
the moment they say "hello" just 1 second on the air...
I accept such DX request some more money for the hard job they do in
working pile-ups... but not for DXpedition that receive thousands
dollars (and much more) to be on the air !

But spending or worst loosing his/her time on the radio is IMO not and
argument. This is a hobby for everybody, what means that we don't have
to speak about money, but only pleasure. DXpeditions are another
affair.

Hi,

Good to know.
But how is that possible ? F, ON, and LX request only 0.74 euros (same
in US$) to send worlwide a QSL in an enveloppe by air, with a
SASE+1$... I have hundreds of QSL confirmed this way.

Of course I also know that some ON hams request 2 IRC for sending QSL
back by mail to US or at 20000 km away (LP !) I cannot understand this
price. There is no financial reasons, and the postman clerck is agree
with me.

300 km away DL request twice that price ? Why in DL and HB and not in
OZ or LA... Surely a "political reason". And our dealers speak about
Europe... This confirm we are far to be a true union...

Hi,

Holy cow ? I didn't know that expression...
All my hobbies are indeed expensive (diving, parachutism,
astronomy...), Hi !
But I don't like to lose my money for nothing...

But contrarily to what i stated, I send only very few QSL direct to UR
or UA with GS or IRC knowing how special can be the post "control" in
those coutries regarding GS.

I checked my log, and for the last 6 months there are only... 1 QSL
direct (to Murmansk, UA9ZZ) in about 1000 qsl sent (buro or direct).
All other QSL that I sent to UR/UA and direct only if there is a QSL
manager in western Europe or in the USA.
Otherwise they are all sent via buro, and that will take the time it
needs... its is pity but even if I have some budget to QSLing direct I
prefer that my $$ reach their recipient and that nobody steals them...
Not crasy... (and not millionnaire !)

Hi,

Wasn't it a pirate station you heard in place of the K1B...

Have you check their on-line log on http://dx.fireroute.com/kh1/

Hi,

My 5(euro)cents contribution.

Sometimes (I did it 2) when these mails comes back, I call my
telephone company in order they help me to find the good adress of
this people. I call them from ON or LX because sometime I get a better
and more accurate answer in one or in the other country (i live in
LX).
They never accept to give me the phone number but at least his/her
address.
That cost me the price of a local telephone communication.

NB. This is also this way that my ex-girlfriend found me. She knew my
name, where I worked. She took 2 weeks to find my phone...

Do a similar way, Hi !

Be advised that in many Latin American countries there is no residential
mail delivery, or sometimes there isn't delivery in certain parts of a
town, or the local PO has excessive delivery charges.
I've experienced all three of those scenarios. Thats why you often see
them using a local radio club PO box or something like that.

I do respect experience. So I can understand there's a big
difference between card # 100 and card # 1000. I made the
switch over to chasing DX after spending 8 mos. in the net
called "The 3905 Century Club" where I got an 80M Only WAS.
Though many here might scorn at using a net, I felt it would be
more traditional to start with a WAS first and the added challenge
of 80m Only on a home-brewed wire vertical hanging from the Elm
tree in the back yard made me feel OK about using a net to get it.
(" KH6IX , You are 2/2, 2/2, rodger !! ?? !!) -- Hi, Hi. At least I did
actually hear him.

I can see our opinions may differ based on our experience. It will
fun to see if you one day catch me giving your advice to some newbie.
As for Ham money, however little you have I'm sure I have less. But
still, going to the Ham-fests I don't see how $300.00 US would make
much of a dent. For a collector/builder looking for some odd part maybe.
But I suspect Operators (even little ones like me) quickly assemble their
station to get on the air. After that, it's all about upgrades and that will

cost mucho dinero these days. 300 won't touch it. So it makes sense for me to spend my money confirming results now and worry about "tweaking" my station to Big Gun status later.

Thx fer your words,

KG4JBM

I get more cards back from some of the rarer countries via the bureau
than from the USA. A couple of years ago I sent cards for a bunch of
US hams to a manager in the US and never got a thing back.

Hi,

Are you licenced ham radio ?

and are you interested in amateur astronomy too, or professional ? I mean you have some background in that matter, you own a telescope > 100 mm aperture, or you know well astrophotography, or the sky, etc.

I would like simply keep a list of some amateurs, licensed but also SWL, working in both hobbies, like me, a way to exchange some information one or another day.

A short summary of your activity 'd be welcome (not mandatory)
Give me also your callsign (I presume you are listed on QRZ.com) or the URL of your website.

Thanks in advance.

3213. ARNewsline 1315 - Oct 25 2002

Newsgroup: rec.radio.amateur.dx
Date: 2002-10-28 05:36:47 UTC
From: radionews@aol.com
Message-ID: <20021028003647.28678.00001346@mb-mv.aol.com>
Source record: 11989

Amateur Radio Newsline™ #1315 – October 25 2002

Amateur Radio Newsline™ report number 1315 with a release date of Friday, October 25 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham radio operator may have played a part in the apprehension of the DC sniper suspects, the U-K says no more new operators in its 5 megs experiment and the ARRL says no to unlicensed visitors sharing a United States ham radio band. These stories are first on Amateur Radio Newsline report number 1315 coming your way right now.

**

RESCUE RADIO: HAM RADIO HELPS NAB THE DC SNIPER SUSPECTS

A ham radio operators may have played a role in the apprehension of two men wanted in connection with the sniper shootings in the Washington DC area. ABC News interviewed the trucker who called the police to report he had spotted the two suspects. When asked how he heard about the description of the vehicle, his response was that he heard it while listening to Bozo on WLW radio

Now, Chip Margelli, K7JA tell amateur Radio Newsline that Bozo in real life is Dale Sommers; callsign WB6OM. Sommers hosts a very popular late night trucker's show on the 700 Kilohertz clear channel station. His show is mainly music and information of interest to long-haul truck drivers. The description of the wanted men was just that. As a result the pair are in custody thanks to a trucker who was paying attention to what WB6OM had to say as “Truckin Bozo” over WLW in Cincinnati. (K7JA)

**

INTERNATIONAL: NEW PERMITS FOR THE UK 5 MHZ EXPERIMENT GOING ON HOLD

What happens when a propagation experiment gets a bit to popular? If you are a telecommunications regulator in the United Kingdom you might be inclined to temporarily suspended issuing further permits for hams to take part. And that’s what’s about to happen in regard to the United Kingdom’s 5 Megs experiment. From Nottingham England, here’s Jeramy Boot, G4NJH:

--
The Radiocommunications Agency says that applications for 5-MHz band experimental Notices of Variation or NoV’s have far exceeded their expectations. The R.A. now considers that the risk of congestion on the five spot frequencies allocated may be detrimental to the overall success of the experiment.

Accordingly, the RA has decided not to issue any further NoV’s for applications received after the 31st of October. The position will be kept

under review and occupancy monitoring of the frequencies will be carried out. It is hoped that ollowing this exercise - more NoV's could be issued, or a numerical limit to the number of NoVs can be set based on usage and congestion. It is likely that an announcement can be made later this year for action early in the new year.

Jeramy Boot, G4NJH.

--

The United Kingdom 5 MHz experimental band was made available to that nations individual Full Class A hams by means of a Notice of Variation issued last July. The five 3kHz-wide frequency allocations are permitted for the purposes of antenna and propagation experiments. The Radio Society of Great Britain is in charge of the overall management of the project. (RSGB)

**

INTERNATIONAL: AN IARU UPDATE FROM PRESIDENT LARRY PRICE W4RA

Still in the international arena, we have a follow up to last weeks story on the International Amateur Radio Union. With it, here's our producer Bill Pasternak, WA6ITF:

--

We received a very nice note from International Amateur Radio Union President Larry Price, W4RA, following last weeks story about the recent meeting in Morocco. According to President Price, the news isn't the IARU observer status at Plenipotentiary Conferences. He tells Newsline that IARU has had this status since the 1998 Conference in Minneapolis. At that time the International Telecommunications Union Convention rules were modified to give the same privileges at Plenipotentiary Conferences as IARU already had at Radio Conferences.

President Price says that the real news was the special station, CN8UIT set up at the conference center in Marrakech. He says that this was a follow on from a similar station set up by the ARRL in Minneapolis and one eight years ago in Kyoto, Japan from the JARL.

Buy the way, the CN8UIT call is based on the French pronunciation of the International Telecommunications Union. For those of you unaware, the International Amateur Radio Union was founded in 1925 specifically to represent our service at international conferences. It has done so -- with great success -- ever since.

With a thank-you to IARU President Larry Price, W4RA, for that neat note, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.
--

In his note to us President Price says that the IARU has taken part in every major conference in modern years. Also that it will be there for all of us at WRC 2003 in Geneva Switzerland. (ARNewsline™)

**

INTERNATIONAL: ARRL ASKS FCC TO DENY US USE OF EUROPEAN/UK FRS-TYPE RADIOS ON 70 cm

The ARRL is saying no to visitors using unlicensed radios in our ham bands. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has more:

--
The ARRL has asked the FCC to deny a petition that would set aside spectrum in the 70-cm ham band for non ham use. This, for use by visitors from Europe and the United Kingdom to use their Personal Mobile Radio transceivers while in the U-S.

According to the ARRL Letter, the request was filed by Dr. Michael Trahos, KB4PGC of Alexandria Virginia. It asks that European PMR 446 type handie-talkies be allowed to operate license free while overseas travelers were in United States jurisdiction. PMR 446 hand-helds are similar to the US Family Radio Service transceivers but operate on eight channels between 446.0 and 446 .1 MHz. at up to a half watt out.

In his Petition, Trahos said that existing Part 97 Amateur Service rules precluding the use of PMR 446 radios in the US were essentially unenforceable and that granting his petition would have minimal impact on existing amateur operations. The ARRL countered by saying that there are obvious enforcement problems associated with the Petition. It says that putting the unlicensed users on a ham band is a formula for serious interference problems to be created.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.
--

As an alternative, the ARRL recommends that European and UK visitors simply purchase inexpensive FRS transceivers to use during visits to the United States. (ARRL)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N5IUF repeater serving the Lone Star State from Dallas Texas.

(5 sec pause here)

**

RADIO LAW: FCC REJECTS AMATEUR'S PETITION FOR RECONSIDERATION ON CC&R ISSUE

The FCC has turned down a Petition for Reconsideration filed by a Florida amateur. This, of the Commission's 2001 decision to deny the ARRL's Application for Review in RM-8763. That proceeding concerned the League's effort to have the Commission include privately imposed deed restrictions under PRB-1.

The ARRL says that the FCC dismissed its Application for Review last December 18th. At that time the FCC noted that PRB-1 more than adequately protects federal interest in promoting amateur communications from overly restrictive regulations.

Not long after, W. Lee McVey, W6EM, of Bradenton, Florida, filed his own Petition for Reconsideration Mc Vey claimed that it presented additional evidence that the FCC had not considered in dealing with the ARRL's petition. But the FCC disagreed. It says that McVey offered up no new evidence in the matter and has turned his petition away. (ARRL)

**

ENFORCEMENT: INDONESIA PIRATE UPDATE

An update now to our recent story on the problems being caused by pirate stations in Indonesia. Not only are they making life difficult for hams around the world. The pirates are also playing havoc with domestic Indonesian ham radio communications as well. With more, heres Q-News Graham Kemp, VK4BB:

--
Many reports covering Indonesian non amateurs using our frequencies in the 40, 20 and 10 metre bands are making their way to the IARUMS. There seems absolutely no control over their working and existence by the local Government.

It is very difficult for licensed Indonesian amateurs to find a clear frequency in the lower edges of 40mb for their authorised cmmunications. Generally the licensed Indonesians are around 7050,7055 and 7060 kHz for their traffic. 7050 kHz frequency, carries CW lessons for the intending future amateurs. Otherwise, the licensed ones, operate in their own nets and you can clearly identify their call signs in between, as per standard practice, though the entire conversations are in Indonesian.

Another frequency regularly used by a SE Asian group for two-way non amateur communications is 14044 J3Eu mode around 0100 UTC every day. IARUMS need the services of those knowing SE Asian languages to identify them, they may be from XV, 3W or XU area.
--

If you are a resident of South-East Asia and heating this newscast, you are requested to watch 14.044 MHz and help identify the unlicensed users. Please send that information to your nations Intruder Watch Coordinator as fast as you can. (Q-News)

ENFORCEMENT: PIRATE BOARDCASTING IN SAN DIEGO CA

Back here in the U-S-A, Bob Gonsett’s CGC Communicator reports on an entity calling itself Free Radio San Diego which announced plans to begin broadcasting on on 96.9 MHz.. The transmitter location and parameters are unknown but one person reports being in the town of Carlsbad California and seeing a spray-painted stenciled sign on the concrete walkway promoting Free Radio 96.9. Also, the operator of the station does have a web site at

www.pirate969.org What action the FCC may be planning on this one is unknown. (CGC Communicator)

**

ENFORCEMENT: BE CAREFUL ON 146.52

The has FCC issued and then retracted advisory notices to five Mid-West hams telling them that they were talking to long. This, on the national calling frequency of 146.52 MHz.

The letters said -- and we quote: “The frequency 146.52 MHz is customarily used, and is called for under the band plan, as a simplex calling frequency for Two Meter operation. Numerous communications from your station during the above dates have lasted from nearly half an hour to an hour. While band plans are not mandatory under the Commission’s rules, the Commission depends upon them to minimize the situations in which Commission intervention is required, and they comport with good Amateur practice under our rules. Please review Section 97.101 of the Commission’s rules” -- end quote.

The FCC origionally said that the October 16th letters went out following a review of complaints about the operation of their Amateur stations between September 19th and October 6th. The retraction was issued on Wednesday October 23rd. No reason was given for the withdrawal. (FCC)

**

ENFORCEMENT: FCC JUDGE FAVORS SCHOENBOHM'S RETURN TO AMATEUR RADIO

The ARRL reports that an FCC Administrative Law Judge believes the regulatory agency should permit Herbert L. Sahoenbohm to once again hold an Amateur service license. In rendering his decision, Judge Arthur I. Steinberg says that he believes Schoenbohm now appears to hold the requisite character qualifications to be a Commission licensee.

The FCC had designated Schoenbohm's license renewal application for a public hearing. This based on character issues stemming from a 1992 conviction and alleged lack of candor during subsequent FCC hearings on the matter. The former KV4FZ lost his bid to renew his ham ticket in 2000. He applied for a new license in 2001 which lead to the recent recommendation by Judge Steinberg. A final decision on whether or not to re-license Schoenbohm now must be made by the FCC itself. Schoenbohm has also passed an Extra class exam that is also pending. (ARRL, FCC)

**

THE INTERNET: DENIAL OF SERVICE ATTACK THWARTED

What investigators are calling a sophisticated and large-scale assault against the World Wide Web has been thwarted . But not before nine of the thirteen servers that manage global Internet traffic were crippled for a short time on Monday October 21st.

The FBI's National Infrastructure Protection Center said that it was aware of the denial of service attack and is addressing this matter. Service was quickly restored after managers put defensive measure in place bringing the attack to a halt. Most Internet users did not even notice the hour long attack whose origin is still not known. (WebNews)

NAMES IN THE NEWS: PAUL BLUMHARDT, K5RT, JOINS CQ STAFF

Paul Blumhardt, K5RT, has joined the staff of CQ Communications, Inc. as Director of New Business Development. Blumhardt, of Rowlett, Texas, will oversee efforts to broaden the base and the scope of the company's marketing activities.

According to publisher Dick Ross, K2MGA, Blumhardt has actually been part of the CQ "family" for the past three years, serving in a volunteer capacity as Worked All Zones Award Manager. Blunhardt holds an Extra Class amateur license, a commercial FCC General Radio Operator License and degrees in both engineering and business. Among his personal operating achievements are 5-Band Worked All Zones, 5-Band DXCC, 6-Band Worked All States, and #1 DXCC Honor Roll.

As all of you are aware, CQ Communicatoins publishes magazines, books, videos and other materials for the amateur radio and hobby radio fields. They are also a co-corporate underwriter of the annual Young Ham of he Year Award. (CQ)

**

THE WAR ON TERROR: A BANNER AND A LINK

Pieter Wycoff, KG4UPX, says over the Internet that he has found an important tool that every concerned ham should have on his or her personal website. Wycoff says that the Homeland Security Knowledge Database has a banner that can be posted to any website notifying visitors of the current status of alert to

terrorist threats.

The site also contains lots of other information relevant to homeland security and how you can play a part. You can even sign up to receive threat notification updates by e-mail. To learn more on how you can add this feature to your ham radio website, take your web browser to http://www.twotigersonline.com/resources.html.

And for those not aware, right now the nation is under color code Yellow which indicates an elevated level of alert. (Via Internet)

CONVENTIONS/HAMFESTS/CONFERENCES: AMSAT IN FT. WORTH IN NOVEMBER

The 20th annual AMSAT Symposium will be held November 8th to the 10th in Fort Worth, TX. The gathering actually kicks off with an Early Arrival Activity on November 7th and ends with the conclusion of the Board of Director's Meeting on the 11th. More information is in cyberspace www.amsat.org. (ANS)

**

SATELLITE NEWS: FCC DECLINES TO APPROVE ECHOSTAR-DIRECTV MERGER

The FCC has declined to approve the transfer of licenses from EchoStar Communications Corporation and the Hughes Electronics Corp. subsidiary DirecTV to form a new business entity. The FCC said that the companies did not demonstrated that approval of the transaction will serve the public interest,convenience, and necessity. The complete story is on the web at www.fcc.gov/Daily_Releases/Daily_Business/2002/db1010/DOC-227263A1.doc (CGC)

**

HAM RADIO IN SPACE: SOYUZ ACCIDENT SOLVED

A Russian state commission has set October 30th as the launch date for a Soyuz rocket carrying a three-person crew to the International Space Station. The decision was made after investigators determined that it was a probably a production glitch rather than faulty design which led to the October 15th crash of a similar launch vehicle.

For a while, it appeared that ham radio operations and everything else on the International Space Station might come to a grinding halt. Russia had threatened to suspend resupply launces following the mishap with the unmanned Soyuz ship which exploded seconds after liftoff, killing one person on the ground and injuring 20 others.

Such a delay would have had a devastating effect of future habitation of the space station. This is because the current emergency evacuation lifeboat vehicle is fast approaching the date on which it must be replaced. Only a Soyuz launcher can carry the replacement lifeboat to the ISS. If the Soyuz launchers had been kept on the ground, operations on the ISS might have been suspended. Thankfully, that wont be the case. (Published news reports)

**

INTERNATIONAL - RUSSIA: HELP LETTER MAY BE PHONY

A electronic letter purportedly from a Russian ham asking for financial assistance may be a phony. Then again, maybe not.

The letter showed up in hams mail boxes and on the numerous Internet news groups beginning on October 18th. Signed by a person calling himself Valentin, the note asks for donations of money and other gear. What has made many suspicious is that the writer never gives his call sign and does not use any ham radio terminology.

A number of people believe that the letter was actually sent by a spam-mail generating company or someone with a program that harvests e-mail addresses from the World Wide Web and generates automatic e-mail to them. There is even some speculation that the message did not come from Russia as the note itself claims.

Then comes a posting to the QCWA remailer from Lee Manning AK7T. Manning says that he e-mailed the writer of the message. Valentin replied that his callsign is RA3XAA. According to international call sign listings, RA3XAA belongs to Valentin Mikhaylin in Kaluga Russia. We have e-mailed him and are waiting to find out if he is the person who issued the letter and how he was able to get so many e-mail addresses of United States hams.

Meantime you might want to keep in mind two words. Caviat Emptor. Buyer -- or in this case -- giver beware. (QCWA Remailer, others)

**

INTERNATIONAL - THE NETHERLANDS: AUCTIONS NOT MANDATORY

Media Network says that a judge in Rotterdam has ruled that the next Dutch government will not be required to auction the commercial radio frequencies to the highest bidders. The ruling on Friday October 11th will impact on future spectrum auctions in that nation. (Media Network)

**

DX

In DX, GB2EVR is a new permanent special event operation for the Eden Valley Railway in the U-K. The station is located at the Warcop railway station, six miles east of Appleby-in-Westmorland, Cumbria. (GB2RS)

Also, JA2ZL will be active as F0/JA2ZL from Morea Island in French Polynesia from the 30th of October to 2nd of November. He plans to operate on 40 to 10 meters mainly SSB, with some CW and RTTY. (GB2RS)

And a milliwatt Beacon is on the air on 11 meters from Northern California. AOH is at the top of a very high mountain and operates under FCC rules part 15. This is the same as child walkie-talkie and can be heard on 27.125 MHz. The Beacon is on the air trying to make a point you don't need 20 kilowatts to DX. If you hear it, QSL to aoh@ computermail.net (APC News)

**

THAT FINAL ITEM: INNOVATION IN AMATEUR RADIO REWARDED

And finally this week, a big honor for a deserving ham. Amateur Radio Newsline’s Don Wilbanks, KC5MFA, has the details:

--

Brad Phillips ZS5BP has been rewarded for his innovation in Amateur Radio. This by being named to receive the South African Radio Amateur of the Year Award.

Phillips received the honor for his work in introducing the Internet Repeater Linking Project – or IRLP to that nation. South Africa Radio League President Sid Tyler congratulated Phillips on his achievements saying that IRLP is as much part of amateur radio as is HF.

But that’s not all. The award itself says that IRLP offers new opportunities for the development of the amateur radio service in South Africa. This is because it brings amateur radio within the reach of young people in schools and the older generation who, after retirement, often do not have access to High Frequency stations or other ham gear of their own. Phillips work brings ham radio to both.

For the Amateur Radio Newsline, I’m Don Wilbanks, KC5MFA.

--

The South African Radio Amateur of the Year Award is sponsored by Siemens. Its given annually by the South African Amateur Radio Development Trust to a ham radio operator who has made a major contribution to the Amateur service. (SARL)

>working pile-ups... but not for DXpedition that receive thousands
>dollars (and much more) to be on the air !
>

I agree with you on the above

Of course, I'm having fun when I work a DX station . Is it
reciprocical ? I hope it is fun for everyone. Most of them are not
really rare DX. Just DX to me !

about money:
Thats why I include a stamp or some money, so that QSLing won't become
a burden. It's like ordering myself a gift by mail.

But I'm not asking a free gift. I'm the one making the request here.
It is more like ordering merchandise by mail. Some goods are more
expensive more than others, if we agree on the price ...

Continuing on the subject of QSLs: If someone asks me to send him 2
GS or 2 IRC and he really does answer my QSL, he's being honest. He
is honest, because he told me his requirements and he respected his
engagement.

By the way IRCs are expensive here in Canada: 3.50$ Cdn or about
2.20$ US each, so if someone asks me for 2 GS, I'm getting a fair
deal.

Speaking of gifts, an additional little trinket like a local postcard, a
photo of the shack, or even a local radio station sticker is often
interesting to another ham, or his QSL manager. In my active managering
days I used to love those 'perks'.
These items cost less than a gratuitous extra green stamp and the guy
will likely save them and remember you.

The problem with QSL buros in these countries is that often it takes
quite a while for enough cards to build up and be sent. The buro service
works, but it takes far longer than you'd normally expect.

A Wilson 1000 and Uniden Grant is probably as good a combination as any. I used to work CB-DX in my time with a Realistic 5W radio and a 1/4 wave vertical on the rooftop. 4 watts more is probably going to make no difference when it comes to DX, no matter what the CB shop guy says.

You can use the frequencies above and below 27 MHz if you want, at your own risk. They're not authorized for CB or amateur use in any case.

My experience with "DX" on 27 MHz has been that it's erratic and not very entertaining. Half the stations ignore international transmissions, the other half don't hear you above the static, and the ones that do don't really know what DX means or what they should do. There's no DX infrastructure on 27 MHz, which means you can't QSL as easily (and what's the fun in DXing if you don't have a QSL to show for it?). Ham DX is far more interesting, and well worth the hours spent going over the material for the license exam.

The callsign comes with your license, it's unique and there's no other station with the same callsign anywhere else in the world. If you're interested in DX, get your license, you'll see it's well worth it.

Saints be praised! I finally got mine this morning. The report was hand-written (as opposed to computer generated), and the air-mail envelope from RZ3AA was postmarked October 22nd--so a very reasonable one-week trip through the postal system. The envelope did not have air-mail crossed out nor was a corner clipped, as I've often seen in mail from Russia.

My card was first sent May 7th, so almost a 6-month turnaround.

I received a interesting QSL card today from RA3GS. I sent direct and was actually suprised that I got a card back. Anyway, included in the envelope was this letter. Goto http://www2.1starnet.com/matt/letter/ and take a look at it. I'd like to know what people think about it and if you've received such a letter when sending for a QSL card from this station. He's asking for money. I got no problem sending him a little cash to help out if this is really legit and not some sick and twisted ploy to get money by preying upon the generosity of the ham community.. BTW: He sends a very nice picture full color QSL card so that just makes me more skeptical that this is legit and not a scam. Let me know what you think.

Thanks,

Matt

He's pretty well set for equipment to be in those straights, but if giving
him the benefit of the doubt wouldn't alter your lifestyle, it couldn't
hurt. You'll have a nice glow and he might need it a lot more than most of
us.

I've gotten some of these letters with Russian QSL's over the past few
years. Don't think it's anything new. I, however, have been asked
personally, because I am a Trustworthy Individual, by a number of
Prominent Government Officials in Nigeria and elsewhere to assist them
in transferring large sums from U.S. bank accounts. Maybe the RA's/UA's
could get in on that action :-)

I'm stealing lots of money from my employer - Perth & Kinross Council. It must be millions by now. Trouble is that it is a little awkard getting the money transferred without being caught.

I want to share that money with you Walt.

What I want you to do is open a joint bank account in both our names and as a gesture of good will deposit 5000 UKP into it. Send me the details of the account and I will deposit the millions of stolrn loot into it. We can then share it 50 50.

How can you lose. Trust me.

Do Russians beg for UKP and Euros too or do they just want U.S.
dollars?

While the U.S. is reviled by much (most) of the world, it's curious
that our currency is loved by all.

***Just some observations. Color QSL photo cards are not cheap
especially in Russia. And if he has decent HF equipment, it is usually
much more expensive than you and I would pay for it here in the states.

If what he writes is true, I would ask myself the question: "What is
he doing with radio equipment and color photo QSL cards"? In one
respect, the letter tugs at your emotions and tends to make one feel
guilty by not sending money. On the other hand ham radio operators
in Russia are usually more affluent than the average Russian. Today's
Russia is in a state of poverty true and people are struggling. But
I have to wonder about the equipment/photo QSL vs his plea for money.

The other day, the Mrs and I passed a family begging for money on
the roadway near my home. I turned around and gave one of the
children a $5 bill and told the father to make sure it went for
food. As I drove away he said "It will be" and lit up a cigarette.
At almost $4 bucks a package, I really wonder what the 5 bucks would
be used for.

In any event, it is your call but check it out before you shell out
your hard earned money, if in fact it can be checked out.

I'm a pessimistic as the next guy...not so much that RA3GS (Green Stamp?) could use a few bux (most anybody in Russia could), but that it would ever reach him.
Picking over the guy's color photos and nice gear hardly proves anything about his character. He says he had a house fire with 70% damage. Maybe his gear and stock of QSLs didn't get burnt up. He's either lying or not. RA3GS is a fairly active ham and isn't totally unknown in the ham community.
If I had a house fire of that nature I might still be able to put on a nice suit of clothes (if they didn't burn up) but would be hard pressed to replace everything else that might be lost. It could be a very dire situation, moreso if I were disabled.
In one of the Latin countries where I worked, one of the employees had a house fire. We took up a collection amongst the 30 or so employees and rounded up the equivalent of US$1000....this coming from folks who averaged about $125/month income.
I find it disconcerting that a bunch of fellow hams that probably average $500-1000 week incomes would digress into figuring out reasons

NOT to send the guy 5 bucks because maybe he smokes cigarettes or something.
I'd be a real hypocrite to rattle off this way and NOT send him $5, so even though I have my doubts about it reaching him, I'm gonna reach into my wallet and look for a fiver to send him then sleep like a baby because its worth a measly $5 to me to have some degree of faith in my fellow man, if not myself.

***As I said, just some observations. To each his own. I applaud
your generosity. In the case of the $5 that went to the family
begging for food. I guess I never will know if it went for food to
fill the bellies of his kids or to sustain his habit that stains his
fingers yellow and his teeth brown. In the case of your money, neither
will you. But, as you say, you will probably sleep better and that
my friend, is certainly worth much more than the $5 you send. I only
hope in both our cases, P.T. Barnum was wrong when he said: "There's
a sucker born every minute".

Ciao, K3BEQ

I won't disagree with the risk of being made a patsy but the only
argument that stands out in your comments is that he may be a smoker.
Hmmm, something tells me you're a non-smoker.
Maybe I oughta just send him a package of cigarettes instead of cash :-)
then he can cash them in on the famous Russian Black Market if he
chooses.

My opinion.... Scam... I'm an invalid, 4 kids, a son who's a ham,
oh, and my house recently caught fire, so can you send me some
American dollars?

He got your QSL card, that should suffice....

3257. Pattern of *Tri-Di-Pole*+++

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-02 17:19:30 UTC
From: wa8mea@hotmail.com
Message-ID: <8a260fb2.0211020919.1d04a7f@posting.google.com>
Source record: 11933
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur,rec.radio.amateur.homebrew,rec.radio.amateur.dx

Could use some help from some of our more technically minded antenna buffs.

Several years back, I came up with a general use dipole for SWL's that I named the "Tri-Di-Pole". The "Tri" meant a third wire element connected to the ground side of the dipole at the appex, with this wire running straight done to be connected to a ground rod. This was invented more for practicality purposes, so SWL's didn't have to fiddle with ground wires soldered to those tiny little external antenna phone plugs that are in common use for most portable shortwave radios.

But over the years, several hams have called me about using this same antenna for transmitting. To be honest, I've never tried it for transmit. I just don't have the real estate to experiment with it. But now I'm curious, how well would it work for transmitting purposes?

My devices are born more out of a practical design than technical. I freely admit I'm not all that antenna theory book smart. My questions: What kind of a pattern would this antenna have? Would the take off angle make it highly suitable for DX on certain freq bands? And what would I have to trim? Just the two standard dipole elements? Or would I also have to trim the third ground element? Anybody ever try such a design for transmit and on what freqs?

Thanks for any/all input.

There are a number of websites out there (ie NJ DX Assoc) that will spit out a DXCC country list with beam headings and distance from your QTH. Anyone know of site(s) that will do that for the IOTA entities?? Thanks in advance.

Gary

> stn answering our calls, Hi...

Personally I think that DX, at least on HF, is defined not so much by the distance covered but by the difficulty involved in the contact. For example most days you can work Europe (intercontinental) on 10 m without breaking a sweat, that would theoretically be DX... but it's so darn easy it doesn't really feel like DX. On the other hand the day I was able to work Honduras on 10 meters I was jumping up through the roof.

But oficially, I guess the definition would be the one given by the DXCC system, which would be a contact between two separate DXCC entities.

Does anybody know of a decent freeware program
for printing my own QSL cards from my PC at home ?

I know some exist somewhere. Seems like I looked
at one program once and it seemed very clumsy.
Single-side printing is OK and I don't need pix
of the Space Shuttle.

This is a stop-gap measure for me. Not looking to
print 100's of them -- or maybe yes? Any imput is
welcome. Accept my thanks in advance.

Try Qsl Maker by W8RCR. You can find it on most of the ham sites like qrz.com. I generally use it for contest cards. Not the highest quality in the world but quite adequate. I generally make them up three on a page as a black and white master and then photocopy them onto colored card stock. If you own a photocopier like I do (dirt cheap from a university surplus auction), you can do these for about a cent per sheet plus the paper cost.

I have created really nice ones using both Microsoft Word as well as Microsoft Publisher 98. Just use the postcard size setting available for program. I can send ya a copy of the file for mine if you are interested or save it as an .html if you want to see an example.

For the contact information box, simply draw a table within the program, with it being two rows, with as many columns as necessary. Then simply add whatever pictures/images and whatever text you want on it. You are only bound by two things, your creativity and availability of images. Otherwise, your computer is your pallette. Card stock is available at most of the larger office supply stores. Some inkjet printers work better with printing them in single order and some work better printing them 4 to a sheet.

If you want, send me a list of whatever you want on the card, (contact information etc.) and whatever pictures you *may* have or what you may want (I have alot of radio related images.) and I can make you a card in Microsoft Word.

RESCUE RADIO: CB HELPS SAVE HAM RADIO OPERATORS DAUGHTER’S LIFE

The daughter of a ham radio operator is alive after he to turns to C-B radio for help. It happened down-under in Australia as we hear from Q-News Graham Kemp, V-K-4-B-B:

--
Recently on holiday at Finley, S. NSW, Eric VK2TRD's daughter Tegan, 12, had a very narrow escape, after she was bitten twice by a Tiger Snake! After emergency treatment at Finley Hospital she was transferred by Ambulance to Shepparton, Vic.

Travelling to Shepparton Eric called five times on the 2m repeater seeking guidance to the Hospital, no response. Disgusted, he called on the UHF CB repeater and got instant help.

Over 6 days there, nothing was heard on the repeater but the ident., and that was when Eric fired it up. On 2m simplex, only 2 farmers using it as an intercom, no c/s's.

Tegan, that night suffered cardiac respiratory arrest and was in intensive care for two days. Now at home she is doing OK. A traumatic time for all.

For the Amateur Radio Nrewsline, I’M graham Kemp, VK4BB of Q-News Australia.
--

Once the ordeal was over, VK2TRD paused to thank all who helped in his daughters rescue. This included the Shepparton CB’ers for their immediate response.

**

RESTRUCTURING: IARU REGION I MEETS NOV 10

The International Amateur Radio Union Region 1 Conference is slated for the tiny nation of San Marino beginning on November 10th. And according to the W5YI Report's Fred Maia, it could be a rather hot meeting. The reason -- two words: Morse code.

Writing in the November 1st issue of his newsletter, Maia says that the subject of Morse proficiency testing among those serving on the High Frequency Committee is shaping up to be controversial. On one side are two giants. Germany's Deutscher Amateur Radio Club and the Union of Russian Radio Amateurs are two national societies who are already on record as opposing dropping Morse testing as an international requirement.

Leading the charge to eliminate manual telegraphy tests is the Radio Society of Great Britain. It says that Region 1 if the International Amateur Radio Union should formally endorse the October 2001 resolution of the IARU Administrative Council in respect to abolishing mandatory Morse exams.

Both the Deutscher Amateur Radio Club and the RSGB have submitted well crafted conference documents stating their respective positions. How this will all work out will be known at the close of the conference on November 15th.

**

RESTRUCTURING: IRELAND ADOPTS 5 WPM

Meantime, restructuring and slow code have come to Ireland. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the details:

--
According to Echo Ireland, that's the journal of the Irish Radio Transmitters Society, a set of new amateur radio regulations were signed into law by the Regulator in the Republic of Ireland on September 11th. The newws is just getting out and the main points of the new regulations governing ham radio are as follows.

First, the Morse code test speed has been reduced to 5 words per minute to bring it in line with whats become the defacto world wide standard. More important, that there is no longer any age restriction on a persoin getting an Irish ham radio license. This means that anyone -- any age in Ireland can brccome a ham. And up until now, there had been a probationary period of a year before a Full Licence could be issued. Now, thats gone too.

On the technical side, the maximum power permitted on each band is now listed in decibles per watt R-M-S at the output of the transmitter. This is good news because it effectively allows a power increase for Irish amateurs. The old regulations specified that limits were regarded as input power rather than measured at the R-F output jack.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ.
--

We will have more news from around the world later on in this weeks Amateur Radio Newsline report.

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Amador County Amateur Radio Club Net serving Pine Grove California.

(5 sec pause here)

**

ENFORCEMENT: YOU CANT USE THOSE RADIOS ON FIRE CHANNELS

Back on this side of the Atlantic, the FCC has told a fire department to stop using illegally modified ham radio gear. The FCC's Daryl Duckworth, NN0W, explains:

--
Duckworth: "The Enforcement Bureau has notified the Bon Secour Fire and Rescue Department in Alabama that the Amateur equipment they were using was contrary to Commission rules because it had been modified to operate on Public Safety frequencies. The letter referred to several Icom IC-V8 handie talkies."
--

The note went to Karl Bingert who is the Chief Bon Secour Fire & Rescue Department. It told him that the use of Amateur Radio units of any kind, modified to operate on its frequencies, is against the Commission's rules and would result in enforcement action by the FCC. (FCC, RAIN)

**

ENFORCEMENT: FCC BACKS REPEATER OWNERS BAN OF UNWANTED USER

The FCC is once again backing up a repeater operator who wants to ban a particular user from the system. Its all taking place in Ohio. Again, the FCC's Daryl Duckworth tells us about the situation and the agency's position in favor of the people running the machine:

--
Duckworth: "The Enforcement Bureau sent a Warning Notice to Billy R. Marshall, N8ORF, warning him to stay off of the W8HFF repeater system in the Toledo Ohio area. The Toledo Mobile Radio Association had issued two letters to Marshall requesting him to stay off the repeater due to his failure to follow operational rules.

The Enforcement Bureau reminded Marshall that control operators may take whatever steps are necessary to insure complience with the rules and that they will be backed up by the Commission"
--

Marshall was given 20 days from the date of receipt of the FCC letter to reply and outline what steps he has taken to comply. (FCC, RAIN)

**

ENFORCEMENT: PHONE COMPANIES FINED

Two companies have learned the expensive way that it does not pay to try to grab another telephone company’s customers. This, as the FCC issues two Notices of Apparent Liability proposing a total of $6,560,000 in fines against two operator service providers for taking advantage of consumers.

The companies named are Opticom Corporation and ASC. The FCC says that the massive fines are based on Opticom apparent sixty-four violations, and another eighteen apparent by ASC. The term apparent is the FCC’s way of alleging a violation has taken place. The Commission says that it calculated the proposed fines by using the $80,000 per violation amount previously used in cases involving egregious slamming. Take your browser over to http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-226534A1.doc to learn more. (FCC)

**

RESCUE RADIO: EMCOM SUSPENDS NATIONAL EMERGENCY ALERT NOTIFICATION SYSTEM

EMCOM -- the emergency alerting system has suspended its the National Emergency Alert Notification System operations effective October 25th. Our producer, Bill Pasternak, WA6ITF, has the nitty-gritty:

--
In making the announcement, EMCOM officials said that what they term as a stand-down also affects the Emergency Information Web Sites maintained by EMCOM for every state, county and municipality in the nation. Also impacted are over 1 million other web pages that reportedly utilized the automatically updated EMCOM Homeland Security Status Bar or the PubAlert notification bulletin pop-up system.

By way of background, for the first six months after the 9/11 tragedy, EMCOM offered to provide access to full use of the system to any community's emergency agencies for $500 per month. During that period there were no takers, even though EMCOM had notified almost every senator, representative, and agency in the nations capital.

So the bottom line is this: The EMCOM alert system is dead for now but hopefully not gone forever.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.
--

In making the announcement, EMCOM took the opportunity to express its gratitude to the hams, ARES and RACES operators who helped to get the system off the ground.

More about EMCOM is on the web at www.comdinet.com/emcom (EMCOM release)

**

RESCUE RADIO: SKYWARN RECOGNITION DAY

On a more positive note, Larry Boyd, KB4GFT says in an Internet posting that The 2002 SKYWARN Recognition Day will occur on Saturday December 7th. It will begin at 00:00 UTC and run for 24 hours.

SKYWARN Recognition Day was created in 1999 by the National Weather Service and the American Radio Relay League. It honors the contributions that volunteer SKYWARN radio operators make to the National Weather Service.

Last year 80 National Weather Service offices participated. The list of this years participants and other information is on the web at hamradio.noaa.gov (KB4GFT)

**

RADIO RULES: RULES REWRITE ON MEDIA CONSOLIDATION

The Federal Communications Commission has embarked on a major rewrite of rules that limit the consolidation of media companies. The overhaul, which FCC officials first announced in June, is likely to conclude by the middle of next year when the agency issues final rules.

Many observers expect the agency to relax the current media ownership restrictions, although FCC officials stressed during a recent meeting that they had not reached any conclusions. The FCC is seeking comment on whether it should keep or change six specific media consolidation rules, including bans on common ownership of a newspaper and television station or television and radio stations in the same media market, as well as a limit on the percentage of the national audience that any station may reach.

Many of the rules were written decades ago before cable and satellite-based television and the Internet. The proceeding is being conducted under a statute that requires the FCC to periodically review its rules to determine whether they remain in the public interest. (FCC)

**

COMMUNICATIONS LAW: JUDGE THROWS OUT PAY AS YOU CLICK CASE

Its a big court win for all of us. This as a federal court says no to a law suit that could have cost all of us a lot of dollars as we clicked our way across the World Wide Web. Amateur Radio Newsline’s Bruce Tennant, K6PZW, has the details:

--

U.S. District Judge Colleen McMahon has rejected a claim by the B-T Group that it owns the patent on those single-click hyperlinks that make the Web what it is. It’s lawsuit accused Internet service provider Prodigy Communications Corp., of infringing on the B-T patent.

But Judge McMahon rejected the claim that each Web server on the Internet is a central computer and thus the Internet falls within the patent's scope. Her decision, filed in a White Plains, New York Federal Court concluded that no jury could find that Prodigy infringes on the B-T patent.

The B-T suit had been viewed as a test case that could have opened the door for the company to challenge other Internet service providers and demand licensing fees. These fees could have added a lot to the annual cost of anyone surfing the net.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.
--

With the potential of billions of dollars at stake, its not known if B-T Group will appeal the judges decision or re-file the case. (Published news reports)

**

HAM RADIO TRAINING: AMATEUR RADIO LICENSE GUIDE – THE PROGRAM

Stuart Cole, N5LBZed, tells us by e-mail about a computer program that he has just finished writing. Its called "Amateur Radio License Guide" and is a modern update of the DOS version that he brought out back in 1999.

According to Cole, the program is based on the official ham radio question pool, is divided into three sections and does cover training all classes of license. More information is in cybrspace at http://cableone.net/sacole/ (N5LBZ)

**

THE WORLD ABOVE 50 MHZ: WRITER ASKS YOUR HELP

Gene Zimmerman, W3ZZ, says over the VHF Reflector that his next World Above 50 MHz column in QST Magazine will include a discussion of VHF+ clubs and groups. This refers to weak signal groups that meet regularly, VHF groups that sponsor annual conferences like Central States VHF Society, contest groups and others interested in the non-repeater world of VHF and UHF communications.

Gene says that he has already mined a lot of data from Internet sites but I would like his information to be accurate and up to date. He has identified the PackRats; the Rochester VHF Group, the South East V-H-F Society and about a dozen others as falling into this category. He asks that anyone connected with these groups please contact him by e-mail to confirm the information he already has. He also wants a person or point of contact to send readers to if someone wishes to find out more information about how to particular group. Gene’s e-mail is w3zz@arrl.org. (VHF Reflector)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

EMERGING TECHNOLOGY: AM MODULATION IMPROVEMENT ANNOUNCED

A new modulation technique for AM broadcasting is being promoted by broadcast industry pioneer Mike Dorrough, KO6NM. Dorrough claims the Advanced Modulation System can increase carrier modulation to 200% while improving the performance, range and sound quality of Amplitude Modulated radio.

According to the CGC Communicator, KO6NM recently discussed the system at an SBE meeting in Sacramento and plans other presentations.

Ross du Clair, WA6VWY is the Chief Engineer for Clear Channel in Sacramento. He attended the Sacramento meeting and is quoted in Radio World On-Line as saying, "This is real and it does work."

As previously reported, Mike Dorrough was the recipient of the National Association of Broadcasters Radio Engineering Achievement Award in 2000. This, for his contributions to audio processing and signal monitoring. Details of the new Advanced Modulation System will appear in an upcoming issue of Radio World magazine. (CGC Communicator)

**

EMERGING TECHNOLOGY: PERSONAL LOCATORS FOR KIDS

In the wake of multiple child abductions, parents are turning to satellite-based locator bracelets to track their children. The bracelets carry transponders that will permit parents keeps tabs on their kids over via the Internet or by telephone.

Wherify Wireless plans to release its three-ounce G-P-S equipped Personal Locators next month. The device uses satellite and cellular technology and has a built-in numeric pager. It allows the wearer to contact an emergency law enforcement service in worst-case scenarios

Each unit costs 400 dollars and is accompanied by about 30 dollars in service fees. Experts on missing children warn such devices are not foolproof and could give parents a false sense of security. Still many parents are willing to try the locators a try. (Scienceonline)

**

RADIO IN SPACE: SOYUZ FLIES AGAIN

Some good news for the astro-ham team on board the International Space Station. The Soyuz rockets are flying again.

On Wednesday October 30th a manned Soyuz rocket with three cosmonauts on board blasted off from Russia's Baikonur cosmodrome bound for I-S-S. The Soyuz-TMA booster rocket lifted as planned at 03:11 GMT with no reported malfunction on its way to orbit.

As reported last week, the launch of this Soyuz was delayed after the fatal crash of a similar design unmanned cargo rocket October 15th. During this Soyuz 12-day mission, the Russian and Belgian crew will replace a rescue capsule docked at the ISS. (Published reports)

**

CONVENTIONS/HAMFESTS/CONFERENCES: MARTLESHAM MICROWAVE IN NOVEMBER

Turning to the ham radio conference scene, work that the Martlesham Microwave Round Table 2002 will be held this year at Adastral Park, Martlesham Heath, England. The dates are Saturday the 9th and Sunday the 10th of November.

Highlights include a visit to the Royal Air Force's Defense Radar Museum at R-A-F in Neatishead and an evening dinner in Ipswich. All of this plus the usual flea market, lectures and the UK Microwave Group Annual General Meeting. For ore information e-mail g3xdy@btinternet.com (GB2RS)

**

CONVENTIONS/HAMFESTS/CONFERENCES: EUROPEAN RADIO SYMPOSIYUM IN BARCELONA

The 2002 European Radio Symposium is slated for November 13th in Barcelona, Spain. Convergence, digitization and electronic audience measurement will be key topics tackled in this symposium. Speakers include David Rogerson of Strategic Media Solutions. (Media Network)

**

CONVENTIONS/HAMFESTS/CONFERENCES: BIG TURNOUT FOR ARRL/TAPR DCC

According to a recent ARRL Letter over a hundred the worlds most active Amateur Radio digital enthusiasts turned up in Denver, Colorado, September 13th to the 15. This, for the 2002 joint ARRL and TAPR Digital Communications Conference.

This marked the 21st such Digital Communications Conference held. The agenda ranged from Automatic Position Reporting System topics to high-speed digital networking and software-defined radio. All agree it was well worth the trouble of traveling to the mile-high city to attend. (ARRL)

**

DX

In D-X, word that 3D2AG, will be working on Rapa Island through the 28th of November. He plans to operate as FO5RK on CW and SSB. This, during his late afternoon, nighttime and early morning hours. Rapa is part of the Austral Island group. (RSGB)

And SMZ0WKA is in Cuba until the 10th of November and is active as T48W. Look for him on 160 through to 6 meters, with an emphasis on the lower bands. QSL this one as directed on the air. (RSGB)

**

THAT FINAL ITEM: W6XYZ/KTLA AT 60

And finally this week, one of the nations pioneering television stations is in the midst of celebrating its 60th anniversary. That station is KTLA television in Los Angeles. And almost from its inception, ham radio has played a role in its success. Roy Neal, K6DUE, takes a look at KTLA and some of the hams who helped it to make history:

--
DATELINE "HOLLYWOOD." ON A HIGH AND WINDY HILL, OVERLOOKING THE FAMOUS DISTRICT OF LOS ANGELES, IN GIANT BLOCK LETTERS, THERES A SIGN THAT READS HOLLYWOOD. AT THE TOP OF THE HILL, THERE'S ALSO A RADIO TOWER WITH A HISTORY. THAT'S THE SITE OF THE FIRST TELEVISION STATION WEST OF THE

MISSISSIPPI.

IT WENT ON THE AIR IN SEPTEMBER OF 1942 AS W6XYZ, AN XPERIMENTAL TELEVISION STATION WITH STUDIOS ON THE PARAMOUNT FILM LOT. IN OCTOBER OF 1942. THE STATION EVEN BROADCAST INSIDE A MOTION PICTURE STUDIO, FEATURING THE MOVIE "THIS GUN FOR HIRE."

BY 1946, W6XYZ WAS GONE, REPLACED BY THE CALL KTLA. THE GUIDING GENIUS BEHIND THE STATION WAS KLAUS LANDSBERG, WHO CAME TO THE UNITED STATES AFTER ESCAPING FROM NAZI GERMANY. IN THE LANDSBERG BOOK, NOTHING WAS IMPOSSIBLE. SO KTLA RACKED UP AN IMPRESSIVE LIST OF FIRSTS WHILE PIONEERING TELEVISION.

ON THE FIRST OF JANUARY, 1946, THEY BROADCAST THE TOURNAMENT OF ROSES PARADE…LIVE. IN 1955, KTLA BECAME THE FIRST LOS ANGELES STATION TO BROADCAST THE PARADE IN COLOR.

IN MAY OF 1952, LANDSBERG DROPPED RELAY STATIONS ON MOUNTAIN TOPS TO BEAM AN ATOMIC BOMB TEST FROM NEVADA TO LOS ANGELES. HE CALLED IT OPERATION BIG SHOT.

AND IN MAY OF 1958, BUYING EQUIPMENT FROM NBC, KTLA WENT ON THE AIR WITH ITS TELECOPTER…A HELICOPTER EQUIPPED TO COVER LOS ANGELES FROM THE AIR!

ONE OF THE MOST POPULAR SHOWS LANDSBERG PRODUCED WAS LAWRENCE WELK, A PROGRAM THAT STILL EXISTS IN SYNDICATION.

MANY OF THE STATION'S ENGINEERING STAFF WERE RADIO AMATEURS. FOR EXAMPLE, THE INVENTOR OF THE HAM RADIO REPEATER, THE LATE ART GENTRY, W6MEP. THIS REPORTER REMEMBERS MANY FUN TIMES WHILE TALKING WITH THE AVUNCULAR MR. GENTRY FROM THE REPEATER SITE ONCE OCCUPIED BY W6XYZ.

IN 1964, FILM AND TV STAR GENE AUTRY BOUGHT THE STATION AND AMONG THE ENGINEERS HE BROUGHT IN WAS LOYD SIGMON, W6LQ. "SIG" IS PROBABLY BEST KNOWN AS THE FATHER OF THE SIGALERT TRAFFIC MONITORING AND PUBLIC ADVISORY SYSTEM.

W6LQ AND W6MEP WERE TWO OF THE BETTER KNOWN HAMS WHO HELPED KTLA AS THE STATION PIONEERED EARLY DAY TELEVISION UNDER THE GUIDING AEGIS OF KLAUS LANDSBERG.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE
--

KTLA is owned these days by Tribune Broadcasting and is part of the Warner Brothers -- or W-B Television Network. More important, its history is one rich in break-through technology and innovation. Its a pioneering station that made television happen. You can read more about it in cyberspace at the website you will find in this weeks amateur Radio Newsline report.

More on the fascinating history of W6ZYZ and KTLA is in cyberspace at http://ktla.trb.com/about/station/ktla-about-history1.htmlstory (Tnx K6DUE, CGC Communicator, others)

**

NEWSCAST CLOSE

MAKE YOUR OWN QSL CARDs

http://ac6v.com/dealers.htm#CRE

a.. QSL Creator - Create Your Own QSL Card -- Downloadable Program -- Click on DOWNLOADS -- From "The Loaded Dog"
a.. QSL Maker - From WB8RCR
a.. QSL Cards - Make ur own from WA7S
a.. QSLMaker 2.2 From rsars.org - UK
QSL card.com - Create and distribute your own online QSL Cards via the web!
a.. QSL Card Kit - W7NN QSL Kit. Publish your own QSL Cards using your PC and ink jet printer. See QSL Kit.
AC6V's InkJet Card. Select an image (I used PowerPoint), visit a paper supplier and choose heavy stock with the preferred color. Get samples and see if they will go thru your printer. Print image on one side. On the reverse side print the QSL data -- call, time, RST, etc. Print several images per sheet. Trim to size with a paper cutter. This is OK for a few cards, but will take you broke as inkjet cards take a lot of ink. For economical quantity, take an inkjet master, then Xerox several on a sheet, cut to size. Really best to Xerox them as inkjet will smear and run when wet. See sample http://ac6v.com/brag.htm#QSL

AC6V's Photo QSL Card. Use your 35mm Camera -- take your favorite photo -- Shack, Mug Shot, Local Attraction, etc. Have photo finisher run off 100 copies or so (try drugstore coupons). For callsign - use an Avery transparent label. For QSL data, use an Avery stick-on label, on the back of the photo. Print with ink-jet or laser. For AC6V's homemade card see Oceanside Harbor and the Star Of India at the bottom of the brag page, Sample at URL --- http://ac6v.com/brag.htm#QSL

I make my QSL cards using PrintShop. I think most of these kinds of programmes are suitable. Admittedly, about the only stock graphics in that particular programme are a world and lightning flashes, so these are used in my card, but you can also import graphics (If you don't want your card to look like mine, HI).

DXKeeper, a member of the freeware DXLab Suite, is a full-function logging program that includes the ability to generate QSL cards and/or QSL labels. The generated cards are simple, but effective for DXing where confirming multiple QSOs with the same DX station with a single card is convenient. DXKeeper also tracks awards, automatically generates the QSL cards needed to achieve your DXing objectives, and prints addresses on envelopes or labels.

DXKeeper is available via www.qsl.net/dxlab

Many of the email addresses that Charles uses are fake and used only to harrass newsgroups. But he has been kinda quiet lately. His homepage and porn pages seem to be dead.

Which results in -caribe.net and that is not a valid domain.

But it fits the pattern. No real name, no real callsign and an invalid
address. Yes, fits the pattern.

Not that of a successful DXer I hasten to add.

3280. Veteran's Day/General LeMay's Birthday Special Event

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-07 22:52:15 UTC
From: "Paul W. Schleck" <pschleck@novia.net>
Message-ID: <3dcaee0a$0$204$45beb828@newscene.com>
Source record: 11806
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

To recognize Veterans Day and General Curtis E. LeMay's birthday this year, the Strategic Air Command Memorial Amateur Radio Club (SACMARC) will be operating K0GRL on November 11th, 2002 from 1200 hours to 2400 hours Zulu (UTC). The station will operate in the General phone bands on or near to the following frequencies ending in 47 (for 1947 when the Air Force became a single entity) 3.947, 7.247, 14.247, 21.347, & 28.347, whichever band seems to be open best to most locations. Also look for us on 51.47MHZ. We will also be on 146.46 simplex for local folks. You should also listen to the 3905 Century Club WAS Net in the evening.

Originally assigned by the Federal Communications Commission (FCC) sometime during the Cold War, K0GRL was the personal amateur radio callsign of General Curtis E. LeMay when he was the Strategic Air Command, Commander, (CINCSAC) and assigned to Offutt Air Force Base. (Offutt, near Omaha Nebraska, was the Headquarters base for the former Strategic Air Command or SAC, 1946-1992, now reorganized into a unified command called USSTRATCOM) and was used by him until the late 1950's. The General received K4FRA when he went to Washington, D.C., to be the USAF Vice Chief of Staff (later Chief of Staff), and retired in California with W6EZV. The original Nebraska callsign, K0GRL, had long since lapsed and was unassignable under FCC rules for several decades. Recent changes in FCC rules, including the adoption of a Vanity Callsign Program, offered the opportunity for SAC veterans, and other members of the local amateur radio community, to recover that callsign in memory of SAC and military communications history. With the gracious consent of the LeMay family, including the General's daughter, Mrs. Jane LeMay Lodge, K0GRL was taken down from history's attic, dusted off, and returned to active use in May of 1997.

To receive a K0GRL QSL card (after contact, of course), Please visit the SACMARC web site at:

http://www.sacmarc.org

Contact information and mailing address are listed there also. Please include an SASE with your QSL card. K0GRL is also good in the current call book and on:

Hi,

Azimutals maps as they are called (centered on your QTH and showing
beam headings to all DX) is available from most ham libraries or
included in some books.

You can also buy a logger software like DX4win that displays the
heading and distance live.

3293. DX4WIN

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-09 11:44:46 UTC
From: John <my-callsign@qsl.net>
Message-ID: <9z6z9.1908$FJ2.242278@newsfep2-win.server.ntli.net>
Source record: 11819

I am currently using a DOS based application for logging software and starting find it restrictive in the modern Windows environment e.g. it doesn't support the use of USB for printing. However, it has very good reporting facilities.

I am thinking about upgrading to DX4WIN. My first question is: is it capable of running the type of reports that I normally run on my present package e.g.

1. Number of countries worked on each band in any year.
2. Number of countires worked in a year on CW (or SSB).
3. QSO's in a defined period (eg over 12 months ago) where a QSL has been sent but none received back.
4. List all QSO's with the same QSL manager
5. List all QSO's with a particular country

Secondly, if I import from my current logging program as a CSV file or similar, is DX4WIN capable of keeping the QSL status intact? (eg Direct or Buro)

Many thanks
John
G4IRN.

I think the poster was asking specifically for one that had the IOTA
entities already programmed in.
In my case, I use AZMap by Paul Burton AA6Z on my computer and the
location file is a simple .txt file that is readily editable. I suppose
the die-hard IOTA enthusiast could spend a 'few' hours editing the file
to include those entities specifically by name.
Unless one is running a razor-sharp rotatable antenna I'm not sure that
there would be any real advantage in having that as opposed to just
going with the normal locations included in most of these programmes.

John,

I know that discussions of logging programs tend to incite lively debate -- seems that most hams enjoy an almost religious affiliation with their logbook of choice. That said, I am an avid user of DX4WIN and can answer all but one aspect of your questions with certainty:

The answer to all your questions is YES, with some explanations:

In DX4WIN, you set a "filter", which allows you to perform any operation (view/print/export/send QSLs) with that subset of QSOs. For example, you would set of filter for 1/1/1999 - 12/31/1999 and see only that year's QSOs.

The filter can have combinations of any characteristics: callsign, prefix (country), mode, date, QSL manager, QSL status, QSL method, text in note field, ... So for more your complicated combinations, such as "QSOs in 1999 in CW that were sent direct and have not been received" you would view/print/export only QSOs that meet that query condition. Now , if you want DX4WIN to count the unique countries in that subset of data -- I have never tried that. I know that I can perform an export of that data, and then massage that export in Excel to get unique countries. However, there is a custom report generator built into DX4WIN and you may be able to generate the report directly... not sure.

Hope that answers your question... I would be happy to take the discussion of detailed specifics off line with you if you want.

REALISTIC PRO-2040 SCANNER - Canadian Version
With Descriminator tap Mod, RCA type plug added to rear of unit to connect DATA SLICER which I'm also selling
Excellent scanner, I've decoded ACARS, FLEX, POCSAG paging, MDT, MOBITEX, etc with the data slicer and my PC
I will even include the software. This scanner can receive cell phone transmissions also. Original box, manual,
telescopic antenna and power adapter included. -$115.00

REALISTIC DX-392 Shortwave with Cassette Recoder!! With Mute and Beep Mod!, Manual, excellent condition, NO BLOWN FETS! - On Ebay Now.
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=800394541&rd=1

GRUNDIG YACHT BOY 400PE
With Mute and Fine Tune Mod!!!, Manual, Original box, carrying case, Wall Adapter, long-wire external antenna,
Hardly used! -$105.00

BELTEK 23 CHANNEL AM TRANSCEIVER
This one's an oldie, looks like a mid seventies transceiver, couldn't find anything on the web about it. It measures about
12x10x4 in an all metal cabinet, it has a 120v ac as well as connections for 12v mobile. This is a solid state transceiver
and it works. -$15.00

I'm located in SW Ontario, shipping to anywhere in North America is about 8-12 dollars for these items.

Regards.

Amateur Radio Newsline™ Report 1317 – November 8, 2002

Amateur Radio Newsline report number 1317 with a release date of hFriday, November 8, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Some good numbers for ham radio here and across the seas. The hobby is growing once again. Find out the details on Amateur Radio Newsline report number 1317 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: GOOD NUMBERS IN THE USA

The numbers are in and they speak for themselves. Restructuring is finally having a very positive impact on ham radio growth here in the United States. Amateur Radio Newsline's David Black, KB4KCH, has the good word:

--
Last year at this time there were nearly 683,000 hams licensed by the FCC. As of October this year, there are 2235 fewer--but numbers are not always what they seem. The reality is that ham radio in the United States is growing once again.

First, the General and Extra class have increased substantially since the 13 and 20 word per minute Morse code exams were eliminated April 15th of 2000. In fact, the number of people holding these licenses has increased by well over 25,000 for each license class. And that's great news for ham radio equipment suppliers since they rely on higher dollar high frequency transceiver sales for much of their yearly income.

The Technician class is holding its own, too. The number of new Tech license holders is keeping pace with the number of hams either upgrading or dropping out of amateur radio. The net change is close to zero.

Only the Novice and Advanced classes are seeing significant drops in numbers. No new Novice or Advanced class tickets have been issued since April, 2000. And while existing licenses can be modified and renewed, it appears as if that's just not happening among Novices. They appear to be fading away, and quickly -- there were 65-thousand Novices in 1997 -- only about 37-thousand, though, today.

The bottom line is that for the last 12 months ham radio has seen an average of 16-hundred brand new ham licenses issued each month. That's an improvement of 160 a month over the previous year. And that improvement is very good news for ham radio.

As to the state with the largest number of hams? It's still California which can now claim being home to more than one seventh of all the nations hams. Latest figures show there are more than 100,000 hams now living in California.

The state with the fewest hams? North Dakota -- only 1575 hams there.

Reporting from the Amateur Radio Newsline's South-East Bureau in Birmingham, Alabama, I'm David Black, KB4KCH.
--

The bottom line is this. Restructuring seems to be doing the job it was intended to do. Its now up to those in the hobby to work to swell its ranks even more. (W5YI)

**

RESTRUCTURING: 5000TH UK FOUNDATION LICENSE CELEBRATED

The United States is not the only place where ham radio is growing. In the United Kingdom Andrew Finch, M3FMA, is only 11 years old and suffers from dyslexia. But nothing was going to keep the young scout from becoming a ham. And now he is the 5000th person to obtain that nations new and very popular Foundation Class license. Jeramy Boot, G4NJH, has more:

--
The Radiocommunications Agency has been so pleased with the numbers taking up the license, that it decided to commemorate the 5000th amateur with a special award. Alan Betts of the Agency's Amateur Radio section, commented: "The radio amateur community was around 50,000 strong before the new license was introduced, and so this level of interest is very welcome".

He also added "The License has proved very popular with young people and amateur radio is very much an up-and-coming hobby for them".

The presentation of Andrew's prize took place at a ceremony held at the Radiocommunications Agency's monitoring station in Baldock, Hertfordshire on Tuesday the 22nd of October. Andrew was also presented with membership of the Radio Society of Great Britain by its President, Bob Whelan, G3PJT, who also presented a host of radio amateur goodies and books.

Andrew's day was not over after the ceremony - he was given a tour of the Radiocommunications Agency monitoring station at Baldock. 'Heartbeat FM' from Hertfordshire then conducted an interview with him before he was whisked off for another interview with 'Dream FM' of Chelmsford.

Jeramy Boot, G4NJH.
--

Andrew had told his parents that he was going to begin saving his pocket money to buy a radio. He won’t have to do that. Among the gifts he received for becoming the 5000th Foundation license holder was a brand new F-T 817 transceiver donated by Yaesu. The Foundation License has only been available to U-K residents since earlier this year. (GB2RS)

**

EMERGING TECHNOLOGY: HAM RADIO INVITED TO DIGI RADIO EXPERIMENT

Ham radio has been asked to be a part of an important digital radio experiment. Bill Pasternak, WA6ITF, has the details:

--
Digital Radio Mondiale, or DRM, is a project aimed to revitalize the short-wave, medium-wave and long-wave AM radio broadcast bands. This, by using digital signals to provide near-FM quality.

Radio amateurs and serious broadcast-band listeners have been invited to become part of the DRM Software Radio Project. They may also be among the first to access the initial DRM programs when test transmissions begin next month.

James Briggs is the DRM Projects Co-ordinator with Merlin Communications in Dorset England. Biggs says that the project relies on adding an extra down-converter board to existing receivers and then using software to decode the signal via a PC soundcard.

The interface is simple and the sound -- hopefully -- will be superb.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.
--

To find out how you can play a part in the DRM experiment take your web browser to www.drmrx.org (Media Network)

**

RADIO LAW: CONGRESS AND CCR'S

Some good news and some bad news in the drive by the ARRL to get Congress to ban deed restrictions on hams who want to put up towers and antennas. The good news is that several more members of both houses have signed on as co-sponsors in recent weeks. The bad news is that no action took place on the issue before Congress adjourned for elections and there's little chance of any action once it returns to close out the year. The bottom line: The ARRL says that it will try again when Congress reconvenes in January of 2003. (ARRL)

**

ENFORCEMENT: FCC PROBES JAMMING OF THE HURRICANE WATCH NET

The FCC is asking a Morrison Colorado ham to explain why he allegedly interfered with an onging hurricane emergency net. The FCC's Daryl Duckworth, NN0W, tells us about the case:

--
Duckworth: “The Enforcement Bureau opened an inquiry into allegations that Merle W. Garbe, W0SBE, of Morrison Colorado interfered with the Hurricane Watch Net on 14.325 MHz on October 3rd of 2002 during its Hurricane Isadore operation.”
--

The FCC letter to Garbe notes that the Hurricane Watch Net is operated to assist the National Hurricane Center in Miami, other government agencies and people in a target area of a hurricane system. The letter goes on to note that the agency considers this service to be one of the most important purposes of the Amateur Radio Service .

**

ENFORCEMENT: NO RADIO CALL-IN SHOW PERMITTED ON 75 METERS

The FCC is asking a California ham why he allegedly ran a radio call in show on 3.830 MHz and requested shortwave listeners to participate. The regulatory agency alleges that James C. Watkins, KI6GU, of Burbank ran such an operation last August 16th and 24th and used a reverse autoptach system to facilitate the call-ins.

Along with the FCC inquiry Watkins was furnished 9 pages of material relating to the complaints against him. He was given the customary 30 days from the date of the Commission inquiry to respond. (FCC)

**

ENFORCEMENT: BIG FINE AGAINST FLORIDA PIRATE BROADCASTER

The FCC has levied a $10,000 fine against a Florida man who has allegedly been operating a radio transmitter without a license. Richard Munoz of Naples was issued the forfeiture notice for operation of a radio station on 105.1 MHz without Commission authorization. Amateur Radio Newsline’s Bill Burnett, KT4SB, is in Miami with the details:

--
The story begins on April 20 if this year. This, when agents from the Tampa Office investigate a complaint alleging that an unlicensed radio station was transmitting on frequency 105.1 MHz in the Naples, Florida area.

A search of Commission records shows that there was no FM radio station licensed on 105.1 MHz in Naples. So, using a mobile direction finding vehicle, the agents trace the station to the Tree of Life Church in Naples.

The agents then interview several witnesses at the church who identify Richard Muñoz as the operator of the radio station transmitting on 105.1 MHz. The witnesses also provide the agents a business card identifying Richard Muñoz as the pastor of a Spanish-language ministry called Mission Possible Ministries. A brochure advertises a radio program called “Mission Possible" on 105.1 MHz.

The agents interview Muñoz. He admits that his ministry owns the radio station equipment and is operating it.

The agents ask Muñoz if he had a license for the station. He replies that a friend has submitted an application to the FCC. Also that the friend has advised him that he could operate the station while the paperwork was being processed.

The agents advise Muñoz that he cannot operate the station without a license and directed him to terminate the unlicensed operation. Muñoz requested additional time to notify his listeners that the station had to go off the air. The agents again tell Muñoz that he could not operate the station without a license and order him to take the station off the air. Muñoz directs another person to turn off the transmitter.

But the story does not end there. On April 30th the FCC'sTampa Office receives another complaint alleging that an unlicensed FM station is again operating on 105.1 MHz in Naples. Also that it is causing interference to the reception of an FM broadcast station licensed to operate in that area.
On May 14th, agents again trace the station to the Tree of Life Church and on May 17th the Tampa Office issued a warning letter to Andrew dealing, the head pastor of the Tree of Life Church. The warning letter advises DeLong that operation of a radio station without a license violates Section 301 of the Act, ordered him to cease operation of the unlicensed station transmitting on 105.1 MHz immediately.
Then, on May 24, 2002, the Tampa Office receives a letter from Pastor DeLong. In the letter, DeLong states that Richard Muñoz is the operator of the radio station transmitting on 105.1 MHz. Also that that Muñoz leases space for the radio station from the Tree of Life Church, and that the Tree of Life Church had no control over the operations of the radio station.
Based on the facts before it, On June 5th the Tampa Office issues an Notice of Apparant Liability for a $10,000 forfeiture to Richard Muñoz for operating a radio station without a license in willful and repeated violation of Section 301 of the Act. In his response to the notice, Muñoz admits that he operated the unlicensed station on 105.1 MHz, but requests cancellation of the forfeiture. He tells the FCC that his church, Mission Possible Ministries, had agreed to purchase 50% of the radio station for $15,000 from Daniel Morisma approximately eight months earlier. According to the reports, Muñoz maintains that Morisma told him that there was an application for the radio station on file at the FCC and that the station could go on the air while they were waiting for the application to be processed.
According to Muñoz, Morisma told him that the station should go back on the air because the FCC would not visit again, and that if the FCC did visit again, it would issue a second warning before proceeding with any penalties. Muñoz asserts that the station had been using the time between the FCC’s first and second visit to explain to listeners that they would soon be off the air because they had been lied to and scammed and that the station was a week away from dismantling when the FCC visited the station the second time.
But the FCC sees it another way. In its order the FCC says that it is unfortunate that Muñoz may have been duped into believing that there was an application for the radio station on file with the FCC and that he could put the station on the air while the application was being processed.
None-the-less says the FCC, Muñoz clearly knew following the inspection by its agents on April 20th that the station was unlicensed.
The bottom line. The FCC says that under these circumstances, it concludes

that no reduction of the forfeiture on this basis is warranted.
From Miami, I'm Bill Burnetrt, KT4SB, reporting for the Amateur Radio Newsline.
--
Muñoz was given the customary 30 days to pay the fine. If he fails to do so the FCC indicates that other punitive action may be taken.

**

WITH THE SCOUTS: JOTA FOLLOW-UP

ARRL Educational Programs Coordinator, Jean Wolfgang, WB3IOS, reports that so far over 125 scouting Jamoboree on the Air or JOTA survey have been received for this years event. The reports show over 9079 Scouts, 2855 visitors, and 657 hams participated. This is a substantial improvement over last year when only 65 surveys were returned!

But says Wolfgang, there are several state we have not heard from. They are Delaware, Hawaii, Idaho, Mississippi, Montana, Nebraska, North Dakota, South Dakota, Utah, Vermont, and Wyoming.

If you participated in JOTA 2002 and have not yet completed the ARRL survey please have a representative of your JOTA event complete and submit the form as soon as possible. You will find it on the web at http://www.arrl.org/FandES/ead/jotalog. (WB3IOS)

HAM RADIO BUSINESS: HAS HAMVENTION 2003 GOT A DEAL FOR YOU

The planners of Hamvention 2003 say -- have they got a deal for you! The Hamvention, in cooperation with the Dayton Montgomery Convention and Visitors Bureau has put together a special V-I-P package. It will do to five of the first 500 who purchase a preregistration ticket before Novermber 15th.

The five lucky winners will be chosen in a randon drawing in early December. They will receive two nights of hotel accommodations during Hamvention, dinner for two at Jay’s Restaurant, a V-I-P badge, a special souvenir package and the most important prize of all. An on-site V-I-P parking pass for the show! Thats right -- parking almost at the Hara Arena front door.

More information on this special Hamvention 2003 promotion is available by e-mail to tickets@hamvention.org. You can also phone during business hours Eastern time to area code 937-276-6930. (Dayton Hamvention)

**

HAM RADIO BUSINESS: WORLDRADIO EDITOR DEPARTS FOR CAREER IN LAW ENFORCEMENT

One ham who may not be at Hamvention 2003 is Worldradio Magazine editor Rick McCusker, WF6O. This is because McCusker has announced that he is leaving the post in a major career change.

Accordong to McCusker, he has been in training for some time to become a peace officer. He has also been working as a Reserve Depuity Sheriff in his spare time. Now, he has accepted a full time position with the Sacramento California County Sheriff’s Department.

Duruing his tenure at Worldradio, McCusker completely redesigned and modernized the magazine’s look. He took most columns by-monthly permitting the addition of new writers representing emerging technologies in the hobby. His legacy is a well respected publication with a steadilly growing reader base.

McCusker’s last day at Worldradio will be on Wednesday November 13th. At airtime no replacement editor has been named. (ARNewsline™)

**

THE CHANGING OF THE GUARD: KL7Y LOST IN MOTORCYCLE ACCIDENT

Some sad news. Word that famed contest operator Daniel Robbins, KL7Y, of Wassilia Alaska has died in a motorcycle accident while in Hawaii. According to the Honolulu Star Bulletin, the 54 year old Robbins died Thursday October 31st after he lost control of a motorcycle while riding in Kona and drove into a lava field. The Fire Department said that Robbins, who was not wearing a helmet, suffered head and other injuries.

KL7Y was a friend to many inside and outside of the world of ham radio contest operations. He had just completed operating the CQ World Wide SSB contest from KH7R a few days before the accident that took his life. A memorial guest list for his friends to pay their respects has been set up on line at www.contesting.com. (K7JA, contesting.com)

**

ON THE AIR: THE MIGHTY MO CELEBRATES VETERANS DAY

The “Mighty Mo” is coming to the ham radio airwaves for a very special event. Bob Maguire, KA2WXU, reports over the Internet that on November 9, 10, and 11 the Battleship Missouri Amateur Radio Club will be on the air each day from 17:00 to 04:00 U-T-C on 14.263, 21.363 and 28.363MHZ, in honor of Veteran's Day weekend. There is no special event QSL card for Veteran's Day event but if you Q-S-L via KH6BB you will receive a regular Mighty Mo QSL in return. More information is on the web at www.kh6bb.org. (KA2WXU)

**

ON THE AIR: UARC CELEBRATES 75TH ANNIVERSARY

The Utah amateur Radio Club will celebrate its 75th anniversary with an on-the-air event beginning Saturday November 9th and continuing through November 10th. Operation will be on most high frequency bands with emphasis on 20 meter SSB. The call sign to listen for is W7SP. For a special commemorative card, QSL as directed on the air. (N7HVF)

**

INTERNATIONAL – INDIA: PIRATES PERSIST

The president of the Amateur Radio Society of India, reports a significant number of pirate operations using call signs VU4A, VU7A and similar other call signs continues. VU2SDN says that a blanket ban exists on operations from Andaman, Nicobar and Lakshadweep islands, and that VU4 and VU7-prefix call signs have not being assigned for 10 years. The only exception was the brief 1993 VU2JPS operation from the Andaman Islands. Quoted in the ARRL Letter, VU2SDN says that call signs that begin with VU2 followed by two or three letters or with VU3 followed by three letters are the only valid call signs for India. (ARRL)

**

INTERNATIONAL – USSR: A WALL OF SOUND

Radio Liberty's broadcasts to the Union of Soviet Socialist Republics were the target of Soviet noise jamming for several decades. But Media Network reveals that the Russian operators actually left frequencies undisturbed so their friends could hear the programs. Now, you can too with a 30 second audio sample of what jamming sounded like for those of you too young to remember. Its on the Radio Netherlannds website. The URL is http://www.rnw.nl/realradio/features/html/jamming021018.html (Media Network)

**

DX

In D-X, a surprise U-S to Japan long path opening surprised many South-West region hams the morning of October 31st. At about 15:45 UTC, D44TD was worked as far west as Arizona. while N6XQ was reported to be 599+ into JA-land, Unfortunately for many U-S hams the surprise opening took place while they were away at work and preceeded an X-class flare a bit later in the day. (K7JA)

**

THAT FINAL ITEM: SOLVING AN AGE OLD QUESTION

For nearly a century, mathematicians have been stumped by one of the math world's most difficult problems. This is a conjecture by French scientist Henri Poincare about the properties of three-dimensional space. And now, it appears as id a British math whiz claims to have solved the problem. Amateur Radio Newslines Henry Feinberg, K2SSQ, has the puzzeling story:

--
Jules Henri Poincare was dubbed by E.T. Bell as the "Last Universalist. A man a who was at ease in all branches of mathematics.

Poincare was also a 19th century professor of astronomy who made fundamental contributions regarding the motions of the planets. He went on to found the field of topology, a branch of geometry, and even competed with Albert Einstein in the study of relativity.

Before Poincare, mathematicians fully understood two-dimensional space, such as the Earth's surface, and could list all the possible shapes of two-dimensional surfaces and use mathematical calculations to distinguish between them. But The math mystery Poincare raised regarded the properties of three-dimensional space. His question, or conjecture, was whether the two-dimensional calculations could be easily modified to answer similar questions about three-dimensional spaces.

He was pretty sure the answer was yes but couldn't prove it mathematically. Nearly 100 years later, math whizzes remain stuck, except for one. His name is Martin Dunwoody.

Dunwoody is described as a British mathematics expert. His answer is barely six pages long and only an outline. And as you might expect, Dunwoody's solution - complete with formulas and diagrams - has been praised and challenged in England.

No, we will not try to explain all the math here. What is interesting is the reaction of the scientific community. Professor Ian Stewart of the University of Warwick, one of Britain's most respected mathematicians calls it the first good shot at this problem in years,. But Colin Rourke, another University of Warwick mathematician, disagreed. Rourke says that when he raised a problem in the solution, Dunwoody admitted on his Web site that it could be difficult to overcome.

Once the math community has accepted the solution, the Clay Mathematics Institute in Cambridge, Mass., must conduct its own review. Only if that proves successful will Dunwoody be rewarded. And if the reaction of the British math professors is any indication, this conrriversy could rage on in math circles for years.

Adding it all up for the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.
--

Even if Dunwoody continues to refine his answer and eventually is proven correct, it could be a long time before it's official. First, he must get it published in a mathematics journal, then undergo a two-year waiting period of international review. (Science Today)

Peter,

Think you need to get a different ISP. Caribe.Net resolves to 209.91.196.15
and www.caribe.net works fine.

I on the other hand elect to use a bogus email name and domain. But I'm
easy to find if you really need to contact me direct.

I've tried numerous times, too. I know he does QSL, I just figure the mail is getting pilfered. Hopefully he'll be back at his home QTH in a few years, wherever that is, and mail won't be a problem. We can all hopefully get caught up on QSL'ing then.

I'm having the same problem with SU9ZZ QSLs - several tries, no response.

Hi John;

On all your questions, Yes.

Also poosible to make a query on the logbook on many fields. When you get
the list in 'logbook' you can export to an CSV-file.
If you change the extention of the file from csv to txt you can import the
file in Excel and Access.

I get QSL from Ralph, without envelope - just addressed QSL simple black&white card (only colour stamps, hi)

before I find his business e-mail in some UN documents (by internet) and asked about QSLing

Hey Guys,

Sorry to be so long getting back to your responses.
I've been trying to evaluate the DXKeeper program. It
is sizable indeed. Too bad I don't have a true SVGA
monitor for DXView (though I still found a work-around).
It's a very impressive set of freeware. How tragic that
work, family, and life in general should get in the way
of really important pursuits such as DX.

I'm still keeping my options open for some of the other
offers (thx., thx.). Will report more. In the meantime my
thanks to all.

If you have space on your computer for LaTeX (which is
a rather big, but very versatile typesetting program, good
for almost anything from scientific books to QSL cards),
you might give it a try. You can include PostScript figures,
and I have myself designed some QSL cards with it.

There is also the possibility to write directly in PostScript,
but this has so many commands that it would be good to start with
an already existing file.

Hi,

I received back the mail I addresses to the Funkner DX Family practically 2 month ago, what could allow me to get their CIS award (12 countries worked/heard) from UK.CO.

Their address was RS3DZZ, P.O.Box 50, 109439 Moscow.
But it seems to be no more active (Moscow postoffice send the mail - and IRC and dollars included ! - back writting "No r&#65533;clam&#65533;, no asked for").

Can someone out there tell me what could be the new address of CIS award manager ?

Thanks in advance

Thierry, Luxembourg
ONL5183
NB. For those to whom I sent a QSL and sent me theirs, I received it in the SAE I prepared. Tks

3324. VP3MEB/MAB : you call tha a QSL ?!

Newsgroup: rec.radio.amateur.dx

Hi,

I just received the "QSL" card from BP2MEB, VP2MAB.
This is what we call indeed a QSL, a card confirming a QSO...
but it does not looks like a usual QSL.
See by yourself. The document displayed on QRZ show the document.

What I received is the same picture as the one you can see on QRZ... but it is a small card, about 12x8cm, printed on a simple printer of medium quality, recto verso, cut manually and not always straight, and of the back of which the QSO information is manually handwritten where that are place left, the information being quasi lost between manufacturers logo (75% of the back show logo for publicity purposes).

It is pity when you paid 1 GS and the return for a document sponsored...

Good to know

Thierry

Well, what do you want? Confirmation of the QSO or SWL report.
Did you get it? Apparently yes. Fine. Then it is what we call a QSL.

Since you complained in public: You can't always expect
pretty pictures in fancy print. Actually, for DXCC and several
other awards, a handwritten note on a page from a schoolchild's
exercise book is as good as any other sort of QSL card.
Remember that 80 c of your dollar went probably to the post office,
anyway.

Maybe they had run out of pre-printed cards and used whatever card
stock and printing facilities they had - who knows? Did you ask them
before you posted to r.r.a.dx? If I had something to complain about,
that's the first thing I would do.

Out of all the horrible and ugly QSLs I've ever received, the one that
stands out the most is 9K2DR from the 1970s. Many of you will remember
this one. It was a crude hand-drawn sketch of a barely recognizable
rooster crowing CQ printed black on white, odd-sized paper of course.
The report form was rubber stamped on back.
And if you ever remember working him (I think he was Robert) you'll
remember his xmsns were one long series of heavily weighted dots and
dashes with no spaces :-)
Robert was then in his 70 or 80s I think and had been active in the
region since the colonial MP* days. I must have worked him on every
band and had many chats with him. Can't imagine putting a price tag on
his 'unique' QSLs no matter how ugly.

I don't see any problem with home printed cards. The only purpose of a QSL
card is for acknowledgement.

I have confirmations written on torn pieces of brown paper sacks .... works
for me.

I am not sure where the notion started that QSL cards had to be 50 colors,
fold-outs and museum quality.

Hi,
It seems 9K have the best and the worst...
See the 9K2ZZ, Bob and his famous style...
The callsign, big, it name , smaller and on the back as many as sticker you worked him... :-((
Compared to 9K2OK who sent a true polychrome QSL, there is world apart !

If some of you have received very bad QSL, showing very strange colors, one color, AND the same callsign looking like a postcard (a very good one, polychrome) please send me a scanned copy of each.
I would like to make on my webpage some comparison between QSL. Send to lombryt@hotmail.com. Tks

Hi,

That can be a problem as QSLing direct I pay 1 GS, maybe more, for a QSL,
most being sent to DX or to their QSL mgr, waiting impatiently the return.

Most hams (to say, about 60% of my QSL), send an ordinary QSL on vellum
bristol with text box filled out on front. On these QSL verso is often
blanck.
For the same price I prefer to receive a colorful QSL without ink marks or
crossed out (erasure) , showing a polychrome picture on recto and the QSO
information on the verso, and still more when this is a far country, a
DXpedition or one of the 100 most wanted. But this is not always the case,
even QSLing direct.

It's really a pity that some institutions, like 4U1ITU (or their QSL mgr)
send ordinary bristol QSL (one side) where an individual station like 9N7ZK,
Bill, send you a colorful one showing Himalaya. Worst, 4N1UN requests a
fee - 1 GS although they print GS themselves !! - to send your a 2 colors
QSL !

See ITU QSL here : http://www.astrosurf.com/lombry/Radio/qsl-4u1itu.jpg
and 9N QSL here : http://www.astrosurf.com/lombry/Radio/qsl-9n7zk.jpg
See 4UN here : http://www.qsl.net/on4ldu/on4ldu/qsl/qsl-4u1un.jpg

Note that if you ever receive mine (some readers did), don't worry, this is
a colorful one showing a sunset in LX on plastified paper ;-)

3330. Re: CIS award from Funkner DX familiy

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-12 14:39:24 UTC
From: Thierry Lombry <lombryt@hotmail.com>
Message-ID: <3dd112a2$1_2@news.vo.lu>
Source record: 11704

Hi,

Please do confirm these two alternates for the CIS award are still valid :

Russ Fish K7INA, 216 Spring Road, Port Angeles, WA 98362 U.S.A.
or
Marina N. Funkner RK3DNU, P. O. Box 14, Zheleznodorozhnyj, 143987, Russia.

If that may helps, I have found the info here :
http://www.funcap.narod.ru/index.html
but I am not sure data are still valid. So I sent to each Mgr an email in
order theu confirm their respective address.

Do me a favour and don't send me any QSL of yours. Neither would be able to
meet your expectation, nor would I want to.

|The report form was rubber stamped on back.

Mine has two roosters, one crowing "9K2DR" and the other crowing
"Bob." It dates from 1979 and was my first Kuwait QSL and I was glad
to get it.

One of the nicest "personalized" cards I've received was from XT2AW.
It is a preprinted card with an outline of Africa and the op's address
but it also has a very colorful little abstract figure to the left of
Africa.

While it too dates from 1979, it wasn't until about a year ago that I
was handling the card and realized the colorful image was actually
hand painted with the tiniest of brushes.

|Hi,
|
|I just received the "QSL" card from BP2MEB, VP2MAB.
|This is what we call indeed a QSL, a card confirming a QSO...
|but it does not looks like a usual QSL.
|See by yourself. The document displayed on QRZ show the document.

I'm not sure what call you are talking about since the header and the
message have different ones.
|
|What I received is the same picture as the one you can see on QRZ... but it
|is a small card, about 12x8cm, printed on a simple printer of medium
|quality, recto verso, cut manually and not always straight, and of the back
|of which the QSO information is manually handwritten where that are place
|left, the information being quasi lost between manufacturers logo (75% of
|the back show logo for publicity purposes).

My policy is to QSL all cards received 100%, and this includes SWL
cards. Many hams do not QSL for SWLs, so you should be thankful that
you got one at all. It is too bad that you are disappointed with the
card you received, but the money you sent is to cover postage, not pay
for the price of producing the QSL.

I get lots of QSLs from expeditions for which I sent more than 1 GS
and the card I get back is a big advertisement for one or more
equipment manufacturers, but I'm not complaining about it.

You have the country confirmed. Move on.

Thierry, I've tried to hold my tongue (or rather fingers off the keyboard), but I can't any longer. Your are *NOT* paying a GS for a multi-coloured QSL. You are paying for the postage necessary to return proof of a QSO back to your location. Period. NOTHIN MORE.

>For the same price I prefer to receive a colorful QSL
I'm sure you would. I'd like to travel on the Concorde and have a 120 foot tower with stacked monobanders on it as well. Sometimes we have to live with disappointment.

>without ink marks or crossed out (erasure)
Yes, I agree. Crossed-out and re-written or altered cards are not valid for DXCC credit. A station should make out a new card if he makes a mistake.

>showing a polychrome picture on recto and the QSO
>information on the verso, and still more when this is a far country, a
>DXpedition or one of the 100 most wanted. But this is not always the case,
>even QSLing direct.
Deal with it. QSLs cost money to print up front, and not all hams have a that much to be able to afford to print a four-colour card just for you! Do you know what it costs to get cards made? Do *YOU* have a 4-colour card that you send to everyone? Mine cost me about $185 US for 1000 cards (yes, I could have gotten a better price, but I needed them fairly quickly). Maybe that's not a lot of money to you, but for some hams, they have to feed their families and pay rent before spending money on cards.

>It's really a pity that some institutions, like 4U1ITU (or their QSL mgr)
>send ordinary bristol QSL (one side)

I'd give my eye teeth for a confirmed QSO from 4U1ITU, and I don't care if it's written in crayon on a bit of toilet tissue (so long as it's not used).

> where an individual station like 9N7ZK,
>Bill, send you a colorful one showing Himalaya.
A Thank you to Bill. I'm happy for you that you have a nice picture of the Himalayas.

>Worst, 4N1UN requests a fee - 1 GS although they print GS themselves !! - to send your a 2 colors

>QSL !

Do they print postage stamps as well?? Thierry, for the zillionth time, you're paying POSTAGE CHARGES!! And they do NOT print GS! The United States Department of the Treasury prints them. If the International Telecommunications Union is now printing them, I think someone ought to let the US Secret Service know about this. I'm sure they would be interested.

>See ITU QSL here : http://www.astrosurf.com/lombry/Radio/qsl-4u1itu.jpg
>and 9N QSL here : http://www.astrosurf.com/lombry/Radio/qsl-9n7zk.jpg

>Note that if you ever receive mine (some readers did), don't worry, this is
>a colorful one showing a sunset in LX on plastified paper ;-)

Again, you are to be congratulated for paying for a nice QSL, and I'm sure recipients would be happy to get LX confirmed. however...

>Thierry
>ONL5183 (in LX)

That doesn't sound like an amateur call to me...you're an SWL, correct? I'm sure more people would appreciate your card if it was actual confirmation of a QSO with you.

The bottom line is simply this. It doesn't matter what the damned card looks like. So long as it accurately shows the correct information that's necessary for whatever award you're chasing, or if you're not chasing an award, so long as it proves that you had a successful exchange with that station then THAT'S ALL THAT MATTERS. PERIOD. Yes, it would be nice if every station could afford a 4-colour card, but unless you're volunteering to pay for them all, don't be TOO offended when you get a small scrap of paper back.

If you hear me, please send me your QSL with 1000 GS and instructions
on how to prepare the return card. I can supply a card with an
Arizona sunset that I'm sure is better than anything you see in LX.
see:

http://users.triconet.org/wesandlinda/Sundown_3.jpg

for a sample.

Or for something a little unusual:

http://users.triconet.org/wesandlinda/N7WS-2a.jpg

For only 500 GS, I send:

http://users.triconet.org/wesandlinda/N7WS-1a.jpg

Of course these jpeg do not do them justice. Yours will be custom printed just as you specify.

I operate mostly 20 meters. Please listen for me.

I consider these ecowackos terrorists. Remember those forest fires a few
months back out west? Why was that? Because those green wackos wouldn't
let anyone clean out the underbrush. And if ANY sort of clearing was to be
done to help break up fires they took em to court.

Got no use for them at all.

Unfortunatly, I think he's dead serious. Bad case of "DX Is My Life".

Somebody needs to take the boy to the drug store, so he can buy
all the pretty post cards he wants and pick them out himself.....

Good news is he makes me feel much better after all the SWL cards
I threw in the garbage over the years. Nobody would have appreciated
my plain old ugly QSL card even if I had sent one back.

Well Jim, I wouldn't go that far. I've always cheerfully answered SWL cards with/without being sent money and never had a single one complain about the quality of my card.
Thierry has done a lot of agonizing and posting here in recent months how to assure the best return rate on QSLing and I suspect his results may now drop to zero% from anybody who frequents this group.

Don't be so sure...
The main concerned people, VP3MEB himself, send me 4 emails explaining the situation that some of you know very well as i speak about it on the air, and I answered him also.

As a matter of fact, he accepted with sympathy to send me his true QSL. So my action was justified.

You think what you want about QSLing with me, or SWL if you like (don't forget however that all of you where SWL in the past), but it seems that some of you profit of such post to spit out the venom they retain for years.

This is not my +20 years of QSLing that will change my opinion. I see and experimented situations worst that this one, which hopefully has an happy end (for me).

But as usually if someone does not moan, this situation will never change, and some OM (I don't speak about VP2MEB) will always ask you up to 10 GS for their QSL, what stay a scandale until guy like me expose the situation in public.
This last case has still to be develop, later, when all of you will be lazy to shoot at me and in a quieter position to discuss.

Hi,

We have often discussed on this forum about the price of QSL vs the investment in printing and even in rigs. If we count this way, the calculation is wrong and why to not incorporate the price of the car that helps you to go to the post office and the house that protects your thousands QSL in stock... This is a non sens.

Sponsor pay up to 10 millions dollars for an DXpedition and their QSL is not necessary more expensive... of course they do enough advertising that give them a lot of return....

As amateur I cannot expect such a return, on the contrary. As I lost a lot of money in QSLing (1GS + 1 stamp + enveloppe, etc) I hope at least to get a minimum of return, so a good QSL....
This is my opinion, I know that some share it, and I only ask you to respect it as it.

When an OM send me a bad QSL I try to negociate a better one. Sometime I succeed, sometimes not.
This time I did.
Now, you appreciate of not my position is something different. My objective was to get the good QSL and thanks to my mail to VP2MEB, I got it.

And from what I read here, this is probably not due to all your intervention, more directed by subjectives ideas or maybe to protect a state of fact than to explain me why such situation still exists.

In summary,
I will never be agree with the fact to send an ordinary QSL to some OMs workinh me once for example, and reserving the most beautiful of my QSL series to only a few priveleged OM that worked me on 5 bands and paid 10 GS, as do some (rare hopefully).
For me all QSO request a QSL, without discrimination in the quality of my QSL. If I can only send him one serie, OK, he will receive my only one QSL.

But the argument taken in account several extra is not acceptable for me.

To close,
I still prefer to receive a bad QSL from bengladesh of Solomon island than a full color one because I am sure that the money is better invested in school or humanitarian needs. But in the western world or middle east, i suspect some guy doing much money in QSLing. This is all these situations I highlighted here.

If you did'nt understand teh lesson I can repeat a next time.

Hi,
If you don't mind, be happy, but there is however a problem in the fact.

This is the situation where an OM, often using big guns and high-end RTX - I can list you a lot of them and many come from the middle east, some from Oceania too - who negociate their QSL at the highest price.
That means that they consider their QSL has some value, and sometime it seems their QSL is estimated between 2 or up to 5 or even 10 dollars ! If you don't pay you receive a bad QSL 2 tones.
Do you find such a situation normal ?

This situation is not admissible and we should list all OM requesting over 4 GS on this web to avoid such situation to repeat and repaeat in all DX spots and most wanted DX.
This is my opinion.

Now do not misinterpret my opinionas most will probably do, and thisis what I told to VP2MEB a few hours ago after what he accepted to send me his true QSL.
I am not against the fact to receive an ordinary QSL, this is hopefully the case if the OM/YL has only one series of QSL to send, and still better, as I told before I prefer to receive a monochrome QSL from Solomon island or Benglasdesh because I know that their money is invested in something more usefull like education, etc.
But I cannot accept such a behaviour from a western station that has money to print various series of QSL and send them accordingly a subjective reason. There is no more fairplay and ham spirit in this attitude.

One of my favorite card so far is from KD5IJT. It was on a 3x5 note
card, Made with two felt tip pens and a ballpoint pen. The felt pens
were used for the callsign and a green border, and he made a little
sketch at the bottom in ballpoint, below the note he wrote me.

Some of the cards I get aren't that pretty, and I have to admit I'm a
bit deflated when I see them, but that does not detract from the fact
that I'm very happy to get them. Even better is that they count!

Whatever keeps you happy in the hobby, I guess.

I know very well the problem. In more than 20 years of QSLing I must still have some 2-3000 QSL, surely 3000 QSL on the way, staying somewhere in suffering between my QTH and the recipient or vice versa, I don't know. Many have GS inside. Hoepfully some comeback with a "wrong address" sticker, even in URSS (and the GS is still there). So disappointment I kown that too. I'm not a novice believe me ;-)

Oh yea. I explained this problem in this post ad some others.

Do *YOU* have a
> 4-colour card that you send to everyone? Mine cost me about $185 US
> for 1000 cards (yes, I could have gotten a better price, but I needed
> them fairly quickly).

Indeed you can easily find cheaper and probably with the same quality in Italy (they are several printshops doing good prices and excellent QSL)..

Maybe that's not a lot of money to you, but for
> some hams, they have to feed their families and pay rent before
> spending money on cards.

You know, each of us has a "limited" budget dedicated to his/her ham activity. Working, like many of you I have some chance to have some money left but that doesn't mean that I have the intention to throw it out. I have also others needs, but also currently some priorities I try to respect of defend.

>
> >It's really a pity that some institutions, like 4U1ITU (or their QSL mgr)

> it would be nice if every station could afford a 4-colour card, but
> unless you're volunteering to pay for them all, don't be TOO offended
> when you get a small scrap of paper back.

All depend of the sender (DX spot) quality (country, person, etc).
There is more than 22 years I practice hamradio and I know what are countries, or OM, that practice this double game of having two or more set of QSL, sending them accordingly a deep subjective opinion of their recipient. Like you I suppose, I don't like such attitude.We all practice the same hobby, isn't it. So we all have right to the same QSL, why several series ? (There are reason, I can heard them but I do not accept them, and still less when I can convince the OM to send me back his most beautiful QSL in place of his "second choice"...).
if some do not worry about this attitue, I am trying for a while to change that in various posting, letters to associations and meetings. This is far to be an easy task but sometimes some OM change their mind.

Hi,

You are maybe among the ones working with a monochrome QSL or so ?
I do not arg against you or the kind of QSL you use, or some other reader
use.
I protest against those people who printed 2 or more series of QSL and send
systematically their worst serie to the OM they worked only once, reserving
their best serie (polychrome) to fivebanders, etc.

I'm preparing ar article about this. Me and my friends have found in our
stock of QLS received months and years ago dozen of such case, where the OM
send QSL of various quality depending the number of QSO... or GS you sent
him....

This is this attitud I don't like and I suspected to VP2MEB. Hoepfully after discussion he changed his mind but I cannot be agree with this.

If you are really intersted in send me a personal email to discuss about
this problem as it seems that most of today readers are opposite to my
protest and can even find something to say against what I could say.
I can find probably find some in my old QSL if I check my olderst logs. Not
easy but we can find them I think (not a joke)

Hi,
Do not misinterpret what I told as most of today readers.
Check my other answers too if you want.

I protest about the fact that some OM have several set of QSL and distribute them accordingly a deep subjective idea of what could be "the best" for such of such recipient. This is inacceptable.
But hopefully I have the chance to convince VP2MEB to send me is "normal" QSL. Why he has two set in another affair.

Boo-freaking-hoo... It is precisely people like you who produced the
green stamp collectors whose idea of dxing is five-nineing a shitload of
US, JA and Europe and then running to their mailbox to collect their loot.

If everyone could just wait it out a few months, most of the cards would
trickle down through the buro and there would be a lot less ham
professionals and more amateurs.

But when even an ordinary plain middle-European ham knows that he can
request and *receive* direct-only cards, why would the rarer ones
abstain from asking for what the market can bear?

In the end, you get what you pay for.

This is not a problem related to pro cons hams, all are playing the same
game.
If about currently 2-3000 of my QSL are somewhere on the way between LX
and the recipient or vice versa, this well because i QSL most via buro !
Reread my threats in place of saying anything without knowing the
subject.

Don't worry about me. I am used to "fight" again some hard to convince
opinion.
I am on the move for over 20 years now, I know the music
Most answered seem only to convince me that some OM do protect their
privileges in sending their 10 series of QSL depending the recipient's
callsign or any other insensed idea...

Do demonstrate me the contrary... My stock of QSL showing the same
callsign on various quality (and sometimes price) is a fact you cannot
ignore.

Hi,

You like Oleg Sakharov's QSL, the famous R1ANF (see QRZ), this colorful QSL with bleu, yellow, red colors ?

In place of QSling via his manager you can get his QSL quicker and surely.

Do you know how (I know) ?

To be followed...

Easy "DX",

Send him the QSL direct at Bellingshausen station !
This is not a secret, this is only not know by all OMs, but after some
years of practice all OM know the trick.
And indeed his QSL is very beautiful and attract OM like bees on honey.
Here is it, http://www.astrosurf.com/lombry/Radio/qsl-r1anf.jpg
But still better, Oleg is very friendly.

3367. Say no to multiple QSL !

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-13 02:57:00 UTC
From: F1FNU@hotmail.com
Message-ID: <53efdcd9.0211121856.61d9bec6@posting.google.com>
Source record: 11741

Hi all,

I read with interest the mail sent my Thierry, ONL5183.
(without entering the debate, Hi ... I do here)
We both speak french, so sorry if there are some mistakes in my post too.

I would like to insist on the QSL problem and Thierry had the courage I think to expose a true problem to our community.

I was also witness of such practices, receiving B/W QSL printed on bristol (carton leger) and then discovering that the club received a colorful QSL for the same callsign. Our clubstation is working with an antenna farm 15m high, a Mark V and various high-end transCV, where I can only use a midrange TS 50W and a dipole at home.
I worked that stn twice on 2m, the club of 5 band + sat.

What else excepting the working conditions and numbers of bands worked could explain that this OM sent different QSL ?

ONL5183, if his strory is true, (but i beleeve him easily) and if he has not exagerated he experimented a worst case, receiving a "paper like" QSL then the usual QSL on 200gr paper or so after have complained to the sender knowing he owned another set of QSL.
The problem is still worst and can be highlighted as he wrote when the station requests an additional fee to send you his true colorful QSL and personaly I cannot accept to pay over 2US$ for a QSL.

We cannot accept such deals, I mean several series of QSL and price over 2US$ when QSLing direct !

Are you not agree with this idea ?

If ONL5183 (je parle pour toi Thierry) has maybe introduced the problem with a lack of diplomaty (this is maybe voluntary) or without enough detail in his first post, at least 4 or 5 OM shared his opinion but all the problem seems have been dissolved in a hard talk pro or con ordinary text box QSL, what, if I well understood hs post and answers was not the subject.

I wpost this sort of reply to knwo what is the opinion of the US community, where most QSL Mgr are located about the fact to sent various QSL, in different quality, to OM, YL SWL ? if you use such practice, at what condition do you send the ordinary and the more bautiful QSL to the destinee, what are your criteria ?

Thanks for your explanations

F1FNU

I'm with you on that one Derek. I get a few SWL cards through the bureau now and then and I will reply in kind. Haven't gotten one direct yet. Frankly, I just don't see the point. It's so bloody easy to get a Ham license today, why not just get it over with, learn the damned code and some kindergarden theory and get on the air...Let the QSLs stand for something.

And when I was an SWL (during the brief months I was studying before passing my exams) I never sent one card out. If I'd heard a special utility station like an aeronautical mobile progressing from one side of the world to the other, I might have, but never to a Ham station.

Since I have a 4/1 colour QSL card, I guess I can't justify throwing away the SWLs I get...so bureau it shall be!

|
|Don't be so sure...
|The main concerned people, VP3MEB himself, send me 4 emails explaining the
|situation that some of you know very well as i speak about it on the air,
|and I answered him also.
|
|As a matter of fact, he accepted with sympathy to send me his true QSL. So
|my action was justified.

He probably got tired of all of the complaining and spam and said to
hell with it I'll send another card.
|
|You think what you want about QSLing with me, or SWL if you like (don't
|forget however that all of you where SWL in the past),

When I was SWLing, I was 12-15 years old and didn't have a QSL card.
I didn't try to get cards from hams but SW broadcast stations. I
wrote letters to the chief engineer giving signal reports and
describing the program content that I listened to. Not quite like
tuning the ham bands during a DX contest, copying down calls and
demanding a four-color QSL in return for zero effort.

Just wondering if Thierry is a native LX or a Belgian being in LX for a
living (and returning back home after his 9-5 job or on week-ends).
If the later is the case, it should at least be LX/ONL5183 to do it right
(according to CEPT rules) or apply for a LX SWL call if actually living in
LX, anything else is wrong. Anyway, ONL5183 would only confirm Belgium.

3376. SA-049 - What's the name of the island?

What is the name of the island the french guys are operating from?
On DX Summit there are lots of suggestions like Bel Isle En Mer, Staten,
Navarino, Redona etc...
Can anyone tell for sure?

Hi,

Small is beautiful... Hi !
SA-049 is Los Estados Island (Staten)
Check with the altest release of DX Atlas. It should be listed (not sure
however)

You are not concerned by how I manage my private life and from what i know
you never see my QSL and its verso. So you will discuss about that fact from
the moment you will see my QSL
All other "idea" like these are pure insinuation.
have the courage to give me your name instead "3dd2170e_2" sending his meail
from a public LX server.

> If the later is the case, it should at least be LX/ONL5183 to do it right

Why paying for the same info you can have by 425dxnews and www.NG3K.COM.
Send al your info to i1jqj@425dxn.org and they publish it in 5 languages.
And it does not cost one dollar at all.Why always inventing warm water?
Work together!

Why pay for correct information when you can get incorrect information
for free? Great question. Because if you send your QSL to the RIGHT
place, you have a much better chance of getting one back......

The GOLIST is the ONLY source of VERIFIED information. That's why.

Why are hams so willing to stick five bucks in an envelope and mail it
to anywhere that some moron posts on the cluster? Because it's so much
fun to get on the internet and whine about NOT getting QSL cards?

Why pay for QST when you can get an AES catalog for free?

Why pay for food when you can eat from a trash can for free?

Why does our SWL buddy have so many unreturned QSL cards?
Maybe because he reads the 425 DX news.........

73, Jim KH2D

RIGHT ON JIM. DITTO DITTO
And now the RAC (Flying Horse Callbook) is kaput because of all the "free"
on line callbooks.
These "free" links break regularly, info is partial, outdated, and many
countries are not on line.

The internet is a great resource, but not the only resource.

If you are just starting to DX, the GOList is the way to proceed, otherwise
you end up here begging for QSL info that when you get it may be incorrect.
Or searching for an inordinate amount of time on all the web pages.

Although "PathFinder" is certainly well done. URL:
http://www.qsl.net/pathfinder/WebClient/
Before you ask for QSL info here -- check PathFinder or get the GoList

The authors of the world check, double check, and triple check their work.
How many posters here do likewise?

To Repeat Jim's observation -- The GOLIST is the ONLY source of VERIFIED
information. That's why.

Message-ID: <J8QA9.7733$XF5.1247946@news2.west.cox.net>
Source record: 11616

Did you know ??

PathFinder now has a GOLIST button to use the GOLIST database 30 times a
month for FREE!!!!
Pathfinder -- http://www.qsl.net/pathfinder/WebClient/
GoList --- http://www.golist.net/ Once you find how good the GoList
is -- a subscription will save a lot of time and grief.
I have no pecuniary interest -- just a high recommendation for a well
implemented service which I have used for years.

Check these before asking for QSL info. And always state you have looked at
the on-line resources B4 asking here. I used to look up info for folks but
found about 50% of the time it was available on the web.

Also I hear that the Radio Amateurs Callbook (RAC Flying Horse) is in its
last publication (CD-ROM) -- better get this while you can.
http://www.hosenose.com/racx/

More QSL sources at URL:
http://ac6v.com/callbooks.htm

And http://www.google.com/ will often find info and on-line log books

Happy QSLing es DX

Hi,

The answer is straighforward : do answer or post messages in place of
shout at him.
This "guy" as you write is really not the bad guy as some or maybe you
suspect if you check all his posts...
Here in Europe, and mainly in F, ON, LX... several hams know him very
well and his post are always welcome.

So move on and discuss hamradio, mainly DX please !
We play in the same court.

Marc

Come on Jim. Don't say that all info of 425 isn't verified.
And must we always do like Americans?
And don't think that many send information. Many forget to send the information. An other part are too late or after the deadline (typical American term). It's the same with articles for a periodical. Annouces arrives to the editor after the deadline and then they are suppriced that it isn't published. Don't forget, we have to do with hobbists. It's for fun and not for the money. And how more it costs the less they wanted. Don't think that every amateur has the money to buy every thing he wants. That is only the top of the iceberg who can do that.

The notice about QSL for SWL : How many licenced amateurs write cards to SWL, respects SWL? Many don't even answer a QSL from an other amateur! I was SWL before i became a licence and i can see an big difference between my SWL period and now. The return now is much bigger.

Perhaps the info can be send to 425dxns and the can publish it under a new heading ********* verifyed info by the GOlist **********
If 425dxns really should publish faulty info than they shouldn't have more than 9200 subcribers.
Send me examples of such faulty info by them, convence me about it. Then we can talk.

So where would a newbie seek this freebie so he can use his own word
processor and graphics software to make cards?

3401. Any info on the S21YV ?

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-15 01:24:16 UTC
From: dxer@aol.com
Message-ID: <20021114202416.16839.00000467@mb-cq.aol.com>
Source record: 11627

I have seen him posted a couple of times on 14.195, but it doesnt seem anyone is hearing him at that time.
Does anyone know what times and freqs he might be operating. Does he have certain 15 or 10 meter freqs and times he likes.

Tnx
Craig

Mate, you're totally out of tune, I suggest you join the local primary
school group of girls collecting postcards, barbie dolls, serviettes
(tissues) and similar things. That'll bring you to a total
(ham)spiritual peace. It's full of fairness, too. And fairies, for sure.
:-)

Before I go any further, go to this link and LEARN about QSLing.
(I recommend everyone read this, it's a very nice article, UFB)

http://www.eham.net/articles/3943

(now read on, below)

So, bloody, what ???

> Do you find such a situation normal ?

Yes, and there's a perfect solution, don't ask them for the card.

>
> This situation is not admissible and we should list all OM requesting over 4
> GS on this web to avoid such situation to repeat and repaeat in all DX spots
> and most wanted DX.

Ha ha, as if they would care. And why don't you list them ?
Even better, take them to the European Court of ... whatever and sue the
hell out of them for "QSL discrimination"

> This is my opinion.
>
> Now do not misinterpret my opinionas most will probably do, and thisis what
> I told to VP2MEB a few hours ago after what he accepted to send me his true

> usefull like education, etc.

> But I cannot accept such a behaviour from a western station that has money
> to print various series of QSL and send them accordingly a subjective
> reason.

OK, so don't exept it. Other 2.554.877 hams world wide do. When you get
his card, send it back and ask him for your money back. By the way,
iclude 1 or 2 GS's for return postage of your monies.

If I ever receive your card, I'll print one special QSL for you. Unique!
it will include picture of all European presidents' wifes in bikinis
on the tropical Queensland beach. Boy is this gonna cost you.
And there will be a few extras (at extra cost) Dolphins $ 5 each,
Pelicans $ 3 each, with spread wings another $ 1 extra (per wing,
ofcourse) Palm trees $ 1 each, coconuts 50 cents only.

And an extra extra special price (november only) 50% off on all waves on
the ocean, normally 19.95 including TAX :-))))

However, black and white card US$ 1 or 1 IRC will do. But you don't need
that rubbish, right ?

> There is no more fairplay and ham spirit in this attitude.

I really think you should look for another hobby.

BTW, I deeply applologise for typing this in balck and white. I hope
it's not going to ruin someone's afternoon.

73 de Mike VK4DX

The above "73" is ofcourse in colour, 7 is pink-blue-ish and 3 is dark
red turning gradually into the yellow towards the top. The callsign is
naturally purple.

3410. Looking for QSL Route for old KZ5 (Canal Zone) QSO

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-15 14:25:04 UTC
From: Larry Johnson <larryj@teleport.com>
Message-ID: <3DD501E0.A9141AC2@teleport.com>
Source record: 11636

I know it's been a long time, but just went through an old log book and found a QSO with KZ5IS, which was the DXCC Country "Canal Zone" at the time (it's now a deleted country.) I did make note at the time that the QSL route for KZ5IS was via another Canal Zone station, KZ5SF. Of course, there are no KZ5 calls except in the USA now.

Anyone have any info as to either of these station's present calls, if any, or any possible route for either station?

Thanks for any help.
LJ

Source record: 11646

Hi,

Searching in my log and in my bag of QSL to answer to Derek and others supporters-san (;-)) I have found various QSL from OM (no YL sorry up to now) working in the field of humanitarian missions or educational projects abroad (5H, 9G, YB, HZ...). Some of them are for example 5H3ID, H44A (this latest having even not the slightest QSL to send but a great picture on his website).

Question:
Searching in your QSL, can you give me the callsigns (or the email) or such people working e.g for a Catholical mission abroad, an educational project in far east, etc.
And whatever the country... I know by experience there are also such missions in HZ for example - where I worked some years ago - although the country is one of the richest, building palaces where all accessories are... in gold, but locally some people (at Khamis Mushaiyt e.g) have not all the chance to go at school, although the State has to help them, etc.

NB. I do not speak about manufacturers (e.g. Nokia in BY) supporting a hamradio club under cover of a so-called educational project but rather true humanitarian missions.

Having gathered a lot of information about the subject in +20y of practice I would like to write a specific page about this activity and the friendship than link sometimes the ham community and civilians and others categories of people (e.g militaries humanitarian missions much appreciated in Belgium, which staff includes also OM that worked from Africa during their free time, doctors, managers of company (TAG,....), working for civilian associations, etc.)

But to achieve this project I need some more QSL, most of them DX, to scan in order to illustrate this file (hence my request for callsigns).

The best is maybe to answer to my private email, as you want.

Thanks in advance

Thierry

Source record: 11647

Hi,

You will find on http://www.astrosurf.com/lombry/qsl-download.htm
the new EWWA list of countries (update as Dec 2002 with new entities). This
is an xls file as all listed on that page.

Note for the readers who are interested in the EWWA award (check on
http://www.ewwa.net/) that there are light differences with the DXCC list
(there for example many entries in Antarctica, Ceuta & Melilla and divided
in 2 entities, etc). On the 200 first entries of DXCC only about 190 are
valid for the EWWA. So take care and check twice your list of countries when
you submit it to Francis, F6FQK, the award mgr.

Recently, I spent several hours contesting on the ARRL Sweepstakes -- cw and ssb. From time to time, I scanned 10 meters and heard absolutely no activity on 10m. I assume that similar conditions will be in effect during the upcoming ARRL 10m Contest.

What kinds of scores do contesters get under these circumstances?
Are there some QTHs were 10m is hot and others where it is not?

Hi,

As most readers know, the fact that a band is temporary free of
activity does not mean of course that the band is closed. Check around
it but first the propagation for that day and time using dedicated
program like W6EL a very powerful tool, and the MUF or even performing
an ionosonde with a yagi placed vertically (but this is a very special
job. See on ON4EU website in that matter).

If you apply already the simple rules of checking the propagation with
accuracy you must succeed in your DX chasing (or contest) in place of
calling CQ DX is bands that are maybe closed.

Only real-time values (valuable for about 2 hours long no more, with
"windows" lasting only 15 min sometimes) provided by software like
W6EL (see link on my webpages) can give you a quasi real-time
situation, and that works super FB, QRO (i.e. thanks to such program
ON4UN works quasi all DX on 160m and ON4LDU working mainly in CW works
the same way in checking the propagation from all bands from 1.8-28
MHz).
If you only count with the chance you cannot really succeed, or as
defined, according your chance (like playing with dices).

Check also the few comments i placed on these pages
http://astrosurf.com/lombry/qsl-perturbation2.htm and its links or on
http://astrosurf.com/lombry/qsl-propa2.htm

3438. DX Packet Cluster spots with TS-2000

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-20 00:02:13 UTC
From: "David M. St. Pierre" <salemdave@mvn.net>
Message-ID: <3ddacc52_2@corp.newsgroups.com>
Source record: 11514

I've been considering the purchase of a TS-2000, and from very careful reading of the Kenwood brochure and user's manual, it seems that it is only possible to *get* the DX Packet Cluster spots off the node with the built-in TNC. Is it possible to send DX spots to the node with the built-in TNC and FM transceiver on the subband?

If someone with experience with the TS-2000 in DXing could give me some feedback on this, I'd appreciate it. It would make the difference whether I would go ahead with the purchase, or consider another HF transceiver, and a VHF FM transceiver and separate TNC.

I know exactly what ya mean. From time to time I have thrown out a call on certain bands that seemed quiet, but surprisingly there was someone listening even though there wasn't chatter currently going on. It didnt take long to hear many more joining in after that. Kinda like a snowball effect.... otherwise most people discount the band unless it is "flooded" with QSO's. Could be a good reason as to why some of the bands are dead from time to time, even if propagation IS working. For me as listed in the second sentence, this has been at night, when normally the particular band may normally be dead....

In CQWW SSB Contest 2002 the 10m band was full like I never heard it
before. I couldn't get a free frequency from 28.260 - 28.800.

Check it out again this weekend, CQWW CW, I am sure it'll be full 28.000
- 28.200 or even higher. Same should happen in ARRL 10m, actually I
think it'll be even more crowd as it's only one-band-contest.

They are very active on 40m CW and SSB, generally a pileup but OK as long as listening 'up'.

10 meters was dead? I made 80% of my Sweeps contacts on that "dead band".

On non-contest days if you can hear activity on the Chicken Band, 10 meters is open.

I think your 10M feedline is shorted.
Signals at least 16 hours per day on 10M during the contest.
When it was dark you had to dig a little to find them :-)
When the sun was up the main problem was front end overload!

You're wrong again. The World Bank does NOT print United States
currency--and that's what a Green Stamp is (in the context of QSLing
as we're discussing it)--one United States of America dollar bill.
This is legal tender of and printed by the United States government,
Department of the Treasury.

The world bank does not print any currency (or postage stamps).

Go to this URL to learn what they do:

Amateur Radio Newsline™ Report 1318 – November 15, 2002

Amateur Radio Newsline report number 1318 with a release date of Friday, November 15, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is a lifeline after tornadoes hit on Sunday November 10th. Find out the details on Amateur Radio Newsline report number 1318 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND THE NOVEMBER 10th TORNADOES

Ham radio is called out after a series of tornadoes hit in several states east of the Continental divide. Thirty-five are confirmed dead. Damage is in the tens of millions. And ham radio becomes a life-line when all other communications fail. We start our coverage with Amateur Radio Newsline's David Black, KB4KCH, in our South-East bureau not far from one of the areas hardest hit:
--

For Alabama, the night of November 10th is one for the record books. The small town of Carbon Hill was devastated. Ten people were killed there, and damage was extensive following two tornadoes--one of them, an F3 that cut a path of destruction measuring 46 miles. In all, 12 people died in Alabama.

Two counties away from Carbon Hill, amateur radio operators were on duty at the Weather Service's Birmingham Forecast Office, where forecasters were issuing a total of 46 Tornado Warnings. The ham radio group that works with the Weather Service is called the Alabama Emergency Response Team, or ALERT. Chuck Arthur, KF4SSX, is ALERT's President:

--
Arthur: "It was very busy. We had four of our members down there from 4 p.m. until after 2 a.m. and we were busy the entire time we were down there"
--

At one point, more than half a dozen Alabama counties--stretching from eastern Tennessee to eastern Mississippi--were all under Tornado Warnings at the same time.

--
Arthur: "We are able to talk to all of the different storm-spotter nets across North Alabama and of coarse the National Weather Service coverage area and receive reports of damage, tornado touch-downs, hail and all of the important pertinent things that the Weather Service is interested in"

--

Arthur says emergency communications were conducted on VHF and UHF frequencies:

--
Arthur: “The storms came in from the South-West and moved all the way up through the North-East corner of the state three or four times in a row. We had multiple counties under tornado warnings at the same time so it makes it very busy”
--

To the north, Tennessee was slammed hard by killer twisters, too. 17 deaths were reported statewide, making the outbreak one of Tennessee's deadliest. President Bush declared 16 Tennessee counties disaster areas. From Louisiana to Pennsylvania, 88 tornadoes were reported.

Another community hit hard was Van Wert, a town in western Ohio. Fred Vobbe, W8HDU, of the DX Audio Service is in nearby Lima Ohio has that part of the story.

--
NOTE: DAVE BLACK TOSSES TO FRED VOBBE IN OHIO
--

Sunday was cool and quiet, but when storms racing across Indiana quickly it heated up the amateur community in Van Wert, Ohio. The call for amateur assistance came as Van Wert Ohio E.M.A. Director Rick McCoy, operating the Van Wert Amateur Radio Club's W8FY, alerted hams to an approaching storm.

The storm spawned one tornado in the community of Berne, Indiana, but by the time the storm arrived in Van Wert there were reports of as many as four separate funnels.

Listening to ham traffic on the 146.850 repeater and public service channels was like listening to an attack from enemy. Call after call relayed the fact that there were tornadoes on the ground. Homes, businesses, and even a large power feeder tower buckled and fell to the ground as the winds from the F4 tornadoes tore up the once pristine countryside.

The initial storm spotters tracked the storm system as it entered Van Wert county, and then exited into Putnam County where it then hit Continental, Ohio. Later the storm touched down again in Huron and Sandusky Counties on the south shore of Lake Erie.

At one point a ham radio operator solemnly reported assistance as he came across a fatal. Hams assisted in pulling people out of homes that were flattened. Four people died, two in Putnam, and two in Van Wert County. The death toll in west central Ohio could have been higher had spotters, and the Van Wert County E.M.A., not worked cooperatively together. Hams reported to the Van Wert E.M.A. and an alert system used by the county which warned a group of school kids who escaped from a theater just seconds before it was reduced to rubble, leaving a small Toyota in row one. Citizens had as much as 28 minutes to prepare for the storm due to the efforts of hams

Ham involvement did not stop with spotting. Again, working with the Van Wert County E.M.A., hams assisted in damage assessment, helped in local shelters, located downed power lines, kept traffic and the curious out of devastated areas, and assisted police, fire, and EMTS operators with communications. Some hams stayed through the night manning communication centers, which helped authorities concentrate on the task of finding the missing, and assessing the damage.

The storm was compared to the April 3rd, 1974, tornado in Xenia, Ohio, where 33 lost their lives. Had it not been for ham radio operators working closely with authorities the death toll in Van Wert and Putnam would have been much higher.

In west central Ohio, I'm Fred Vobbe, W8HDU, reporting for Newsline
--

You can see some of the damage from the storm at Fred's web site, www.vobbe.net/weather.

And one last thought: The tornadoes of November 11th are another reminder of the way a disaster can occur at any place and at any time. And when there is no other way to communicate ham radio is always ready to step in. (ARNewsline™)

**

RADIO HORROR: AMATEUR OPERATOR MURDERED IN GAMBIA

A United Kingdom ham has been killed while on vacation. And as Jeramy Boot, G4NJH, tells us, it appears as if he was the victim of a rather violent crime.

--
Ron Ford, G3NKO, has been murdered while visiting the Gambia. Ron, from Waterlooville in Hampshire, had built his own holiday accommodation in the Gambia, from where he operated as C56RF.

His body was found at the end of October and has been brought home for burial. It is thought that Ron was the victim of a robbery and the circumstances of the murder are now being investigated by officers of the Metropolitan Police.

Ron was an active member of the Royal Signals Amateur Radio Society, and was a regular check-in on the RSARS international net on 20-meters SSB from the Gambia. He had also held a number of other DX calls, including MP4BFH in Bahrain, MP4TBV from theTrucial States, VS2FN in Malaya and VS9AFR from Aden.

Jeramy Boot, G4NJH.
--

As we go to air there has been no word from Gambian officials on where its investigation of this crime is leading. (GB2RS)

**

RADIO SECURITY: BE CAREFUL WHAT YOU SAY ON THE AIR

Use discretion an the air and help defeat the terrorists. That’s the sub title of Bill Sexton’s MARS column appearing in the December issue of

Worldradio Magazine. And in it, Sexton, who holds the call N1IN says that American’s now face a new concern over the indiscreet transmission of material that my seem harmless but which could be used against us by a terrorist enemy.

By way of example, Sexton cites the well published airline schedules that were used by al-Queda terrorists to coordinate their September 11th attacks on New York and Washington. This is material still available on every airlines website.

Sexton says that we all must all be concerned with what the military calls Operational Security or OPSEC. And he indicates that it is very important for hams to consider what they are saying on the air because you can never tell who listening in. And he says that even the most seemingly innocuous tidbits of information, monitored by hostile ears are probably being handed on to the enemy’s intelligence analysts in the hope it will reveal some weakness or secret that can be used against us.

Sexton covers quite a bit about domestic security and how you can do your part. You will find it beginning on page 50 of the December issue of Worldradio Magazine. More information is on the web at www.wr6wr.com. (Worldradio)

(5 sec pause here)

**

SPECTRUM POLICY: FCC CHAIRMAN WANTS TO REVAMP THE NATIONS RF AIRWAVES

The government's top communications regulator wants to revamp the nation's current policy on use of the public the airwaves. Bill Pasternak, WA6ITF, has the details:

--
Federal Communications Commission Chairman Michael Powell says that he rejects the notion that there is not enough spectrum to go around for those who want it. And the FCC leader is proposing an almost total overhaul of the nations telecommunications policy involving radio frequencies used for everything from television broadcasts to wireless Internet devices and everything in-between.

Powell says he hopes technology and new FCC policies will take advantage of all empty and underused spectrum, possibly by using time sharing techniques. He says that recent tests conducted by his agency in five major U-S cities show that there are many under utilized spectral parcels available for sharing. This is especially true when some frequencies are used only at certain times of the day and are otherwise left empty.

What is evident is that the FCC is looking at ways to better utilize every hertz from D-C to light and beyond. And if a mandatory sharing of most spectrum is put in place there’s a good chance that all hobby and personal radio -- including ham radio -- will be sharing in some future yet to be established all-digital domain.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

The frequency bands referred to by Chairman Powell were not detailed in the news release. (Various FCC and other news releases)

**

SPECTRUM POLICY: AUSTRALIA ISSUES PAPER ON SPECTRUM USE

The United States is not the only place where spectrum use and bandspace is an issue. It’s also under study in Australia where Q-News Trevor Tague, VK4BAT, tells us what the Australian Communications Agency is doing:

--
The ACA has prepared a Discussion Paper outlining a range of issues relating to the operation of spectrum licensing and posing some questions for discussion.

The paper does not attempt to present the ACA's assessment of these issues but rather aims to provide a starting point for industry debate about the effectiveness of the spectrum licensing concept in the light of experience since its implementation in Australia some five years ago.

Trevor Tague, VK4BAT, reporting for Q-News.
--

The Australian Communications Agency is soliciting input on this matter from the citizens of V-K. (Q-News)

**

HAM RADIO EDUCATION: THE BIG PROJECT KEEPS GETTING BIGGER

Back here in the United States, the December issue of QST will feature an article on the American Radio Relay League’s Education and Technology program better known as “The Big Project”. And, according to an Internet posting to QRZed dot com by League President Jim Haynie, W5JBP, the program which got off the ground late last year grew to 26 schools in 2002.

When President Haynie proposed this project to the League’s Board of Directors, he said that it should be funded by donations, not dues. That’s exactly what has happened and he now says that he is gratified at the results to date.

W5JBP says that the Amateur Radio community has sent a loud and strong message that this is something that they want. He adds -- and we quote: “I, and the entire ARRL organization want to thank you for that support.”

At least 14 more schools are lined up to join the Big Project in 2003. The full text of Jim Hayne’s posting is at www.qrz.com. (Adapted from QRZ.COM)

**

ENFORCEMENT: WASHINGTON LAW NAILS SPAMMER

An Oregon man was ordered to pay nearly $100,000 in the first case brought under Washington state’s tough law against "spam" e-mails. Attorney General Christine Gregoire's office estimates that 28 year old Jason Heckel of Salem, sent as many as 20,000 unsolicited e-mails to Washington residents in 1998, trying to sell a $39.95 booklet called "How to Profit from the Internet."

The case was the first brought after the Legislature banned commercial e-mail with misleading information in the subject line, invalid reply addresses or disguised paths of transmission. Judge Douglass North ordered Heckel to pay a $2,000 fine and more than $94,000 in legal fees.

Heckel didn't appear in court. His lawyer Dale Crandall said he plans to appeal, Crandall says that state anti-spam laws violate the U.S. Constitution's protection of interstate commerce. (Published news reports)

**

ENFORCEMENT: OHIO HAM AGREES TO VOLUNTARY SUSPENSION

An Ohio ham has agreed to a voluntary one year suspension of his operating privileges. This after the FCC accused him of interfering with a Cincinnati area repeater system. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “The Enfocement Bureau, by agreement, imposed a one year suspension on Gary R. Weiler, KI8DI, for interference to the K8CLA repeater system in Cincinnatti. The interference occurred in March.”
--

Back in September the FCC sent Weiler a Warning Notice that alleged on several occasions he had deliberately interfered with the K8CLA repeater. That system is operated by the Cincinnati Amateur Radio Club which the FCC says assisted in tracing the interference to Weiler. By agreeing to the one year suspension Weiler avoided harsher enforcement action that could have included a hefty fine and the possible revocation of his amateur license. (FCC)

**

REPEATER COORDINATION: METROCOR SAYS COORDINATION IS BACK IN NNJ-NYC-LI

Repeater coordination appears to have returned in and around the New York City area appears. This with word that MetroCor has issued its first coordination documents on October 24th to repeater systems that have had no changes from their prior coordination.

This marks the first time for any organization to issue any coordination documents within the area since the collapse of the Tri-State Amateur Repeater Council several years ago. All repeaters in the New York City, Northern New Jersey and Long Island New York areas are being asked to file with MetroCor by

December 1st so that it can meet the submission date deadlines of the various repeater directories.

More information and necessary documents are in cyberspace at www.qsl.net/metrocor. (MetroCor)

**

RADIO LAW: COURT STRIKES DOWN DESCRIPTIVE VIDEO FOR THE BLIND

Bad news for the visually impaired. A Federal appeals court says that the FCC overstepped its authority in ordering broadcaster to provide descriptive video to accommodate the blind. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--
On Friday, November 8th the U.S. Court of Appeals for the District of Columbia Circuit threw out Federal Communications Commission rules requiring television programs to include these oral descriptions of the action on the screen. In rendering its decision, the court said that Congress did not give the FCC the power to order the creation of this service.

The court maintained that Congress only authorized and ordered the commission to produce a report on how best to accommodate the needs of the visually impaired. Nothing more and nothing less. And that it definitely did not direct the agency to create a federal mandate that a descriptive audio service be made mandatory.

Under video description, a narrator describes the action during natural pauses between dialogue. The description is available on the secondary or SAP audio channel which is usually used for second language broadcasting.

The Motion Picture Association of America had challenged the rules in court. It claimed that the FCC was not authorized to issue them. Now, the U.S. Court of Appeals for the District of Columbia Circuit says that it agrees.

For the Amateur Radio Newsline, I'm, Bruce Tennant, K6PZW, in Los Angeles.
--

Blind advocacy groups are criticizing the court decision. They say its a setback for those who are visually impaired. (Published reports)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

HAM RADIO BUSINESS: KENWOOD TO RESTRUCTURE

Some big changes at a company considered one of ham radios “big three. Ken Butler, W1NNR, tells about the news coming from Kenwood:

--
Kenwood Corporation is merging five U.S. based subsidiaries. As part of the restructuring, Kenwood will combine home and car audio marketer Kenwood U-S-A, its repair company Kenwood Service, Kenwood Communications and Kenwood Systems with their parent Kenwood Americas. The merged entity will simply be called Kenwood.

As part of the merger, Kenwood will expand its U.S. based home and car audio engineering team. The communications business which includes Amateur Radio products will continue to maintain its own sales and marketing staff. The consolidation won't shut down any offices or warehouses and the company plans to add people in an engineering capacity.

Ken Butler, W1NNR.
--

The changes here in the United States are a are part of a total Kenwood corporate restructuring announced earlier this year. (ARNewsline™ from press release)

**

OUR HERITAGE: KFBK AT AGE 80

Former Amateur Radio Newsline reporter Ross Du Clair, WA6VWY, passes along word that Sacramento California radio station has made history. This, as KFBK-AM 1530 celebrates its 80th birthday this month.

Ross is the Chief Engineer for several stations including KFBK. He says that his station began as the broadcast arm of McClatchy Newspapers in February of 1922. McClatchy is best known as the publisher of the Sacramento Bee.

Today KFBK is owned by Clear Channel Communications, of Austin, Texas. Over the years, KFBK engineers contributed many innovations to the radio broadcast industry. This includes the creation of the Ampliphase Modulation system adopted by RCA.

The station officially celebrated its "birthday" Friday 8 November 2002 at the Sacramento Hyatt Regency. The legendary Rush Limbaugh was to be the guest of honor. Limbaugh began his meteoric rise in talk radio from the studios of KFBK. (WA6VWY)

**

HAM RADIO IN SPACE: ISS EXPEDITION 6 ARE ALL HAMS

The new ISS Expedition 6 crew are all of licensed radio amateurs. They are U-S Astronauts Ken Bowersox KD5JBP and Don Pettit KD5MDT. Leading the team is Russian Cosmonaut Nikolai Budarin R-V3FB.

The launch of Space Shuttle Endeavour was planned for November 11th. It was halted only minutes before liftoff when a small oxygen leak was detected. A new launch date is tentatively set for Monday November 18th.

The STS-113 flight of Space Shuttle Endeavour is scheduled as an 11-day mission. During the seven days the shuttle will be docked to the Station, three spacewalks will be performed in addition to delivering the new crew. (AMSAT)

**

HAM RADIO IN SPACE: THE LEONID METEORS ARE COMING

Sky & Telescope magazine reports the Leonid meteor shower is due to sweep across Earth during the early morning hours of Tuesday, November 19th. If the weather is clear, we could be in for a grand celestial show. And many meteor scatter enthusiasts are expected to be on the air attempting to make contact by bounding signals off the ionized meteor tails as they burn up in the planets atmosphere. (Various sources)

**

INTERNATIONAL - CANADA: RAC VP RESIGNS

Radio Amateurs of Canada has announced the resignation of is First Vice President Joe MacPherson. MacPherson cited irreconcilable interpersonal differences with some members of the Board of Directors as the reason for his reason to stand down from the RAC Executive. A replacement for MacPherson will be named within next few weeks. (RAC)

**

CONTESTS

Turning to the contest calendar, word that the Bulgarian L Z DX contest begins at 12:00 U-T-C on Saturday November 16th and runs for 24 hours. This is a C-W only event taking place on 80 through 10 meters. The approved contest exchange is an R-S-T report and your I-T-U Zone. (GB2RS)

**

DX

In D-X, word that OH0Z on Aland Island will be active during the November 23rd to the 24th CQ WW CW Contest. He will be operating in the single operator, all band category. QSLs via Ari Korhonen, OH5DX, at his callbook address. (GB2RS)

And KX7YT is active on 10, 15 and 20 meters SSB and PSK31 as S-21-Y-V from Bangladesh. He will be there through the 4th of December. Q-S-L this one as directed on the air. (Modern DX)

Higher in frequency, the GB3VHF 144 MHz propagation beacon was removed from service on November 2nd for maintenance and was expected to be for one week. (RSGB)

And the GB3BUX 50 MHz beacon has suffered antenna damage due to storms a couple of weekends ago. It is currently running at reduced capability as a result. Its sponsor says that repairs will be made as time and weather conditions permit. (RSGB)

**

THAT FINAL ITEM: FCC HONORS WORLD WAR II COMANCHE CODE TALKERS

About a year ago Amateur Radio Newsline told you about a very special group of Native Americans who’s linguistic ability made battlefield communications secure during World War II. Now, the Federal Communications Commission has taken the time to honor this group for id dedication to our nation. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--
The Comanche Code Talkers were members of a specialized communications unit of the U.S. Army 4th Signal Corps. And using their ancestral Comanche language they created an unbreakable code used by Allied Forces on the battlefields of Europe. Now, decades later our own Federal Communications Commission has paused to honor this group of Native Americans for their meritorious service to our nation.

Charles Chibitty of Tulsa, Oklahoma was the FCC's guest of honor at the recent ceremony. He told how he and 16 other young men, who had grown up together and were all members of the Comanche Tribe of Oklahoma, used the Comanche language and their Army communications skills to create a military intelligence code that was never broken by the enemy.

Even more interesting, Chibitty also shared anecdotes from their enlistment and training. He explained that they even had to create Comanche code words for "bomber" and "tank." These are words that did not exist in the Comanche language.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.
--

Chibitty is a decorated veteran and the last surviving member of the 16 Comanche Code Talkers. You can read more at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228074A1.doc (CGC Communicator, FCC)

I keep seeing Kmart listed but they don't seem to sell them anymore.
I was all set to buy one at amazon.com for $44, when I went to make
the purchase, the price had changed and it was no longer available.
If I am going to pay close to the MSRP, I just assume have the instant
gratification of the physical purchase!

Yes to all John, I have over 80,000 records for one callsign and it
works flawlessly. It will also track individual awards from DXCC to
minor awards.

I am very impressed with DX4WIN and the level of support from them and
3rd party addon's (IOTA, QSL MANAGERS, AWARDS etc - which are free to
registered owners !)

Ah, civilized... defined as "having accomplished their massacres 50-100
years ago", as opposed to the uncivilized ones who were still at it in
the last decade?

Btw, freedom also means not having to subscribe to the mass hysteria
that compels one to see a terrorist under every bed. McCarthy is dead.

Who says I'm talking about that region? There have been plenty of massacres committed by the British in every part of the world that had a misfortune to be colonized by "the Crown". From India, to Africa, to Arabia, etc. Your air force bombed some villages in Iraq (when it was still being "administered" by the UK) for failing to pay taxes, forchrissake! What was Dresden if not a war crime?

But now you find it necessary to accuse me of, what, having once lived in the FYU??? Don't worry, it's not contagious. Besides, I live too far from you to break into your house, rape and kill you, which is what we from the uncivilized countries do on a daily basis.

You might consider DXKeeper, a FREE full-function logging application:

- comprehensive set of logging fields consistent with ADIF 1.0

- intuitive, configurable Log Management window provides logbook view

- compact Capture window for real-time logging with navigation shortcut keys

- extracts operator data from the Radio Amateur's Callbook

- powerful searching and filtering (full SQL is available)

- robust ADIF import and export

- tracks progress against DXCC, TOPLIST/9BDXCC, WAZ, WAS, WAC, IOTA and GRIDs (more
coming)

- automated QSL workflow

* identifies needed QSLs based on DXing objectives and/or explicit requests

* captures QSL addresses from Callbook or Pathfinder

* prints QSL cards or labels, or uploads in realtime to eQSL.cc

* prints addresses on envelopes or labels

* aging report identifies overdue QSLs

- supports operation from multiple QTHs within one DXCC entity

- supports operation from multiple DXCC entities

- full 32-bit implementation runs on Windows 95, 98, 98SE, NT4, 2000, and XP

- uses Microsoft's Jet database engine (logs can be manipulated with Access or Excel)

- iterative approach to development yields frequent releases available to all users via multiple mirror sites

- strong, constructive user reflector at http://groups.yahoo.com/group/dxlab/

- automatically interoperates with other FREE DXLab Suite applications

* Commander for Icom/Kenwood/TenTec/Yaesu transceiver control

* Pathfinder for QSL route discovery

* SpotCollector for spot capture and analysis from packet/telnet/IRC

* DXView for

> beam heading display on world map

> solar terminator display on world map

> DX spot display on world map

> one-click rotator control (ARSWIN/Heath/Hygain/M2/Yaesu

* WinWarbler for 3-channel PSK31 and 2-channel RTTY from one user interface

* Propview for

> graphical propagation prediction (using included IONCAP engine)

> active IARU/NCDXF beacon monitoring (QSY's transceiver on schedule)

DXKeeper and all other DXLab applications are available via www.qsl.net/dxlab

73,

Dave, AA6YQ (author, the DXLab Suite)

What gives lately with IRCs (International Reply Coupons)? I went to three different post offices today trying to get some, and none of 'em had them. One place had never heard of them (???) the other place said "oh I guess we're out", the third stop said "I don't think we carry them any more."

I finally gave up and put in some "greenstamps" just so I could get my QSLs in the mail. I really prefer IRCs though, when I can. Did I just wind up with hitting a series of bad luck, or did they change something?

I was told that the Post Office has withdrawn them at least
for the time being while they review the whole arrangement.
The idea is to make sure they (USPS) aren't losing money
because of variations in the currency exchange rates and
such. I have a feeling that they may either decide it's too
tough to figure out a fair price and dispense with them
altogether, or worse, revise the price up yet again in an
effort to keep from coming up short when the exchange
rates are not favorable.

Someone sed thier post office didn't have IRC's -- almost all MAIN PO's do.
If not ask for the supervisor and have them order some.
But you can buy "used" uncancelled ones from the web and they are just as
acceptable as "new ones".

Go to http://www.google.com/
Type in quotes "IRCs for sale"
Find a dozen or so sources at reduced prices and just as good.
Beware of the older ones which are no longer valid.
See IRC Tips and advice at URL:
http://ac6v.com/irc.htm

And this is called a red herring fallacy.

>>What was Dresden if not a war crime?

> Oh right ... how about Hiroshima and Nagasaki too, whilst you're at
> it? Bet you didn't say *they* were war crimes during your US
> Citizenship test! ;-)

If asked, I would express my opinion on that event freely (namely, that it was indeed a terrible war crime, since the unarmed civilian population was exclusively targeted in the areas of no military significance), without fear of reprisal from the INS agent. Not only due to the fact that if he dared to discriminate against me, the ACLU would be on his ass so fast he wouldn't know what hit him, but also because I believe in the first amendment of the Constitution of the US. Even with Ashcroft as the Attorney General.

You see, Walt, there is a difference between a civilized country and an uncivilized one after all, but it's not in the amount of massacres committed. There is practically no nation in the world that's not guilty of some sort of atrocity in the past. However, there are countries where freedom of expression is treasured and protected and then there are some where people are being imprisoned, tortured and murdered for nothing more than expressing their opinions. Now, aren't you glad we both live in civilized ones where no party apparatchik finds it necessary to restrict what we say on or off the air (which is how this discussion got started)?

>>But now you find it necessary to accuse me of, what, having once lived
>>in the FYU???

> Oh, you didn't? Sorry ... my mistake.

Sure I did, I was just under the impression that being born in a place you disapprove of is neither a crime nor misdemeanor.

Take care,

Zoran

I just picked up 30 IRC's at the Post Office branch here at the University I work for last week. No indication of any thing out of the ordinary with them.
I use IRC's for most of my QSLing. I checked my return rate for the last year, and I'm getting a 55% return rate. I'm probably doing better than that, as the average time to replay is 4 months for direct QSL's and 3 months for managers outside the US and 2 weeks for state side managers. Love them state side managers.

3507. Monday evening conditions

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-26 15:39:45 UTC
From: Bill Ogden <ogden@us.ibm.com>
Message-ID: <3DE395C1.45B9062B@us.ibm.com>
Source record: 11683

Was it just me, or did others notice really horrible conditions above 10 MHz on Monday evening. (At least in the Northeast section of the U.S.)

Bill

Source record: 11684

He worked a number of W4's from Virginia to Florida on 10 meters in November and December 2001. He was 5/5 on 15 several times this year. As W1KSZ said he was fairly easy on RTTY too.

I think Ed did an excellent job for his limited operation.

A local in Atlanta worked him with 100 watts and a beam at 40 feet. Ed tried to work the East Coast and often called for W1,2,and 3 only. I even heard him work a VE1 on 15 SSB.
The signals peaked about the time he had to QRT on 10 but I noticed he was in for an hour or more on 15.

Ed is going to be there for a while so let's hope the Authorities change their mind.

I understand that Juno and Hotmail will no longer accept Email
from the ARRL server. Something to do with stopping or reducing
SPAM. Negotiations underway to resolve problem, but does not look
promising for a quick fix.

I received this information from another ham. Have not received an
ARRL bulletin verification as of this message release time.

You're crazy to buy IRCs from the post office. Buy them on the
secondary market from a QSL manager for about $1.00 apiece. Guys like
KU9C regularly sell them.

My problem was that he was on while I was at work, and when I was home the only time I heard him he went QRT in 5 minuets. So I never had a chance to work him. Such are the lumps of DXing. Maybe he can get back on when North Korea gets over it's current stupidity.

That is funny, two of the bigger Spam conduits dumping the ARRL.net for Spam. I've long ago made message rules dumping anything from Hotmail and Juno because I became sick of all the Spam from their sites.

It doesn't surprise me at all. However Hotmail and Juno are among the
worst offenders themselves.
I never used my arrl e-mail address for anything else but to receive
the newsletters and yet see that spammer use this same address to send
me their junk. It seems that the spammers got hold of the e-mail
database at ARRL... or worse... :-(
The first spam arrived in my mailbox just weeks after applying for the
arrl e-mailaddress (my hotmail address was spammed within the hour
without even using the account).

It would not surprise me even slightly if various spammers are simply
connecting to the ARRL.NET mailserver, and doing an iterated
"dictionary spam" attempt against every possible callsign. It's not
as if the algorithm for creating U.S. callsigns is a difficult one to
implement ;-)

The spammers wouldn't care a bit if 98% of the callsigns they try
don't actually correspond to an @arrl.net address.

Wise Ones live in the depths of the D, E, and F-Layers, and in the servers at
google.com. They are the descendants of the Gods. I personally subscribe to
the theory they are the children of Thor Heyerdahl, the Viking god of Thunder
and Balsawood Raft Dxpeditions. But that's another story.

The Wise Ones control everything that happens on the air and on the Usenet,
but they can't police every pileup or every newsgroup by themselves, so every
morning, just before daylight over Katmandu, the Wise Ones select the "Mostest
Intellegentest DXer" in their layer and convey upon him the title INFLICTOR OF
HIGHER MORAL HARANGUES. This title and its duties last until the following dawn
on Bouvet, if someone is there to observe the sunrise. Otherwise your duties end
when K2ASP gets tired of your crap and sends his lawyers with a gag order.

If you are ever chosen you will know because a representative of the Wise Ones
will anoint your temples with oil from a thirty-five year old bottle of Dr.
Guano, collected on Ocean Island by VR1L in 1966. For that day you will be known
as The Chosen. Your duties will be to seek out those that don't things the way
you do them (in other words, the right way.) When you find them, it will be your
duty to correct them.

Think about it...too wide, too weak, too slow, too fast, what's your call admit,
wrong VFO, rotten fist, poor pileup control, wrong band, wrong QSL route, you
timed out the repeater, wrong lingo, not enough green stamps, you're in the DX
window, no-coders not allowed, coders suck, ... They're all yours.

When you find these wayward ones, you will lumber onto their frequency, stand up
in your operating chair and shout, I AM SMARTER THAN YOU, SHUT UP AND LISTEN.
You will now have the wayward one's undivided attention. He will think about

this very briefly, then yield to your superior intellect. He will be very receptive to your thoughts and point of view.

Lecture him and proceed to the next wrong doer.

Now for the sad part of this tale. There are pretenders and charlatans out there
who try to usurp the rightful powers of The Chosen. To you villainous few, I say
beware. The Wise Ones also created BAWA (Baddest Ass Whats Around). No matter
how bad you are, BAWA has the ability to be badder. You will know when you start
your lecture and Bawa yells back, "You're a jerk, but I'm a bigger one. LET'S
ESCALATE".

And you will have no choice.

But soon BAWA will tire of you and sink your little balsa boat. As you slip under the surface you will yell, "BUT I WAS RIGHT, DAMMIT" and you will once again prove the ancient mariners axiom -- AN OPEN MOUTH TAKES ON WATER.

dit dit

I'm pretty sure that some spammers harvest e-mail address from the ARRL web site. The only thing I used my ARRL address for was to get e-mail from the local club. Never got any spam related to it. Then I put a small ad in the back of QST and used my ARRL e-mail address. Now I get a fair amount of spam addressed to my ARRL e-mail - much of it from supposedly overseas "officials" wanting wanting me to join in a joint venture that will yield lots of money - but of course I first have to send them my contribution.

Once ARRL puplished this on any of their web pages, the spambots found it and added it to their email lists. A spambot just roams web sites looking for blocks containing @ and add the block to their email lists.

A lot of spam senders actually spoof an email address from their list and insert it as the sender when it sends spam to another email address on the list. It is not uncommon to get "bounced email" messages from a server saying you sent mail to xyz@somewhere.com and xyz is not a known user on the system. Of course, you never sent xyz any email but a spam machine used your email address as the originator in one of it's mailings.

Dont know if they will ever put an end to this goofiness. I have had some luck in small claims court against the chain mail senders (move your name up the list and spam 10 million more). If I spot a NY addresss in the list they are fair game. They never appear and lose by default. Then the fun begins on collecting :-)

Steve

For six or more months, I've used a program called "Mailwasher." Free. www.mailwasher.net. Written up in one of the PC mags this month as highly recommended. In the beginning, you need to look at incoming mail and flag those things you never want to retrieve, but within a couple of weeks, it's filtering out almost everything. It also flags potential viruses. Maybe two to four spams slip through in a week.

It does display advertising which can be stopped for a one-time donation of your choice. $20 is requested but not required.

You can also preview any questionable message before it is downloaded and decide if you want to delete it, blacklist the sender or "bounce" it. "Bouncing" may be its best feature. It sends a message back to the originator that essentially says, "you sent this message to an invalid email address," causing a lot of spam generators to remove your address from their mail list. Quite a nice program.

I have not noticed spams coming to my callsign but will watch for it.

For a LONG time, I had Outlook Express filtering out (deleting) anything coming from Hotmail. Mailwasher helped enough I was able to discontinue using that filter.

Good luck.. Ed W5EJ

I too use MailWasher and find it extremely useful. However, very little
of the bounced mail goes back to the originator because its rare that
a spammer would use his real address. Instead it makes a second bounce
and winds up at Postmaster@your ISP. Thats fine with me because I would
rather my ISP deal with the crap they are letting pass through.
However, some smaller ISPs don't appreciate this and one of mine in
particular (a friend) has asked me not to bounce msgs coming via them.
Nonetheless, its a nice feeling to delete and bounce without having to
download the crap and be continuously cleaning out your mailbox.

I would like to replace the 2SB754 (Q51) with
the 2SB688 for better modulation.

What are the pros and cons to making this
radio modification ? Would it be harmful
to use a power mike once done ?

Anything else needed to be done once this
transistor is replaced ?

Any other diodes or resistors needed to be addressed ?

Ed
That's the reason I use the disposable email accounts
like yahoo & hotmail. When the spam gets to much
I just switch accounts and start all over. I NEVER
let anyone know my home ISP account address
that way I never get spamed there.

Here are some pretty rare DX alerts -- from various sources

MAURITANIA, 5T. Look for JA1CPS, JA1PBV, JA6RQ and JA8RUZ to be QRV as 5T5CPS, 5T5PBV, 5T5RQ and 5T5RUZ, respectively, from November 29 to December 7. Activity is on all bands, especially on 160 and 30 meters. QSL to home calls.

NEPAL, 9N. Hugo, LA5YJ is QRV as 9N7YJ from Kathmandu. Of late, he has been active on 30 meters just before 1900z and on 40 meters around 2100z. QSL to home call.

UNITED ARAB EMIRATES, A6. Ali, A61AJ has been QRV on 80 meters around 1345z and 40 meters around 1400z. QSL via N4QB.

IRAN, EP. Moshen, EP3SMH has been QRV on 12 meters between 1310 and 1345z. QSL to home call.

SOUTH SHETLAND ISLANDS. Alex is QRV as R1ANF and has been active on 20 meters using RTTY around 0200z. QSL via RK1PWA.

SUDAN, ST. Marco, ST1MN is active from here until the end of June 2003. QSL via IV3OWC.

GABON, TR. Alain, TR8CA has been QRV on 30 meters just after 0430z and on 12 meters around 1730z using RTTY. QSL via F6CBC.

MALI, TZ. Mac, TZ6JA is visiting Bamako until December 10. Outside his work hours he will be QRV using SSB on 40 to 10 meters, including 17 and 12 meters. QSL via JA3EMU.

73 and good DX

da ' the TRUMAN show' un film diretto da Peter Weir con Jim Carrey, settembre 1998.
Distribuito da Paramount Pictures e prodotto da Scott Rudin, Andrew Nicol.

Il " the TRUMAN show ", unica opera insieme alla Muraglia Cinese
costruita dall' uomo e interamente visibile dallo spazio;
una storia per metï¿½ italiana ! Maccheroni dalla " faccia di bronzo ",
semola di grano duro nord-americano e Libera Muratoria
(Freemasonry) tra le ragioni di questa farsa.

Quali sono i messaggi che si celano nella trama di questo celebre e tanto imitato movie ?
Perchï¿½ tanta fantasia, esagerazione, camuffamento anzichï¿½ descrivere la cruda realtï¿½
?
Perchï¿½ non essere chiari, diretti, concreti ?
Lo sanno tutti, non sarebbero sufficienti neanche un milione di telecamere per riprendere integralmente la vita di una persona 24 ore su 24, senza censura. Ma sopratutto perchï¿½ Truman dev' essere sempre all' oscuro di tutto, ritrovarsi unico in questa situazione, fare ovunque la figura dell' idiota e da ultimo concepire un figlio in diretta e rimanere fuori della
Casa. (quella del Big Brother ovviamente !).
Per quale miracolo della tecnologia ï¿½ la casta padronale ad essere la meglio informata sulle vicende di Truman fin nei particolari piï¿½ minuziosi ed insignificanti ?
E ancora perchï¿½ tutti dovrebbero entusiasmarsi, trasformarsi in degli stupidi ed ipocriti
guardoni, in dei patetici commedianti del raggiro per provare (tutto da dimostrare) dell' emozioni ?
Indubbiamente la figura eccessiva interpretata da Christof richiama alla mente quella di un Maestro Venerabile (Grande architetto dell' Universo) ridotto a provare emozioni storpiando il mondo e manipolando la mente umana ai propri desideri come nel popolare detto " Grande capo, tutti cani...".
Analogamente SEAHAVEN ISLAND City con le case in stile coloniale e templare,
colonne, pilastri e vestiboli, edicole, insegne pubblicitarie ed altro ancora a forma di tempio e nell' interno l' obiettivo della telecamera, l' ingresso alla compagnia assicurativa
con sul frontale l' immagine del sole nascente (l' Oriente), le finestre, le porte e tutti i
particolari a croce, circolari, gli ombrelloni colorati, i dettagli a raggiera e a cerchi concentrici, rappresenta allegoricamente l' insieme simbolico di tutte le logge massoniche; " un mondo nel mondo" ed anche "come dovrebbe essere".
Una prima scena annovera una parola chiave "MACCHERONI !", pronunciata da Meryl ipocritamente nel buio dell'interrato accanto ad una meravigliosa fenice che risorge dalle sue ceneri (dio Horus per gli antichi egiziani ed anche simbolo massonico) e con visibile disgusto di Truman. Piï¿½ di una invece alla 'pizza' gustosa e famosa nel mondo, un invito in pizzeria e una metafora originale "al doppio plancton" assieme un bacio dato
all' aria aperta, in una romantica serata sulla spiaggia, dove Sylvia rivela sinceramente a Truman di vivere in un mondo simulato.

Sul tavolo dell' agenzia turistica dove Truman si reca per prenotare un volo si trovano due bandierine: una il Tricolore italiano l' altra ha i colori del Vaticano mentre sul muro strani manifesti sconsigliano l' uso dell'aereo.
Nella scena finale la barca di Truman navigatore solitario porta la scritta "Santa Maria" in
poppa e una testa di uccello rapace sulla prua. E la bella ragazza che lo farï¿½ innamorare con nome e cognome di Lauren Garland (sul proprio quaderno), ma lui e tutto il cast ostinatamente la chiameranno Sylvia.
Ed infine le Isole Figi "sono dall' altra parte del globo" afferma convinto Truman, mentre gioca un' ironico golf con il suo amico-pagliaccio Marlon; nella geografia opposte al Tamigi di Londra, il fuso orario da Greenwich ï¿½ di dodici ore precise, le americhe rispetto
alle Figi sono a metï¿½ strada, con circa sei ore di fuso orario.
Troppi sono i riferimenti al grand BelPaese come pure al mondo frammassonico, considerando che si tratta di un' opera prodotta negli USA per affrontare una problematica tipicamente americana, un domanda viene spontanea: perchï¿½ questo film non promuove solo prodotti, costumi, bellezze e soluzioni americane come fanno tutti gli altri ? Una probabile risposta, impossibile per ogni artista negare la realtï¿½ concreta che lo ispira.

Da notare ancora:
La piramide tronca nel cui vertice figura un triangolo con dentro un occhio ed il punto tracciato in un cerchio sono simboli della societï¿½ segreta degli Illuminati, stranamente tutto molto simile al logo del Big Brother italiano.
Il nome di persona Truman letteralmente " uomo vero e sincero", ha il significato opposto della espressione " faccia di bronzo", questa in Italia definisce il falso, di persona che costruisce e divulga menzogne.

>>>>CERCASI AUDACI AVVOCATI !<<<<

...ah dimenticavo, caso mai non vi rivedessi
buon pomeriggio, buona sera e buonanotte...!

Enzo Di Marino
Via Nazionale, vico 2, nï¿½ 2
[66015 - Fara S. Martino (Ch) - Italy] Tel. 0872 / 980645 - 328 / 2481198

Per chi vuole aiutarmi ad approfondire, puï¿½ leggersi:
"La Massoneria in Italia " di Enrico Nassi - Tascabili Economici Newton - Il sapere ï¿½.1000
Interessante la parte dedicata al nostro sommo poeta Gabriele D' Annunzio.

" Violate privacy by satellite."

The "the TRUMAN show" only work together the Great Wall of China
constructed by man and visible entirely from space; a story
half italian ! Macaroni " brazen-faced", durum wheat
north-american and FreeMasonry some reasons of that farce.

What are the messages which hide this famous and very imitated movie ?
Why so much fantasy, exaggeration, camouflage instead of to
describe the raw real ? Why not to be direct and concrete ?
All the people know, not are sufficient one million camera for record

integral the life of one person 24 hours over 24 without censure.
Why Truman must to be forever the dark of the all, to remain only in
this situation, to do everywhere the idiot figure, to generate a son
in live and in the last to stay out of the House ? (house of the Big Brother !)
For which miracle of the technology the caste master is the better
informed over incidents of Truman also in the particulars more insignificant.
And again why all the people must to be enthusiast, to transform in the
stupid lookers or in the pathetic comedians of the trick for to feel
of the emotions ? (to demonstrate)
Undoubtedly the excess figure interpreted to Christof remember that of
a Grand Master Venerable reduced to feel emotions only mangling the world
and manipulating the human mind like in the popular saying
"Big master all the people dogs..."
Similarly SEAHAVEN ISLAND City with the houses in colonial and templar
style, the advertising insignia with form of temple and inside the lens of the
cameras, front door of the insurance company with the image of sunrise,
all the particulars cruciform and concentric circles represent the
whole symbolic of all masonic lodge " a world in the world ".
A first scene include a key word "MACARONI !" pronounced from Meryl
hypocritically in the dark of the underground near to a wonderful phoenix
which revive again from its ashes (god Horus for the ancient egyptians and
even symbol masonic), with visible disgust of Truman.
More is dedicated to the "pizza" famous in the world, a invited in pizzeria
and a original metaphor "on double plancton" together a kiss in romantic
night on the beach, where Silvia sincerely reveal to Truman of to live
in simulated world.
On the table of the travel agency where go Truman for engage a fly there
are two small flags, the tricolor italian and other widh colors of the vatican,
on the wall strange posters discourage use airplane.
In the final scene the Truman's boat navigator has the inscription
"Santa Maria" in the stern and the head a bird of prey on the prow.
And the nice girl which she enthrall him with name and surname Lauren
Garland (written on book), but all the cast obstinately will call her Silvia.
In the end the Fiji Islands "are in the opposite side of the globe" affirm
Truman while play ironic golf with friend-clown Marlon: in the geography
they are opposite to the Thames of London with time zone 12 hours from
Greenwich, the americas are to about 6 hours.
To many are the references for the country Italy and the freemasonry,
considering that it is an movie made in USA for to tackle a problem american,
a question come spontaneous: why that movie not promote only products,
customs, beauties and solutions american ?
A probable response, impossible for every artist to deny the real concrete
which it inspire him.

To note again:
The pyramid truncated in the which vertex figure a triangle with inside
a eye and the point tracing in the circle are symbols of the secret society
called Illuminates, strangely very similar to logo of the Big Brother italian.
The name of person Truman literally " man true and sincerer", has the meaning
opposite of the expression "a brazen-faced" (faccia di bronzo), this in Italy

define the false, who make and divulge lies.

Premio ANDREA PAZIENZA
* *

Appena consegnata agli annali la quarta edizione del Premio "Andrea Pazienza",
la piï¿½ ambita vetrina per i giovani narratori e fumettisti abruzzesi.
La premiazione della rassegna che quest' anno aveva come tema " Del mondo si
puï¿½ ridere anzi si deve", si ï¿½ svolta presso il Ridotto del Teatro Comunale di L'
Aquila.
Primo classificato nella sezione racconti, sui 150 concorrenti in gara, si ï¿½ piazzato
Maurizio Di Fazio, 27enne giornalista-scrittore pescarese.
Il suo racconto, intitolato " L' amore ai tempi del Grande Fratello 2", ï¿½ stato
paragonato, dalla giuria, a certe effervescenti e "cinematiche" pagine del compianto
Pier Vittorio Tondelli, il romanziere-saggista autore di " Altri libertini" e " Un weekend
post-moderno". Il racconto di Maurizio ï¿½ un sincopato affresco del " prima della
celebritï¿½"
vissuto tra due paradigmatici giovani pescaresi, in sottofondo l' italietta televisiva,
pubblicitaria e conformista. Due ragazzi, un lui e una lei, che si incontrano sul treno
Pescara-Milano. Non si conoscono ancora, ma Stefano e Giada " vagheggiano un
possibile altrove". Lui laureato, con il massimo di voti, una volta addirittura fu ospite
di una puntata di " Colpo di fulmine" e " solleva pesi con un inestinguibile sorriso
casuale", in una nota palestra cittadina; lei ï¿½ una fan esacerbata di Alba Parietti,
non reprime la propria prorompente femminilitï¿½ e perï¿½ riflette, scrive, dï¿½ la sua
versione dei fatti. Cita sempre " La fattoria degli animali" di Orwell.
Due pescaresi a 24 carati, creature integralmente speculari della loro cittï¿½.
Il viaggio prosegue: i due si scambiano dritte sullo show-system sui loro simmetrici
universi interiori. Poi l' arrivo a Milano. Inopinatamente li ritroviamo entrambi in uno
Studio Mediaset, a sottoporsi al medesimo test per l' accesso al Grande Fratello 2
(un estratto della prova orale: " Vi piace essere preda di pettegolezzi e maldicenze ?,
in fondo siete sempre stati esibizionisti, sottoscrivete il motto ' Purchï¿½ se nï¿½ parli
?' ").
Vi accedono. Ma poi scoppia l' amore... (anche questo, un pï¿½ artefatto) .
Stefano e Giada si fanno eliminare dal reality-show, per vivere, pienamente, il loro
sentimento...E al loro ritorno ' in patria', Pescara, bloccata per un giorno, li accoglie
con una monumentale festa. La cittï¿½ ï¿½ in festa, ï¿½ una giornata di giubilo universale:
evviva i nostri eroi ! Evviva i formidabili reduci ! C' ï¿½ chi piange, chi si tormenta i
capelli a ogni falso allarme; c' ï¿½ chi ostenta un posticcio menefreghismo...".
E c' ï¿½ l' alto rappresentante delle istituzioni che redarguisce cosï¿½ la folla:
" Facit li brave bardasce"; il giovane imprenditore che auspica " flessibilitï¿½ emotiva";
le tute bianche che gridano forte il loro slogan, " No GF2, contro la globalizzazione
del reality-show"; le donne biancheazzurre che inneggiano " Galeone-Gale-Gale-One".

Maurizio Di Fazio deliberatamente immagina un finale " hollywoodiano in salsa adriatica":
ï¿½ l' amore, quindi, a trionfare. >dimarinoenzo@inwind.it<

La Orfeo: "...mi piace stare vicino alla gente"
dal Quotidiano ' Il Tempo' d' Abruzzo l' 8 maggio 2002.
RadioDelta1 - 93,900 / 88,600 / 97,500 MHz - Atessa - (Chieti)
tel. 0872 / 897545 - fax 0872 / 897913 www.radiodelta1.it

La Orfeo: "...mi piace stare vicino alla gente".
Cosï¿½ afferma la nota giornalista lancianese, voce di RadioDelta1 in una
intervista apparsa sul giornale ' Il Tempo' d' Abruzzo l' 8 maggio 2002.
Una pioniera...anima professionale ed elegante... Qualcosa di piï¿½ e di diverso:
una sorta di coscienza della professione femminile...la radio ï¿½ per lei una scelta
di vita, in bilico tra un metaforico paradiso ed un inferno che non c' ï¿½, un' invenzione
quotidiana..." Io faccio un lavoro che mi piace...io stessa mi devo piacere... ma
resta sempre necessario trovare stimoli, emozioni da trasmettere... Perchï¿½ a me
la radio piace vicina alla gente...una radio di relazione...le emozioni tante,
tantissime...il timore ï¿½ quello di non riuscire cosï¿½ simpatica come sono alla
radio...una piazza dove far parlare la gente...per chi ci lavora e per gli ascoltatori.
Sono alcune frasi riprese dall' articolo.
Bisogna riconoscerlo, di passione e grinta AnnaMaria nel suo lavoro ne mette
proprio tanta, da meritare davvero il Premio alla voce Verace. Le sue improvvisazioni
creative lasciano spesso senza parole e le vibrazioni che riesce a trasmettere le
sento realmente sulla pelle, in sincronia con i miei movimenti. Incredibile !
E che dire dei giochi di parole, musica ed emozioni che ogni giorno inventa per
tenere i suoi ascoltatori in allegra compagnia come se la distanza che la separa da
questi non esistesse, una vera professionista della radio. Ma questo non spiega
ancora il suo linguaggio, a volte puï¿½ sembrare vago e fantasioso tanto da percepire
la sensazione, che sotto sotto parli indirettamente con qualcuno.
A me piace immaginare, la sensibile conduttrice, comunicare mediante metafore,
associazioni, toni della voce ed anche direttamente con il noto personaggio
cinematografico " Truman"; vittima e cavia inconsapevole, nella gigantesca rete
multinazionale dei media e della pubblicitï¿½ che ormai condiziona il mondo,
protagonista del movie "the TRUMAN show".
Ma questa forse ï¿½ solo fantasia !

"...perchï¿½ ha la Faccia di Bronzo".
da ' Il Centro' Quotidiano dell' Abruzzo, del giovedï¿½ 8 giugno 1995.
www.ilcentro.it --- www.dececco.it

FACCIA DI BRONZO.
ï¿½ï¿½ï¿½

il loro spaghetto ï¿½ liscio come una palla da biliardo.
Quel carattere " ruvido " che distingue la pasta De Cecco,
ï¿½ la prova tangibile di una ossessiva passione per la qualitï¿½.
La pasta De Cecco, per assumere la sua forma finale,
passa infatti attraverso trafile di bronzo.
Queste trafile sono ormai rare presso l' industria pastaia italiana,
perchï¿½ esigono un processo di lavorazione della pasta molto piï¿½
lungo e quindi molto piï¿½ costoso; numerose aziende le hanno
perciï¿½ sostituite da tempo con trafile in Teflon.
Ma torniamo alle nostre trafile in bronzo.
Con esse si deve impiegare una semola dalla granulometria
piï¿½ grossa, la semola piï¿½ grossa richiede un impasto piï¿½ umido,
l' impasto piï¿½ umido comporta un' essicazione piï¿½ lunga,
un' essicazione piï¿½ lunga esige una particolarissima
attenzione anche manuale in tutto il processo.
Ecco ! Questo ï¿½ quello che fa da sempre De Cecco pur
di garantire alla sua pasta quella rugositï¿½, quel carattere ruvido
che le aggiunge una piccola ma fondamentale qualitï¿½:
saper trattenere il condimento quel tanto in piï¿½ da fare la
felicitï¿½ del buongustaio.
Da oggi, se qualcuno vi chiede perchï¿½ amate tanto la pasta
De Cecco rispondete con orgoglio... " perchï¿½ ha la faccia di bronzo ".

Dove c' ï¿½ De Cecco, c' ï¿½ qualitï¿½.

ï¿½ï¿½ï¿½

Good luck getting this station confirmed. Two requests sent over 8
months, nothing. N4QB doesn't have a published e-mail address either,
so no way to ask without disturbing him with a phone call (I don't
feel comfortable doing that unless it's urgent, and I don't consider
QSLing urgent).

As of yesterday when I checked ARRL, Hotmail is now forwarding
again and they say they are working with Juno to resolve.

Only problem with that is all your friends are constantly having to change
their mailing lists. I never change mine and using Mailwasher, don't have
to. My current spam level is maybe 2-3 per week that sneak through MW...
probably they arrived in the account in the few seconds between the time MW
checked the mail and when OE actually retrieved mail.

I worked A61AJ in 26.Nov.2000 and received his card promptly via W3UR with
no hassle. I've noticed that you mentioned a different mgr N4QB. Pity if his
work is not as good as that of W3UR. Have you tried Ali's email?

Yes, I have...but with no success. I suspect maybe the logs haven't
gotten to N4QB, or (hopefully not) he's having real-life difficulties
leaving QSLing on the back burner. Whatever the case, I don't know of
anybody on the QSL reflectors I monitor who has received a card
through this manager yet.

My ISP uses mail filtering which has reduced the load some
90%, but what does, I send to Spamcop.

I just hope my own domain's mail server stays free
for a bit, but I am not posting the mail address anywhere.

Whatever works best for you, John, is certainly what you should do.

I made this a new message so you can see that all of my outgoing new stuff includes my email address in the signature. I've had this address for ...mmm... maybe 3-5 years and displayed it freely. The only other address I have is my callsign at ARRL.net and that auto forwards to the one below so anyone wanting to reach me and knowing only my call can get through.

Like I said, MAYBE 2-4 spams per week get through to me. Nothing. In my case certainly not worth the trouble of deceptive measures like inserting "nospam" which people must take time to remove, or otherwise hiding it.

Cheers... Ed

Amateur Radio Newsline™ Report 1319 – November 22, 2002

Amateur Radio Newsline report number 1319 with a release date of Friday, November 22, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ohio's Governor praises hams for their November 10th tornado response and self enforcement really works. Find out what we mean on Amateur Radio Newsline report number 1319 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HIGH PRAISE FOR TORNADO HAMS

Some high praise for Amateur Radio from some high ranking Ohio state officials. This following last weeks deadly tornado that hit the town of Van Wert. Bill Pasternak, WA6ITF, tells us how the accolades came about:

--
Ron Moorefield, W8ILC, is the West Central Ohio ARES District Emergency Coordinator and well known throughout the area for his work in emergency communications. And on Wednesday November 13th Moorefield says that he spent time in the Ohio Emergency Management Situation Room with Govenor Bob Taft and Ohio State E-M-A Director Dale Shipley.

Moorefield tells Amateur Radio Newsline that both men stated without any reservation that it was the volunteer efforts of the regions ham radio operators that really saved the community of Van Wert on November 10th. This, through their efforts in the Skywarn program and providing early warnings. W8ILC adds that both men had a high praise for all aspects of the Amateur Radio service.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF
--

Hams across the Mid-West and into the South-Central and South East activated on November 10th. They were active in spotter and emergency nets before, during and after numerous killer tornadoes struck the region. As previously reported, this years SKYWARN recognition Day is Saturday, December 7th. (ARNewsline(tm))

**

INTERNATIONAL - SOLOMON ISLANDS: FIRST NATIVE HAMS GRADUATE

The remote Solomon Islands now has a native ham and C-B radio population of its own. This, as the first group of trainees graduate from a special licensing class. Jeramy Boot, G4NJH, has the rest of the story:

--
On the 25th of October, the Prime Minister of the Solomon Islands attended a special graduation ceremony at which he presented 21 students with certificates marking their successful completion of an amateur radio training course. The students were the first native-born Solomon Islanders to graduate from a unique school set up by Australian radio amateur Sam Voron to bring amateur radio to the people of the Solomons for the first time. All other Solomon Island licensees were ex-patriate amateurs.

At the ceremony, the deputy head of the Australian High Commission in the Solomons presented each student with a CB or amateur radio transceiver which had been donated by overseas amateurs and CB operators, while the Minister of Home Affairs gave each student an antenna.

School radio clubs might like foreign amateur radio operators visiting the Solomon Islands are welcome to stay at the school and help the students.

Jeramy Boot, G4NJH
--

Not mentioned in the story is that Sam Voron's call sign is VK2BVS. Also, school radio clubs worldwide might like to keep an eye on 28.490MHz. Thats where the Solomon Islands ham radio school has already many contacts. (GB2RS)
**
ADVANCED PROPAGATION: THE LEONID METEOR SHOWER REPORT

A possible new record for 222 MHz meteor scatter. Ron Marosco, K5LLL, in Mc Dade Texas reports over the VHF Reflector that Tom Haddon, K5VH, worked Peter Macgregor Shilton, VE3AX, during the Leonid meteor storm on Monday, November 18th. K5VH is located in Dipping Springs Texas while VE3AX is in Cayuga Ontario Canada. Ron estimates the distance between the two stations was in the order of 1300 miles.

As for himself, K5LLL says that he made only 16 QSO’s this year. He says that’s about a quarter the number made 12 months ago.

Out West, W6GYD says that he worked 14 stations on the rocks beginning at about 08:45 UTC and ending his operation at 12:01 UTC. Not bad when you consider that he was running only an Icom IC-756 bare foot to a 5 element Telrex beam at 13 meters elevation. (VHF Reflector)

**

SELF ENFORCEMENT: BEACON QRM'S SPACE – HAM TAKES IT OFF THE AIR

Now the story of a UHF beacon with a signal that was a bit to good. And as its owner explained on the VHF Reflector, a complaint came from an unexpected source. And. as Amateur Radio Newsline's Henry Feinberg, K2SSQ, tells us it had to do with the final frontier:

--
Within 48 hours of turning up his new 1296.300 Mhz beacon in Derry, New Hampshire, Ed Parsons K1TR, received a phone call and a signal report from the Chief Engineer at the Millstone Hill Observatory in Westford, MA. This would

turn out to be the first, last and only QSN report the beacon would receive.

The good news: the observatory hearing it loud and clear! The bad news: The observatory was hearing it loud and clear. So loud that the engineer told K1TR that the beacon's signal was impacting the observatory's capability to track satellites in certain directions. Also, that the recipient of the satellite tracking information, the US Air Force, would not be pleased.

It seem that the Air Force radar uses about 8 Mhz of spectrum centered at 1295 Mhz. They use an 80 foot dish for an antenna. The K1TR beacon was less than 30 miles line of sight from the observatory.

So the Ed's 23cm beacon is off the air while he finds a new home for it. Anyone with a good UHF site more than 50 miles from the town of Westford but still in New England, and who is willing to host the beacon, should contact K1TR by e-mail to esparsons@lucent.com

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ
--

K1TR says that a companion 33 cm beacon is still on the air. He says that signal reports are still appreciated for this one. (VHF Reflector)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the Southcoast Radio Amateur Network serving Los Angeles California.

(5 sec pause here)

**

ENFORCEMENT: FCC SAYS YES TO SCHOENBOHM

The FCC is granting the application of Herbert L. Schoenbohm for an Amateur Radio station license and a General class operators license.

According to the W5YI Report, the decision was adopted by Administrative Law Judge Arthur Steinberg on October 9th as a follow-on to a May 7th hearing to determine if the former ham possessed the requisite character qualifications to be a Commission licensee. If no objections were filed with the regulatory agency prior to November 9th, this initial decision becomes effective on November 29th.

Whether or not Schoenbohm will be granted his old KV4FZ call sign remains to be seen. It has not yet been reassigned and appears to be available callsign pool. (W5YI)

**

ENFORCEMENT: NEW MEXICO STATION FINED FOR EXCEEDING RADIATION EXPOSURE RADIATION

FCC enforcement reaches the “Land of Enchantment.” This as the agency proposes to fine A-O Broadcasting $28,000 for alleged violations of the radio frequency radiation exposure limits applicable to transmitters on towers and for other rules.

A-O Broadcasting is the licensee of FM radio station KTMN in Cloudcroft, New Mexico. Amateur Radio Newsline's Bruce Tennent, K6PZW, tells us why the fine is being levied:

--
The most serious charge by the FCC says that KTMN exceeded the radio frequency radiation exposure limits in publicly accessible areas. The FCC maintains that measurements taken by the agents showed that operation of KTMN’s transmitting antenna at only 40% of its authorized power created radio frequency radiation fields which exceeded the exposure limits for the general public by more than 300%. That engineering snafu will cost them $10,000.

Failure to install E-A-S equipment brings another $8,000 assessment while not having a main studio is another $7,000. Lastly, failure to have what the FCC calls an adequate transmission system control is a $3,000 fine.

It should be noted that this is the first case in which the Commission has proposed a monetary forfeiture for a violation of the radio frequency radiation exposure limits.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW.

--

As usual, A-O Broadcasting has the customary time period to respond. More is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228609A1.doc (FCC, CGC)

**

ENFORCEMENT: CALIFORNIA RACEWAY GETS FINE REDUCED

Still with enforcement news, the famed California Speedway in the city of Fontana, California, has been fined $8,000 for operating an unlicensed one-watt FM transmitter on 104.7 MHz. The fine was reduced from $10,000 originally proposed, because of Speedway's otherwise good compliance record with the Commission's rules in regard to other FCC permits that it holds. This one is in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-02-3105A (FCC, CGC)

**

THE WEB: UK HAM ASKS HELP IN LOCATING E-MAIL PIRATE

A United Kingdom ham says that he did not originate some nasty e-mails bearing his name and he needs your help to find out who did.

Brian Jones, G8ASO, of Worcester, England says that his name and callsign are being pirated on e-mail that carries what's being described as a rather distasteful message. According to the GB2RS News, Jones says that he is not the originator of those messages. Also, that he is equally appalled by their

content.

Since e-mail can originate anywhere in the world and is very hard to trace, G8ASO is asking your help to track down the originator. If you have knowledge of the person responsible for the unwanted messages please e-mail Brian at bajones@worcester.demon.co.uk. Your information may be useful in an investigation that is now underway. (GB2RS)

**

WITH THE HANDI HAMS: MALIBU CAMP OPEN FOR ENROLLMENT

Enrollment is open for the Handi Hams Winter Radio Camp in the Malibu California. The session runs Sunday, March 2 through Sunday, March 9,2003, at Camp Joan Mier overlooking the mighty blue Pacific Ocean.

The Malibu California Camp is open to Handi Ham members with disabilities, and will offer numerous study opportunities to upgrade licenses and learn new communications technology . If you are interested in attending please e-mail Pat Tice at wa0tda@arrl.net. More information is on the web at www.handiham.orrg (HandiHams)

**

HAM RADIO BUSINESS: KOTT REPLACES MC CUSKER AS WORLDRADIO EDITOR

Worldradio Magazine has announced the appointment of Nancy Kott, WZ8C, as its new Editor. Kott replaces Rick McCusker, WF6O, who left the magazine on 13th November for a career in Law Enforcement with the Sacramento County Sheriff's Department.

Regular listeners will recognize Kott as a long time writer of the "Positively CW" column appearing in Worldradio. She also is the Editor of the FISTS Club magazine "Keynote." For those not aware, FISTS is the world-wide More code preservation society.

Nancy Kott is a resident of Metamora Michigan. As such she is part of a new breed of magazine Editor telecommuting to work. Worldradio Magazine is headquartered in Sacramento California. (Worldradio)

**

HAM RADIO POLITICS: MEETING TO UNDERSTAND EMC COMPATIBILITY

Ham radio will have a forum of its own at next springs IEEE International Symposium on Electromagnet Compatibility slated for Istanbul Turkey from May 11th to the 16th.

World Radio 2003 will take place in Geneva in June and July 2003. There are several important issues for radio amateurs on the agenda most of them impose a threat from various interest groups on the frequencies allocated to the Amateur Radio Services.

Realizing the significance of the threat to ham radio from radio frequency compatibility issues, the Organizing Committee of the 2003 IEEE International Symposium on EMC, has allocated a special session in this Symposium to deal with problems related to the Amateur Radio Services. This will be the last chance prior to the next World Radiocommunications Conference for ham radio to meet with key persons from the international EMC and Radio community, researchers, regulators and others, exchange views and influence the decisions.

And hams with knowledge in this area are also being invited to provide formal papers, informal papers or a presentation for the conference. More details are in cyberspace at www.ortra.com/emc2003. Just click on the hyperlink marked "Radio Amateurs". (IEEE, ANS)

**

INTERNATIONAL - CANADA: CANADIAN HAMS TO PARTICIPATE IN 5 MEGS EXPERIMENT

A Canadian Amateur Radio Club will be taking part in the 5 Megs Experiment. The Marconi Amateur Radio Club of Newfoundland, under the leadership of Joe Craig, VO1NA, will be conducting a three phase propagation experiment at approximately 5.3 Mhz from the 22nd to the 25th of November, the 20th to the 23rd of December and finally from June 20th the 23rd of 2003.

The call sign will be VO1MRC with operation planned on or near 5.260, 5.269, 5.280, 5.290, 5.319 and 5.329 Mhz. Also the possibility of some time on 5.400 and 5.405 MHz as well.

All operation will be on CW and upper sideband. For further details, contact Joe Craig, VO1NA ny e-mail to jcraig@morgan.ucs.mun.ca. (RAC)

**

ON THE NET: QCWA QSO PARTY RULES ON THE WEB

N0UF reports over the Quarter Century Wireless Associations internet remailer that the rules for the 47th Annual QCWA QSO Parties are now on the QCWA web site at. Its in cyberspace at www.qcwa.org/qsoparty.htm A 2Ø03 Log Sheet and Multiplier Sheet can also be downloaded from the website as well. The 2Ø03 QCWA QSO Parties will be held on April 5th and October 4th of 2003. (QCWA)

**

DX

In D-X, Albania is on the air. A DXpedition team made up of OH2BH, OH2PM, OH5BM and OH8SR arrive in Tirana on Sunday, November 17th. They set up two stations for a one-week activation of ZA1B. Their operation includes the CQ World Wide C-W Contest, with the team's entry planned in the multi-two category. QSL via OH2BH. (OH2BH)

**

THAT FINAL ITEM: GUY WIRE RETENSIONING, LAKE TAHOE STYLE

And finally this week the sad story of KTHO radio in South Lake Tahoe, Nevada. The 590 kHz A-M station was off the air for over a day recently after its AC power and phone lines were destroyed by wind, fire, and falling trees. But it did luck out in a way because its transmission tower is still standing. Well, kind of.

According to Bob Gonsett's C-G-C Communicator, the story goes this way. High winds caused trees to fall onto the guy wires of the station's 305-foot tower. Near disaster yes, but not quite.

Thanks to the Forest Service the tower did not collapse. The crew carefully cut the fallen trees piece-by-piece, gradually reducing the stress on the guy wires rather than allowing them to loosen suddenly.

Thats the good news. The bad news is that the tower is now bent. You can see what it looks like in a photo sequence taken by Bill Kingman, the Chief Engineer of KTHO. It’s in cyberspace at www.steveblodgett.com/ktho.html (CGC)

**

Amateur Radio Newsline Report 1320 - November 29, 2002

Amateur Radio Newsline report number 1320 with a release date of Friday, November 29, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International space station gets a new crew and all are ham radio operators. Newly licensed Solomon Island hams take on an emergency communications challenge and good news for a California ham. These stories and more are coming your way on Amateur Radio Newsline report number 1320 right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: NEW ALL HAM CREW ARRIVES AT ISS

The international Space Station has a new crew which plans to start operating the ARISS Amateur Radio station in about three weeks. They boarded the staton on Monday the 25th of November. They plan to be there for about 6 months. All three are licensed hams.

Look for Ken Bowersox KD5JBP, Nikolai Budarin RV3FB and Don Pettit, KD6MDT. They will use the Space Stations calls ... RS0ISS over Europe and NA1SS for the United States. Contacts can be heard on the downlink frequency of 145.80 MHz.

They replace Peggy Whitson, Valerie Korzun and Sergi Treschev. Valerie, RZ3FK, was very active, on the air almost every day, while Peggy conducted many memorable school contacts. (ARISS)

**

RESCUE RADIO: SOLOMON ISLAND NEWS HAMS PROVIDE DISASTER RELIEF

We reported their graduation last week. And while the signatures on their ham licenses may not yet be dry, a group of Solomon Island hams are already off on their first rescue radio adventure to Malaita Island:

--

Thats right Roy. Q-News reports that three graduates from the Amateur Radio Training School of the Solomon Islands have gone by ship to provide emergency communications for flood affected areas on Malaita Island, near Guadalcanal. With them are with 19 tons of rice along with officials of the National Disaster Council.

These new Hams will operate a ham radio station at the Red Cross clinic on South Malaita island. They will report on the distribution of supplies to the National Disaster Council HQ in the Capital of Solomon Islands.

This is the first humanitarian deployment of the school's initial graduates. It also provides the Solomon Island hams their first real experience in helping people with radio knowledge of Amateur Radio.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The three hams making the trip are identified as H44MKA, H44WSB and H44SF. As we go to air they should be operational from a Red Cross clinic set up on the south end of the island. More information is on the web at www.h44A.com (Q-News)

**

RADIO POLITICS: HAM CCR BILL DIES AS CONGRESS CONCLUDES SESSION

The 107th Congress has adjourned without taking any action on an ARRL sponsored legislative measure to free Amateur Radio of land use restrictions commonly known as C-C and R's. The ARRL indicates it plans to try again when the 103rd Congress convenes early in 2003. (ARRL)

**

RADIO AND THE LAW: CALIFORNIA SUPREME COURT SIDES WITH HAM

Still with antennas and land use, we have an update on the court battle of Mark Abrams, WA6DPB versus the city of Rancho Palos Verdes California. Amateur radio Newsline's Bruce Tennant, K6PZW, has the good news:

--

The good news is that the California Supreme Court has upheld the right of a California property owner to use antennas on his property for any reason he wants. It did so on Friday, November 15th when it denied the request of the the City of Rancho Palos Verdes to hear an appeal of the decision of the California State Court of Appeals in the case of The City of Rancho Palos Verdes vs. Mark J. Abrams. This means that the decision of the Court of Appeals is now state law.

The earlier decision of the said that Amateur Radio operators are entitled to an "exalted" status, thus giving amateurs new hope for getting antenna arrays approved. And Abrams says that there are many precedents that can be extrapolated from this ruling, but he says that the case clearly establishes that a city in California cannot tell a resident what to do with an antennas once they approve the actual array.

According to Abrams, the legal precedent applies only to California. But he says that when most states are looking to set a precedent, they will look to either California or New York. And since there is no precedent in New York on this subject, it makes California the one to serve as a guide to other states.

For the Amateur Radio, I'm Bruce Tennant, K6PZW, in Los Angeles. (WA6DPB)
--

Abrams tells Amateur Radio Newsline that he is now going to file with the Federal Court of Appeals to declare the City's appeal of his injunction against the City of Rancho Palos Verdes as moot.

**

RESCUE: ZL1AMO REPORTED ON LIFE SUPPORT
The Radio Society of Great Britain reports that well-known D-X'peditioner Ron Wright, ZL1AMO, has been taken ill. According to Wright's daughter Terri, her dad suffered collapsed lungs while in Fiji. He was air lifted by an emergency air ambulance to Auckland New Zealand where he was initially reported to be in critical condition and on life support.
A later report from Terri Wright says that her father is currently in stable but guarded condition. The RSGB says that Wright had been operating from Fiji as 3D2RW. Regular updates on Wrights condition are being posted to the web at www.papays.com/opdx.html (RSGB, ZL2BHF)

**

ENFORCEMENT: EX-HAM ARRESTED FOR ALLEGED ATTACK ON POLICE OFFICER

A former ham who resigned from Amateur Radio has been arrested in the hills of North Carolina following a manhunt that has lasted over a year. Steve Anderson, the ex-AA8DP, is accused of shooting at a police officer.

Anderson was a member of the Kentucky State Militia, a civilian paramilitary group, until April 2001. As previously reported, that militia group dismissed Anderson because he refused to shut down his unlicensed radio operation. (Published news reports)

**

ENFORCEMENT: ATT FINED FOR TOWER VIOLATIONS

The Federal Communications Commission has released an order imposing a $117,000 fine against AT&T Wireless Services, Inc. for safety-related violations of the Communications Act and the Commission's antenna structure rules. This action follows routine antenna structure inspections and related investigations conducted by Commission field offices throughout the country.

Before issuing the fine the FCC determined that AT&T Wireless committed seven separate violations of the antenna structure requirements as outlined under Part 17 of the Commission's rules. Included were failure to register, light, and paint antenna structures, and failure to post antenna structure registration numbers at the base of the antenna structures. (FCC)

**

ENFORCEMENT: VICTORVILLE CA PIRATE STILL ON THE AIR

Another unlicensed station has been discovered in California. According to Chris Compton writing in the CGC Communicator, he noticed a pirate operating on 90.9 MHz in Victorville while driving through the town not that long ago.

Compton, who is a Director of Engineering said that the unlicensed transmitter was taking out KGZO on 90.9 MHz in Shafter. The pirate was also heard doing commercials for his Nextel Store in Victorville.

Now here's the best part. When Compton called the unlicensed operator, the person responded that he had a "demonstration license" from the FCC and that it was good for one year. He told Compton that the licensed allowed him to "demonstrate" the line of transmitters he was selling along with custom built antennas for the FM band. He then asked Compton if I wanted to buy one.

The first monitoring of the pirate was in September. Compton said that he reported the situation to the FCC. He adds that he was in Victorville not long ago and the pirate was still on-the-air. (CGC Communicator)

**

RADIO POLITICS: JONATHAN ADELSTEIN SWORN IN AS FCC COMMISSIONER

FCC nominee Jonathan Adelstein has been sworn in to fill the Commission's remaining open slot. Adelstein will finish out the term of former Commissioner Gloria Tristani, which ends in June.

According to the ARRL Letter, the White House nominated Adelstein last February. But the nomination of the Democrat and a prot,g, of South Dakota Senator Tom Daschle had been held hostage for most of this year because of political wrangling over several judicial nominations. (ARRL)

**
CONVENTIONS AND HAMFESTS: HAM RADIO UNIVERSITY 2003

LIMARC -- The Long Island Mobile Amateur Radio Club - will hold the 2003 edition of its very popular Ham Radio University on Sunday, January 19th. Location is the East Woods School in Oyster Bay New York with the doors opening at 8 A.M. Eastern Standard Time.

Ham Radio University is a day-long session of intensive training in just about every aspect of Amateur Radio. The focus will be "hands on" with many demonstrations. And this year there will be special forums geared to the non-ham as well as the experienced ham radio operator.
There will also be a V-E testing session for those who would like to take an FCC exam and a Special Event Station set up and operational on the High Frequency bands.

Ham Radio University is a cooperative effort between over twenty clubs and organizations in the New York City- Long Island area. It is also the American Radio Relay League, New York City-Long Island Section Convention. For more information about Ham Radio University please contact George Tranos by e-mail to N2GA@arrl.org. (LIMARC)

**

GATHERINGS AND MEETINGS: MORSE CAMP IN THE U-K

A Morse code training camp is planned for the weekend of the 11th and 12th of January 2003 in the United Kingdom. The venue will be The Beacons, Simons Lane, in the town of Frodsham. For further details please contact either Catherine Pearson at RSGB HQ or Kath Wilson, the RSGB Regional Manager for North West England. Pearson can be contacted on by e-mail: toar.dept@rsgb.org.uk. Wilson can be reached at dwilson@btinternet.com (GB2RS)

HAMVENTION 2003: "THE YEAR OF THE YOUNG"

The 2003 Dayton Hamvention will have "The Year of the Young" as its overall theme. Planners say that the show's focus will be on the young ham and on bringing 12 to 18 year olds into the Amateur Radio hobby. More information will be posted on-line at www.hamvention.org as soon as final plans are made firm. (Dayton Hamvention*f*)

**
EMERGING TECHNOLOGY: MICROSOFT EASES RESTRICTIONS ON NEW XP MEDIA CENTER

Microsoft says that it will relax restrictions on how users of its new multimedia Windows XP Media Center operating system will be able to copy and distribute TV programs. As a result of the changes, users will be able to view unprotected TV programs copied onto DVD on any PC with Windows XP Media Center Edition. TV programs with built-in copyright controls will still prevent users from making copies.

Originally, Microsoft had developed the software so that users could only watch television programs stored on the hard disk or copied onto a DVD on only one machine. That being the PC used to record the original content. (Microsoft)

**

OUR HERITAGE: REMEMBERING THE RADIO OPS OF WWW2

The event that lead to the United States becoming involved in World War 2 will be commemorated by Amateur Radio. This, as a group of survivors of the Japanese sneak attack on Perl Harbor visit the USS Hornet and take to the air this coming December 7th.

The SSB Frequencies will be 7.260, 14.320, 21.320 and 28.320 MHz. CW operations will be found on 3.530, 7.030, 14.030, 21.030 and 28.030 Mhz. Operating hours will be from 0900 to 1700 Pacific Standard Time. A special QSL Card will be made available for those who make contact. (KB6SSN)

**

INTERNATIONAL - CANADA: VC2C ON 60 METERS

An update on whats become an international version of the U-K five megs experiment. Word from Canadian that station VC2C was recently given special permission by the Canadian radio authorities to operate on the 60 meter band. It took to the air between the 21st and 25th of October. During that time, VC2C made two-way C-W contacts with four G stations, one GM and one GI operator. All contacts took place on 5.280 MHz. (RSGB)

**

INTERNATIONAL - NEW ZEALAND: NZART CALLS FOR ELECTIONS

New Zealand's national ham radio society, the NZART has placed a call for nominations for those who want to serve on the Council and as the organizations President. NZART says that New Zealand hams have until December 31st to file their nominations. (NZART)

**

ON THE AIR: WSWSS 2 METER NET GOES PSK-31

A popular weak signal net is going digital check-in. David Peters, KI6FF, says that the Western States Weak Signal Society 2 meter Southern California Technical Roundtable net held Tuesdays at 8:30 PM Pacific on 144.130 MHz is going PSK 31 only for check-ins. Once the

evenings roster is complete the net will move to SSB and help people who need to get their equipment and software setup and checked out. (VHF REflector)

**

DX

In D-X, word that G0UIH will be in Australia and active as VK2IAY/P until the 15th of December. During this period, Steve will operate from several different rare IOTA island groups. Look for him on or around 14.260, 18.145 or 21.260 MHz on SSB only.

And NK3T will be active from McMurdo Station Antarctica as KC4 slash NK3T until late January or early February. QSL via his home call.

Also, special event station ER60SB will be on the air from the 23rd of January through the 2nd February 2003. This to commemorate the 60th anniversary of the Battle of Stalingrad. QSL via ER1DA either direct to Valery Metaxa, ER1DA, P.O. Box 3000, Chisinau, MD-2071, Moldova or via the bureau. (This weeks DX courtesy GB2RS)

**

THAT FINAL ITEM: FIGHTING BACK WITH A PHONE

And finally, here's one from the pages of the French e-magazine La Companion that we found surfing the Internet. Its the story of fighting back with a cellular telephone. Amateur Radio Newsline's Norm Seeley, KI7UP, has the curious details:

--

Maybe its all net-lore, but supposedly a female bus rider in a Paris suberb was annoyed by a loud-mouthed cellular telephone phone user a few rows in front of her. The fellow so boisterous that she could not even hear her companion seated right next to her.

Then the cellular bully supposedly made the mistake of mentioning his cellphone number during the conversation. A few minutes later, the lady picked up her own phone, called the man and asked him to: "...be quiet please".

But he refused. In fact he was so incensed by the call that he started to use all kinds of unsightly language. That is until he finally realizing where he was and that everyone on the tram was staring directly at him.

Undaunted, he supposedly stood up, uttered a few more choice words and exited at the next stop. The woman and her companion received a round of applause.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

And what else needs be said! (Tommorrows Technology)

3553. good radio for AM listening

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-29 23:14:11 UTC
From: rex <rex@here.com>
Message-ID: <6rsfuu06409200169d29tcbd14bh64gslm@4ax.com>
Source record: 11579

Gotta question all....

I want a good radio for AM, will probably want a shortwave someday as well.

What I would like to know is, would something like the dx-398 give me better AM performance than a Superadio III?

Obviously my budget does not stretch into the stratosphere. I have ruled out the CC because it seems the Superadio does a just fine job for almost a quarter of the price (don't need the special features). Not to mention that dx-398's usually pop up on ebay for what I would pay for the CC as well.

Originally my plan was to get a Superadio for AM now, and then later on I would bite on a dx-398 (or maybe yachtboy or whatever) to start listening to shortwave. However, if the 398 matches the Superadio for AM performance then there wouldn't be much sense in purchasing the SR, just jump right to the 398.

Looking for a little clarity....

rex

3554. GREAT CHRISTMAS GIFTS FOR ANY DXer.

Newsgroup: rec.radio.amateur.dx
Date: 2002-11-30 01:03:30 UTC

Two great products that would make any DXer happy
this Christmas are:

GOWIN, Golist for Windows, Qsl Manager Database and
Search program.

DX TELNET, the premier Internet DX Cluster telnet program

GOWIN is still $49.95 and includes these other services:
52 Weeks of UNLIMITED lookups on the Golist Online
Database.....a value of $25.00.
52 Weeks of the DX ALERT report of announced DX
operations ....a value of $25.00.
52 Weeks of GODATA, the weekly database file update
used by GOWIN and supporting Logging Software like
WIN-EQF; DXBASE; WINLOG32; DX4WIN; SWISSLOG;
LOG WINDOWS; TRX-MANAGER; and others.....
a value of $36.00.

DX TELNET is still $35.00 for the standard Windows version
and updates to this version are Free for the lifetime
of this version.

Visit the GOLIST WEB SITE and read about all the GOLIST and
DX TELNET products. Also read the GOLIST testimonal page to
see what GOLIST users think about GOLIST products and service.

http://golist.net/

Order online or via email (orders@golist.net)

HAPPY HOLIDAYS to each of You from the GOLIST.

Message-ID: <hGVF9.86723$g9.244200@newsfeeds.bigpond.com>
Source record: 11582

You would think they could at least have some sort of QSLing update on
either their website or by way of this NG.

Where are my SSB cards K1B????
I sent you good money (and enough of it) for the courtesy of a reply.
(CW cards were received several months ago.)
Has it been pilfered in some Russian PO? This was a bad move in the first
place and blind Freddy could have seen this one coming.

Splitting Managers was just an attempt to virtually double your $$$ income -
what a cheeky stunt.

If YT1AD cannot share some information sooner or later then don't expect
much support for your next one.

That's a bit misleading. A lot of spam gets sent with faked hotmail.com
addresses, but the spam often doesn't going anywhere near a hotmail.com
server. There's nothing MS can do about that.

And thats why spammers use a fake hotmail.com address and hotmail.com
winds up in everybody's filter list.
There's a very finite number of spammers in the world...far fewer than
one would think when your mailbox is full of crap email everyday. MS,
if anybody, has the resources to put a big dent in the numbers.

From the K1B site:

K1B QSL-ing:
============

Talked to Hrane, and Roman about your concernrs relevant
to sending cards to RU, and YU. They said that 2 IRC should
work fine for the letter up to 20 gr. When sending to
Yugoslavia add Serbia & Montenegro to the address. Hrane's
address published on the KH1 web page is authentic, even a
bit short.

Two IRCs??? Well, guess I won't get my card...

One suggestion: we should note that the improperly managed SMTP relays are
extremely irresponsible. This is a prominent mechanism that enables practically
anonymous spam, and it is incredible that so many of those who connect directly
to the internet (unfiltered) are so very irresponsible. I consider my
internet connection equivalent (in a sense) to maintaining a lawn. It
is important to keep the software up to date, and when new weeds
are found (bugs), then it is important to remove them.

I have numerous blocks on numerous IP address ranges, along with aggressive
blocking of domains (whether or not they are bogus.) On my system
that used to get lots of spam, now I only get 1-2 spams every couple
of days. When I detect the spam, and refer to my sendmail logs, I
enter the appropriate information into the block lists. Many/most of
the domain names for email spam are bogus, but the relay source is
most often not bogus. Those who allow such nonsense on their
machines are equally as guilty, but for negligence as the creeps who
spam everyone.

This is a little more tricky for ISPs and more general services, because
I am more willing to block groups of addresses than they might be. Also,
my various blocks include deterrents that make snooping a little less
comfortable than normal services might be willing to employ.

My own practices include checking my system logs quite regularly, and also have a configuration that is adequately different that things like root kits would fail. I'd much rather my systems fail (until the nonsense and exploits are removed) instead of continuing a fail-soft operation that ends up being an obnoxious and irresponsible net-citizen.

Bingo. And thats probably why arrl.org got pegged.
Any bozo that knows how to use Telnet can hijack any number of unwitting
servers worldwide for a one-time flood of spam. Most server owners wise
up very quickly and can prevent this...but some don't.
A year or two ago the vogue was to cry about Korean spammers, etc but in
2002 the blame should be placed on YOUR indivdual ISP for not having
adequate filtering. As long as there are ISPs operating on the floor of
a cheap apartment in Manila, there will be a conduit for spam.
Attacking the source is futile....the delivery mechanism should be the
subject of attention.
Many ISPs and newsgroup servers are well on the ball these days at
implementing filtering. If you get too much spam they are the entity
which you should complain to. And then there is AOL.

I generally agree with your response (and it is important to be vigilent.) However,
there are alot of people like me who essentially provide their own ISP to themselves,
and the connection to the internet does entail significant responsibility. If
I hadn't been an internet host since about 8yrs ago, and experienced in the
care and feeding, and I am the only real user behind the firewall (I have some
aliases for family members, however), then maintaining the connection
would be less pleasant.

At times, I have considered dropping my internet host, and just doing it the
way that most people do. However, as soon as you connect with variable
IP addresses, and connect through a captive service, then the ISPs will
sometimes do alot of filtering, thereby disabiling potential experiments.

If I wasn't doing OS development (from time to time), or work on distributed
computing issues, I'd most likely reassign my domain name to a service that
just provides email :-).

As it is, I don't normally divulge my personal domain anymore, simply to keep
my life simple. My normal public email is provided through my ISP. However,
my exposure of my private email address in the past (after starting to keep it

quiet a few years ago), still has the effect of receiving nonsense spam. As it is, my ISP that does do some spam filtering, tends to be a little too conservative, and still lets spam though, but also flags the potential spam.

The biggest mistake that I had made, and the mistake was indeed exploited, was that I had left the UNIX 'finger' command open to the world. This was a bad thing, but an interesting side-effect of version skews in early versions of FreeBSD that I was working on was that the utmp file format had changed, and the login names returned by finger were bogus :-). I still get email attempts to those bogus names, and that was over 3-4yrs ago when that problem was fixed.

There are also other approaches for personal anti-spam, including the use of bogus email addresses (like adding something obvious to remove), but accept both the bogus name and the real name. If someone sends email to the bogus address, it replys with the formula for correcting the address (or might even reply with an instruction to simply reply, and the correct address would get the message.) Most spammers tend to bounce the messages to a reply anyway, but that wouldn't be 100% (some spammers might actually read and reply, and then your real email is on a list.) :-(. This just might not work, but seemed like a logical follow on to the situation that I noted above.

John

Mornin,

Any 5's out there know the status of the W5 buro? I know they are in the
process of moving from MS to OK but the old W5 web site says October is the
transition month - here it is December and no update...
Has anyone received cards from the W5 buro in the past couple of months?

Thanks and 73,

Back then in the 'heyday' it would have been WA1BWV. John bought his dead guys call.

Source record: 11456

>>I worked A61AJ in 26.Nov.2000 and received his card promptly via W3UR with
>>no hassle. I've noticed that you mentioned a different mgr N4QB. Pity if his
>>work is not as good as that of W3UR. Have you tried Ali's email?

>Yes, I have...but with no success. I suspect maybe the logs
>haven't gotten to N4QB, or (hopefully not) he's having real-life
>difficulties leaving QSLing on the back burner. Whatever the case,
>I don't know of anybody on the QSL reflectors I monitor who has
>received a card through this manager yet.

I spoke about 4 days too soon!! I'm pleased to report that A61AJ's QSL
was received over the Thanksgiving long weekend. Beautiful 4-colour
card with correct information ona computer label. Received a very nice
note from his stateside manager, N4QB as well--so it looks like the
cards are on the way out. Guess I jumped the gun a bit <grin>.

>
>If YT1AD cannot share some information sooner or later then don't expect
>much support for your next one.

Received K1B (SSB) a couple of weeks ago, so I'm guessing there are
still cards to be sent. Please note that the information on mine was
HAND WRITTEN and not witha computer label, so I'm guessing the process
is very arduous on their end as well.

That said, and with thanks for the card, I do believe it was a
serious mistake to have QSLs for this operation go to Russian
addresses. Were there simply no stateside or Canadian managers who
wanted to tackle a DX-pedition of this size?

The nearest I ever came to anything like that was in 1965. I managed to have a **reasonable** qso with Mike, W2OY, on 75. Never liked 20 meters (except when on Guam Island as it was almost always open to the states for a number of hours). 160, 80, 40, and 15 were my hangouts (mostly 160). About 80% of the contacts were CW. These days it's 440 FM. Oh, a very few folks whining over cw vs. no code, but no bad operators that I've encountered. I haven't been on HF since 1970.

Back in the 60s, W2OY was very well known. His cq went something like "cq cq de W2OY .... no lids, kids, space cadets, or school bus riders. Only class A operators on this frequency from W2OY". He was a classic. Actually, a very good friend of mine, Tim, WB2KAO, tells me he was a nice guy in person ... I think he enjoyed 'trolling' the radio the way some folks troll the newsgroups ;-)

I would propose that MS and their fleet of lawyers nail a few of the big time abusers and/or provide configuration assistance to the abusive ISPs that allow spamming in the first place that would exclude 'their' name.

I know it won't happen, but thats my proposal.

-Bill

posting under different names that could be configured to exclude hotmail addresses.

Jim,

That's how I remember it - or at least how I remember it being told to me by the "old-timers" back in 1969 - when I was first licensed - and was a kid, a lid, and a WB - there was no way I was going to respond to the guy's CQ! ;-)

It's ironic that this discussion thread emerges after all of these years - pretty harmless fluff compared to some of the traffic you hear on the airways today -- but 33 years ago W2OY was a pretty radical dude.

No they haven't. There never has been a requirement to use standard
phonetics. Shoot, the ARRL had a different phonetic alphabet in the
'60s (I don't know when they changed) than the ICAO one that was
standard for the FAA and the military. They couldn't possibly have
promoted that if the FCC had any "standard."

Most likely an urban legend as the FCC did not require the use of
standard phonetics. We made up all kinds of phonetics for our
calls. The last three letters of a friend's call who drove for
Greyhound Bus was DGD (Drunk Greyhound Driver), another was AGG
(America's Greatest Gabber), ect., ect., ect.
No one was ever cited and the FCC did quite a lot of monitoring of
the ham bands in those days.

Dan, I think he used to state "no wet-bottom boys". He'd sometimes speak with a station with a WA prefix, but seldom to a WB. I did chat with him once and had a fairly nice chat. At the end of the chat he said he'd have to go as his grandkids were arriving. He said his grandkids needed a paddling. ;)

Right. "adam, baker, charlie, david, edward, frank ..." was the ARRL phonetic alphabet whilst the military used "alpha, bravo, charlie, delta, echo, foxtrot ...".

Reminds me of W7TPG, Herman Middleton. His schtick (50's & 60's) was
along the lines of "Calling CQ from W7TPG, W7 Tuned Plate Grid, "from
the beautiful 'valley of the sun', Phoenix, Arizona, where the birds
fly backwards, not because they don't trust each other, but because
they want to keep the sun out of their eyes."

Yeah Rich is history. His pride overtook his brain and he is history. The Herpster will be back. He shucked and jived his way back into ham radio. Check 14.300in the mornings for Queenie and Herby fun hour.

Welcome back Mike. Hope ya get the tower up and no one comes down to visit ya anymore. Poor Judy has given up on ham radio tho. So who are you going to talk to about masturbation? Maybe you can find David Tolassi to help you out there, eh?

Oh one more thing Captain....grin...we both know thats bull don't we?. Be careful of the 'enforcer'. He talks softly and carries a big stick. They call him Riley......ask Polly about him.

Well, now you're going to get me started on Blackie, W6HLH.

He'd sit on 28.503, or 14.203 (back when the American phone band
stopped at 28.500 and 14.200) and call,

"CQ, CQ, CQ; CQ 10 (20) meters. CQ, CQ, CQ, California calling, dubya
six, hotellll, leema, hotellll, calling CQ on 10 (20) meters. Dubya
six, hotellll, leema, hotellll, listening this frequency or 28.495
(14.195). If you are transceiver equipped, tune your VFO to 495 (195)
and turn your RIT to the far clockwise position. CQ, CQ, CQ; CQ 10
(20) meters. CQ, CQ, CQ, California calling, dubya six, hotellll,
leema, hotellll, calling CQ on 10 (20) meters."

Eventually someone would call him and there wasn't much to listen to
after that. He was a far better CQer than a QSOer.

"Buh-lackey, neeeear the airport...Saaaan Fraaaancisco". I've heard him use "Honolulu-London-Honolulu" to break the monotony of those 10 minute CQs :-) "All Collllllinnngs (sic) equipment"
Funniest part was when he finally unkeyed and there was a great pileup of people razzing him for being such a lid.
I actually had a QSO with him once. It basically consisted of a 10-minute monologue from him of how everybody on the band was an asshole. He went into drunken rambling spells in some of his CQs where he just went on and on muttering about how everybody was.
I'll give the OF his due, he always had one helluva signal!

Amateur Radio Newsline™ Report 1321 – December 6, 2002

Amateur Radio Newsline report number 1321 with a release date of Friday, December 6, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. North Korea takes its only ham off the air and the first digital voice Q-S-O across the Atlantic. These stories are first on Amateur Radio Newsline report number 1321 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL – N. KOREA: LAST HAM FORCED OFF THE AIR

The Peoples Republic of Korea appears to no longer want Amateur Radio operating from its soil. It made its intention clear when it asked its only ham ito pack his gear and send it out of the country. Jeramy Boot, G4NJH, in Nottingham England has the details:

--
Ed, P5/4L4FN, the only radio amateur operating legally from North Korea, has had to close down. On the evening of the 22nd of November, Ed was called into a meeting with the North Korean Radio Regulation Board. Without any explanation he was politely asked to stop all transmissions and to pack up all his radio equipment.

Ed spent the following day dissembling his antennas and packing boxes. That afternoon government officials sealed all the boxes and Ed has been told to take everything out of the country when he leaves North Korea for a two-week holiday on the 10th of December.

Jeramy Boot, G4NJH
--

With Ed now off the air, ham radio is gone from North Korea and nobody expects it to be resumed anytime in the near future. It also puts North Korea back near the top of D-X'ings most wanted list.
More on this story is at www.amsatnet.com/p5.html. (RSGB)

**

EMERGING TECHNOLOGY: DIGITAL HAM AUDIO SPANS THE ATLANTIC

Two ham radio communications pioneers have achieved a major breakthrough. The first two-way digital voice transmission across the Atlantic via Amateur Radio. Norm Seeley, KI7UP tells us who did it and how it was accomplished.

--
Doug Smith, KF6DX, and Didier Chulot, F5MJN, have successfully transmitted and received HF digital speech signals between Sevierville, Tennessee and Paris, France. It happened on Friday, November 22 nd.

The first historic contact took place on 21.218 MHz in the 15 meter band. Chulot spoke with Smith for several minutes using a high-frequency digital link within a 3-kHz bandwidth. Signal strengths were S-5 to S-7 and readability was solid in both directions.

The feat was accomplished using Ten-Tec transceivers and digital audio systems from Thales Communications.

--
DEMO AUDIO HERE
--

The Q-S-O demonstrated the advantages of digital audio for two way radio. This includes noise-free, FM-like reception and the potential for simultaneous voice and data exchange.

With an eye toward the digital future of Amateur Radio, I'm Norm Seeley, KI7UP.
--

The Ten-Tec/Thales system used in this experiment is based on a new international broadcasting standard for digital radio adopted last year by the International Telecommunications Union. The FCC has approved a similar standard for broadcasting in the United States. An Amateur Radio version is expected to appear on the market sometime in 2003. (KF6DX, Ten-Tec)

**

EMERGING TECHNOLOGY: PPW PROPOSES ELECTRONIC INFRASTRUCTURE TO WARN PUBLIC OF DANGER

A group of U.S. communications security experts has recommended that Americans be alerted to impending danger over their wireless devices. Amateur Radio Newsline's Fred Vobbe, W-8-H-D-U, takes a look at this new concept in emergency notification:

--
The Partnership for Public Warning says that a national wireless system could send alerts to citizens via their pagers, mobile phones or computer screens.

The Partnership for Public Warning is a newly formed thirty-member advisory body that includes representatives of government agencies, relief agencies and even a ham radio operator. And on Monday, November 25th it released a report that says conventional media broadcasts may spread alerts too slowly in instances of pending natural disaster or terrorist threat.

P-P-W says that the newly formed Department for Homeland Security should take responsibility for leading development of a national all-hazard public warning architecture. This, in partnership with other federal agencies, state and local governments, industry, universities and other stakeholders. The technology itself would be produced by private industry with the alert system

operated by governments and selected other organizations following a strict set of alert protocols.

P-P-W says that improved warning systems and procedures will reduce losses from natural and man-made disasters, and will speed recovery. Most important is that it will save lives.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

President Bush cited quick responses to attacks as a priority of the new Department of Homeland Security which will consolidate parts of 22 departments to better prevent attacks in the wake of the September 11, 2001 terrorist attacks in which some 3,000 people died.

information about the Partnership For Public Warning is on the web at http://www.partnershipforpublicwarning.org/ppw (Published reports)

(5 sec pause here)

**

HAM RADIO GROWTH: GOOD NUMBERS TO US

The folks on that "other band" might call this “almost good numbers.” This with word that the number of radio amateurs licensed by the Federal Communications Commission is at a five-year high. But there are some caveats. Bill Pasternak, WA6ITF, has more:

--
According to the CQ Magazine website, FCC numbersshow a total United States ham population of 684,498 as of October 31st. And breakdowns provided by Joe Speroni, A-H-Zero-A, say that the primary growth has come among Amateur Extra Classand General Class licensees. Extra is now breaking the 100,000 point for the first time.

Technician Class figures have essentially held steady. Also we had 20,000 new hams entering the hobby in the year ending October 31st.

License renewal statistics were also encouraging with the renewal rate climbing from an abysmal 45% two years ago to a better, but still unacceptable, rate of 55% in the past year.

Better numbers, but not the best.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.
--

More on licensing figures are on the web at www.speroni.com/fcc (CQ)

**

HAM RADIO IN THE PUBLIC EYE: THE ATLANTC MONTHLY

The November 26th edition of Atlantic Monthly Magazine On-Line has some good words about ham radio and its role in homeland security. In an article titled America's Secret Weapon in the War on Terror, one of the groups singled out for attention is the nations corps of Amateur Radio operators. Its described in the article as an ever-ready line of emergency communications.

The story goes on to say that America boasts 650,000 licensed ham-radio operators. It quotes he ARRL's Mary Hobart as saying that about 1,500 of them are fully certified in emergency communications and are prepared to rush to the scene of a forest fire, flood, or hurricane with a jump bag full of portable radio equipment. And says Hobart, That can be crucial.

Atlantic Monthly notes that when phone lines, radio towers, and even satellites go down, ham operators -- broadcasting each to each other , and operating on batteries or generator -- stay on the air. And says Atlantic Monthly, after the terrorist attacks of 911 when New York's cell phones turned into paperweights hundreds of hams, some from as far away as Texas and California, turned out to provide radio lifelines for emergency workers and relief agencies.

The article is must reading for everyone involved in Amateur Radio public relations. It can be found at the U-R-L listed in this weeks Amateur Radio Newsline print edition.

The complete article is at
http://www.theatlantic.com/politics/nj/rauch2002-11-26.htm (KS2G)

**

ENFORCEMENT: FCC INVESTIGATING INTERFERENCE TO EMERGENCY TRAFFIC IN LOS ANGELES

The FCC is looking into allegations that two Los angeles area hams interfered with a distress call on an area repeater. The FCC's Daryl Duckworth, NN0W explains:

--
"The Enforcement Bureau has opened a case involving allegations of deliberate interference to emergency communications on the N6SAP repeater in the Los Angeles area. Anton W. Johnson, N6OAY, and Ledge Musselman, KC6NCN, are being asked to explain the allegations of the operations on October 2.

Information is also being sought from the repeater licensee. Scott Press.

This mater is being taken very seriously by the Enforcement Bureau since emergency communications is one of the foundations of Amateur Radio."
--

The FCC claims that Johnson and Musselman interfered with attempts to relay emergency traffic on the 147.435 repeater at about 9:45 a.m. on October 2nd.

Press is being asked to explain what action he is taking in this matter. He is also been directed to summarize any conversations he may have had with the licensees against whom the allegations have been made. The FCC says that Press must also provide any written correspondence he may have sent to Johnson and Musselman. All three were given twenty days from he date of the FCC letters to respond.

**

ENFORCEMENT: THE STORY OF THE EX-AA8DP

A follow-up now to last weeks report of the capture of Steve Anderson, the ex AA8DP. Anderson was wanted in connrection with an alleged attack on a police officer. He was arrested in the hills of North Carolina following a manhunt that has lasted over a year. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the story of how Anderson was caught:

--

A tip to the Fox Television program "America's Most Wanted" and forwarded to federal investigators has led to the arrest of Kentucky fugitive Steve Anderson, the ex-AA8DP. Anderson, an alleged white supremacist who resigned his Amateur Radio license almost two years ago and then operated an unlicensed radio station from his home, had been at large since October 14th of 2001.

According to the Louisville Courier-Journal, Anderson was arrested in the mountains of southwestern North Carolina by the Bureau of Alcohol, Tobacco and Firearms and the North Carolina State Bureau of Investigation. The A-T-F's Don York told the newspaper that America's Most Wanted received a tip about Anderson's whereabouts after airing its second segment on him about a month ago. The tip was forwarded to the A-T-F, which worked the case with North Carolina authorities.

Anderson is accused of shooting an automatic weapon at Deputy Scott Elder. This, after Elder had pulled Anderson's truck over north of Middlesboro Kentucky for a traffic violation. Elder was unharmed after Anderson allegedly opened fire, but his police cruiser was struck about two dozen times. Police said Anderson then drove into the mountains, and a search of his property turned up explosives and guns.

Anderson had attracted attention of authorities several years ago by playing host to a small Ku Klux Klan rally during which a cross was burned. He also allegedly operated a shortwave radio station out of his home, where his commentary against minorities, immigrants and the government drew the attention of the Federal Communications Commission. The Anti-Defamation League complained to the FCC about Anderson's broadcasts which were taking place in the Amateur bands. Rather than explain his actions, Anderson sent in his AA8DP license for cancellation. It was accompanied by a rather convoluted message that said he did not recognize the licensing authority of the FCC which he called an agent of a foreign power.

Anderson continued to broadcast but bowing to extensive pressure from the nations ham radio community, he took the transmissions out of the Amateur

service bands. They stopped after he disappeared following the alleged attack on Officer Elder.

For the Amateur Radio Newsline, In Henry Feinberg, K2SSQ.
--

As previously reported, the ex-AA8DP had been a member of the Kentucky State Militia until April 2001. That group dismissed Anderson because he refused to shut down his unlicensed radio operation. (ARNewsline(tm) from published reports)

**

THE INTERNET VS. HAM RADIO: HOTMAIL AND JUNO BLOCK ARRL E-MAIL FORWARDING

If you get your e-mail using the American Radio Relay League's @arrl.net vanity address, and use Juno or Hotmail as your account you know that you were cut off for a few days. It wasn't the ARRL's doing. Blame it on the twi internet service providers.

According to an ARRL bulletin the two companies notified the League on November 25th that they had stopped accepting e-mail messages forwarded to users of their services from the arrl.net e-mail server. According to representatives of the two companies, this was part of heir solution to the Internet-wide problem of spam.

The ARRL, through the vendor for the arrl.net server began working with both companies to resolve this matter. The ARRL and Hotmail reached a accord the fllowing day and service was restored. Juno was back late on Monday December 2nd. During the peak of the service outage, forwarded e-mail to nearly 6,000 ARRL members was curtailed. (ARRL)

**

RADIO LAW: NEW CODES DEVELOPED TO HELP STUDY RADIO RELATED HIGHWAY ACCIDENTS

State highway departments will soon get help tracking how many traffic accidents are caused by drivers chatting on their handheld cell phones or C-B sets, using their pagers or checking their personal digital assistants. In January, every state will receive a booklet of revised codes that describes causes of vehicle crashes, including distractions from electronic communication devices. The codes were developed by traffic safety and crash data experts, including the Governors Highway Safety Association and the Federal Highway Administration.

A spokesperson for the Governors Highway Safety Association, says that the updated crash codes will allow the organization to develop data that demonstrates whether electronic distractions in cars are a serious safety problem. A March report by the National Conference of State Legislatures suggests device-related distractions killed an estimated 600 to 1,000 motorists in 2001 and could kill 2,000 a year by 2004. (Published news reports)

**

RADIO EDUCATION: HAM RADIO COURSE OFFERED AT PENN STATE

Amateur Radio is a part of the training being offered this fall to freshmen at the Pennsylvania State University. According to Brad Parola, KB3HQE, Vice President of the Penn State Amateur Radio Club, part of the course during the first half of the Fall semester included exposure to Amateur Radio. Students were shown how to tune radios like the Ten Tec Pegasus, shown how to receive PSK 31 signals, and were given a tour of the world famous Rock Springs Antenna Test Range run by Dr. Jim Breakall WA3FET. Early in October, those students who were interested were given the opportunity to take their Technician class tests. So far 15 students have passed an Amateur service exam. (KB3HQE)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**
RESCUE UPDATE: ZL1AMO CONDITION REPORTED UNCHANGED

We have an update in the medical condition of famed D-X'er Ron Wright , ZL1AMO. Jim Meachen, ZL2BHF, has the latest:

--
A bit of good news this week. Wrights daughter Terri says the family visited Ron in the hospital and he was sitting up in a lazy boy chair. This is the first time any of the family had seen seen him out of the bed since he was hospitalized. Terri Wring says that Ron is also trying to communicate with those around him and he looks a lot better than on previous visits.

As reported last week, Wright suffered collapsed lungs while visiting Fiji. He was air lifted by an emergency air ambulance to Auckland New Zealand where he was initially reported to be in critical condition and on life support.

The INDEXA – the International D-X Association -- has established a fund to assist Wright and his family with the cost of air evacuating him from Fiji to Auckland. Donations go to the ZL1AMO Air Ambulance Fund, in care of Bill Jennings, W4UNP, P. O. Box 607, Rock Hill, South Carolina, 29731. Sorry, but INDEXA says that contributions to this fund are not tax deductible.

From Auckland New Zealand – down under – I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline
--

Updates on the fund and Wrights condition are being posted to the web at www.papays.com/opdx.html (ARNewsline(tm), INDEXA, AA7UC)

**

THE SCIENCE PAGE: WHALES YES – NAVY NO

A federal judge has tentatively blocked the Navy from deploying a new early warning system because it might harm whales. Amateur Radio Newsline's Brucce Tennant, K6PZW, has the rest of the story:

--
A Federal court has said no to a new high-frequency SONAR system designed to detect enemy submarines at long range because it could further endanger the worlds whale population. But in making his ruing, the judge also said the Navy may use the sonar during wartime and must be allowed to train with it beforehand.

In partially siding with environmentalists, the judge ordered both sides back to court to begin formulating a plan balancing environmental and military concerns. Environmental organizations say the Navy's powerful sonar system can strand, maim or kill marine mammals. The Navy disagreed.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--

A few days earlier, a different judge ordered the National Science Foundation to stop firing high-intensity sonic blasts into the Gulf of California because they harm whales. So far there has been no comment from either the Navy or the N-S-F. (Published reports)

**

HAM RADIO IN SPACE: UO-22 IS BACK WITH US – FOR NOW

G7UPN reports that U-O-SAT 22 is back on line and open for business. At least for the time being.

Chris tells the AMSAT News Service that new software has been loaded to try and keep the downlink operating most of the time. But says G7UPN, UO-22 is an older veteran satellite. This means it may give problems in the near future. More information is in cyberspace at www.amsat.org (ANS)

**

INTERNATIONAL – JAPAN: JA SAYS NO TO PLT

Japan has said no to the introduction of Power Line Transmissions or P-L-T in that nation. Following extensive trials, the Ministry of Public Management, Home Affairs, Posts and Telecommunications has decided not to permit their roll-out for fear of interference to other services.

The Japan Amateur Radio League had been actively working with the government, radio astronomers, broadcasters and others to assess the impact of P-L-T systems on the radio spectrum. The results of this P-L-T study in Japan is a real eye-opener. It showed conclusively that Power Line Transmission system emissions are harmful to High Frequency communications operating in the range 2 to 30 MHz. Because of this Japan's telecommunications regulators have refused all requests from P-L-T manufacturers to operate these systems. (JARL, Q-News)

**

INTERNATIONAL: GETTING ON THE AIR DOWN UNDER

Still in that region of the world, were you aware that New Zealand is one of very few countries in the world where licensed amateurs visiting from overseas can immediately operate?

Well it is and a visiting amateur can get off an airplane, walk into the terminal building and start operating on 144 MHz and above by simply signing his own call sign portable Zed-L. This, without the hassle of getting a license and without paying a licence fee.

For more information on operating in New Zealand as a tourist or visitor take your web browser over to www.nzart.org.nz (NZART)

**

ON THE AIR: COMMEMORATING DIANA

Back here in the U-S-A, the first successful moon bounce experiment was conducted by the Army Signal Corps on January 10th 1946. And to commemorate the event, the Ocean Monmouth Amateur Radio Club will operate from the historic Diana radio site on January 10th 2002. The Ocean Monmouth group plans to operate using Morse and SSB in the General and Novice Technician sub bands of the 80, 40, 20, 15, 10 meter bands. For more information on the Diana Project and for QSL info please visit the OMARC web site at www.qsl.net/n2mo (OMARC)

**

DX

In D-X, F6COW is reporteed tobe operating from the 9S1X club station in the Congo. He will reportedly be there until the 9th
of December. (GB2RS)

Also, F6BLQ will participate in the ARRL 10 Meter Contest on the 14th and 15th of December, also as 9S1X. His operation will be on SSB only. (GB2RS)

And ST1MN is a new ham in the Sudan. He will be active on all bands until the end of June 2003. Q-S-L as directed on the air. (GB2RS)

A lot higher in frequency, FT1ZK, is active on 6 meters every afternoon from Amsterdam Island. The operator is named Caroline and she has a beacon transmitter active on 50.086 MHz and running 24 hours a day. She will be on Amsterdam Island until January 16th. QSL via F5JCB. (VHF Reflector)

**

THAT FINAL ITEM: THE CANALS OF VENUS - DEBUNKED

And finally this week lets turn our eyes toward the planet Venus. Just our eyes. Not our telescopes. Because if we do use a telescope we might make the very same mistake made by a very famous astronomer regarding canals on that mist shrouded planet. Q-News Graham Kemp, VK4BB, takes us into the cosmos for this one:

--
Turn of the century astronomer Percival Lowell is well known for promoting the incorrect notion that water canals had been built on the surface of Mars. He

also drew a map of the "canals" on Venus; the only problem was that no one else could see anything resembling canals because Venus is always shrouded in clouds.

Turns out that Lowell had narrowed the aperture of his 24" telescope down to about 3" to attenuate the bright light from Venus. That little known fact - recently publicized - caught the attention of optical experts who realized that Lowell had unwittingly turned his telescope into a reverse ophthalmoscope, an instrument used to examine the interior of the eye. Instead of mapping the surface of Venus, Lowell was apparently mapping the shadows of blood vessels and other structures on his own retina!

Sky & Telescope magazine explains the situation in detail, presents Lowell's sketch of the Venusian "canals," and a photograph of retinal blood vessels. The two patterns are strikingly alike.

From Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.
--

You can see the pictures Graham reefers to in the online edition of Sky and Telescope magazine. Just take your web browser over to http//skyandtelescope.com/news/current/article_648_1.asp (Q-News)

After reading the discussions within the mists of the F layer this
morning, the Wise Ones have hereby released the following list of
Approved Phonetics .

A - Aegis
B - Brie
C - Cereal
D - Djibouti
E - Eye, Ewe
F - Fjord
G - Gnome, Gnu
H - Hombre
I - Iguana
J - Juarez
K - Knight
L - Llama
M - Mnemonic
N - Night, Nome, New
O - Ombre
P - Pneumatic, Phenomenon
Q - Quiche
R - Rote, Rye
S - Serial
T - Tsunami
U - Ursa, Uruguay
V - Voila
W - Wrote, Wry
X - Xenon
Y - Yttrium
Z - Zeitgeist

73 de Peter, W2IRT
(ex-AB2NZ, VE3THX)

As per it's prefix, ZS2 would be the Eastern Cape (around Port Elizabeth if my memory serves me right) whereas ZS8 represents Prince Edward & Marion Island. I don't know the ZS Ham Radio rules as such but I believe they would at least have to add "8" or "ZS8" if operating from another DXCC entity.

<G>! (and agreed fully on both counts...)

I'm sure this had far more to do with the big todo about the nuclear
program.

Absolutely amazing is there no limit to the code bigotry.

It's over, that ship has sailed, the fat lady has sung.

Why not just enjoy the hobby instead of carping all the time.

Unbelievable!

Why can't Derek express preference for a particular mode without
being called names?

It looks to me like you'll find the real bigot in the mirror.

The 8th International CCF Contest/DX Meeting in Finland

Contest Club Finland welcomes contesters and DXers to the 8th international
Contest/DX Meeting in Finland!

Date: 17-19 January 2003
QTH: Vantaa, Finland

Presentations with perspective - Agenda (preliminary):

Friday 17.01.2003
19:00 (local time) "Unofficial" Get-Together in Sokos Hotel Vantaa

Saturday 18.01.2003 Sokos Hotel Vantaa
Meeting 12:00 - 19:00:

CQWW DX 2002 CW at EA8ZS &#65533; la OH2U by OH2XX
(Claimed multi/multi winner)
- The story behind
- Setup and technical solutions
- Audio examples

Serious RTTY Contesting by OH2BP

WRTC2002 Analysis by K3NA

ZA1B CQ WW CW Operation by OH5BM

Logistics Behind A Contest/DX Pedition To a Remote Location, Case
C53M/C56R
by OH9MM

Contest Dinner 19:00 -
(please inform when you pre-registrate, if you are taking part in dinner
too
... menu/prices available soon)
WRTC2002 Video Presentation - World Premier by OH2BH

Sunday 19.01.2002
Goodbye Finland (program still open)

Meeting QTH information:
SOKOS HOTEL VANTAA, Hertaksentie 2, 01300 Vantaa
(5km from Helsinki-Vantaa Airport, 15 minutes to Helsinki City Centre
by
train)
Rooms: single 77 euros/night, double 88 euros/night

Reservation: phone +358-20-1234 600 (020 1234 600 from Finland), fax
+358-20-1234 646 (020 1234 600 from Finland), email:

Hi,

A new design has been created for the EWWA award.

It comes with a new picture of the European Council (note that a short stock of the old version is still available for a few weeks).

Note that the list of EWWA entities has also been modified on december 2002.

Info about the EWWA on http://www.ewwa.net/

Hi all,

I have just finished 'xgridloc', my first attempt at a GTK+
ham radio application for linux. xgridloc is a Maidenhead grid
locator calculator which can accept a 'home' location's
longitude and latitude and calculate the grid locator or vice
versa. It can also accept a second 'remote' location's position
or locator and calculate the great circle bearing and distance,
short-path and long-path, and if the 'xplanet' application is
installed, it can display both locations and the GC arc between
them, on the map of the earth which xplanet produces.

'xgridloc' is released under the GPL at

Yep but MVI had a QSL manager. The others were supposed to QSL
automatically, without needing a card from me.

Anyone else get one?

I think Martti can get this one done without me, but it's Dave who is
his protege. Maybe the State Department can get Dave over there on a
secret mission.

But I do wonder if the video presentation will be via amateur
frequencies?

And it's just plain N0iMD now. I could be portable 8 if there were a
requirement to claim "portable," and if I had written permission.

Thanks for the thoughts, though.

Amateur Radio Newsline™ Report 1322 – December 13, 2002

Amateur Radio Newsline report number 1322 with a release date of Friday, December 13, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds as a winter blizzard sweeps the Carolinas and the FCC asks a V-E team to explain. Find out what on Amateur Radio Newsline report number 1322 coming your way right now.

(Billboard Cart Here)

**
RESCUE RADIO: HAMS RESPOND TO CAROLINA BLIZZARD

Weathecasters described it as a clash of titans. A large cold mass of air from the North collided with a warm wet airmass from the Gulf of Mexico. The result was blizzard-like conditions in many areas of the Mid-West and along the Eastern Seaboard.

It all happened late Wednesday December 4th and all day on Thursday December 5 th. Hardest hit was North Carolina. Gary Pearce, KN4AQ, lived through the storm in Raleigh and has this first hand report:

--

The storm began moving across North Carolina as snow and sleet on Wednesday afternoon, and turned to ice overnight. With temperatures hovering just below freezing, a half-inch or more of ice coated trees and power lines. Power failed to several million homes across a wide belt in the center of the state. Telephone service had fewer outright failures, but both wired and cellular service was sluggish due to the high volume of calls.

The amateur radio story began Wednesday afternoon, as SKYWARN spotters tracked the storm for the National Weather Service. As night fell and power failed, the Red Cross and county emergency management's began opening shelters to give people a warm place to stay. Amateurs in several dozen counties staffed EOCs, shelters and Red Cross offices to assure continued communications. There was no statewide communications emergency, but ARES operators kept watch on the statewide ARES HF nets, and the state EOC in Raleigh remained on the air.

On Friday, with millions of people heading into the second night without power out and temperatures predicted to dip to 18 degrees, North Carolina Governor Mike Easley declared a state of emergency and decided to send the National Guard out to do house-to-house canvassing in 22 counties, to make sure people without phones, radio and TV knew there were shelters available.

The communications plan for the Guard units was to use cell phones to call into the State EOC and make their reports. North Carolina Emergency Management asked if Amateur Radio could provide a backup if the cell phones didn't come through. But, they couldn't pin down when or where amateurs might be needed.

John Guerriero, KG4HDT, the Emergency Coordinator assigned to cover the State EOC, arranged for the Tarheel net -- NC's statewide ARES -- Net to operate all day Saturday. He announced on Friday's nets that operators may be needed at any time in the 22 counties covered. He was especially interested in hams with HF mobile capability.

Operators from many of the affected counties maintained watch Saturday, and Guerriero demonstrated the HF and VHF Amateur Radio operation to the National Guard coordinator at the EOC. Ultimately, however, the hams received no requests for Amateur Radio communication.

One county did work directly with the Guard. In Alamance County, ARES operators who already on duty providing communications between the EOC, the Red Cross and shelters offered to accompany the Guard, but were told that civilians could not ride in military vehicles. Instead, the county provided VHF radios left over from a recent move to 800 MHz, and the Amateurs at the EOC acted as dispatchers. Alamance County EC Dwayne Ayers, N4MIO, reported that this arrangement wasn't nearly as good as the coverage the hams could have provided, but it was all the Guard would accept.

ARES operation in some counties continued through Monday, though with much power restored and shelters closing, most Amateur Radio activity secured by Tuesday.

For the Amateur Radio Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

As we go to air almost everyone in North Carolina have had their power restored. And the hams of North Carolina are standing by -- just in case Mother Nature has more winter storms up her sleeve. (KN4AQ, ARNewsline(tm))

**

HAM RAIO IN SPACE: ARISS MEETS IN WASHINGTON

It may have been snowing outside, but that did not stop ham radio delegations from descending on the Washinton D-C area for the Winter 2002 meeting to plan the future of ARISS and manned ham radio on board the International Space Station. Roy Neal, K6DUE, was there and filed back this report:

--

THE DELEGATES AND REPRESENTATIVES OF ARISS…AMATEUR RADIO ON THE INTERNATIONAL SPACE STATION... MET AT THE GODDARD SPACE FLIGHT CENTER, NEAR THE NATION’S CAPITOL.THEY DECIDED THAT 2 THOUSAND AND TWO WAS A GOOD YEAR FOR THE SPACE STATION. IT GREW RAPIDLY AND IS WORKING WELL. THE SAME IS TRUE OF ARISS.

THERE WERE MANY EXCELLENT CONTACTS WITH SCHOOLS ALL OVER THE WORLD, INCLUDING EUROPE, SOUTH AFRICA AND JAPAN. GROUND STATIONS IN SOUTH AFRICA, AUSTRALIA AND HAWAII WORKED VERY WELL IN MAKING THOSE CONTACTS .

PACKET HAS BEEN BROUGHT ON LINE AND SEVERAL THOUSAND VERY SATISFIED USERS ARE MAKING THE MOST OF IT.

FOUR EXTERNAL ANTENNAS WERE INSTALLED LAST YEAR. A MONUMENTAL ACHIEVEMENT THAT GAVE ARISS THE CAPABILITY OF OPERATING ALMOST ANY FREQUENCY FROM 20 METERS UP INTO THE GIGAHERTZ RANGE.

AMONG ITS PROBLEMS, THE SPACE STATION HAS A CREW OF ONLY THREE ASTRONAUTS AND COSMONAUTS., INSTEAD OF SEVEN AS ORIGINALLY PLANNED. THAT SEVERELY LIMITS OPERATING TIME FOR AMATEUR RADIO. THE ARISS DELEGATES WERE TOLD THAT THE INTERNATIONAL PARTNERS HOPE TO INCREASE CREW SIZE IN THE NEAR FUTURE. HOPEFULLY A LOT MORE AIR TIME WILL BE AVAILABLE.

HAM RADIO ON THE SPACE STATION PLANS FOR THE NEXT PHASE CALL FOR EXPANSION TO 70 CENTIMETER OPERATION AND A SECOND STATION ON THE AIR. THIS WOULD OPEN THE DOOR TO FULL DUPLEX OPERATION. AT A FUTURE DATE IT MIGHT EVEN ALLOW STUDENTS TO RECEIVE PICTURES ON 70 CM WHILE TALKING ON 2 METERS!

WORK WILL CONTINUE, TESTING SLOW SCAN TELEVISION AND SPACE CAM HARDWARE, HOPEFUL OF GETTING BOTH THESE PROJECTS ON THE AIR PERHAPS BY THIS TIME NEXT YEAR.

MANY OTHER EXCITING, ADVANCED TECHNOLOGY PROJECTS WERE DISCUSSED. THEY WILL BE REPORTED HERE ON NEWSLINE DURING THE COMING YEAR AS THE ARISS TEAM CONTINUES BUILDING ITS HAM RADIO STATION IN ORBIT.

ROY NEAL, K6DUE, FOR AMATEUR RADIO NEWSLINE

--

Thanks Roy. (K6DUEE, ARNewsline(tm))

**

HAM RADIO IN SPACE: RS-20 IN ORBIT

Russia has a new ham satellite in space. Well, kind of.
According to the AMSAT News Service, the new ham radio bird is actually an Amateur Radio telemetry beacon operating as a secondary payload of a new Russian navigational and scientific satellite. It was launched on November 28th, is at an altitude of 720 kilometers and circles the Earth every 99 minutes. Its beacons can be heard transmitting telemetary on 145.828 and 435.319 MHz. The new satellite has been officially named RS-20. (AMSAT NA)

**

SPECTRUM ISSUES: 40 METER REALLIGNMENT DISCUSSED
The just-ended preparatory meeting for next years World Radiocommunication Conference heard five ways to fix the problems plaguing 40 meter. It also heard a sixth presentatoion that would essentially leave things as they are.

Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
Without going into minute detail, the five concepts differ markedly from one anotgher. League Executive Vice President Dave Sumner, K1ZZ, says in the ARRL Letter that all five options do represent improvements for Amateurs operatng in the 40 meter band, although two fall short of fulfilling the 300-kHz worldwide requirement.

The International Amateur Radio Union is on record as supporting a 300-kHz worldwide amateur allocation in the vicinity of 7 MHz. Sumner says that achieving this will require the fixed and mobile services to make room for broadcasters and for the broadcasters to change their operating frequencies.

The five proposed methods for change include a variety of transition schedules to ease the impact on these other services. Even with this Dave Sumner says that there is no guarantee that proposals will be limited to the six methods described in the report.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

More on this story is on the web at www.arrl.org (ARRL)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4VRB repeater serving warm Vero Beach Florida.

(5 sec pause here)

**

ENFORCEMENT: VE'S ASKED TO ANSWER STRANGE PASSING GRADE

The FCC's Enforcement Bureau has begun an audit an ARRL VEC sponsored test session held in Pelham Georgia on June 10th 2000. Letters have been sent to the three V-E's who supervised the test. They ask some key questions:

--
Duckworth" “The bureau seeks information as to how a candidate who has seriously failed seven tests passed the Pelham test with a perfect score on Element 2 and only one wrong answer on Element 3.”

--

The reason for the suspicion? Again the FCC's Daryl Duckworth, NN0W:

--
Duckworth: “The candidate got a license but was recalled for testing. He did not appear and his license was canceled.”

--

The three V-E's were given an appropriate amount of time to respond. In the meantime the FCC has also recommended to the ARRL VEC that it not not accept their services while the matter is under review. (FCC, RAIN)

**

ENFORCEMENT: FCC SUGGESTS THAT FIVE VE'S ARE OUT

Meantime, the FCC has closed the books on its audit of a pair of ARRL sponsored ham radio exams in Cookville Tennessee. The sessions were held back on December 14th 1999 and March 11th, 2000. And as the FCC's Daryl Duckworth, NN0W, tells us, the Enforcement Bureau has recommended that five Volunteer Examiners not be used again:

--
Duckworth: “It recommended that the services of five V-E's be no longer accepted because they knew or should have known that one of the test candidates was related to a V-E. Also, the location of one of the test sessions was not revealed in the documentation sent to the ARRL.”
--

A final decision on the future of the five V-E's is now in the hands of the ARRL VEC. (FCC, RAIN)

**

HAM RADIO TESTING: NEW TECHNICIAN CLASS QUESTIONS NOW AVAILABLE

Scotty Neustadter, W4WW, says that the new question pool for Technician class exams is out. Neustadter heads the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators. And, in an e-mail, W4WW says that the committee has released a revised and expanded Amateur Technician class question pool into the public domain.

The new question pool becomes effective July 1, 2003. It must be used for all Technician written examinations given on or after that date. The complete set of questions can be downloaded in text or Portable Document File format from www.arrl.org/arrlvec/pools.html. You will need a free Adobe Acrobat reader program to view and print the P-D-F version. It can be downloaded at www.adobe.com. (W4WW)

**

ENFORCEMENT: FCC EXPECTED TO OK MITNICK RENEWAL

The FCC is expected to approve the license renewal of former computer hacker Kevin Mitnick, N6NHG, if it has not done so already. The W5YI Report says that an Administrative Law Judge says that Mitnick has paid his debt to society and has been adaquitey rehabilitated to where he now holds the requisite character requirements to continue as an FCC license holder.

In rendering his decision the Judge added that Mitnick has been using his radio gear since his release from prison and it is significant that there have been no complaints filed regarding his radio operations. Also, that Mitnick's post

prison conduct demonstrates that his rehabilitation can be relied upon to deal honestly with the Commission and to comply with all rules and regulations.

Mitnick's ham radio license renewal had been on hold based on his conviction for computer hacking which the FCC alluded brought with it questions regarding his fitness to remain a Commission licensee. (W5YI, ARNewsline(tm))

**

ENFORCEMENT: FCC RE-LICENSES HERB SCHOENBOHM

The former KV4FZ is back on the air but not under that call sign. Herb Schoenbohm who used tohold that call sign showed up on the air during last weekends 160 metrer D-X contest sporting the call NP2MJ.

FCC records show that Schoenbohm’s new call was issued to him on December 7th. The action to grant a new ham license comes about two months after an FCC Administrative Law Judge ruled that he now holds the requisite requirements to again become a Commission license holder.

Two years ago Schoenohm was forced off the air after the FCC refused to renew his ham ticket based on an earlier fraud conviction and the U.S. Supreme Court refused to hear his license renewal appeal. Its not known if Schoenbohm will apply for his old KV4FZ call under the vanity progam -- or -- if the FCC would grant such a request. (Numerous listener reports)

**

ENFORCEMENT: VK CB'ERS IN TROUBLE

Still with enforcement news, word from down-under that a pair of Australian C-B operators are in trouble with communications regulators. VK7HG-O reports that the two U-H-F C-B operators have been charged with breaches Australia's Radiocommunications Act for operating where they were not supposed to be.

On November 22nd, the two C-Bers were talking on the input channel to an emergency repeater. They refused to relinquish the frequency and would not move away. They were tracked from the town of Reinna to Richmond and back to Honbart by a ham radio direction finding team and the Australian Communications Authority. The regulatory agancy has already spoken with the two V-K Citizens Radio operators and is reportedly considering further action. (Q-News)

**

RADIO POLITICS: HAM ELECTED MAYOR OF CALIFORNIA CITY

The New Mayor of Agoura Hills California is a ham. Jeff Reinhardt, AA6JR was sworn in as the city's new leader on December 3rd. He says his theme for 2003 is “The Year of Discovery.”

Reinhardt, a public relations specialist, is best known nationally as he author of his “Magic in the Sky” column at appears regularly in C-Q Magazine. He will be starting a new quarterly column on mobiling also for C-Q.

Among those attending the swearing-in ceremony were Reinhardt's wife Melissa KD6BIT, daughter Jessica KD6ARA and son Steven K6SJR. Also present were Jim Fortney K6IYK, Doug Wynn WY6NN and a number of other local Southern California hams.

2003 marks the 20th year of cityhood for Agoura Hills but only the first time a licensed radio amateur has sat in the Mayor's seat. (WY6NN)

**

CONFERENCES: THE SOUTHEASTERN VHF SOCIETY

Turning to conventions and hamfests, a first call is out for papers to be presented at the 2003 Southeastern VHF Society Conference. This gathering is slated for Huntsville, Alabama, on April 25 and 26. The deadline for submitting papers to Dick Hanson, K5AND, is March 11. Dick's e-mail address is k5and@adelphia.net. Contact him directly with any questions. (VHF Reflector)

**

HAM RADIO MEMORIBILIA: COLLINS REPRODUCTIONS AVAILABLE ON-LINE

Collins reproduction items, including a new antenna switch unit are now being marketed by the Collins Radio Association. This, through its Collins Radio Center location, near Johnstown, Pennsylvania. Items can be picked up in person at the center or shipped via U-P-S. More information on what's available is in cyberspace at www.collinsra.com. (Press release)

RADIO LAW: NEW STUDY SAYS MOBILE PHONES CAUSE ACCIDENTS

Researchers say increased cell phone use has led to more crashes caused by drivers on the phone. According to a December 2nd news report, researchers at Harvard's Center for Risk Analysis, drawing on previous research involving cell phones and government figures for auto accidents, say there is a growing public health risk from the reliance on cell phones in cars.

Data on the number of crashes caused by cell phones is incomplete but it suggested that drivers talking on their phones are responsible for about 6 percent of U.S. auto accidents each year. Translated into a human toll it means that an estimated 2,600 people are killed and another 330,000 are injured.

Researchers say that the figure was reached using current cell phone usage estimates to update a 1997 study. That study looked at phone records of Canadian drivers involved in crashes to see if they were making calls at the time.

The number of cell phone subscribers has grown from 94 million in 2000 to more than 128 million today. Opponents of banning mobile phone usage by drivers say that the benefit of car calls outweigh the possible dangers that they may pose. (Published reports)

EMERGING TECHNOLOGY: EMERGENCY RADIO CAN INTERFERE WITH PACEMAKERS

If you wear a pacemaker or know someone who does, listen up. A new emergency radio system could affect you. Q-News Graham Kemp, VK4BB, has the details:

--
United Kingdom and setting the pace –makers: New Scientist 23 November carry an article warning that TETRA, the two-way radio system being adopted by many of the worlds emergency services can interfere with the operation of medical devices like heart-pacemakers.

TETRA operates at 400 megs and uses pulse-rates of 17.6 Hz. Rex VK4LR suggests that anyone playing with PCM at VHF or even HF should be very careful in case someone nearby suddenly has unanticipated ticker problems!
--

The TETRA system is a European developed standard that being adopted by emergency services in 50 countries. In addition to Europe, TETRA radios are in Africa, Asia and Latin America. Great Britains' Devices Agency found that TETRA radios can upset heart pacemakers, confuse defibrillators, and stop ventilators from working. (Q-News)

**

INTRUDER WATCH: AIR ACTS ON INTERFERENCE TO 10 MHZ

A shortwave broadcaster has acted to eliminate interference to a ham band. Following a report that All India Radio was radiating spurious signals from it's 9.950 Mhz channel the broadcaster has taken the offending transmitter off the air.

All India Radio's Deputy Director said that the company decided to suspend the transmission on November 21st to investigate the cause of spurious emissions. The unwanted spurs were being heard in 50 kHz increments and included 10.1 and 10.150 MHz . (Q-News)

**

INTERNATIONAL - KENYA: NEW US-KENYA RECIP AGREEMENT
According to ZS6AKV, Kenya has new reciprocal licensing agreement between it and the United States. Under it, U-S citizens with F-C-C issued licenses may apply for and be granted Kenyan licenses.
ZS6AKV notes that it has taken the IARU close to ten years to achieve this

agreement. The application form to operate in Kenya can be downloaded a www.cck.go.ke. (SARL)
**
INTERNATIONAL – UK: NEW UK-THAILAND RECIP AGREEMENT

The United Kingdom's Radiocommunications Agency has signed a reciprocal licensing agreement with Thailand. Visitors to Thailand may apply for a Thai license with an H-S-Zero prefix and long-term residents of Thailand receive a full Thai callsign. (RSGB)

**

DX

In D-X, HG4I reports that he will be on from Hungary between the 20th of December and 12th January with the special event call sign H-G-Zero 3-H-N-Y. This call celebrates the new year with the numerals Zero 3 representing 2003 and the H-N-Y suffix is abbreviation of phrase Happy New Year. Look for him on all of the H-F bands running CW, RTTY, BPSK, SSB, and FM on 29 MHz.. QSL directly with a self addressed stamped envelope to HG4I at the call book address. (HG4I)

**

THAT FINAL ITEM: THE PAPER SAID WHAT?

And finally this week, an update to a simple story that has now taken a rather bizarre twist. As in -- a reporter made part of it up and nobody caught it. Fred Vobbe, W8HDU, is back with the rest of the story:

--
Last week we at Amateur Radio Newsline brought you an item about a call by the Partnership for Public Warning to create a national wireless emergency alert system. One that could send warnings to citizens via their pagers, mobile phones or computer screens.

It sounds like a good idea, only thats not what P-P-W had in mind when it released a report based on a workshop that the group conducted last June.

You see, one of the worlds largest news services picked up the story and put it out on the wires. Several news organizations including many newspapers picked up wire service story and ran their own versions of it. We were sent a number of copies by our own listeners that appeared in their local papers. And who ever questions a newspaper article? Well in this case we all should have.

Richard Rudman, W6TIA, is a Director of the Partnership for Public Warning. He ways that when his organization learned of the story its Press Relations Director contacted the news agency. Rudman says they admitted to P-P-W that their reporter made up the lead sentence about using pagers to contact the public. And as a result, the news agency actually issued a very rare retraction, but many news organizations that ran the original story did not pick up the corrected release.

For the record, Rudman says that the Partnership for Public Warning does not endorse any one vendor or technology over another. Its goal is to promote what it terms as a level playing field. One where all warning marketplace players can be more certain of rules and standards. This says W6TIA will permit them to develop on a level playing field which does not now exist. It will also promote development of common warning terminology to better serve the publics need.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

That full report of last June's P-P-W workshop was released on November 25th. You can read it on-line at www.ppw.us.org. (PPW via W6TIA, W6VR)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go this note. We have been advised that last weeks story on the Canals of Venus credited to Q-News actually originated in Bob Gonsett's CGC Communicator. There was no credit line in the Q-News audio report and we thought it was theirs. Turns out it was actually written by Bob Gonsett, W6VR.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Mert Garlick, N6AWE, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2002. All rights reserved.

When I saw the solar flux at 197 -- turned on the 6M rig and in about an hour ME, NH, MA, NY and VE's were coming into San Diego. Signals were strong on my Ringo half wave antenna at 6 feet off the ground. Saw where some east coast was working Europe.

So tis the 6M season for F Layer skip if the SFI is up and the A and K are agreeable.

Check the DX Packet Clusters for openings either VHF or Telnet.

I tune to 50.110 and squelch it down and when the band opens it breaks the squelch.
Happy Holidays es Gud DX

3667. ARRL outgoing QSL bureau question

Newsgroup: rec.radio.amateur.dx
Date: 2002-12-24 07:18:18 UTC
From: Rick Karlquist <richard@karlquist.remove.this.com>
Message-ID: <_STN9.441669$%m4.131445@rwcrnsc52.ops.asp.att.net>
Source record: 11443

When sending cards to the ARRL outgoing QSL bureau, is it necessary
to look up QSL managers and note them on the card? Or does the
bureau know who the managers are? I am specifically interested
in cases where the QSL manager is in a foreign country.

No, the buro will *not* do it for you. All they do is sort the cards (actually, even that you're supposed to do yourself before shipping) and send them to the appropriate national QSL-buros of the indicated recipients. It is, therefore, crucial that your QSL manager info homework be done (and clearly marked as "QSL via ...") before mailing the cards to Newington.

Hi Rick -- I always include the QSL Manager and sort by callsign prefix of the manager.

See URL:
http://www.arrl.org/qsl/qslout.html
Everything there indicates to include the manager and direct your card to him/her.

Quote: When sending cards to Foreign QSL Managers, make sure to sort these cards using the Manager's callsign, rather than the station's callsign.End Quote. Example: quote ZB2FX via (G3RFX). End quote

Also to be sure -- You can address the question to --- Inquires via email may be sent to buro@arrl.org

OK, suppose, for whatever reason, I send a card to the ARRL
buro without the QSL manager's call. They send it to the
buro in the country of the station being QSL'ed. Now does
that buro forward to the QSL manager, or do the cards go
into a black hole?

Quite often the need for a manager is because there may not be a bureau in the country....or the ham doesn't want to fool with his own cards due to expense, his duration in the country or whatever.
But, excepting that, as long as the recipient keeps his envelopes on file, or is a club member, or whatever the requirement may be, then the card should reach its 'local' destination. It wouldn't normally be forwarded elsewhere unless the op has made such arrangements with the local outfit.

Rick,

Just remember this one rule of thumb: Every bureau along the way will attempt to deliver the card to the callsign _you_ have indicated on the card. If the delivery callsign is the station itself, then the ARRL and the callsign's foreign bureau will attempt to deliver to that country/callsign. If the delivery callsign is a "via AB0WXYZ", then the ARRL sends the card to the "via" country's bureau and that foreign bureaus attempts to deliver to the "via" callsign. Nobody second-guesses you and inserts someone else's [a manager's] callsign as the delivery point.

Along the way, there are several opportunities for your card to fall into a black hole.

1. If the delivery callsign is a destination without a foreign inbound bureau [there are about 55 countries without bureaus... see the ARRL web site], then the ARRL sends your card back to you with a little stamp saying "undeliverable - no foreign bureau".

2. If/when the card makes it to the destination bureau, if they determine that the card is undeliverable [silent key, no such callsign, ham is not a member of the bureau organization] then your undeliverable card will work its way back to you via the bureau system (READ: SLOWly)

3. If/when the delivery callsign operator (the QSL manager, in this example) gets the card he (or she) may: reply with a confirming QSL card (hooray!); reply that they are no longer the manager; reply that you are NIL (not in log); or simply never reply <sigh>.

FWIW, the better logging programs have tables that keep track of countries without bureaus, and prevent you from sending a batch of bureau cards to a non-existent bureau. They also pre-sort your batch-bureau QSL cards by the delivery callsign (either the station itself or the manager) so that all you have to do is print and ship -- no manual sorting.

Depends. Typically it would be a black hole, since no buro wants to spend limited resources on tracking down QSL routes for you. There are exceptions, however: for example, if the QSL manager and the station worked are in the same country and the traffic flow to/from the manager is significant, then the buro sorters will know where the card is supposed to go. Don't count on it, though. Gathering QSL information in this day and age is a breeze - there are dozens of resources available, from paid services to free lists and lookup engines.

My experience has been that a great many QSL managers will not accept or respond to cards forwarded to them by a bureau. Many managers also insist on a self-addressed envelope for return (plus a few US $) and do not send outgoing cards via bureaus. I have tried a few cards to managers via the outgoing bureau. Most produced no return, a very few did produce returns to the incoming bureau, some 5-6 years later.

>Many managers also insist on a self-addressed envelope for return

You say that as if it's an unreasonable demand to make for a direct reply. I've personally written out over 50,000 cards as a manager and I'm not about to write out the op's address on an envelope I have to buy, and then put a 37c stamp on it. I don't know of any managers who would cheerfully shell out $20,000 in that way, either.

If you can't be bothered to find an envelope and write your address on it, don't expect the manager to do it for you. And if there's no stamp on the envelope, the card goes back to you via the buro (which is far from cost-free). If you want a manager to send you a card, the least you can do is make it easy for her or him to do. At the very least, this includes supplying a SASE!

If you're lucky enough for this to happen to you with a QSL to an
Australian station then the black hole is called rubbish bin. VK bureau
(VK4 bureau in QLD for sure) does not return undeliverable cards,
they're going to the trash can.

When I worked with the W4 Buro we did not return undeliverables either
as an official policy. In my section I kept them for a year or so just
in case the recipient bothered to send in an sase.
However, I had a lot of outgoing cards of my own and occasionally tossed
in the undeliverables to go back to their sender.

Is there a logging program that will download a database of QSL managers
and print "via <QSL manager> " automatically? This seems like an obvious
thing to do, but I haven't seen it offered anywhere. Why should I have to
manually look up QSL managers? I currently use DXbase and also own DX4WIN
logging programs.

Rick,

it would be pretty bad idea to rely on the logging program to do that
for you. The reason being is that number of stations use different QSL
info / managers over the years. Especially in contests, there are some
callsigns issued to different crews and they all have different QSL
info. Or there are some club stations populated by different crews in
different contests. Take 3V8BB as an example.

3V8BB VIA YT1AD (WPX CW 2002; WPX SSB 2001/2002; CQWW SSB/CW 2001/2002)
3V8BB VIA JH8PHT (27.JAN.2002; JUNE 2002)
3V8BB VIA I5JHW (ARRL 10M 1999/2000/2001; ARI MAY 5/6, 2002)
3V8BB VIA HA5FA (JUNE 19, 2001)
3V8BB VIA IK7YZG (JAN 4-6, 2001)

If you go to http://www.qslinfo.de/ (the best QSL info site) and do a
query on 3V8BB you'll see the page of 50-60 lines detailing QSL info
between 1995 and now.

That's why we do it manually. :-)

But anyway, for a list of logging programs (with links) visit
www.vk4dx.net/software.htm

All the best in New Year !

'Sivac's answer is the best. The online manager databases tend to
wander a bit regarding accuracy. For my own purposes I tend to
'average' the online results to get the best odds compared with what I
'might have heard' as the actual operator's info.
I have been in situations where the call I was issued in a foreign
country was reissued the following year for a one-weekend DXpedition.
Few databases can track all of this,.

Anyone know what the JA stations use to print the nice forms on the back
of their QSL cards? The W7 buro is handled by the Willamette Valley DX
Club and I'm a member, so I see LOTS of those cards.

Rick,

I hesitate to answer yes to your question about "automatically" - because that has some subtleties to it. I use DX4WIN for this purpose, and DX4WIN arrives with a list of QSL managers -- which, as everyone has already pointed out, was outdated as soon as it was released.

However - DX4WIN supports interfaces to external references. For this purpose, you can install companion databases that are refreshed on a regular basis. In my opinion, you should start with an annual CD-ROM database (Flying Horse, for example) and supplement that with a more frequent refresh (the Golist is best for this). DX4WIN will interrogate both of those QSL manager sources and display the results when you press the <F3> key.

"Automatic"? - not quite. Due to the nature of the data, when you press the <F3> key you may see information that requires you to choose which manager is correct for a particular callsign - based on things like date, mode, band, contest. You will also be greeted with unwelcome messages like "this callsign is a known pirate" - crushing your hopes of confirming that elusive DX locale! ;-)

Your mileage may vary... but this works for me. Along with a liberal dose of manual queries to QRZ.COM and appeals to the helpful folks on this newsgroup.

US VIRGIN ISLANDS, KP2. Joe, W8GEX and John, WZ8D will be active as
N8Z from St. Croix, IOTA NA-106, from December 30 to January 8.

==========

Why do we even bother with callsigns anymore when it seems that anything
goes? K1B is Baker & Howland, N8Z is KP2...

So, are we now going to have a revised DXCC list:

K SMOM
K Monaco
K Agalega & St. Brandon
K Mauritius
K Rodrigues I.
K Equatorial Guinea
...
K USA
...
K South Africa
K Prince Edward & Marion Is.

Why don't just give everyone everywhere callsigns they want, no
questions asked? Hell, we're already half way to CB anyway.

Exactly! Do as many are now doing. Go to qrz.com, look up
a vacant call sign or one some old guy has who is no longer active
and then operate inside the ham bands. The word has been out
for a long time, do not operate outside the ham bands, that draws
attention. Operate inside the ham bands with a call sign. No one
ever questions it. I know from experience. If a pesky ham happens
by, ignore him, qsy, or if you really want to talk to someone, tell
them you just got the call and it must not yet be listed on qrz.
So simple, why would anyone even bother getting a license!
Change freqs. often, don't stay on one particular freq. learn ham
slang, avoid CB jargon.

Are you ready to finally get that HAM Radio license that you always wanted?
Maybe you need to upgrade that license?

Take a FREE Online HAM Radio practice exam and see if your ready. You can
take the exam as often as you like and best of all, IT'S FREE.

www.qsl.net/n4rpd N4RPD's HAM Radio Website has a practice exam for all the
current license classes. A new exam is generated every time you visit too.

Good luck and 73,
Rob N4RPD

You scheme worked well for a wannabe in Northern Virginia until I happened to be mobiling around one day in 1994 and heard a familiar call sign that belonged to an old-timer who helped get me started in ham radio. I called him, he came back. I told him that I knew the original owner of the call sign and wondered how long he had had the call. I got a bit suspicious when he did not come back -- this was on a 2-meter repeater.

Next chance I had, I looked up the call only to find that the old timer was still very much alive. I gave him a phone call, we chatted a bit, and he confirmed that, yes, he was still alive and, yes, he was still (call sign).

I contacted a very active ham in the area who asked a few questions, located the bootlegger, and busted him with the FCC.

Why go to all the trouble and risk when a license is simple enough to earn?

Oh -- silly me -- I forgot that we live in the age of
I'll-do-my-own-thing-and-screw-your-stupid-outdated-rules.

You missed the point. I'm not bitching about vanity calls; it's using
the (continental) US calls from other DXCC countries without signing
that bugs me. How did N8 get to be KP2 all of a sudden? Should we
discard the DXCC prefix system in favor of "anything goes" just because
it's legal?

There are reasons DXCC countries were assigned different prefixes: so we
can tell who's operating from where. Using N8 from KP2 and K1 from KH1
kinda defeats the purpose, especially when the same calls can and will
be reissued and used from somewhere else.

If I go on vacation to KP2, should I change my call? That's the only way I could comply with your mythical "DXCC prefix system". Just as easy to glom on to a temporary 1x1 special event callsign like these guys have done. What's the harm?

The FCC could care less about DXCC, and there are several call prefixes that will probably NEVER be issued under the present system, like KP1, KP5, KH3, KH4, KH7K, KH9. On a more global scale, what's the need for reserved prefixes like KP1 when no operator will ever be issued such a call? But who knows..... many decades ago I was assigned the call KG6AQI when I lived on Guam --- now the call is assigned in sequence to a fella in California.

Lets see now, you contacted a "very active ham." So was he 83 or 93?
and spends most of his morning on 2 meter repeaters with his other ham
buddies in their 80s, discussing what medications they are on. So much
for the "very active ham." And you say he asked a few "questions"?
Yup, probably went like, "Uhhhh Joe uhhhhhhhh, you been a hearing any
strange stations on the air 'round here," And Joe said, "Uhhhhhhh no Mike,
uhhhhh uhhhhh there been a problem"? So much for the "questions."
And now this gem, "Located the bootlegger." Oh my yes!!! Instantly
he was located!!!!! Won't even address that, just flush it! And here's
the best one, "Busted him with the FCC." So please share with us, did
the FCC make him a deputy FCC junior ranger or just kind of let him tag
along? And of course, we all know the FCC has a Hot Line, on which
it takes calls from ham radio operators about bootleggers and upon
receiving a call, the FCC Special Reaction Team swings into action with
lights and sirens blazing as they speed to the location of this latest
Public
Enemy Number One, called "Bootlegger." The media interviews
witnesses and of course the story is all over the 6pm news and tomorrow's
papers!

Sounds good; I had a guy call me one time on 160 meters. Unfortunately, he chose the callsign of a friend who lived only 2 miles from me. Quick land-line. Hopefully, the FCC will start enforcement (but I doubt it). I may not only have to switch to CW, I may have to brush up on my land-line (American) Morse as I haven't seen any pc programs for that ;)

Read my other post. Ignorance is curable; stupidity isn't. The dope on 160 happened to choose the callsign of a friend of mine who lived only a mile or two away. First, his signal shouldn't have been down at S-2, second, perhaps more importantly, my friend had no antenna for 160 meters - he operated on 75 and down (in wavelength).

N8QRZ goes to the US Virgin Islands on vacations and operates from
there. What call woulk you expect him/her to use?

S/he likes it so much that s/he and the family move there. The FCC
does not require a call sign change. What is so wrong about using
the existing legal call sign?

Surprisingly, the W6 1x3 that I held from 1957 until I turned it in
for a 1x2 in 1977 has never been reissued or claimed as a vanity
call.

So much for the shortage of 1x3 calls.

(The 1x2 that I turned in to reclaim my original K2 call was snapped
up immediately by a club the day that it became available, just
before MY club could reclaim it.)

Phil,

I, too, lost my call when I let my ticket expire (N2JH). I've been thinking ... as long as we are on a vanity callsign search, could you help me to get a special callsign? A 1X1 would be nice, but it has to be a special event. How about simply "W2"? Or maybe just "W"? I'm really enjoying the repeaters ;)

It's not so much a shortage as that they can no longer be sequentially
assigned to hams. The sequences have been run to the end. However there
are a fair number of expired calls that are available but they won't be
assigned unless requested as vanity calls.

My main contact for those things in Gettysburg, Darlene Reeder, the
processing guru of Amateur Radio Service applications, is retiring
at the end of the month after 40 years of service there. She kept
things flowing smoothly and solved the problems when they didn't.

Look for processing there to be a vaudeville fire drill until a
competent replacement is found.

Phil - your prayers are answered. I can provide a letter from my boss. The FCC needs a competent employee? I'll get a letter from my boss. He says I'm really IN competent (I assume if one is in, it is good; if you're out, you're no good). Not only that, he'll tell you I really try. He told me I was the most trying employee he has! ;) Everyone forgets at times that it is a matter of budgets. I'm sure a lot of folks are really getting overload at various government jobs as the dollars are rapidly disappearing. My gut feeling is that almost everyone does what they can with the cards they are dealt. I only wish I could remember the folks at the Buffalo office (assuming they are still around). Believe it or not, I did have some fun on those treks to Buffalo (I'll never forget going to Buffalo from college on a bet - I was soooo .... hung over). They took one look at me and asked if I really wanted to take the test (I got the 2nd radiotelephone license with radar endorsement on that one - I had to go back one more time for the 1st). It was crazy, but I actually enjoyed seeing those folks after a number of times (general, extra, 2nd phone, 1st phone, 2nd telegraph - well, the extra and 2nd telegraph were done in one visit. I don't know if I did the cipher groups as it is so confusing as I did a lot of that for that for the US Navy) ... despite what many think, I believe they are dedicated folks just playing the hand that is dealt to them. BTW, thanks for your time, too. ;)

For radio regulatory purposes, the US Virgin Islands are "part of
the United States" and amateur radio is regulated by the Federal
Communications Commission (FCC) there.
>
>When I go to Gibraltar on vacation, I use ZB2/G3NYY. It's a very

Does UK radio regulatory law specify or allow use of a "regular" UK
call sign issued to the operator when s/he is in Gibraltar or must
the operator append the location indicator?

US regulatory law allows use of a "plain" US call sign in the US
Virgin Islands - without a "location indicator" - if that is the
call sign assigned to the operator. I was one of those folks who
fought long and hard several decades ago to get the FCC to change
the rules which formerly required detailed logging as well as such
indicators and the words "portable" and "mobile" when operating away
from the station's "authorized location", which is another concept
that no longer exists in American amateur regulations.

You are advocating use of what the FCC rules call a a self-assigned
indicator which is allowed before or after the call sign or not used
sat all at the option of the operator. It is ALLOWED. but not
REQUIRED.

In the U S of A, what is not required by the rules cannot be
required - it's optional on the part of the operator. I choose not to
use it.

Not what I meant; you've inferred incorrectly!
It's certainly proper to send a manager an envelope and postage or
equivalent. One isn't going to be able to send these materials to a
manager and then expect a return just by sending a card "via XY89QQ"
through an outgoing bureau. That's what the intended meaning was-DO send
an envelope directly to the listed manager. Yes, in some few instances
outgoing bureau and "via manager" yields a return, but not reliably.
I appreciate the efforts of QSL managers, a friend of mine handles cards
for an asian ham and often gets large bursts of cards. He responds 100%
to the direct requests with envelopes, stamps, IRCs or currency
equivalent for return postage. Others may or may not get a look and
response.

No, just have a courtesy to sign /KP2. Is that so difficult?

> That's the only way I
> could comply with your mythical "DXCC prefix system".

??? My mythical "DXCC prefix system"? You're joking, right? I mean, the DXCC list with its separate prefix entries for KH1, KH2, KP2, ZS8, ZC4, ZD8, VK9X and dozens (if not hundreds) of others has been used for decades. Now all of a sudden there's a mysterious tendency to ignore it. Why?

> Just as easy to glom
> on to a temporary 1x1 special event callsign like these guys have done.
> What's the harm?

The "harm" is in the fact that if every ham radio operator in the world followed the same principle just because it was legal, very soon we would be flooded with nothing but generic callsigns, unable to tell who's working from where, and the only thing we would be able to tell from the callsign would be which country's administration issued the call. That's the harm. I don't see anything wrong with the DXCC assigned prefixes, they work nicely, so why change for the sake of change? Just because everybody's on the Internet and is able to look up the N8Z's location, this makes it OK?

The US is comprised of 18 DXCC countries, France and United Kingdom over 20 each, Australia nine, and so on. Then there's the EU which is likely to eventually adopt a concept similar to the FCC's. Now, if we have in place a system that enables us to tell a DXCC entity from a callsign, why flood the bands with generic nonsense that doesn't mean squat?

There's already a band with a similar concept and it's called CB.

At the risk of starting a flame war or some equally useless waste of time, I

suggest that not using the location indicator is poor operating practice at worst and bad manners at best, regardless of what the regulations permit.

I am a very QRP CW operator living in NE TN. It's a bit challenging for me to work the western states on 300 milliwatts and it's damned frustrating to spend an hour or more chasing what I think is a western station only to find that he's local. Two cases in point: A 6 answered my CQ and I figured I had CA in the bag -- only to find the #&^$#@! is located in West Virginia. Then there was the 7 who answered me after I spent over an hour digging around listening for a 7 -- I caught him signing with another station and called him. He was in OH. No, I said nothing to either of them about it -- just had a normal QSO and kept on looking.

Of course, I still keep an ARRL paper logbook and drive a 30 year old VW Beetle.

Buffler has been "regraded" to a "Resident Agency" with two agents (and no support staff) - Dave Viglione (an experienced engineer whom I've met a couple of times) and Gene Stambro, whon I do not recall meeting.

IIRC John Theimer was an engineer there - he may have been the chief - but he transferred to Philadelphia in 1980 and retired when I did.

I wish sometimes that I should have made a copy of a field roster that my former boss had from the mid-1960s when I joined the agency. It listed all the old-timers. One day in the late 80s we sat and went down the list, noting the few who were still "aboard" and where they were at the time.

Quick perusal of QSL boxes yield the following:

KB6 (Baker), KJ6 (Johnston), 9S4 (Saar), I1 (Trieste), 1Z4 (Norhday Island).
Hmmm ... here is another: KA2SK ("King Arthurs Two Small Kids") (Japan).
KA6IJ (No, it's not California)
VP6 (Jamaica). Won't even bother with all the other Carribean changes :-)
UQ2 (et al)
DL (The entity changed, prefix did not).
KS4 ... three of them, all different DX entities at different times.

(Babble mode on)

There never has been any "DXCC prefix system".
Just a long list of Prefix - Start date - End date - Entity Name

Don't get me started on Zones ... CQ and IARU e.g.

States, provinces, prefectures, regions, et al. Same problem.

(I'm in the process of creating a database schema to represent the
relationships between a geographic place, the prefixes used for
ham radio licenses in that place, the dates those prefixes were valid,
whether the prefix was authorized by local authority, the DXCC
entity assigned to that geographic place at that time, etc. etc.
Is a major worm can.)

Now where did I put that VS1 (I mean VR2) QSL?
Oh, never mind. VR2 used to be somewhere else.

ZE? Or is that Z2? or is it one of the tribal-lands prefixes in use
for only a short time? Or were those parts of South Africa?

At least the I1BNU card is quite clear - it ain't Italy :-)

(Babble mode off)

That's what a call sign is meant to be by international regulatory practice. Neither the ITU nor the FCC give a flying fig for the arbitrary "DXCC countries". We are darned lucky that the FCC will issue 1x1 special events call signs at all.

On the US of A at least nothing prevents adding the optional self-assigned indcators by those who want to play the DXCC game.

>The US is comprised of 18 DXCC countries,

EX-CUSE ME? The US is one country. DXers may consider it to have 10 different places for DXCC credit, but it is ONE country for radio regulatory purposes.

Exactly - this "long list of [criteria]" is what makes a system.
Therefore, if there has been "a long list of [criteria]", that means
that there has been a DXCC system in place that has worked fairly well
so far.

I don't know why we're "lucky" for this, but my complaint addresses the indiscriminate usage of such calls from the DXCC entities whose prefixes do not correspond to the calls in question.

> On the US of A at least nothing prevents adding the optional

Um ... yes ... I just agreed with you, but also pointed out that
things are not simple now, have not been simple in the past,
and will not be simple in the future. The reason is obvious:
DXCC entities (or WAE countries or CQ zones) are not something
the licensing authorities care about, or usually even know about.

"Real DXers" (TM) work 'em first and sort 'em out later.

Been that way for the 49 years I've been chasing DX, don't
expect it will change.

I hate when people keep their callsigns when they move outside of their
call area, and I curse them under my breath every time I mistakenly work
them. :) But the rules are the rules and people like Phil are just
making it more interesting by keeping me on my toes.

Like it wasn't hard enough already. But if it was too easy, I'd get
bored as well. Oh, I am so conflicted. :)

Do you have a single reference of such a comment from me? I didn't
think so.
By the way, I don't have any minions. We dried them and gave to the
neighbors for use in soups.

Hi there,

(Are you related to Hashifisti Scratchi, a famous ham radio columnist?)

My original callsign was KG6AQI which I lost when I left Guam for "the
world". I wonder if the current holder (in California) gets "hated" when
folks find out he doesn't live in North Tipalao which was my town when I
held the call.

Sunuvagun!

Actually, I don't think USVI is part of the USA, it's a US territory, which isn't the same thing. The USA is only the 50 states plus DC. Then there is Puerto Rico, which has 'commonwealth' status, where it is etiher a state or a territory. Nobody is saying that they are not under FCC jurisdiction, or that you have to use /KP2 when in USVI, only that it is good operating practice to do so, but apparently even that is too contentious for some. For the record, I did sign N3KIP/KP2 when I visited USVI.

Someone in the thread said (a couple of times) maybe things are different in the UK. Well, they are, very different. The UK callsign system uses transferrable prefixes, which involves a lot of redundancy between callsigns. For example, G8VUK in England becomes GW8VUK in Wales and GJ8VUK on Jersey, as only one of these calls is issued. Most people get confused when talking about England, Britain and the UK, each of which is different. This even confuses some British people, but just remember that England is only a part of Britain and that in turn is only the mainland of the UK. The country (not for DXCC, but politically) is called the UK or United Kingdom. The mainland is called Britain or Great Britain, and is divided up into England (G, M, 2E), Scotland (GM, MM, 2M) and Wales (GW, MW, 2W), each of which is still referred to as a 'country' (not just for DXCC), because they used to be separate countries. The other parts of the UK (which are not part of Britain, although the people are still British) are Northern Ireland (GI, MI, 2I), The Isle of Man (GD, MD, 2D) and the Channel Islands, which for ham radio purposes are divided up into Jersey (GJ, MJ, 2J) and Guernsey (GU, MU, 2U), although there are two other jurisdictions in CI, called Alderney and Sark, but they come under Guernsey as far as the prefix goes, and also for DXCC. Each UK prefix is a separate DXCC entity, but this is because they were grandfathered, not because they meet the criteria.

The UK also has territories, but they have separate prefixes, and radio is not administered in them by the RA, so even someone with a UK licence needs a reciprocal licence. In the Carribean there are Anguilla (VP2E),

Montserrat (VP2M), the British Virgin Islands (VP2V), the Turks and Caicos Islands (VP5) and the Cayman Islands (ZF). Then you have Bermuda (VP9) and you also have on that side of the atlantic VP8, which covers both the Falklands and the British Antarctic, which itself also includes islands that are separate DXCC entities (South Sandwich, South Georgia, South Orkney and South Shetland, I think, all uninhabited), but there's no way to separate the different VP8 DXCC entities from their calls. On the other side of the Atlantic there are St Helena and Tristan da Cunha, which use the ZD prefix. You can separate them as DXCC entities, because they use different numbers in the call, although I always forget which is 7 and which is 8. The British base at Akrotiri in Cyprus uses the ZB prefix. There's also Chagos/Diego Garcia (VQ) in the Indian Ocean (a US base, but a British territory). I think that's all that remains of the British Empire, that I can remember.

I just got a QSL from KA2MBR who resides in Puerto. Perfectly legal call, and he announces his location whenever he makes QSO's.

What about those special event prefixes in the UK (ie GB2, GQ3, etc.)?...there's no clue as to where they are...could be GM, GW, G, etc.

Amateur Radio Newsline™ Report 1323 – December 20, 2002

Amateur Radio Newsline report number 1323 with a release date of Friday, December 20, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Newfoundland joins the 5 megs experiment and Guam's ham radio community is reported safe following a super typhoon. Find out more on Amateur Radio Newsline report number 1323 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO TECHNOLOGY: NEWFOUNDLAND JOINS 5 MEGS EXPERIMENT

The 5 megs experiment is growing once again. This, as hams in Newfoundland come on board to try their hand at propagation on what may wind up as a future ham radio band. Jeramy Boot, G4NJH, reports from Nottingham in the U-K:

--
VO1MRC, the Marconi Radio Club of Newfoundland club station, has received experimental authorization to transmit CW and upper sideband on seven spot frequencies around 5.3MHz for three four-day periods.

The next session is from the 20th to 23rd of December inclusive and the frequencies that VO1MRC can use are 5260, 5269, 5280, 5290, 5319, 5329 and 5400kHz. The experiment is to look at the differences in ground wave and sky wave propagation on 3.5, 5.3 and 7mhz.

Jeramy Boot, G4NJH.
--

The original 5 megs experiment began several months ago in the UK. It required British hams to get special temporary authority to use the band. The experiment proved so popular and so many hams applied that British telecommunications regulators had to put further permits on hold until they could reassess the impact to the band. (GB2RS)

**

RESCUE RADIO: SUPER-TYPHOON HITS GUAM - HAMS AFE AND OPERATING

Reports over a popular ham radio website that the territory of Guam was hit by a "Super Typhoon" on Sunday December 8th. And while no stations from Guam have been heard here in the United States, reports over the Internet say that everyone is O-K. We have more in this report:

--
Duncan Campbell, KF6ILA portable KH2 lives on Guam. He says over the QRZ

website that the typhoon packed sustained winds of 160 miles per hour with gusts topping 190 miles per hour.

News reports pick up from there. They say that the storm damaged much of the island's infrastructure including electrical power and knocked out wired and cellular telephone service. And Campbell’s posting adds that along with the loss of electricity and water, the port of Guam was the scene of a major fire that destroyed the reserve tanks of fuel used across the island. The blaze started during the storm and the island is now low on gasoline. He says that the sale of the remaining fuel is restricted to emergency vehicles only.

With the clean up now underway the good news is that all the Amateur radio operators on Guam are believed to be safe. Campbell says that several hams are known to have lost their antenna systems and the islands only repeater was also blown off the air. This, the result of the collapse of a nearby cellular telephone tower striking it as it fell.

KF6ILA says that some hams are already back on the air handling post storm related communications. All operation is on the high frequency bands centered near 14.310, 21.375 and 28.520 MHz. Another frequency -- 7.085 MHz is supposed to be used for emergencies but so far no stations have been heard.

By Sunday December 15th, Andersen Air Force Base and part of hotel row in the town of Tumon had power restored. But news reports say that other parts of Guam could remain blacked out for a fairly long time. And even though its almost two weeks since the storm hit, if you hear ongoing emergency or storm related communications please give it priority over any other use you might have for the frequency.

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News Australia.

--

A little more information comes from the Guam Pacific Daily News. It says that that the Red Cross and Salvation Army are on Guam providing post typhoon relief. Also, that the Red Cross service center has already processed over 200 requests for disaster assistance.

Meantime, another poster to QRZed says that he arrived in port at Guam on December 14th. N6HPX says that the repeater is back up and operating on 146.91 MHz, but there is nobody on the air using it. (QRZ, Q-News, others)

**

RESCUE RADIO: NEW SALVATION ARMY STATION

Speaking about the Salvation Army, word that it and the Oklahoma City Autopatch Association hosted the grand opening of the Salvation Army Emergency Communication Center. It took place in Oklahoma on Saturday, December 14th. The new center is located at the Salvation Army Citadel on SE 44th Street in Oklahoma City.

Frank McCollum, N5FM, the station trustee, held the first net from the new facility at 9 am. McCollum helped to establish the first station in 1986, at

The Salvation Army's Arkansas Oklahoma and Divisional Headquarters where it remained until two years ago.

The new station features very modern gear. It is designed to allow multiple High Frequency, VHF and UHF stations to provide ongoing communications services at the same time. (WA6LBU)

**

ENFORCEMENT: FCC CLEARS CT TESTING

Turning to enforcement news, the FCC has closed the books on its audit of a Connecticut VE testing session. The good news is that no violations of any rules were uncovered. The FCC’s Daryl Duckworth, NN0W, explains:

--
Duckworth: “The Enforcement Bureau has informed the ARRL that it has concluded its audit of the Trumbull Connecticut test session of May 10 2001 and found no wrong doing by the VE’s. The Bureau cautioned the ARRL however, that when the number of VE’s exceeds the number of test candidates, control and supervision of a test session is more complicated.”
--

The FCC says that all ten V-E’s did follow proper procedures while administering the exam. It also thanked them for their cooperation in resolving the matter. (FCC, RAIN)

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WA6BAI repeater serving Visalia California.

(5 sec pause here)

**

SPECTRUM ISSUES: REVISED 6 METER BANDPLAN IN SERA TERRITORY

The South Eastern Repeater Association’s Repeater Journal says that there is a revised 6 meter bandplan in place for repeater operation in states that it oversees. Under the new plan the 15 repeater pairs using 2.51 MHz offset have been eliminated. This is because the outputs of the 2.51 MHz spaced repeater pairs fell on the 20 Kilohertz spaced channels from 53.71 to 53.99 MHz.

The South East Repeater Association says its goal is to simplify the bandplan for 6 meters. The revised plan calls for 15 repeater pairs using 500 kHz offset and 20 kHz spacing with outputs from 51.70 to 52.92 MHz and 39 channel pairs using 1 MHz offsets and 20 kHz spacing outputting between 52.01 to 53.99 MHz. The few repeaters originally coordinated using the 2.51 MHz offset are being grandfathered and allowed to continue operation under the old system.

The South Eastern Repeater Association is one of the nations largest all-volunteer repeater councils. It provides coordination services for repeaters in Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia. (SERA Journal)

**

SPECTRUM ISSUES: ADDITIONAL BANDS FOR UNLICENSED DEVICES

The FCC says that it is seeking comments on the possibility of permitting unlicensed transmitters to operate in additional parts of the electromagnetic spectrum. According to Bob Gonsett’s CGC Communicator, the regulatory agency specifically wants comments on the feasibility of allowing unlicensed devices to operate in the TV broadcast spectrum.

But that’s not all. CGC says that the Commission is also looking for comments on the feasibility of permitting unlicensed devices to operate in other bands and at power levels higher than other unlicensed transmitters. The FCC believes that advances in computer technology make it possible to design equipment that could monitor the spectrum to detect frequencies already in use. This says the FCC would ensure that transmissions only occur on open frequencies. So far, no Amateur Radio service frequencies have been specifically targeted by the proposal.

More on this issue is on the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-229400A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: NEW BANDS FOR EMERGING TECHNOLOGY

Also from the CGC Communicator comes word that the FCC has allocated 90 MHz of spectrum for advanced wireless services. The bands in question are from 1710 to 1755 MHz and from 2110 to 2155 MHz.

The FCC indicates that this spectrum could be used by current cellular and PCS licensees to expand their capacity by offering wireless voice and data services such as 3 G. Or it might be used by others to support the development of entirely new applications that are distinct from existing offerings. Either way, the FCC is seeking comments on licensing, technical, and operational rules.

More is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-228237A1.doc (CGC Communicator)

**

NAMES IN THE NEWS: ROCK STAR GIVES MAJOR DONATION TO ARRL BIG PROJECT

Some good news on the ham radio education front. The ARRL Letter says that rock entertainer Joe Walsh, WB6ACU, has made a major contribution to ARRL's Education and Technology Fund.

According to the Leagues Chief Development Officer Mary Hobart, K1MMH, the significant gift through the Joseph F. Walsh Foundation. Hobart says that it will fund an additional eight pilot schools in the ARRL Education and Technology Program.

Walsh is best-known as a guitarist, vocalist and songwriter with The Eagles and The James Gang. He has been an active Amateur Radio operator for more than 37 years, is an avid collector of vintage radio gear and a longtime friend of Heil Sound's Bob Heil, K9EID.

The amount of Walsh's donation was not made public. An up-close and personal profile of WB6ACU appeared in the November issue of C-Q Magazine. (ARRL)

**

NAMES IN THE NEWS: REPEATER COORDINATION PIONEER NAMED NEVADA SM

A ham who helped to pioneer repeater frequency coordination in Southern California has been named as the new ARRL Nevada Section Manager. Amateur Radio Newsline has a look at Dick Flanagan, W6OLD.

--
Dick Flanagan, W6OLD, is replacing Jan Welsh, NK7N as Nevada Section Manager. According to an ARRL release, Flanagan, a resident of Minden Nevada was the recipient of the ARRL 2000 Excellence in Recruiting Award and was active in the successful effort to secure an Amateur Radio antenna bill in Nevada. But long before that -- back in the early 1970's, W6OLD started his ham radio political career while still a resident of Los Angeles California.

It was in 1971 that W6OLD helped to create the famed Southern California Repeater Association or SCRA. He also served several terms of office with that group. And it was during his tenure that SCRA pioneered many innovations in the area of repeater coordination and dealing with the FCC on repeater related issues. And under Flanagan's leadership the SCRA worked out a frequency sharing scheme with Baja California Mexico that still remains in force -- essentially as negotiated -- more than two decades later.

Since moving to Nevada W6OLD has held a number of positions in the ARRL Field Organization. This includes ARRL Official Observer, Official Emergency Station and ARRL VEC volunteer examiner. Most recently he has also been serving as an assistant Section Manager.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL says that Welsh is stepping down at the end of the year for personal reasons. (ARRL, SCRA Archives)

**

RADIO PUBLICATIONS: WRTH 2003 NOW AVAILABLE

The new 2003 edition of the World Radio and T-Handbook is now available. Better known as WRTH, the latest edition contains the details of most broadcast entities plus details of transmissions made in the English, French, German,

Spanish and Portuguese languages. To find out more, take your web browser to www.wrth.org (WRTH)

**

RADIO REMEMBERS: STAMP COLLECTING OPERATORS

The Radio Stamp Operators Group reminds us that a year ago, on November 15, 2001, the Japanese Postal Service released an 80-yen postage stamp honoring the 50th anniversary of commercial radio and TV in that country. The stamps depict the images of the microphone used when commercial radio broadcasting began, the first monochrome television camera used for commercial television broadcasting, and at television set up for street viewing. More information on radio stamp collecting is on yahoogroups at radiostamps@yahoogroups.com (RSG)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE ARNEWSLINE SUPPORT FUND REPORT WITH N6TCQ

Ladies and gentlemen, the administrator of the Amateur Radio Newsline support fund, Andy Jarema, N6TCQ:

--
With the holiday season upon us, I need to ask you to add one more name to your gift list. Of course I'm referring to Amateur Radio Newsline.

Without going into a bunch of numbers that will bore you, let's just say that we will end the year with a deficit and it will grow in months to come. That is unless you, the Amateur Radio Newsline listener step up to help.

What we need is immediate support so we can pay the back bills and ongoing support to prevent any back bills. And only you can make it so.

Remember, Amateur Radio Newsline is a federal 501 (C)(3) not for profit orporation and donations to it are tax deductable. This is an excellent way to do some end-of-year "window dressing" on your personal or club's taxable income.

The address is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California. The zipcode is 91066.

If you missed that address don't worry. It will be repeated in the close of this weeks report.

Andy Jarema, N6TCQ

--

Thanks Andy. (ARNewsline Support Fund)

**

EMERGING TECHNOLOGY: BOSTON TV STATION DISRUPTS POLICE SYSTEM

A Boston-area TV station's new 24-hour-a-day digital transmitter is disrupting Camden County New Jersey police communications over 100 miles away. Amateur Radio Newsline's Ken Locke, N8PJN, fills us in:
--
The South Jersey Courier-Post newspaper says that twice last summer, the new digital transmitter used by WCVB in Boston Massachusettes interfered with field communications to Camden County's communications headquarters in the town of Lindenwold. The town's leaders want the problem to go away.

By way of background, WCVB began broadcasting its Federally mandated digital television signal on Channel 20 in 1998. But the problem in the currently shared 506 through 512 megahertz band did not show up in Southern New Jersey until this year. In January WCVB began full time, round-the-clock digital programming. A summertime conditon hams call tropospheric ducting is being tabed as the cause of the interference.

A duct acts kind of like an R-F tunnel from one geographic area to another. This one is putting South Jersey in Boston's back yard and vice versa during the warmer months of the year.

Engineers seem to agree that the police or the television station will have to move frequency. The big question is which one will make the change. New Jersey Congressman Rob Andrews met with county representatives and is now working to arrange a meeting between them and the FCC in Washington. They want the station to move.

But some consultants and communications lawyers feel it will be the county thats told to change frequency. They say that broadcasting is mandated the spectrum on a primay basis.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.
--

The bottom line. This one looks as if it could become a political football for the FCC. (South Jersey Courier-Post , Portland SBE, KB4KCH, others)
**

HAM RADIO IN SPACE: SPACE STATION ACTION PLAN APPROVED

The leaders of the five space agencies that are partners in the International Space Station have approved a new operating plan for the orbital outpost. Meeting in Tokyo Japan, the group has approved. Among the more important items to Amateur Radio is increasing the number of permanent crew members so that research projects can proceed more swiftly. More people on-board the ISS means an increased chance or QSO's.

Right now, with limited crew resources of three Astronauts research takes a back seat to construction aimed at completing the orbital station. By 2006 that number is expected to at least double if a method of emergency evacuation can first be worked out. The current escape vehicle which is mandatory to ISS crew deployment can carry only three. (Adapted from published news reports)

**

INTERNATIONAL - CANADA: ONTARIO SM RE-ELECTED

On the International scene, Radio Amateurs of Canada reports that Robert McKenzie, V-E-3-S-J-Q has been re-elected Section Manage of the Canadian Province of Ontario. His next two-year term begins on March 1st.. McKenzie ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL-CANADA: LICENSING RECORD UPDATE

Records maintained by Industry Canada and Radio Amateurs of Canada show that the Canadian callsign database is becoming corrupted by inaccurate information. Radio Amateurs of Canada says that one of the prime reasons for this is the failure of some Canadian Radio Amateurs to advise the licensing authority of address changes.

The rules in Canada that the holder of an Amateur Radio Operator Certificate shall notify the Department within thirty days with respect to a change of mailing address. Unfortunately, this does not appear to be happening in all cases. (RAC)

**

INTERNATIONAL - SOUTH KOREA: INVESTING IN THE WWW

South Korean telephone companies plan to invest the equivalent of $10.9 billion in U-S dollars in broadband networks by 2005. This, as a growing number of people in that nation demand access to high-speed Internet services.

In making the announcement South Korea's Ministry of Information and Communication did not provide breakdowns of the investment plans. It did note that South Korea boasts having the world's highest Internet penetration with more than one fifth of the population having access to high-speed Internet services. (News release)

**

HAM TESTING - SOUTH AFRICA: ZS EXAM SUCCESS

And talk about high exam scores. The South African Radio League has announced that during the October 2002 Radio Amateur Examinations that four candidates achieved the first place in the test. SARL says that each of these applicants emerged with an average of 99% in the overall exam. (SARL)

**

INTERNATIONAL – UK: FOUNDATION LICENSE PARTY

The United Kingdom plans to celebrate the first year of its new Foundation Class license with a big on-the-air QSO Party. The Foundation License for 'QSO Party' for M-3 prefix licensees and their friends on the 1st of January 2003 from 10:00 and 15:00UTC. Operations will be on 40 meters around 7.070 MHz, plus or minus any QRM. (RSGB)

**

DX

In DX, word of a new station on from the Sudan. His name is Marco. His call sign is ST1MN, and he is reportedly will be active on all of the High Frequency bands through the end of June 2003. (RSGB)

Also, VK8AN will be active as 4W6AN from Dili, East Timor. This, from around the 19th of December through the end of the year. Due to limited notice he will only be running about 15 watts to a dipole or groundplane antenna. QSL only via VK4AAR. (Via e-mail)

**

THAT FINAL ITEM: THAT FINAL ITEM: STAR TREK -- HERE WE COME

And finally this week a story about the ultimate form of communication. About sending yourself electronically to anyplace you might want to go. Bill Pasternak, WA6ITF, has the far out story of science fiction on its way to becoming science fact:

--
As incredible as it may seem, a Star Trek like transporter may be a step closer to reality. This, after physicists in Denmark make two samples of trillions of atoms interact at some distance.

The experiment involved a science called quantum entanglement. This is a mysterious theory of a controlled spiraling of two or more particles without any physical contact. Scientists say that these entangled states are needed for quantum computing and for teleportation.

Before the team at the University of Aarhus made its breakthrough other scientists had successfully developed entangled states of a few atoms. But the scientists in Denmark have now done it with very large numbers.

At the moment nobody is about to teleport anyone, anywhere. But the research, which was reported in the science magazine Nature makes the idea of instantly transporting an object from one place to another less far fetched.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.
--

We know you are waiting for the obvious tag line, so we won’t disappoint you. If all goes well, maybe the term “Beam me up - Scotty” will be reality in our great, great, great grandchildrens lifetime. The only question is whether or not a 5 word per minute code test will be required to “communicate” using that rather exotic mode. (Future Technology)

Amateur Radio Newsline™ Report 1324 – December 27, 2002

Amateur Radio Newsline report number 1324 with a release date of Friday, December 27, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a Southern California gas leak and interference issues are front and center with the FCC. These stories and more come your way on Amateur Radio Newsline report number 1324 beginning right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS RESPOND TO SOCAL GAS LEAK

Ham radio is there to provide communications as a gas leak hits Huntington Beach California. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest:

--
Glorria Morrison, KE6ATG, is the Huntington Beach California Fire Department Emergency Services Coordinator. She was in the process of briefing the new Police Chief, Kenneth Small, on routine procedures on Wednesday, December 11th when the meeting was interrupted by a report of a natural gas leak. Nine fire companies were assigned to the incident. Public Works and Police Department personnel were also sent to the scene.

First order of business -- a near-by 55-unit apartment complex had to be evacuated. Fire Battalion Chief Jacques Pelletier requested that a Care and Reception Center be set up for displaced resident. Huntington Beach RACES was soon activated. It established a net and began logging-in availability of members for the response. 20 RACES made themselves available.

Meanwhile, a call was made to the Community Emergency Response Team Shelter Leader to activate five volunteers for service at the Care and Reception Center location. Tim Sawyer, WD6AWP, acted as net control operator. Huntington Beach RACES Chief Radio Officer Steven Graboff, W6GOS, responded to provide Amateur Radio, cell phone, Red Cross and fire radio communications. Other RACES operators were deployed to the Emergency Operations Center and the Fire Incident Command post at the gas leak scene.

Within 90 minutes the incident was over. The shelter was closed down and the residents went home. No injuries to the firefighters or the RACES volunteers were reported.

For the Amateur Radio Newsline, I'm Bruce Tennant., K6PZW, in Los Angeles.

--

RACES communications was utilized exclusively throughout this event because the city’s cellular telephone system was not working at the time. (KH6WZ)

**

RESCUE RADIO: ARES ASSISTS FOLLOWING MISSISSIPPI TWISTER

The ARRL Letter says that Amateur Radio Emergency Service teams from Jackson and Meridian Mississippi converged on the tiny community of Newton last week. This, to provide emergency communication following a devastating tornado on Thursday, December 19th.

The mid-day twister struck a Wal-Mart filled with holiday shoppers, blowing out the front windows and collapsing part of the roof. The tornado also damaged a furniture factory. According to news accounts, some 70 people were hurt, but no one was killed. Property damage in the town was said to have been widespread, and Governor Ronnie Musgrove has declared a state of emergency in Newton.

According to Mississippi Section Manager Malcolm Keown, W5XX, about a dozen amateurs from the Metro Jackson ARES and the Lauderdale County ARES groups turned out. They took turns supporting relief agencies in Newton which has no ARES organization of its own.

Keown said the ARES teams helped the Red Cross with damage assessment and with shelter communication. Hams also assisted the Salvation Army and the Southern Baptist Men's Kitchen canteen operations as well as making themselves available to local emergency management officials.

In the tornado's immediate aftermath, telephone service and electrical power were out in much of the town of nearly 4000 and in surrounding Newton County. (ARRL)

**
RESCUE RADIO: GUAM SUPERTYPHON - THE AFTERMATH
An update on the recovery effort on Guam following a typhoon that hit the island on December 8th. As reported last week, the giant storm packed sustained winds of 160 miles per hour. It damaged much of the island's infrastructure knocking out electrical power and all telephone service. Now the inhabitants of Guam are slowly digging out. We have this report:
--
By far the best source of what happened during and after the typhoon has been Duncan Campbell, KF6ILA portable KH2. He lives on Guam and survived the storm. He has also been posting regular updates to the QRZ.com website.
Campbell gives a reason why one key Guam station was off the air. He says that on Wednesday December 11th the high frequency ham station on the Naval Station from where he was operating was ordered to shut down because fuel to run generators that supply electricity was running low. The supply of fuel returned to normal on December 17th. Also, water and power is now back on at his home and there is some telephone service but long distance is still spotty, but life is stating to get back to normal.
One thing KF6ILA does not cover in his QRZ.com posts is why most other Guam

based stations have been off the air since the typhoon hit. But news video from the island pretty well covers that. The pictures show that the devastation was very wide spread. Its more than likely that antennas simply got blown away.
As far as medical services Campbell says that a military Field hospital from San Diego has been set up outside of Guam Memorial Hospital. He says its here to relieve the strain on both of Guam's regular hospitals. Both were damaged in the typhoon.
Finally, Campbell says that that he is now back at work and that there is a lot of post typhoon restoration taking place. That added to the times when the high frequency bands are open to the U-S mainland means that he has not been able to keep scheduled contacts.

Reporting from Auckland New Zealand, I'm Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.
--

Another ham on Guam -- Don Palko, N7GZA -- adds to the story. He says that he was with KF6ILA when he was trying to maintain communications with the mainland U-S. He says hat it was Campbell hat brought Guam's one and only 2 meter repeater back on the air. He adds that the American Red Cross is on scene to help with the recovery and they have brought ham radio operators with them. (KF6LIA, N7GZA via QRZ.COM)

ENFORCEMENT: OLD PROBLEM - NEW SOLUTION?

The FCC is using a new diplomacy to deal with an old problem. Its telling a repeater owner that he will be held responsible if an unlicensed individual is relayed over his system. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--
Wayne Curley, WA6NRB, of Montrose, California finds himself receiving an interesting warning letter from the FCC. Curley operates a popular repeater serving the Los Angeles area. It's on that repeater where the Commission alleges that Richard Burton, the former WB6JAC, has been appearing.

Burton and the FCC have a long history. Burton is a former ham who had his license revoked back in 19-81. The following year, he was convicted on four counts of transmitting without a license and two counts of making obscene transmissions.

That conviction got him sentenced to 8 years in a federal prison. But the judge then suspended all but the first six moths. Burton appealed. The Ninth District Court of Appeals threw out his obscenity convictions but let stand the charges of operating without a license. But it doesn't end there.

The Commission says that Burton transmitted without a license while on probation in 1984, 1990 and again in 1992. After a second conviction, he was fined $2000 and received a year's probation. On his third unlicensed operation conviction, he was sentenced to serve 7 months in prison and do a year on probation.

In 1992, Burton decides to try and get his ham license reinstated. The FCC says no. So he waits four years. In 1996, he passes a Technician class exam. Burton is issued the call sign KG6GKS but that license grant is short lived. As soon as the Commission realizes that the new license has gone to Burton, it sets the license aside, putting Burton off the air again, at least as a Commission licensee.

In may of 2,000, another federal grand jury indicts Burton for operating without a license. He's arrested that August. In January of 2001, Burton agrees to serve three months in jail. He does his prison time at a federal detention center near Fort Worth, Texas. Burton is also placed on one year's probation following his release -- and he's ordered to undergo psychological counseling.

Now, the FCC says that Burton is back on the air again, this time, using Wayne Curley's Los Angeles repeater. And it appears that--this time--the FCC has decided to simply give him no place to operate by holding Curley, as repeater operator, responsible for letting Burton's unlicensed signal to be relayed.

On December 4th, the FCC issued a Warning Notice to Curley. The letter reminds Curley that a repeater licensee is responsible for continuing violations of Commission rules. And it tells Curley that enforcement action against him may result if he fails to prevent violations from occurring over his repeater. The FCC says this could include fines, license suspension or even revocation if Curley fails to act.

But the FCC also gives Curley some advice. It tells him he has several options available to prevent recurring and deliberate violations of FCC rules from taking place on his repeater. This includes locking rules violators out...or using access tones...or even limiting the repeater's operation.

But the Commission also adds a warning. If he is not able to do this, the FCC says, Curley must take his repeater off the air.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

As we go to air its not known what enforcement action the FCC might be planning to take directly against the ex-WB6JAC. (FCC with background from ARNewsline and Westlink Radio Archive)

**

ENFORCEMENT: YOU CANT OPERATE - YOU AGREED TO A SUSPENSION

The FCC’s Enforcement Bureau has issued a warning notice to Cornwall Chan, W3CI, of Dresher Pennsylvania regarding operation on a 2 meter repeater back in November. The reason: Chan is not supposed to be on the air.

You may recall that W3CI had forfeited his license back to the Commission for a period of three years. This, in settlement of an earlier enforcement action regarding repeater interference.

Chan is supposed to stay off the air until September of 2003. The FCC says that if he shows up again before that date it will take further enforcement action against him. The FCC adds that in view of the alleged violation of its agreement with Chan that it has now dismissed his request to have his suspension period shortened. (FCC)

**

ENFORCEMENT: SORRY -- THATS NOT REPEATER INTERFERENCE

The FCC says that the signal being heard by another Ohio ham cannot be considered as interference because the ham is listening from far to high of a location. Commission spokesman Daryl Duckworth, NN0W, explains the situation and why the agency declined to get involved:

--
Duckworth: “The complaint of Kim Lozier, N8ZW, of Portsmith Ohio was dismissed. Lozier complained about what he perceived as interference from the KF8HL repeater. Our letter pointed out that Lozier was listening from an 800 foot altitude and that merely hearing another repeater with no disabling interference was sharing -- not interference, and that frequency coordination is not necessarily exclusive use.”

--

In a related matter a petition for reconsideration from the KF8HL repeater group in West Virginia was also dismissed as untimely. That petition had sought reversal of an earlier Enforcement Bureau ruling that KF8HL was an uncoordinated repeater and had the primary responsibility -- but not the sole responsibility to prevent interference to the KC8FKP system located near Portsmith Ohio. (FCC, RAIN)

**

CONVENTIONS AND HAMFESTS: RILEY AT FROSTFEST 2003

The FCC’s chief ham radio rules enforcer, Riley Hollingsworth, K4ZDH, will be the keynote speaker at the Richmond Virginia FrostFest 2003. The FrostFest is February 9, 2003 in Richmond, Virginia. The venue is the Showplace center. For information please visit www.frostfest.com on the World Wide Web. (W4PW)

**

AWARDS: WILL THERE BE A WAS A-M?

Amateur Radio Newsline’s Paul Courson, WA3VJB, reports that the ARRL has promised to consider a proposal for special recognition of full carrier Amplitude Modulation. This, as part of efforts by promoters of the mode to earn the popular Worked All States or WAS award.

The proposal for a WAS AM was jointly developed by Pete Markavage WA2CWA and Mark Bell, K3ZX. League staffers have told the two that the idea will be considered at an ARRL Membership Services Committee meeting in January.

Several stateside hams have indicated they have achieved or are close to achieving WAS AM by working stations on popular AM gathering points on 160, 75 and 40 meters. More information is on the web at www.amwindow.org (WA3VJB)

**

SPECIAL EVENT STATION: A CELEBRATION OF KIDS DAY

Its a special event station to help celebrate one of the most important events in the ham radio calendar. K1D will be on the air through January 5th to celebrate the January 4th Kid's Day operating event. That’s the twice a year outing where hams are encouraged to open their hearts and their stations to youngsters nationwide.

As to K1D, that station is special in several ways. Even the call signs of the people operating are in the spirit of the event -- W1DAD and K1MOM who in real life Peter and Jeanne Schipelliti.

So keep an ear open for K1D and if you work Peter or Jeanne, QSL to 7 Dearborn Ridge Rd, Atkinson, New Hampshire 03811. More on Kids Day is on line at www.arrl.org. (News release)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

NAMES IN THE NEWS: ZL1AMO CONTINUES HIS RECOVERY

I’m Ken Locke, N8PJN, with an update on the recovery of famed D-X’er Ron Wriight, ZL1AMO.

Judy Roush, AA7UC of the International DX Association has some positive news this week. While Wright is still in medical isolation and continues to fight the E-S-B-L infection, he is improving. Intravenous feeding has been discontinued and ZL1AMO is now eating solid food.

Rousch says that Wright is still weak but he is able to communicate. In fact, he’s doing so with his family using a mobile phone. And Roush says that

Wright is anxious to resume his ham radio activities as soon as he has recovered. In fact, he continues to ask the family if they are receiving e-mails from the amateur radio community.

Meantime, the International DX Association reports that the ZL1AMO Air Ambulance Fund is within $5,000 of reaching its $20,000 goal. The fund was started to assist Wright in paying the fee to bring him home from Fiji where he was when he took ill. Funds received so far have been forwarded to the air ambulance account in New Zealand.

For the Amateur Radio Newsline, I’m Ken Locke, N8PJN. (INDEXA)

RADIO LAW: HACKER PHONE FREEKS PALO ALTO

The city of East Palo Alto California is stuck with a thirty thousand dollar telephone bill thanks to an alleged hacker. ATT says that the intruders were able to infiltrate the city's phone system last July. Over a five day period numerous long distance calls were placed to the Philippines.

East Palo Alto's typical monthly phone bill is about ten thousand dollars. In July, it was 40-thousand. ATT offered to reduce the total amount by about $10,000 but said that East Palo Alto was responsible for the rest. The city says it has no intention to pay the additional charges. (Published news report)

**

EMERGING TECHNOLOGY: MORE PEOPLE CARRYING CELLPHONES THAN EVER BEFORE

A survey by a telecommunications firm reports that over half of the overall nations population living in major metropolitan areas now own mobile phones and subscribe to service. This, according to ongoing measurements performed by Telephia Incorporated in 44 markets.

Telephia says that while the average penetration rate was at 51 percent, a handful of cities had penetration rates in excess of 60 percent. Some of the cities mentioned are in Greenville, South Cariolina with 68 percent, Atlanta with 67% and 63 percent in Orlando, Florida.

Telephia adds that recent results from an Attitude and Behavior Survey found the percentage of frequent wireless callers increased from 38 percent last year to 48 percent this year. Also that overall wireless service satisfaction increased significantly over 2002. (Telephia release)

**

INTERNATIONAL-AUSTRALIA: NEW SHORTWAVE CENTER OPENED

A new $6 million dollar radio Voice of International Asia broadcast center has been officially opened on Australia's Sunshine Coast. This, by the man behind the project - multi millionaire Bob Edmiston - of the U-K. The studio originates mainly programming for transmission on shortwave. It uses the former Radio Australia transmitters near Darwin in VK8 and the footprint covers

one-third of the globe. (Q-News)

**

INTERNATIONAL - THE AMERICAS: ANOTHER LOOK AT BROADBAND

Proposed U.S. government policies could harm competition in the broadband Internet and affect international e-commerce. This says the Consumer Federation of America could result in reducing market choices and driving up monthly fees for users who want high-speed Internet access.

The FCC ruled in March that cable providers do not have to share their systems or provide open access for competing Internet services. The agency is currently reassessing its line-sharing rules for local-phone giants like Verizon Communications and SBC. (Published reports)

**

DX

In D-X, five Chillian stations will be active as CE6M from Mocha Island from January 15th to the 18th. They plan to operate 160 through 10 meters on SSB and CW. Q-S-L to P.O.Box 591, Temuco, Chile. (425 DX)

QRZ-DX reports that someone pirated the call sign 9S1X and used it to operate 80 metres on December 13th. No other information is available at this time. (QRZ-DX)

And, W8GEX and WZ8D will be active as N8Z from St. Croix, in the Virgin Islands through January 8th. They will be at the home of WP2Z and will operate on 6 to 160 meters. QSL direct to WZ8D. (GB2RS)

Lastly, Q-News reports that the P29BPL, the six meter beacon in Papua New Guinea is on the air, but with reduced power and a lower antenna location. This is reported to be a preliminary test to make sure there is no interference to TV receivers located nearby. (Q-News)

**

THAT FINAL ITEM: IN MEMORY OF ROGER MC CARTHY KD6CC

And for our last item of the year we have a tribute. A special remembrance of one ham for another. It was our Support Fund Administrator Andy Jarema, N6TCQ, who brought this very special remembrance to our attention. We feel it is fitting that he share it with you as well.

--

Normally when you hear my voice its to ask for donations. Not this time. This time I want to share something with you. Actually, its the note that accompanied a donation that we received last June. It was only a few lines but it really tugged at our hearts. See what it does to yours.

The note came from Rob Sweet, KG6DKW, not far from my home in Arcadia California. Here’s what it said:

“Thank you for providing Amateur Radio Newsline. Enclosed you will find a donation in the amount of $50. I would like to make this donation in memory of Silent Key KD6CC, Roger McCarthy, who was killed in a motorcycle accident on May 31st 2002. I never met Roger in real-life, but enjoyed talking with him on the 2 meter band, and exchanging pictures with him on slow-scan TV.”

How do you respond to a note like that? After you wipe away the tears, what do you say?

We talked about it for several months and finally realized that what you do is to help keep Roger McCarthy’s ham radio spirit alive. That’s what Rob Sweet, KG6DKW, wants to do.

So Roger -- this one is for you. This week we dedicate the final Amateur Radio Newsline report of 2002 to the spirit of the ham radio fellowship that you created while you were here among us.

Like Rob, we never met KD6CC, but we wish we had. He sure sound like the kind of ham radio neighbor any of us would be proud to have living next door. May he rest in peace on the other side of the great Ethereal Abyss and may the light of Amateur Radio friendship that he kindled -- live on in 2003 -- and forever.

In Arcadia California, I’m Andy Jarema, N6TCQ.

--

Thank you Andy.

Over the 14 years I held it while living in Wisconsin, W9WI became my identity. Hams around the world know me by this call. Being forced to change it to AC4XX-something when I moved to Tennessee would be like forcing me to change my name from Doug Smith to Bubba Davis. The idea of getting a 4th-district 2x2 never even crossed my mind.

==========

The issue being discussed is to a considerable degree a result of USA callsign policy. The *only* provisions for temporary calls are for 1x1 calls - K1B, N8O, W2L, etc.. You can't get a 2x1 temporary call appropriate for Alaska/Virgin Islands/Hawaii/etc..

So you have really three choices:
- Use the inappropriate 1x1.
- Arrange to use the call of a ham already resident on the island.
- Sign your mainland call /KP2.

#2 is probably the best idea but if you don't know anyone there, it really isn't an option.

Walt Davidson wrote:
> The worst mistake the FCC ever made was to discontinue the mandatory
> use of call area prefixes to indicate the area from which a station is
> operating.

This decision was probably inevitable when the decision was made back in the 1970s to allow Extra Class licensees to request any unassigned call in their district. People who'd been saddled with bad calls like WB9NME could now get something the other guy had some chance of being able to copy. To then face the prospect of having to switch again - to who knows what - when moving to another district would be nearly unthinkable. (I was on the verge of telling the FCC I'd moved in with my aunt in Boston when they decided to open up vanity calls to Extras in 1977. If they'd not done that, I'd be a WA1 today. Unless they'd assigned me WA1NME in which case I'd have probably given up ham radio<grin>!)

There are plenty of countries in which the callsign doesn't give you any idea of where the station is. (G3NYY: is that Dover, London, Plymouth, or Carlisle?) In others, how many of us have any idea how the assignment works? I know you can tell from a Brazilian call where in the country the guy is, but I have no idea which prefix is where. Likewise for UA9's and UA0's - all I know is UA0Y-something is Tannu Tuva, and I'll bet 95% of HF operators don't even know that. BY, VU, XE, F, DL all have either no call areas, call areas too large to be meaningful, or call areas that nobody outside the country understands. VY0 is larger than most European countries. Is VY0AA in Iqaluit, Qausuittuq, or Ikaluktutiak? (pronounce all three correctly and I'll concede the argument<grin>!)

Even if everyone *does* sign with their call area, how much is accomplished? You need Wyoming badly for WAS; you hear WB7NME calling CQ. Sorry, but it's FAR more likely he's in Seattle than Cheyenne. W0WI - probably in Minnesota. Probably *not* in North Dakota.

How do you handle the growing number of mobiles? People who have a vacation home in a different district? People who've just moved? What good does it do to force me to change from W9WI to KX4XX if tomorrow, K8ABC goes mobiling through the state on his way from Michigan to Florida?

Thanks Joe.....

You are right of course... This is the age of the lost generation that takes what they want. No need to know anything any more, just pay for it and it's yours, and if you can't pay for it or earn it...JUST TAKE IT....

God I'm glad I'm getting old and cynical!

3731. International Call Sign Series and the ARRL DXCC List

Newsgroup: rec.radio.amateur.dx

Source record: 11307

Seems to be some confusion about this.

By International agreement, callsigns used by the world are set by the ITU (not the ARRL or FCC)-- see URL:
http://life.itu.ch/radioclub/rr/ap42.htm

The DXCC list is the ARRL list of entities for award purposes. Includes countries, islands, reefs and whatever else !!!
http://www.arrl.org/awards/dxcc/ For example 3D2 Conway reef is listed as a DXCC entity.
But you won't find 3D2 Conway reef on the ITU List -- it is not a "country" and belongs to the Republic of Fiji. So if you work Conway Reef and then Fiji -- you have 2 DXCC entities.

Further the DXCC list gives mostly "primary" and a few "secondary" prefixes. Example the DXCC list gives PP-PY as Brazil but from the ITU list so does ZVA-ZZZ and you will hear ZZ stations during contests and perhaps special events. So if you work a PY - PP and a ZZ -- you only have one DXCC entity unless you snagged DXCC entities -- Fernando de Noronha, -- St. Peter & St. Paul Rocks or -- Trindade & Martim Vaz Is. The latter usually have PP0 as a way to differentiate.

Another example -- YBA-YHZ Indonesia (Republic of) But also has 7A-7I, 8A-8I, JZ, PK-PO. The DXCC list only gives Indonesia as YB-YH

And you thought P5 was North Korea -- well so is HM as well as P5 thru P9 !!! (P2 thru P4 belong to other countries)

Now try and figure out where 1A0 Sov. Mil. Order of Malta came from -- the DXCC list sez unofficial prefix !! Not on the ITU list, however.

So to weed thru the alphabet soup and prefix mush -- try URL:
http://ac6v.com/prefixes.htm

This with the ARRL DXCC List should clarify what you worked or tried to.

The USA FCC assigns callsigns for US and territories - within the ITU framework. District numbers don't mean much these days. The islands, Alaska, Hawaii, and US territories are somewhat defined. But N8xx could be on Hawaii !!! Hopefully he/she ID's with N8xx/KH6

Then there is Islands On The Air (IOTA) --set by RSGB

Actually, "Via the Buro" is the easiest and least expensive (but not the fastest) way to QSL. Except for the "new-new" and "new-band" cards I need, it's the way I handle all my DX QSL'ing. I just wish we could convince ARRL to allow QSLing to the domestic buro also.

By the bureau means: Lots less trouble and it is of worth
Not addressing umpteen envelopes -- just one box to Connecticut
Not $1.00 to $2.00 or IRC's for return postage for each card -- just 10
cards or less for $1.00 or $4.00 for the first pound of cards or portion
thereof--approximately 75 cards.
A fairly long wait
You must be an ARRL Member to use the OUTGOING Bureau.
http://www.arrl.org/qsl/qslout.html

And the Incoming Bureau does not require ARRL membership.
http://www.arrl.org/qsl/qslin.html
Many of your contacts will send to the "Burro" and you probably have some
there now but you must send them a check so they can set up envelopes and
postage. Sending your address labels will help.

I use the bureau for all "common DX".
Rare or new ones - direct or by manager.
Stateside QSL Managers - yes with an SASE.
I tip all QSL managers - helps with print costs, etc.

Oh yes, it is a horrible situation :-)

During the WAE contest I usually sign my call as W0RLI/7 or W7/W0RLI
so the Europeans will not be confused about where I am located.

Maybe I should do that all the time :-)

I suppose when it comes down to it, it depends on what they're doing on the air.

If he/she just brought a rig to keep skeds with friends back home in Ohio, there really isn't much need to sign /KH6. The people they're working already know where they are. If they're, say, in a contest & trying to generate a pileup, the /KH6 is important - and it'll get sent.

For most of us on the mainland USA, we really don't see the need. Tennessee isn't that much rarer than Illinois, and about equally active with Wisconsin and Indiana - people aren't going to be disappointed to learn I'm not in 9-land, and they're not going to be disappointed they passed me up thinking I *was* in 9-land. I suppose it might be different if you were a W6 living in New York, or a W1 in California, or something like that. Then again, an awful lot of people these days are using the Internet or callsign CDs which remove most of the mystery. (more than a few times, a European I've never worked before says "HI DOUGLAS" and knows I'm in Cheatham County...)

There is one place where I will sign /4. That's on VHF CW/SSB, when I'm working a weak station and am afraid he'll spin his antenna the wrong way if he thinks I'm in Chicago. Problem is, at least 60% of the time he doesn't *hear* the /4 and points up north anyway...

I remember when the FCC started giving out 2X2 KG6 calls to California
hams hearing an exchange to a ham got singled out during a pileup to a
DXpedition in a fairly rare entity: "59 and thanks for the Guam
contact. That's a new country for us".

At least in that case they had to actually have an address in the
"country" at the time the callsign was issued.

Actually I lived in the 7th area for 16 years before getting a "proper"
callsign.

Actually, the Guam calls were KG6xxx 2x3's. KG6xx 2x2 were much better DX,
like Saipan (KG6Sx), Tinian (KG6Tx), Rota (KG6Rx), Iwo Jima (KG6IJ), Chi-chi
Jima (KG6IC), and Marcus Island (KG6IF).

Now who can tell me the difference between a KR6 and a KR8 licensee?.

And what would WB6AA count for in DXCC, circa 1960's?

KR6 was Ryukyu. I don't recall a KR8.

> And what would WB6AA count for in DXCC, circa 1960's?

I'm guessing a Novice on Baker, Canton, Howland or American Phoenix
Island

Correct, but lacks detail.

: KR8 -- Swan Is

Incorrect.

: WB6AA was a Novice call for Canton Island.

Correct. I had a friend who was WB6AC. Rare DX, even back when the
tracking station was there. He called CQ incessantly without answer in the
Novice band, and was immediately bypassed when people heard "WB6....".

Clearly the UK is/was organized differently. The US colonies are all
directly governed by Washington and they have, at least the major ones,
have some degree of congressional representation.
As far as I'm concerned, I live in the USA. The US Immigration officials
at our entry points would seem to agree. If not the USA, then what
country is it???

Zoran, I think you should let it go. There are about 4-5 OM's here who just don't get it. If they're happy to spend two hours on internet after every QSO just to find out who they just worked in contest - so be it. :-)

I would like to wish you all a very happy new year and especially to my friends; Bakir K9R in Kuwait, Heinz K0D in Frankfurt, Yoshi N1T in Yokohama, Bill W6O in South Africa, Wong N7Y in Thailand and not to forget David KBA9TYWER in the USA. (David, congrats on the new vanity call, I guess that old call KBA886TYWMM/65 was real pain in contest)

I'll meet you in the ARRL SSB contest next year, I'll be M3E, QTH Brisbane - East coast of Australia (Just in case you'd require QTH)

Ah, before I forget, I have to announce the next years DX pedition to Heard Island, we'll be using the callsign "VK" (We fought for months to get rid of that "0", can you imagine that, bloody idiots wanted to give as the call VK0 ... unbelievable, too long ...boy oh boy!)

Mike VK .... just VK (Don't tell anyone I'm on Norfolk)

(Zorane, pozdrav - Mirza VK4DX)

When I was in Texas last year I called CQ on 50.525 MHz. But I forgot to add a location to my callsign. The guy in the ham club at some local college was excited until I told him that I was just on the other end of town.....

Back in '94 when I was in Beaverton Oregon, my home packet BBS
was on a machine with the call W0RLI. But I haven't done packet
in years, 1200 baud is dreadfully slow even if the channel is not
busy.

It's not in one of our 50 states, but we still own it. Along with a few
other places like Puerto Rico and Guam. They get 1st Amendment
rights under our constitution and stuff.

Lot of changes to the packet network here since '94.
Many 9600 baud ports all around the Metro area.
Lots of TCP/IP operation.

I moved from West Linn to Parrett Mountain in '97, and retired a couple years
later :-)

Getting back into DXing ... 239 entities since March 1.
Ameritron AL-80BQ arriving shortly, thank you Santa Claus.
Second tower sitting in bits outside the shack, waiting better weather.

Working on a log archiving program. Thus my interest in this thread.

Good to hear from you!

I suspect they "get it" just fine, but have the perspective to understand
that we will fail in any attempt to legislate such a thing, and thus you
should get back on the air even though conditions are terrible, and
work whatever you can hear and perhaps ASK them where they are
located or as you suggest spend 10 or 15 seconds to look up the information
about the callsign sometime later on, because during a contest one knows
where a given callsign is located from the exchange they send or from
the various spots found on the packet cluster and if you can parse this
sentence you probably had as much fun reading it as I had writing it.

And your reference in US law for this statement is...?

>> US regulatory law allows use of a "plain" US call sign in the US
>> Virgin Islands - without a "location indicator" - if that is the
>> call sign assigned to the operator. I was one of those folks who
>> fought long and hard several decades ago to get the FCC to change
>> the rules which formerly required detailed logging as well as such
>> indicators and the words "portable" and "mobile" when operating away
>> from the station's "authorized location", which is another concept
>> that no longer exists in American amateur regulations.
>
>Then you fought for a stupid system to replace a sensible and
>well-ordered one.

In those days, those of us in that group spent several hours a day
commuting in heavy traffic working mobile. Logging was darned near
impossible to do correctly. It was also determined that if the
FCC didn't care - and we made sure that it didn't - it was no one's
business whether we were at our "fixed station location" or elsewhere.

Not every ham is a DX chaser or contester....in fact I would
venture to say that the majority of US hams are neither.

>> In the U S of A, what is not required by the rules cannot be
>> required - it's optional on the part of the operator. I choose not to
>> use it.
>
>I am not disputing that you are entitled to act in this way. You have
>that prerogative. It serves to demonstrate how stupid you are!

And your professional experience in radio regulation is...?

>The worst mistake the FCC ever made was to discontinue the mandatory
>use of call area prefixes to indicate the area from which a station is
>operating.

If that was "The worst mistake the FCC ever made" you have a lot to learn about communications regulation in the USA. How long have you been involved in FCC matters professionally?

We Yanks learned that the way to keep "colonies" close is to make
them part of the US of A whether they are called that or not, and
give them all sorts of perks.

OTOH, you Brits went the other way in the latter half of the 18th
century and we all know how THAT turned out.

Zounds! there's an idea. 8^)

People are much more mobile than they were at one time. There are some
who would probably have to change callsigns on a yearly basis if we
followed the old rules.

There are aso a lot more hams now. Some places would end up
with interesting callsigns being assigned, while others would loaf
along.

If dx hunters are "owed" a specific callsign identity for the
location of the person they are hunting for, perhaps we should get
more specific for the county hunters, and everyone's callsign be
county specific. This would be a great help for them.

Indeed!

CQ Zones, IARU Zones, Counties, WAE countries, States / Provinces /
Prefectures / Oblasts / Cantons / Etc. ... grid squares (VUCC award),
telephone area codes, zip codes (WAZ anyone?).

So I figure it is best to just work on my WAS (Worked All Stations)
and WAC (Worked All Callsigns) awards :-) The rest will follow ...

You're getting down to semantic differences between "United States" as a concept and "United States" as the name of a country.

True enough, the U.S. Virgin Islands (don't forget, someone else owns the other half<grin>) are not a state - are not part of the united states of America. (lower case intentional) They are, however, under the jurisdiction of the Washington government - they are part of a nation that calls itself the United States of America.

I can think of several other areas that are under control of a large central government but not necessarily on the same terms as the rest of that country. VK8 is not a state, but nobody would claim it isn't part of Australia. VE8/VY1/VY0 aren't provinces but are most assuredly part of Canada.

The *people* of the U.S. overseas possessions are certainly USA citizens. Unlike those of most U.K. overseas possessions, Puerto Ricans/USVI citizens/etc. have full U.S. citizenship and the right to move to the mainland.

Good grief, Walt. Unfortunately, you're going to have trouble
getting people to agree with your definition.

By that definition, Pennsylvania isn't part of the USA
because it is a "commonwealth". How does that fit in with your theory?

I don't know anyone so computer/internet illiterate that it would take them two hours to find out the call sign info. Two seconds is more realistic (if one has the internet pulled up already).

And even faster is a callsign directory that can be resident
on your computer. Granted, they have to be updated every so often, but
even operating PSK-31, I can look up the callsign during a persons CQ,
and have their name and QTH in my log before I answer them. I'm
surprised anyone finds a problem here.

Since I live here, I'll speak for PR as an example. There is a segment of independentistas here (about 4% at voting time) that also insist that Puerto Rico is not part of the US. Their claim is that the official political status of "Associated Free State" granted in 1952 by the US Congress is the workable equivalent to independence. (but oh!, there's the 'state' word if the argument is to be based solely on words and titles!) However, this nut fringe has attempted things like National passports and has been soundly rounded off by both the local government and the folks in Washington who will very clearly tell you that PR is indeed part of the US and must play by US rules. Most of our Federal entities (like the courts for example) are part of the hierachy of the NY/NJ district.
What Walt doesn't realize is that the American colonies are organized much different than the British ones. No visas or work permits are required of residents that might travel between the mainland and/or between the various entities. Our 'colonial' passports are the same as the mainland...not always so in the case of the UK 'colonies'.
So, if the local government says so, and the Feds say so, and the zillions of court cases disputing pro or con being 'part of the US" have all agreed...I think Walt might be wrong.

from Luxembourg

A question :
Does it exist an US award dedicated to counties inspired by native indian
names ? (like there is a CQ country award) ?

Have you some information (URL, address) ?

Thanks

Thierry

or the state of alaska or hawaii for that matter.

```
you know, the basic problem here is that the ARRL has designated all these
different types of things as 'countries' for their DXCC award and lots of
hams believe them. just because someone convinced a committee that
something warrented being called a 'country' for DXCC doesn't make it so.
there are many islands that are called countries only because they are some
arbitrary distance from somewhere else, or are run by a different department
within the U.S. government... but the fcc has jurisdiction over all of them
and as long as they do none of us are required to sign any kind of portable
designator under the present rules. the ARRL confuses things even more by
counting some of them as states in some contests and awards and then as
countries in others... and then lumps some of them together into sections
for other things.
```

The ARRL DXCC award is for working ENTITIES not COUNTRIES.
Many entities are also countries, but many are not.

See also the WAE "countries" list, which includes Bear Island
apart from Svalbard for example, but both count the same for DXCC.

So it is really quite simple: the entity (confusion intended) that runs the
contest or gives the award gets to set the rules any way they like.

So follow the simple rule of "Hear 'em, Work 'em, Sort 'em out later."

Recently spent a good deal of time untangling all my Pacific Island
cards going back to 1953. What a mess. Seems like there were several
reshufflings of prefixes between then and now.

> And I goofed Swan Island was KS4 and there is quite a story about this
> little place at URL:
> http://www.qsl.net/sidxa/history.html

I have in front of me three QSL cards from KS4.
One is from Swan Island, one from Serrana Bank, and one from North Carolina.

There is also this card from 1Z4NG, Nohrday Island circa 1970 ...
Picture on the card shows it off the Pacific coast of Central America
with FO8 to the north and TI9 to the south :-)

Which is essentially why the ARRL changed the term "country" to
"entity" in the DXCC rules (but let's not start that thread again).

You obviously did not have the U S Civics class in 6th Grade under
Mrs. J.C. Sandberg where the above statement would not be tolerated.

Walt, stick to British civics stuff of which few folks in the US are
knowledgeable, and leave the US civics stuff to those of us here who
do know how our country is soldered together..

>
>How long have you?

Just about forty years.

Three years as a regulatory engineer on the staff of the Israeli
Ministry of Communications (I was 4X4UQ in those days) where I was
the liaison with the FCC and ITU.

Twenty-eight years on the staff of the FCC doing both engineering
and legal enforcement and policy work - retired as District Director
of the San Francisco District.

Eight years as a communications attorney dealing exclusively in FCC
regulatory matters for amateur radio and public safety licemsees.

Keeps me off the dole, and permits me to enjoy ham radio daily.

Oh, really?

Perhaps you need to rush over to their web site and send the governor an
e-mail advising him. Here's their web site: http://www.usvi.org/

Now here's a really strange coincidence: The "chief of state" of the US
Virgin Islands is President George W. BUSH, with Vice President Richard B.
CHENEY. Do you suppose these two -- Bush and Cheney -- are related to US
President and Vice-President of the same names? Consult:
http://www.cia.gov/cia/publications/factbook/geos/vq.html

And while you are at it, tell these folks that they are in no way associated
with Great Britian:

We don't even CARE what you believe! The scenario that Jim Hampton and
others describe happens pretty often. Hams often know the original holders
of callsigns and the sounds of their

voices--even if they have been inactive for years. It just isn't easy to bootleg a call and get away with it. I've pinpointed unlicensed operators with the most unsophistocated equipment and, then again, I have access to some pretty darned accurate Doppler DF equipment that is used by USAF to locate downed aircraft. With that, I can drive right up to YOUR front door and say with 99.99% accuracy that the offending signal is originating from your residence if, indeed, it is.
We (USAF Auxiliary) have even determined that an ELT (emergency locator transmitter) is moving
down the highway, have isolated it, and stopped the offending UPS truck that was shipping/carrying
the accidentally activated unit to get it turned off.

You are trolling, of course, and are incredibly stupid if you truly believe that you would not be punished for operating an unlicensed ham station. But then, that is the reason that I see CB antennas on run-down houses with chipped bricks and plywood in the windows, and the requisite
'74 Buick with flapping fenders in the yard. Oh, there's that bad smell that seems to permeate the
entire area..... You stereotype hams as ALL old men, but CB has its stereo-
types as well. Me? I'd rather be stereotyped as an old man (I'm not) who made a good living in the railroad industry than as a bad-smelling, rotten-toothed cotton mill hand that never got much above minimum wage. At least, I can afford a decent radio shack. Go to Google Search and type in W4CLM. Click on the web address that it gives you. You will be taken to a website of a lady
whose radio SHACK is worth more than most Southern CBers entire houses!! The shelves upon
which her equipment resides are CUSTOM OAK built-ins and cost over $20,000. The equipment
adds another $40,000---and I'm just guessing~!!!!!!!!!
.....then there's her husband's model train room!!!!! So you see, those stereotypes can be promoted and/or defended against.

There are well-educated CB operators, operators that live in $150,000 houses--and there are those who live as described above. Everytime I have DFed a bootleg operator, it led me into one of those poor neighborhoods with the dreadful stench. Like Rabbit Ears in Fla who is serving time
for such misdeeds, it is those hopeless, dead-end job losers that have ONLY a CB "reddio" and a
6-pack of beer to look forward to that usually get themselves into trouble because of an inflated sense of self-worth and bravado that somehow gets magnified by his looking down into a mike that doesn't reflect who or what he is talking to..

Honestly, it has been tried many times (the bootlegging calls), and it doesn't work. They DO get caught and, yes, it is because the hams simply do not put up with shenanigans as are tolerated on CB.

Very simple in morse.... KC8***/call district. On voice modes, callsign and the two words "mobile" and the number of the call district you are in. Ex: KC8PMX/4 or KC8PMX mobile 4. Short, sweet and gets the point across.

Why on Earth you Americans always take for granted that all hams
worldwide have computer and internet right next to their radio?
I am sure that at any given time, of all amateurs currently opearting on
HF bands not more than 10% are connected to internet. And many many have
not internet access at all.

If I am in the contest and I hear station K2G CQing, if I am multiplier
station I'll just walk over him, just another USA - Zone 5, no thanks I
have it. And poor guy is on Guam, a new multiplier indeed. How would I
know ? Internet ? Give me a break.

The other point, I'm located in XE, K2G as I would assume being NY or NJ
state station would be some 30ï¿½ (NE) the real K2G is on Guam, some 100ï¿½
to the left of NY state.

Well now the cat is out of the bag!!

I was wondering what had your panties in a bunch and now I see,
The evil Foundation License. I was at Donington Park when the
Foundation License was announced and it was received very well
by most of the UK hams present. The only folks who were virulently
opposed to the concept were the code freaks and the fossils.

I had a chat with the President of the RSGB and the RA about the new
structure and its potential as a tool to recruit new hams. It is too
bad that people like Walt (I'm not sure if he is a code freak, fossil
or both) can't see the potential. Naturally not everyone who comes
in via the Foundation program is going to be interested enough to
become a real contributor but some will. What you do have with the
Foundation License program is an opportunity to work with a new
group of people and sell amateur radio. Of course you actually
have to drag your sorry butt away from you latest bitch session
on the Internet to do this.

Since I was in the UK for an extended stay I worked several
of the Foundation camps. I showed the participants could be done
with my FT-817. I demonstrated why learning CW is beneficial
by breaking a pile-up with 5 watts. As the old saying goes:
People are a lot like mules--much easier to lead from the front
than push from behind. You might think about this.

Mike, we don't. When operating any event where our location is a
multiplier, we sign portable. For example, on Guam, I would sign
"N0iMD portable KH2."

For everyday use from Ohio, I don't sign, "portable 8," and am guilty
as charged.

>And poor guy is on Guam........

The 'poor guy' using K2G for a contest in Guam deserves to be ignored.
If he's using K2G, he specifically asked for K2G. And if he asked for
K2G for a contest in Guam, he doesn't know much about contesting.

K2G is a 'special' call sign that should be used by the Girl Scouts in
New Jersey, not a contester in Guam. I doubt the intentions of the
three letter calls were to provide people with short calls for CQWW.

The call sign dilema currently being discussed is a result of the
Zero/Hero syndrome we have developed in amateur radio. Nobody
wants to be a zero. Everybody wants to be a hero. Thats why we
sign our email:

K0HAM, ex 9M2HAM, ex E21HAM, bla bla bla....... which in hamspeak
says:

I am now a Zero, but don't forget, I used to be a Hero........

The Zero/Hero system is a direct result of the fact that we aren't
interested in talking to other hams anymore, we are only interested in
obtaining post cards for DXCC clicks.

When I talk to you on my radio, I don't care WHO you are, I don't
care how interesting talking to you may be, I don't care if we have
anything in common, and I don't care to learn anything about you.
I only care if I need a post card from WHERE you are........

Anyway, if you intend to use K2G for a contest from Guam, don't
forget that appropriate phonetics would be Kilowatt Two Goomba.

Happy Holidays Walter.

The lack of sales of the printed callbooks support the premise that the majority of hams who care about QSLing and getting awards do have access to computers so can use either a CD ROM callbook or access the Internet. If they don't have one of their own, they spend time at the library or other publicly available facilities using the computers there. You are, of course, aware that the printed callbooks have been discontinued due to lack of sales. The callbooks are only available on CD ROM and even that looks to be phased out as so many people simply access the data online.

It's like anything else in life. At some point, it proves to be necessary to go with the flow like it or not.

No EA callbook on-line that I know of.

You could probably find them in the RAC callbook but that costs money. And the RAC (Flying Horse) callbook is in its last and final edition -- http://www.callbook.com/ Better get one while you can.
I heard sales were down due to freebees on the web (may or may not be true). But the web doesn't even begin to cover the world like the good old RAC since 1920.

For the time being --- post your request here and some one will kindly (maybe) look EA's out of the RAC for you.

Soon you'll have to rely on the world's goverments to put there data bases on the web -- fat chance of that for many of them. Or ask on the air !!!

The USA, Canada, Australia and others have their database on line free. QRZ and Buckmaster cover some -- but by no means even begins to cover the world. Example QRZ lists 529 records for Spain but the ham population of Spain is about 18,000 -- see URL: http://www.buck.com/divisions_by_location.html

Some on line freebee callbooks (all that I know of) at URL:
http://ac6v.com/callbooks.htm#DXCALL

So soon the newsgroup will be flooded with requests for QSL info. And after a coupla years the RAC will be outdated. Perhaps some company will pick up on a world callbook -- we shall see.

DXPeditions, rare DX calls etc might be found at Pathfinder
http://www.qsl.net/pathfinder/WebClient/

By going to the DX packetcluster VHF or telnet you can get some QSL info -- use SH/QSL A61AJ for example. This is from the GOLIST as I understand. Gives DXpeditions, rare DX but not common DX.

I can here it now -- in an on the air QSO -- could you spell GALLUR ZARAGOZA (SPAIN) once again for me.

I bought the RAC for the last 25 years to get good QSL info as well as the GOLIST. Now it looks like maybe the freebee web has cut the RAC off. Tis a real shame.

No EA callbook on-line that I know of.

The obvious answer is send it by the ARRL bureau -- but catch 22 and 23.
Catch 22 -- ya gotta be an ARRL member to send to the ARRL.
OR send to the IARU QSL Bureaus http://www.iaru.org/iaruqsl.html
Catch 23 -- some countries only process cards for members of their national society !!!!
From URL: http://www.arrl.org/qsl/qslout.html

Countries that currently restrict the forwarding of QSL cards to anyone other than members of that country's national radio society include the following:

France
Germany
Hungary
Japan
Monaco
Morrocco
Poland
Portugal
Zambia

==========

You could probably find them in the RAC callbook but that costs money. And the RAC (Flying Horse) callbook is in its last and final edition -- http://www.callbook.com/ Better get one while you can.

DXPeditions, rare DX calls etc might be found at Pathfinder
http://www.qsl.net/pathfinder/WebClient/

By going to the DX packetcluster VHF or telnet you can get some QSL info -- use SH/QSL A61AJ for example. This is from the GOLIST as I understand. Gives DXpeditions, rare DX but not common DX.

I can here it now -- in an on the air QSO -- could you spell GALLUR ZARAGOZA (SPAIN) once again for me.

I bought the RAC for the last 25 years to get good QSL info as well as the GOLIST. Now it looks like maybe the freebee web has cut the RAC off. Tis a real shame.

KR6 KR8, JR6, KA6 Okinawa (Ryukyu)

For Okinawa while under US jurisdiction, the FCC issued U.S. Nationals KR6 calls, and Japanese Nationals had KR8 calls.

May 15, 1972 -- reverting back to Japanese administration, U.S. Nationals have KA prefixes, while the Japanese Nationals got JR6 prefixes.

Swan Island was KS4 Swan Is

One of the most exciting evenings I spent in a bar was in Hong Kong back in 1976 (or was it 77 ?). It was a topless place -- was featured in a James Bond movie.

Anyway, there was a crowd of South Africans, a bunch of Aussies, some Kiwis, and a few stodgy Brits. The fun began when one of the assholes -- excuse me, I meant to say "when one of the Brits" -- announced that they were all part of the same Commonwealth and it was time for a toast to the dear old Queen.

At which point one of the South Africans -- obviously a student of the Rev. Wm. Archibald Spooner -- stood up and toasted the "queer old dean" and announced that the Commonwealth could kiss his South African ass (I did not realize he had his donkey with him).

This led one of the gents from the former American colonies to ask an Aussie why they played football in shorts.

At that point the place erupted into one big family squabble that was finally decided by the appearance of the Hong Kong police.

God, those were good days . . . . then the Chinese commies took over.

Gawd, I remember that but just can't remember !!! Seems like it was some ichi-gawa enclave related to Ryukus (sp).

Silly me, I still light up at KG1s hoping they are Greenland.

As for those zero calls like K0HB, wasn't the zero call area something stolen from the REAL 1-9 hams?

And as for this idiot 1x1 call that some goober requested for his USVI "DXoperation"...a guy that unattuned to DXing. You probably won't hear such a measly guy anyway and its not likely that you'll suffer for missing this contact.

You ignored my last on the WB6XX. I'm going to say that both KR6 and KR8 were Ryukyu (Okinawa) but that the KR8 callsign indicated that the holder was a Japanese citizen of the islands while the KR6's were the Americans. How'd I do?

First of all Peter what makes you think I gives a rat's
ass what you think?

Second of all after having been stalked, threatened at work,
threatened by phone from these internet discussions I have
concluded that only a fool posts his name or call.

You can take my comments any way you want. There are
two kinds of people those who see the glass as half full and
those who see it as half empty. I just wanted to point out the
positive aspects of the Foundation License as well as to
point out that all UK hams do not share Walt's opinions.

Now that I think back on it, I used to post via a program called
"7plus" very small picture files on packet for world wide distribution.
A comet hit Jupiter in 94, and I got many images of that off the Internet.
Many were blurry, so I could shrink the images without losing
visual information. Then they became jpgs a few K large. Then
the 7plus program would split the jpg file into several pieces and
also prepare them to go thru a 7 bit ASCII channel. I'd get lots
of error reports, almost all were identical. Which would lead me
to believe that a machine nearby yours tended to corrupt the
data before it got to most of the rest of the world. I used to
download the posts I just uploaded to be sure they got into
your machine correctly.

And my machine was a 486 running windows3.11, a Kantronics
TNC, a modified Motorola HT220 and a Jpole antenna hanging
on the wall in my apartment.

KC0QYQ

Try working a string of JAs with my callsign, on SSB.
W, L, R are hard to tell apart ...
The zero confuses to a four ...
Still looking for phonetics that work well.
Heard as W4LRI way too often.

3847. ON6DP QSL-Manager Database, 30th December 2002 Update

Newsgroup: rec.radio.amateur.dx
Date: 2002-12-31 09:10:15 UTC
From: DD3KF <noreply@norbert-graf.de>
Message-ID: <aurmtp$9lm9d$1@ID-17085.news.dfncis.de>
Source record: 11223

Norbert Graf, DD3KF, 31st December 2002

Hello everyone,

the 30th December 2002 Update of the ON6DP QSL-Manager Database is ready for download:

http://www.dd3kf.de

Alternative download via:

http://home.nexgo.de/dd3kf/on6dp.htm

If you want to update your e-mail address or unsubscribe the newsletter please click:

http://www.norbert-graf.de/maillist.htm

If you want to contact me please use the e-mail link on my homepage

http://www.dd3kf.de

because the e-mail address used in this mail is a spam trap.

Happy New Year 2003 and best DX!

By the way:
==========

There is a special database service via Packet Radio by PE1IYR:

Which calls are in the database? A call is in the database when the owner has a callsign in an other country then his homeland. E.g. you are going on a holyday/vacation to an other country and you have over there a complete other call then your call at home.

For more information send a Packet-Radio message to

PE1IYR @ PI8GCB.#NH2.NLD.EU

and put

QSLSRV HELP

in the headerline.

The QSRSRV program will wait for your request!

Third of all, what makes you think that we care if you got
stalked, threatened or called on the phone? That sounds
like a personal problem. Sounds like you need a bodyguard.
Or a personality maybe......

No names, no calls, no nuts, no balls.

Hit the bricks Anony Mouse. Nobody cares what you think.

Take your opinions and go hide in the closet.

Hey Jimbo great to see there are still things we can count on
and your being an asshole is one of those things. BTW why do
you still have a Guam call don't you live in Florida now?

Like I said only a fool would publish his name or call, seems you
fit the bill.

How do you characterize your use of the term "bootlegging?"

3851. Old old calls, Strange Calls and Deleted Calls

Newsgroup: rec.radio.amateur.dx
Date: 2002-12-31 16:38:17 UTC
From: AC6V <ac6v@amsat.org>
Message-ID: <ZJjQ9.11281$L61.952785@news1.west.cox.net>
Source record: 11227

Old old old USA call sign history can be found at URL:
http://ac6v.com/history.htm#call
Such as 1AW, 6OI, 2MN. It was not until October 1, 1928, that the W and K prefixes were assigned to USA Amateurs.

Deleted DXCC Entities can be found at URL:
http://ac6v.com/oldprefix.htm#DEL AND
http://www.arrl.org/awards/dxcc/deleted_list.html
Such as I1 Trieste, JZ0 Netherlands N. Guinea, KZ5 Canal Zone

Old/Changed Prefixes can be found at URL: http://ac6v.com/oldprefix.htm#OLD
Such as MX Manchukuo, NY4 Guantanamo Bay, XU China

Current Prefixes can be found at URL: http://ac6v.com/prefixes.htm
Includes (where known) District numbers , VHF licenses, Visitor, special events, and foreign allotments . Includes "secondary" prefixes such as ZZ for Brazil, Indonesia PK-PO, and HM - Democratic People's Republic of North Korea

And the Gospel -- ITU Table of Allocation of International Call Sign Series at URL: http://life.itu.ch/radioclub/rr/ap42.htm

These should help unravel the prefix alphabet soup. (a little anyway)

Then there was TG0FRACAP which I have a QSL card for -- counted for Guatemala

I remember my late friend Len Bauer, WB8LUA working a string of JA's on
10m SSB a couple of decades back. One of them said something like,
"Double-yoo Bee Eight Errr Yoo Ayeee--Preased to meet you, Wren". I
like to picture the fellow sipping tea--probabry Ripton.

I do not and did not claim that you were a bootlegger based upon
violation of DXCC rules. You were a bootlegger because you have no
documentation to support your claim that you had permission to
operate. You have no military or UN issued paperwork? Too bad.

How many or you, or should I say does anyone know the
full story behind U.S. amateur radio operations in Iceland? This
question applies to the "Agreed Area" only. "Agreed Area" is the
term the U.S. and Icelandic governments use when referring to
the NATO base at Keflavik. It is an interesting story and
illustrates how ham radio bickering and envy exists even at the
international level. HINT: The dispute involved call sign
usage.

I know that we used the prefix "KG1" there for a number of years just as we use "KG4" in Cuba, and this was probably written into the SOFA, but beyond that I don't know a "full story".

We had a similar SOFA in Japan which assigned the "KA#" prefixes, and I dimly recall that "KG3xx" was also briefly used by US forces, perhaps in Greenland?

Our SOFA with Germany was different in that it assigned calls which came out of the host country prefix block.
